Performance

Based on transaction prices, the fund's return was 0.67%.
The Robeco New World Financials Fund underperformed its benchmark in November, despite superior long-term returns and a confirmed Bronze Morningstar rating. Aging and Emerging Finance contributed positively, while Digital Finance companies such as Coinbase were the largest detractors.

Market development

The global financials sector outperformed the flat benchmark in November, rising significantly. A strong earnings season and positive revisions highlighted the sector's favorable standing. Management focused on operational delivery and self-help levers to navigate lingering uncertainties.

Expectation of fund manager

As we are in 2025H2, equity markets remain closely tied to global liquidity and central bank policies, with bond yields signaling a new inflationary regime. Post-pandemic stimulus and geopolitical risks have raised structural inflation, benefiting financials amid regulatory easing. The US dollar's weakness favors non-US assets, while Aging Finance benefits from shifting retirement burdens and growth in alternatives. Emerging markets show resilience despite policy uncertainties. FinTech innovation, AI adoption, and digital wallets drive digital finance growth, presenting significant investment opportunities in 2025.

Sector allocation

The three main trends in the fund are Emerging, Digital and Aging Finance. Emerging Finance is about emerging-market growth, but also includes innovative financials in developed markets. Digital Finance is about the increasing digitization of the sector. Aging Finance is about building up enough savings to enter retirement comfortably. As we look top-down at trends and bottom-up at stock selection, regional or sector spreads are merely the result of the investment process, though we do monitor limits.

Regional allocation

Robeco New World Financials selects the long-term trends that are expected to show the most powerful growth over the long term. Within the trends, the fund managers select the companies that will best capitalize on long-term trend growth. How much we invest depends on the stock valuation, where we look for growth at a reasonable price. As we look top-down at trends and bottom-up at stock selection, regional or sector spreads are merely the result of the investment process, though we do monitor limits.

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process through exclusions, ESG integration, engagement and voting. The fund does not invest in issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up investment analysis to assess existing and potential ESG risks and opportunities. In the stock selection the fund limits exposure to elevated sustainability risks. The fund targets at least 20% lower carbon footprint compared to the reference index. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	20.59%	12	42
Environmental	7.72%	3	9
Social	2.77%	2	7

Voting Related	4.45%	3	3
