Robeco Climate Global Credits FHCo EUR

Robeco Climate Global Credits is an actively managed fund that invests mainly in nongovernment bonds all around the world. The selection of these bonds is based on fundamental analysis. Performance drivers ar the top-down beta positioning as well as bottom-up issuer selection. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The fund aims to reduce the carbon footprint of the portfolio and thereby contribute towards the goals of the Paris agreement to keep the maximum global temperature rise well-below 2◦ C. The carbon footprint reduction objective will be aligned with the Solactive Paris Aligned Global Corporate Benchmark. The portfolio is broadly diversified and has the ability to invest off Benchmark in high yield (primarily BB-rated) and Emerging Credits. Performance drivers are the top-down beta positioning as well as bottom-up issuer selection. The fund's objective is also to provide long term capital growth.

Performance

Based on transaction prices, the fund's return was -2.52%.
The Paris-Aligned Global Corporate Index returned -2.38% (hedged to EUR). Credit spreads widened, driven by geopolitical developments. US investment grade widened by 5 bps and EUR investment grade by 15 bps, ending the month at 89 bps and 97 bps, respectively. Government bond yields moved higher, with the 10-year US Treasury rising by 38 bps to 4.32% and the 10-year German Bund increasing by 36 bps to 3.00%. The largest contributor to the total returns were the underlying governments curves bear steepening. Against this backdrop, we continue to prioritize improved liquidity while maintaining additional spread carry versus the index, given ongoing macro volatility. The portfolio delivered a negative performance with a gross total return of -2.44% (hedged to EUR), underperforming versus the benchmark before fees. The contribution from beta positioning was broadly neutral, as portfolio beta remained close to neutral throughout. Underperformance was therefore driven by negative issuer selection, primarily reflecting currency allocation. A continued overweight in euro credit alongside an underweight in US dollar credit detracted from performance within issuer selection.

Market development

March saw the sharpest cross-asset shock since 2022, as US and allied airstrikes on Iran triggered broad repricing across rates, commodities, and credit. Brent surged 63% to approximately USD 118/bbl, reigniting stagflation fears and forcing a reassessment of central bank paths. 10-year US Treasury yields rose 38 bps to 4.32%, their largest monthly move since December 2024, while German Bund yields climbed 36 bps to above 3% for the first time since 2011. Fed cuts were priced out for 2026 and ECB hikes increasingly priced in, creating a challenging duration backdrop. Credit spreads widened but remained resilient given the macro shock. Global IG ended 8 bps higher at 93 bps, while euro IG widened 14 bps to 97 bps, reflecting higher energy sensitivity. Dispersion increased, with energy and infrastructure outperforming, while software weakened and BDC-linked paper widened amid private credit stress. Primary markets remained open, though concessions increased, with heavy hyperscaler and M&A supply weighing on secondary technicals.

Expectation of fund manager

The macro backdrop entering Q2 is shaped by a stagflationary impulse not fully priced in by markets. With Brent near USD 110/bbl, the inflation-growth trade-off has deteriorated sharply, particularly in Europe and Asia where energy dependence is highest. The Fed retains an easing bias but rate cuts are largely priced out for 2026, while the ECB faces a tougher trade-off, with hikes a tail risk if disruption proves persistent. Against this backdrop, credit spreads remain tight and offer limited compensation for a multi-month Hormuz disruption, rising private credit stress, and AI-driven business model pressure in software. We keep portfolio beta close to neutral and do not chase spreads. Alpha is driven by issuer selection: we favor HALO exposures in energy infrastructure, metals, and critical networks, and remain constructive on well-capitalized European banks. We avoid BDCs and private-credit-linked insurers, stay underweight in software in high yield, and prefer BB over B in EM as dispersion widens.

Top 10 largest positions

The most prominent issuer risk positions are a reflection of spread x duration. We consider the requirements of the Paris-aligned benchmark in combination with attractive valuations. These companies already have a low carbon intensity or credible plans to reduce GHG emissions going forward. This helps to meet the two Paris-aligned decarbonization targets of the fund: 1) At least 50% less carbon intensive than the broad market 2) At least 7% year-on-year reduction of the portfolio carbon intensity going forward.

Sector allocation

Sector allocation is mainly driven by issuer selection and beta decisions. In general, we select issuers with a combination of Paris alignment and attractive spread valuations.

Sector allocation		Deviation index
Industrials	39.8%	-13.2%
Financials	32.0%	-5.1%

Currency denomination allocation

Our currency positioning is primarily based on top-down beta positioning and bottom-up positioning, considering regional valuation differences. We seek arbitrage opportunities in currency mismatches from issuers when they arise, reflecting attractive risk-adjusted return profiles. All currency exposure is fully hedged to match the Paris-Aligned Global Investment Grade Corporate Bond Index.

Currency denomination allocation		Deviation index
U.S. Dollar	52.7%	-13.7%
Euro	39.9%	12.0%

The duration of the fund is managed in line with the index.

Duration allocation		Deviation index
U.S. Dollar	4.6	0.0
Euro	1.6	0.3
Pound Sterling	0.3	0.0

Rating allocation

Our positioning over the different rating buckets is the result of beta positioning and issuer selection. Our philosophy focuses on shorter bonds with higher spreads throughout the cycle. Subordinated bank debt can be BB-rated, and the fund is also active in BB-rated rising stars, corporate hybrids and emerging market corporates.

Rating allocation		Deviation index
AAA	10.1%	9.1%
AA	19.3%	12.6%
A	28.3%	-15.7%
BAA	34.2%	-14.0%
BA	4.3%	4.2%
Cash and other instruments	3.7%	3.7%

Subordination allocation

The fund can invest in subordinated debt such as corporate hybrids, and Tier-1 or Tier-2 capital of banks. Positioning in subordinated debt reflects both our beta policy and issuer selection. The relative value versus senior debt is an important factor in the bottom-up issuer and bond selection.

Subordination type allocation		Deviation index
Senior	84.2%	-11.4%
Hybrid	6.6%	5.7%
Tier 2	4.3%	0.8%
Tier 1	1.2%	1.2%

ESG Important information

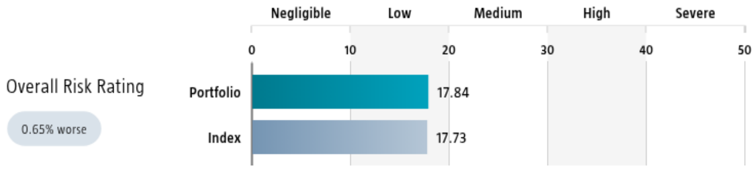
The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

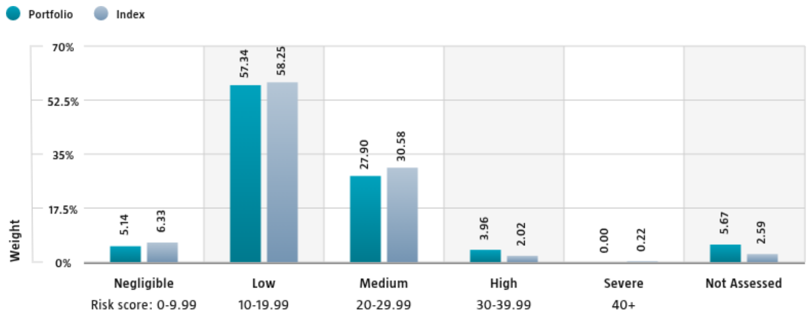
Sustainability

The fund’s sustainable investment objective is to contribute to keeping global temperature rise well-below 2°C by reducing the carbon footprint of the fund. Climate change and sustainability considerations are incorporated in the investment process via exclusions, ESG integration, a minimum allocation to ESG-labeled bonds and a carbon footprint target. The fund does not invest in companies that are in breach of international norms and applies the activity-based exclusions of Article 12 of the EU regulation on Climate Transition Benchmarks, EU Paris-aligned Benchmarks and sustainability-related disclosures for benchmarks as per Robeco’s exclusion policy. ESG factors, including climate change, are integrated in the bottom-up security analysis to assess the decarbonization potential and the impact of financially material ESG risks on the issuer's fundamental credit quality. Furthermore, the fund invests at least 5% in green, social, sustainable, and/or sustainability-linked bonds. In the portfolio construction the fund targets a carbon footprint at least equal to or better than the Solactive Paris Aligned Global Corporate Index. This is to ensure the fund is aligned with the desired decarbonization trajectory of an average 7% year on year.
For more information please visit the sustainability-related disclosures.
The index used for all sustainability visuals is based on Solactive Paris Aligned Global Corporate Index.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.





Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

Portfolio exposure to ESG-Labeled Bonds

Engagement

Robeco distinguishes between three types of engagement.
Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	16.81%	30	121
Environmental	3.61%	7	36
Social	5.07%	4	4
Governance	5.72%	8	17
Sustainable Development Goals	5.33%	11	57
Voting Related	2.40%	7	7
Enhanced	0.00%	0	0

The fund aims to reduce the carbon footprint of the portfolio and thereby contribute towards the goals of the Paris agreement to keep the maximum global temperature rise well-below 2◦ C. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process, applies Robeco's Good Governance policy and applies normative exclusions and activity-based exclusions in line with Article 12 of the EU regulation on Climate Transition Benchmarks, EU Paris-aligned Benchmarks and sustainability-related disclosures for benchmarks.

Key risks

- The value of shares is sensitive to market fluctuations, instrument prices, and changes in political, economic, or market conditions. Corporate bonds are more risky and volatile investments compared to government bonds.
- The fund may use derivatives to achieve its investment objectives. These instruments can create leverage, increasing the fund's exposure to market fluctuations.
- A (derivative) counterparty may fail to fulfil its obligations. Counterparty risk is reduced by exchanging collateral.
- Sustainability risk factors may negatively impact investment returns. This fund has a sustainable investment objective.

Team info

The Robeco Climate Global Credits is managed within Robeco's credit team, which consists of nine portfolio managers and twenty-three credit analysts (of which four financials analysts). The portfolio managers are responsible for the construction and management of the credit portfolios, whereas the analysts cover the team's fundamental research. Our analysts have long term experience in their respective sectors which they cover globally. Each analyst covers both investment grade and high yield, providing them an information advantage and benefiting from inefficiencies that traditionally exist between the two segmented markets. Furthermore, the credit team is supported by dedicated quantitative researchers and fixed income traders. On average, the members of the credit team have an experience in the asset management industry of seventeen years, of which eight years with Robeco.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.

Additional information for investors with residence or seat in Singapore. This document has not been registered with the Monetary Authority of Singapore ("MAS"). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled "Important information for Singapore Investors") contained in the prospectus. Investors should consult their professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled "Important information for Singapore Investors" of the prospectus ("Sub-Funds") are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.
