Robeco Institutional Asset Management B.V.

About the fund

Robeco Smart Energy is an actively managed fund that invests globally in companies active in clean energy production, energy infrastructure and management, as well as solutions that improve energy efficiency for sectors such as industrials, buildings, transportation or data centers. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The fund's objective is also to achieve a better return than the Benchmark. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si.

Performance commentary

Based on transaction prices, the fund's return was -0.58%.

Outperformance in the Energy Efficiency cluster was led by Big Data, as AI-linked stocks regained market leadership. Asia Vital Components, Lumentum and Marvell benefited from continued strength in AI infrastructure spending, while Autodesk supported gains as demand for vertical software remained resilient. Transportation lagged, as weaker EV demand in China weighed on BYD and Shuanghuan Driveline. Energy Distribution also contributed positively, driven by equipment suppliers exposed to grid investment and data center power demand. HD Hyundai Electric and SWCC performed strongly on robust transformer and optical networking demand, while SSE benefited from investor preference for defensive, regulated growth businesses. Renewable Energies underperformed as rising bond yields pressured renewable power producers. Vestas was a bright spot following strong results and improving profitability, while Fervo Energy, Sunrun and Sungrow detracted. Energy Management was the weakest cluster. Power semiconductor stocks faced profit-taking despite generally solid earnings.

Market development

Global equities rebounded in August, recovering much of July's weakness as strong corporate earnings, particularly from AI-related companies, outweighed concerns over rising bond yields and geopolitical tensions. Long-term government bond yields moved higher across the US, Europe and Japan, as investors focused on fiscal deficits, growing financing needs and continued government debt issuance. The AI investment cycle remained a key market driver. NVIDIA's strong results reinforced confidence in sustained demand for data centers, computing power and energy infrastructure, supporting positive earnings momentum across the technology sector. Regionally, US equities led gains, driven by technology and AI beneficiaries. Asian markets recovered, supported by semiconductor demand and improved risk appetite, with Japan, South Korea and Taiwan outperforming.

Expectation of fund manager

Markets remain in a consolidation phase as investors balance geopolitical tensions, higher energy prices and rising bond yields against resilient corporate fundamentals. Attention is increasingly shifting toward AI monetization and the sustainability of elevated capital spending. Encouragingly, earnings continue to support our investment thesis, with robust demand for electric infrastructure, a broadening cyclical recovery and growing evidence that AI investments are creating tangible value. Improving manufacturing activity and a recovery in construction markets further strengthen the outlook. At the same time, rising power demand continues to reinforce the need for electrification, grid expansion and clean energy investment. While geopolitical and policy risks remain, we believe the long-term fundamentals supporting our investment theme remain firmly intact.

Top 10 largest holdings

Infineon is the largest semiconductor company in Automotive and has a market leading power semiconductor portfolio, part of the Semiconductor Power Management subcluster; Marvell is specialized in semi-customized networking, storage and data center solutions for power-efficient data processing, part of the Big Data subcluster; Asia Vital is a leader in liquid cooling for AI servers, part of the Big Data subcluster; Delta Electronics is a global power-electronics and energy-efficiency solutions provider, part of the Energy Efficiency Industrial Processes subcluster. Zhongji Innolight is a leading optical transceivers player, part of the Big Data subcluster.

Sector allocation

The fund invests in companies exposed to the structural growth trends of the Smart Energy theme. As a consequence, the portfolio is particularly invested in companies in the sector technology, followed by industrials and utilities.

Regional allocation

The fund invests globally. Most exposure is in North American stocks, followed by Asia-Pacific and European stocks.

Currency allocation

The portfolio itself does not use currency hedges. This means that for an unhedged share class, the currency allocation is a reflection of the investments of the portfolio. For a hedged share class, the currency allocation is the result of the currency hedge.

Past performance is no guarantee of future results. The value of your investments may fluctuate.

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website. The figures shown in the sustainability visuals are calculated on subfund level.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund furthers the decarbonization of the global energy sector through investments in clean energy sources, energy efficient products and infrastructure and by the electrification of the industrial, transportation and heating sectors. This is done by investing in companies that advance the following UN Sustainable Development Goals (UN SDGs): Affordable and Clean Energy goal, Decent work and economic growth, Industry, innovation and infrastructure, Sustainable cities and communities, and Climate action. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to normative, activity-based and region-based exclusions, carbon reduction target and proxy voting.

To the extent that this document includes an ESG rating based on Robeco's proprietary frameworks, reference is made to the following webpage, which provides further information on the development and underlying methodology of this rating: [Sustaina... policies and positions | Robeco Global](#)

Reference

1. SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. Only holdings mapped as corporates are included in the figures.

2. Sustainalytics ESG Risk Rating

The chart displays the portfolio's Sustainalytics ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Only holdings mapped as corporates are included in the figures.

3. Exclusions

The charts display the degree of adherence to exclusion applied by Robeco. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Source: Robeco. We use several data input sources such as Sustainalytics, RSPO (Roundtable on Sustainable Palm Oil), World Bank, Freedom House, Fund for Peace and International Sanctions. Policy document available: [Exclusion Policy](#)

4. Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. The equivalent factors that are used for comparison between the portfolio and index (where applicable) represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

S&P Global Market Intelligence data © Trucost 2026. All rights in the Trucost data and reports vest in Trucost and/or its licensors. Neither S&P Global Market Intelligence, nor its affiliates, nor its licensors accept any liability for any errors, omissions or interruptions in the Trucost data and/or reports. No further distribution of the Data and/or Reports is permitted without S&P Global Market Intelligence's express written consent. Reproduction of any information, data or material, including ratings is prohibited. The content is not a recommendation to buy, sell or hold such investment or security, nor does it address suitability of an investment or security and should not be relied on as investment advice.

5. Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

Robeco Smart Energy F CHF

Risk management

Risk management is fully integrated in the investment process to ensure that positions always meet predefined guidelines.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.

Dividend policy

In principle the fund does not intend to distribute dividend and so both the income earned by the fund and its overall performance are reflected in its share price.

Registered in

Austria, Germany, Liechtenstein, Netherlands, Singapore, Switzerland, United Kingdom

Currency policy

The fund can engage in currency hedging transactions. Typically currency hedging is not applied.

Additional information for investors with residence or seat in Singapore This document has not been registered with the Monetary Authority of Singapore ("MAS"). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled "Important information for Singapore Investors") contained in the prospectus. Investors should consult their professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled "Important information for Singapore Investors" of the prospectus ("Sub-Funds") are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.
