

Robeco High Yield Bonds ODH EUR

Robeco High Yield Bonds is an actively managed fund that invests in high yield corporate bonds. The selection of these bonds is mainly based on fundamental analysis. The fund's objective is to provide long-term capital growth. The fund invests in corporate bonds with a sub-investment grade rating, issued primarily by issuers from developed markets (Europe/US). The portfolio is broadly diversified, with a structural bias towards the higher rated part in high yield. Performance drivers are the top-down beta positioning as well as bottom-up issuer selection.

Performance

Based on transaction prices, the fund's return was 0.54%.

The high yield bond index had a positive total return in April, which was purely a matter of earning the carry in high yield as yields and spreads traded sideways. The fund performed in line with the benchmark, and the contributions from beta and issuer selection were both close to neutral. In the US market, lower quality outperformed. In Europe, we saw the opposite picture. Our quality bias made a small negative contribution. As Europe slightly underperformed the US, our overweight in Europe also detracted slightly. Positive contributions came from avoiding names like Envision and Lannett, both healthcare companies that defaulted in April. Not owning index heavyweight Dish Networks also contributed nicely. This satellite television company is burdened with too much debt and its competitive position is at risk. Even its most senior debt yields 15%, a clear sign that restructuring will be unavoidable.

Market development

Not often have we seen months that were this stable in terms of spreads and yields. Spreads and yields both rose by 1 bp, to 453 bps and 8.22% (hedged to EUR). Intra-month volatility was very low as well. Investors had to digest the volatility around the US regional banks that shook markets in March, and were otherwise focused on the start of the earnings season and on macro data that could be relevant for central bank actions. In this relative calmness, primary markets reopened again: the number of deals reached almost 20 bln in the US alone, more than triple the amount that companies were able to print in March. However, this number is still a far cry from the normal issuance levels we have seen on average over the last 10 or so years. Default activity picked up in April, with several larger issuers in retail and healthcare going into restructuring.

Expectation of fund manager

Our base case remains that the US as well as Europe will experience a recession in 2023. We are coming from a prolonged period of (too) easy monetary policy and low or even negative yields. The result is a US economy running hot, and a persistent inflation problem both in the US and in Europe. Central banks have been on an aggressive rate hiking path, and their goal is to tame the inflation beast, be it at the cost of driving the economies into a recession. This is typically the environment where 'things break' and accidents happen. Likely victims are over-leveraged companies that are now facing a rapid rise in their cost of debt. Think CCC companies, leveraged LBOs, or companies in sectors that were perceived to be stable and hence loaded with debt like in telecom. The question is: what is priced in? With all-in yields now at 7.5% to 8.5%, a lot of additional widening is needed for total returns to become negative. We will continue to take an active beta approach and are currently close to a beta of 1. We stay up-in-quality. Stock picking is ever more important, as the current environment will certainly create winners and losers.

Top 10 largest positions

Our top ten holdings consist mostly of BB-rated large caps in the automotive and communications sectors. In automotive, we own large overweight positions in ZF Friedrichshafen and Goodyear, which we consider top-tier suppliers. In communications, positions are in some of the large US telecom operators like Sprint, Charter and Level 3. Sprint was actually upgraded to IG last month, meaning we will likely reduce the position. Other top holdings are in US supermarket operator Albertsons, Australian mining giant Fortescue and Netflix.

Changes

The benchmark of the fund is Bloomberg Barclays US Corp. HY & Pan Eur. HY ex Fin. 2.5% issuer Cap (hedged into USD). The fund aims to outperform by taking positions that deviate from the benchmark within predefined risk limits. This share class of the fund hedged the interest rate duration until 10 December 2019 to nearly zero, therefore the benchmark of the fund was not representative. Since 11 December 2019, the duration hedge was removed and the benchmark is representative to compare the fund performance.

Sustainability

The fund incorporates sustainability in the investment process via exclusions, ESG integration, a minimum allocation to ESG-labeled bonds, and engagement. The fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up security analysis to assess the impact on the issuer's fundamental credit quality. In the credit selection the fund limits exposure to issuers with an elevated sustainability risk profile. Furthermore, the fund invests at least 2% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where issuers are flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement.

Sector allocation

Overweights are in less cyclical sectors like food and paper & packaging, as well as in financials, which is an off-benchmark position. Underweights are in sectors that are exposed to consumer discretionary spending like retail, leisure and gaming. The energy sector is still underweight, but not to the same extent as in the past. We also have underweights in pharma and telecom & cable, but this is largely driven by idiosyncratic risk.

Investment policy

Robeco High Yield Bonds is an actively managed fund that invests in high yield corporate bonds. The selection of these bonds is mainly based on fundamental analysis. The fund's objective is to provide long-term capital growth. The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and engagement. The fund invests in corporate bonds with a sub-investment grade rating, issued primarily by issuers from developed markets (Europe/US). The portfolio is broadly diversified, with a structural bias towards the higher rated part in high yield. Performance drivers are the top-down beta positioning as well as bottom-up issuer selection. The majority of bonds selected will be components of the benchmark, but bonds outside the Benchmark index may be selected too. The fund can deviate substantially from the weightings of the benchmark. The fund aims to outperform the benchmark over the long run, while still controlling relative risk through the application of limits (on currencies and issuers) to the extent of the deviation from the benchmark. This will consequently limit the deviation of the performance relative to the benchmark. The Benchmark is a broad market-weighted index that is not consistent with the ESG characteristics promoted by the fund.

Team info

The Robeco High Yield fund is managed within Robeco's credit team, which consists of nine portfolio managers and twenty-three credit analysts. The portfolio managers are responsible for the construction and management of the credit portfolios, whereas the analysts cover the team's fundamental research. Our analysts have long term experience in their respective sectors which they cover globally. Each analyst covers both investment grade and high yield, providing them an information advantage and benefiting from inefficiencies that traditionally exist between the two segmented markets. Furthermore, the credit team is supported by three dedicated quantitative researchers and four fixed income traders. On average, the members of the credit team have an experience in the asset management industry of seventeen years, of which eight years with Robeco.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.
