

Summary document

Robeco Capital Growth Funds - Robeco Sustainable Dynamic Allocation

This financial product promotes environmental or social characteristics, but does not have as its objective sustainable investment.

The Sub-fund has the following E/S characteristics for direct holdings in government bonds:

1. The Sub-fund promotes certain minimal environmental and social standards and therefore applies exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society, such as exposure to controversial behaviour, controversial weapons, and certain fossil fuel-related activities. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom.
2. The Sub-fund promotes investment in countries with minimum average scores on the Robeco Country Sustainability Ranking. The Robeco Country Sustainability Ranking incorporates around 50 ESG factors such as aging, corruption, social unrest, political risks and environmental risks.
3. The Sub-fund promotes investment in countries with policies and institutional frameworks to prevent and combat corruption.
4. The Sub-fund limits investments in countries that do the most harm to peaceful and inclusive societies for sustainable development.

The Sub-fund has the following E/S characteristics for direct holdings in corporate investments, i.e. equity or bonds:

1. The Sub-fund applies certain exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society, such as exposure to controversial behaviour, controversial weapons, and certain fossil fuel-related activities.
2. The Sub-fund promotes investments in companies that have a better score than -2 on the internally developed SDG Framework.
3. The Sub-fund promotes adherence to the exclusion criteria from the Paris-aligned Benchmarks (PAB) rules such as exposure to controversial behavior, controversial weapons, and certain fossil fuel-related activities. Therefore, the Sub-fund excludes investments in companies referred to in Article 12(1)(a) to (g) of the Regulation on EU Climate Benchmarks.
4. The Sub-fund promotes good governance and sustainable corporate practices through proxy voting, which contributes to long-term shareholder value creation. This includes taking an active stance on social and environmental topics through Robeco's proxy voting policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

Investment Strategy

Robeco Sustainable Dynamic Allocation is an actively managed global multi asset fund. The Sub-fund's objective is to achieve a better return than the index. The Sub-fund has a relatively high risk profile and uses asset allocation strategies mainly investing directly in equities and taking exposure to other asset classes such as, but not exclusively, bonds, deposits and money market instruments. The strategy integrates sustainability indicators on a continuous basis as part of the direct line investments or underlying fund due diligence process. Amongst others, the Sub-fund applies norms-based and activitybased exclusions, Robeco's good governance policy, Robeco's SDG framework and considers Principal Adverse Impacts in the investment process, and considers those elements in the due diligence of external funds. More product-specific information can be found on our website and the links provided in the final question of this disclosure.

Benchmark

Not applicable.

Planned asset allocation

The product plans to make a minimum amount of 50 sustainable investments. All investments are aligned with the E/S characteristics, with the exception of investments in the category "other" which are mostly cash and cash equivalents.

Monitoring and due diligence

Robeco has incorporated the sustainability aspects of the investment strategies into adequate investment due diligence processes and procedures for the selection and monitoring of investments, amongst others taking into account Robeco's risk appetite and sustainability risk management policies. Portfolio managers and analysts are primarily responsible for conducting investment due diligence on their strategies on a daily basis. They are supported by independent monitoring, performed by the Financial Risk Management and Investment Restrictions departments.

Data sources, methodologies and limitations

The product uses several sources for gathering sustainability data. Robeco scrutinises the data quality of each provider during due diligence assessments, that includes reviewing the data model, performing statistical checks and evaluating coverage. Data processing takes place in different forms, the preference is always to have data acquisition as automated as possible to avoid any operational risks or unnecessary human intervention.

Robeco maintains comprehensive methodology documents of our proprietary analytical frameworks on our website. In addition, for some social and environmental characteristics, Robeco relies on externally sourced content for which we aim to select the best of breed vendor for each of our target characteristics. The primary limitation to the methodology or data source is the lack of corporate disclosure. Like many other financial market participants, we struggle to find adequate information on the principal adverse indicators. To overcome this issue, Robeco has resorted to using multiple data providers, since each has its own respective strengths and weaknesses.

Engagement strategy

The holdings of the fund are subject indirectly, via the fund-of-fund or direct line investments, to Robeco's enhanced engagement program, that focuses on companies that severely breach minimum standards which Robeco has set out in terms of corporate behavior, climate and biodiversity. In evaluating corporate behavior, we expect companies to comply with internationally accepted codes of conduct for corporate governance, social responsibility, the environment and transparency such as the UN Global Compact and OECD Guidelines for Multinational Enterprises. In the areas of climate change and biodiversity, we expect companies to make sufficient progress against Robeco's climate traffic light score or against the RSPO certification, respectively. The process for enhanced engagement theme selection is a formal part of our exclusion policy. Enhanced Engagement program includes the themes 'Global controversy', 'Acceleration to Paris', and 'Palm oil'.

In addition the holdings of the fund are subject indirectly, via the fund-of-fund or direct line investments, to the selection process of Robeco's value engagement program, that consists of a constructive dialogue between investors and investee companies to discuss how they manage ESG risks and opportunities, as well as stakeholder impact. Although this type of engagement is not directly related to the environmental or social investment strategy of the fund, it can be that adverse sustainability impacts are addressed via the value engagement program.
