Performance

Based on transaction prices, the fund's return was 0.25%.

The Sustainable Income Allocation Fund rose 0.4% over the month, beating its benchmark and staying ahead year-to-date. Overall asset allocation was a slight detractor, as the helpful equity overweight was partly offset by the preference for emerging over developed markets. Reduced exposure to the US dollar contributed positively, supported by a more dovish tone from the US Federal Reserve. Profits were taken on the Australian flattener as prospective rate cuts were priced out. Hedging part of the fund's high-yield exposure in favor of equities further supported returns. Security selection was strong: both the tilt toward low-volatility stocks and the overweight in healthcare added positively. Healthcare valuations remain attractive versus the broader market, and concerns around punitive drug pricing continue to ease. At the stock level, top-ten holding Eli Lilly delivered impressive earnings, and analysts remain optimistic about its long-term growth prospects driven by obesity and metabolic-health treatments over the period.

Market development

Global risk assets ended November 2025 modestly higher after a choppy month. Equities started on the back foot, hurt by profit-taking and valuation concerns in crowded AI/Big Tech names, uncertainty around the extended US government shutdown that delayed key data releases, and a modest scaling-back of near-term Fed rate cut expectations. As these worries eased and on the back of solid Q3 earnings, indices recovered. The S&P 500 finished November slightly positive and was one of the few major equity indices to end the month in the green. Rates markets saw two-way volatility. 10-year US Treasury yields first moved higher on a more hawkish Fed tone, then retraced toward 4% as communication softened and futures priced in a likely 25 bps cut in December. Credit lagged equities: broad US investment grade spreads edged wider, while hyperscalers underperformed amid heavy bond supply for AI capex and rising leverage concerns. In Japan, a fiscal package weakened the yen and nudged long-dated JGB yields higher.

Expectation of fund manager

Equities were weak early in November despite solid earnings, as worries over AI capex, a cautious Fed and missing labor data during the US shutdown weighed on sentiment. Markets recovered after the government reopened, data releases resumed and fears of a sharp labor slowdown eased. We remain constructive on equities, supported by expected fiscal stimulus in the US and Europe, Fed rate cuts and steady ECB policy, with firm earnings. Valuations are not cheap, but we see better relative value in emerging markets and Europe, while remaining comfortable with US large caps given their profit strength and AI exposure. The bond outlook is mixed, with higher deficits and debt arguing for higher yields, but most central banks are now on hold or cutting, keeping the front end anchored; we stay neutral and selective in government bonds. We view the reduction in gold as temporary, stay long in JPY and AUD, and continue to prefer equity over credit risk.

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process via exclusions, negative screening, ESG integration, targets on investments in companies and countries based on ESG performance as well as engagement and a minimum allocation to ESG-labeled bonds. For government and government-related bonds, the fund complies with Robeco's exclusion policy for countries, excludes the 15% worst ranked countries following the World Governance Indicator 'Control of Corruption', and ensures investments have a minimum weighted average score of 6 following Robeco's proprietary Country Sustainability Ranking. The Country Sustainability Ranking scores countries on a scale from 1 (worst) to 10 (best) based on 40 environmental, social, and governance indicators. For corporate bonds, the fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. ESG factors are integrated in the bottom-up security analysis to assess the impact on the issuer's fundamental credit quality. In the credit selection the fund limits exposure to issuers with an elevated sustainability risk profile as well as excludes companies with high or medium negative SDG scores following Robeco's internally developed three-step SDG framework. Where issuers are flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on 25% MSCI All Country World Index(USD) 75% Bloomberg Global Aggregate(hedged to EUR and denominated into USD).

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

Environmental Intensity

Environmental intensity expresses a portfolio's aggregate environmental efficiency. The portfolio's aggregate carbon intensity is based on the related country emissions. We divide each country's carbon emissions, measured in tCO₂, by the population size or gross domestic product to obtain the country's carbon intensity. The portfolio's aggregate intensity figures are calculated as a weighted average by multiplying each assessed portfolio component's intensity figure with its respective position weight. Index intensities are provided alongside the portfolio intensities, highlighting the portfolio's relative carbon intensity. Only holdings mapped as sovereign bonds are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

Country Sustainability Ranking

The charts displays the portfolio's Total, Environmental, Social and Governance scores following Robeco's Country Sustainability Ranking methodology. These are calculated using the portfolio components' weights and respective country's scores. The scores includes considerations of more than 50 separate indicators, each capturing a unique sustainability feature across environmental, social and governance dimensions at the country level. Index scores are provided alongside the portfolio scores, highlighting the portfolio's relative ESG performance. Only holdings mapped as sovereign bonds are included in the figures.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	14.71%	61	227
Environmental	3.37%	18	64
Social	1.39%	9	23
Governance	4.53%	13	53
Sustainable Development Goals	7.76%	25	79
Voting Related	1.25%	7	8

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Additional information for investors with residence or seat in Singapore

This document has not been registered with the Monetary Authority of Singapore ("MAS"). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled "Important information for Singapore Investors") contained in the prospectus. Investors should consult their professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled "Important information for Singapore Investors" of the prospectus ("Sub-Funds") are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.
