

Robeco FinTech X USD

Robeco FinTech is an actively managed fund that invests in stocks in developed and emerging countries. The selection of these stocks is based on fundamental analysis. The fund's objective is to achieve a better return than the index. Proprietary valuation models are used to select stocks with good earnings prospects and a reasonable valuation and those companies which benefit from the increasing digitization of the financial sector are included. These are individually assessed on the basis of industry trend analysis, in-depth discussions with corporate management, analysts and industry experts.

Performance

Performance

Based on transaction prices, the fund's return was 0.57%.

April was a very difficult month, in which financials as well as (fin)tech stocks struggled, which led to an underperformance. The payments segment was the one clear positive standout. Partly because of the bid on one of our holdings, Network International, and partly thanks to solid performance from our investments in Latin American payments companies. The largest performance differences on a GICS industry level were seen, with positive contributions coming from IT services (StoneCo, Network International), banks (The Bancorp, NU Holdings) and consumer finance (Bajaj Finance, Kaspi). Software (Qualys, Blackline), interactive media & services (Tencent) and capital markets (MSCI, TradeWeb) were the worst relative industry contributors to performance during April.

Market development

Central banks keep on raising rates, while one after the other US bank is failing. Credit Suisse has been rescued and all around the world there are worries about Office CRE. As we get closer to a formal recession, the question is when will central banks stop hiking. For us that would be the time to move more into high-growth stocks with a reasonable valuation. Financial infrastructure has been a tough place to invest in April and YTD. Fears for poor results in banking technology enablers did not pan out, as Q1 results have been okay. In financial management we are seeing the rise of non-traditional players like Apple, Amazon and Google. The EU voted in large numbers in favor of the Markets in Crypto Assets (MiCA) legislation, which establishes rules for crypto-asset issuers and service providers, DeFi, and market abuse. Outside the US and Europe, we observe continuous regulatory developments. In our view, this implies that activity, capital and innovation will shift away from the US.

Expectation of fund manager

There has been a significant valuation reset. We still see solid growth potential across the fintech investment universe. Though there is a significantly larger focus on the ability to generate cash and profitability. Payments should continue to outgrow nominal GDP, especially digital payments, as e-commerce grows faster with continued higher adoption rates. Data analytics has been a growing part of the fintech investment universe. The (December 2022) announced deal between Microsoft and LSE Group underscores the importance of DA. Enhancing financial inclusion remains a very important raison d'être (reason for existence) for fintech. In addition, we notice increasing importance of B2B business models in especially international / cross-border payments as well as in digital assets applications focused on wholesale business models. After a tough start of the year, we believe that fintech offers great long-term growth opportunities at much lower valuation multiples.

Sustainability

The fund incorporates sustainability in the investment process through exclusions, ESG integration, engagement and voting. The fund does not invest in issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up investment analysis to assess existing and potential ESG risks and opportunities. In the stock selection the fund limits exposure to elevated sustainability risks. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

Sector allocation

The fund does not have a sector allocation policy. The fund invests in three different segments that benefit from the digitization of the financial sector, and focuses on the fintech long-term growth investment universe. It invests in three distinct segments, labelled as winners, challengers and enablers. Winners are well-established companies that clearly stand out from their peers. Challengers are younger, less-established companies that have the potential to become tomorrow's winners. Enablers are companies that help the financial industry to develop and implement technology.

Regional allocation

The fund currently has over 60% of its investments in the US, which is the dominant country for listed fintech equity investments, but over time we expect China, India and other emerging markets next to Europe to gain importance. We have defined a proprietary fintech universe with companies exposed to payments, distributed ledger technology, regtech, insurtech, personal finance, security, wealth management, electronic trading, big data, etc.

Investment policy

Robeco FinTech is an actively managed fund that invests in stocks in developed and emerging countries. The selection of these stocks is based on fundamental analysis. The fund's objective is to achieve a better return than the index. The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, proxy voting and engagement. Proprietary valuation models are used to select stocks with good earnings prospects and a reasonable valuation and those companies which benefit from the increasing digitization of the financial sector are included. These are individually assessed on the basis of industry trend analysis, in-depth discussions with corporate management, analysts and industry experts. The majority of stocks selected will be components of the Benchmark, but stocks outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the fund may use a benchmark for comparison purposes. The fund can deviate substantially from the issuer, country and sector weightings of the Benchmark. There are no restrictions on the deviation from the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the ESG characteristics promoted by the fund.
