

Robeco QI European Value Equities I EUR

Robeco QI European Value Equities is an actively managed fund that invests in stocks in European countries. The selection of these stocks is based on a quantitative model. The fund's objective is to achieve a better return than the index. The fund invests in stocks with a low price to fundamentals. The fund's long-term aim is to harvest the value premium by selecting the most attractive value stocks. The selection of these value stocks is carried out using a quantitative model, which ranks stocks in a variety of ways, including valuation criteria, solid earnings potential, low risk and momentum.

Jan Sytze Mosselaar, Daniel Haesen, Wouter Tilgenkamp, Koen Rijnen, Maarten Polfliet, Pim van Vliet
Fund manager since 25-09-2018

Performance

	Fund	Index
1 m	1.46%	0.91%
3 m	4.65%	5.14%
Ytd	25.64%	16.28%
1 Year	25.83%	15.71%
2 Years	18.74%	14.43%
3 Years	14.68%	12.17%
5 Years	14.59%	11.14%
Since 09-2018	9.40%	8.49%

Annualized (for periods longer than one year)

Note: due to a difference in measurement period between the fund and the index, performance differences may arise. For further info, see last page.

Past performance is no guarantee of future results. The value of your investments may fluctuate. If the currency in which the past performance is displayed differs from the currency of the country in which you reside, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency. Performance since inception is as of the first full month. Periods shorter than one year are not annualized. Returns net of fees, based on transaction prices.

Rolling 12 month returns

	Fund
12-2024 - 11-2025	25.83%
12-2023 - 11-2024	12.06%
12-2022 - 11-2023	6.98%
12-2021 - 11-2022	1.74%
12-2020 - 11-2021	28.73%

Initial charges or eventual custody charges which intermediaries might apply are not included.

Index

General facts

Morningstar	★★★★★
Type of fund	

Top 10 largest positions

The top ten positions are primarily the result of the fact that these companies have a low price relative to fundamentals, combined with attractive upside potential.

Fund price

30-11-25	EUR	190.72
High Ytd (13-11-25)	EUR	191.76
Low Ytd (09-04-25)	EUR	146.84

Fees

Management fee	0.55%
Performance fee	None
Service fee	0.12%

Legal status

Investment company with variable capital incorporated under Luxembourg law (SICAV)

Issue structure	Open-end
UCITS V	Yes
Share class	I EUR
This fund is a subfund of Robeco Capital Growth Funds, SICAV	

Registered in

Luxembourg, Netherlands, United Kingdom

Currency policy

Currency risk will not be hedged. Exchange-rate fluctuations will therefore directly affect the fund's share price.

Risk management

Risk management is fully integrated in the investment process to ensure that positions always meet predefined guidelines.

Dividend policy

The fund does not distribute dividend. The fund retains any income that is earned, and so its entire performance is reflected in its share price.

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund systematically incorporates sustainability in the investment process via exclusions, ESG integration, ESG and environmental footprint targets, and engagement. The fund does not invest in stocks issued by companies that are in breach of international norms or where its activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the portfolio construction to ensure the ESG score of the portfolio is better than that of the index. In addition, the environmental footprints of the fund are made lower than that of the benchmark by restricting the GHG emissions, water use and waste generation. With these portfolio construction rules, stocks issued by companies with better ESG scores or environmental footprints are more likely to be included in the portfolio while stocks issued by companies with worse ESG scores or environmental footprints are more likely to be divested from the portfolio. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on MSCI Europe Index (Net Return, EUR).

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco’s SDG Framework. The framework utilizes a three-step approach to assess a company’s impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company’s SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	22.85%	20	87
Environmental	8.01%	8	35
Social	1.20%	1	2
Governance	5.72%	6	27
Sustainable Development Goals	8.19%	6	22
Voting Related	1.04%	1	1
Enhanced	0.00%	0	0

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy

Robeco QI European Value Equities is an actively managed fund that invests in stocks in European countries. The selection of these stocks is based on a quantitative model. The fund's objective is to achieve a better return than the index. The fund invests in stocks with a low price to fundamentals. The fund's long-term aim is to harvest the value premium by selecting the most attractive value stocks. The selection of these value stocks is carried out using a quantitative model, which ranks stocks in a variety of ways, including valuation criteria, solid earnings potential, low risk and momentum. The fund aims for a better sustainability profile compared to the Benchmark by promoting E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrating sustainability risks in the investment process and applying Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to; normative, activity-based and region-based exclusions, and engagement.

Fund manager's CV

Jan Sytze Mosselaar is Portfolio Manager Quantitative Equities. He is responsible for quant equity strategies and specializes in quantitative stock selection as well as portfolio and market analysis. Jan Sytze is the author of 'A Concise Financial History of Europe', published by Robeco. He started his career in 2004 at Robeco and worked for ten years as a multi-asset portfolio manager, responsible for multi-asset funds, quant allocation funds and fiduciary pension mandates. He holds a Master's in Business Economics with a specialization in Finance & Investments from the University of Groningen. He is a CFA® Charterholder. Daniel Haesen is Portfolio Manager Quantitative Equities. He specializes in factor research and portfolio management. Daniel joined Robeco in 2003 as a quantitative researcher, with a specific focus on quant selection research, working on both equity and corporate bond multi-factor selection models. He was also responsible for quantitative sustainability and quantitative allocation research. He has published in several academic journals, including the Journal of Banking and Finance. He holds a Master's degree in Econometrics and Quantitative Finance from Tilburg University in the Netherlands and is a CFA® Charterholder. Wouter Tilgenkamp is Portfolio Manager Quantitative Equities. Wouter joined Robeco in 2016 as a Data Scientist. He started his financial career in 2014 as Derivative Trader at Optiver. He holds a Bachelor of Science in Applied Mathematics from Technical University of Delft and a Master's in Quantitative Finance from Erasmus University Rotterdam.
