

Robeco Smart Materials D EUR

Robeco Smart Materials is an actively managed fund that invests into solutions to the resource scarcity challenge such as innovative materials and process technologies that use less or substitute resources, are more scalable, deliver efficiency gains and enable more circular systems. This includes companies that provide technologies, products or services relating to the extraction, transformation or efficient processing of innovative materials, technologies enabling more automation and efficiency in industrial manufacturing as well as the recycling and reuse of materials. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The fund's objective is also to achieve a better return than the Benchmark. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si.

Performance

Based on transaction prices, the fund's return was -7.91%.

The portfolio underperformed versus the benchmark in March, but staged a meaningful rebound in the final week as energy-transition and AI-infrastructure names regained momentum. On the positive side, Viavi Solutions led on raised guidance and data center test demand, followed by ARM Holdings on record royalty growth and its broadening AI opportunity. SQM advanced on the lithium recovery and analyst upgrades, IMCD on improving distribution sentiment, and Chroma ATE on AI-server testing demand. CATL edged higher despite debate around battery export economics, while Albemarle rallied on the firmer lithium tone and Aura Minerals contributed on precious metals strength. On the negative side, Hubbard was the largest detractor as copper miners gave back gains despite elevated spot prices, followed by Aperam on steel weakness and Neo Performance on profit-taking after its rare earth rally. Geekplus and Innoscience reflected continued derating across robotics and GaN names. Impala Platinum, Voestalpine, and Ero Copper detracted on metals volatility linked to the Iran conflict, while Hesai sold off sharply as investors questioned lidar valuation multiples in a risk-off environment.

Market development

In March, the Iran conflict dominated as Brent crude spiked to USD 119 per barrel, adding a risk premium to tight commodity markets while strengthening the energy transition case. Copper remained near record levels around USD 12,200 per tonne on mine disruption fallout, US tariff stockpiling, and unprecedented zero smelter treatment charges. Lithium sentiment improved as SQM reported record volumes and guided for 25% demand growth, while the oil shock reinforced ICE-to-EV switching. Rare earth and hafnium pricing benefited from rising defense and aerospace demand. The copper-to-optical transition gained momentum at OFC 2026, where the first co-packaged optics deployments and Meta's USD 6 billion Corning fiber deal confirmed structural demand for specialty glass and silicon photonics. TSMC's advanced node expansion and surging AI-driven test intensity continued to underpin semiconductor equipment demand.

Expectation of fund manager

2026 offers a supportive environment for smart materials, defined by the combination of a gradually improving industrial cycle and powerful, persistent structural investment trends. Companies positioned at the intersection of electrification, automation, resource efficiency, and circularity are likely to see durable demand, while valuation dispersion and macro uncertainty will require disciplined, bottom-up portfolio construction. Momentum for critical minerals has been strong and continues to look very attractive.

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund's sustainable investment objective is to help mitigate the resource scarcity challenge within industries while supporting economic growth. Resource scarcity and sustainability considerations are incorporated in the investment process by the means of a target universe definition, exclusions, ESG integration, a carbon footprint target and voting. The fund only invests in companies that have a significant thematic fit as per Robeco's thematic universe methodology. Through screening on both Robeco's internally developed SDG Framework and Robeco's exclusion policy, the fund does not invest in issuers that have a negative impact on the SDGs, are in breach of international norms or where products have been deemed controversial. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. The fund's weighted carbon footprint will be equal to or better than that of its Climate Transition Benchmark. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on MSCI World Index TRN.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	12.55%	7	36
Environmental	8.39%	3	14
Social	0.97%	1	3
Governance	3.18%	3	18

Investment policy

Robeco Smart Materials is an actively managed fund that invests into solutions to the resource scarcity challenge such as innovative materials and process technologies that use less or substitute resources, are more scalable, deliver efficiency gains and enable more circular systems. This includes companies that provide technologies, products or services relating to the extraction, transformation or efficient processing of innovative materials, technologies enabling more automation and efficiency in industrial manufacturing as well as the recycling and reuse of materials. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The fund's objective is also to achieve a better return than the Benchmark. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund fosters solutions to reduce resource intensity in the economy by investing in more efficient, scalable materials that have lower emissions over the lifetime, mainly investing in companies that advance the UN Sustainable Development Goals (SDGs): Decent Work and Economic Growth, Industry, Innovation and Infrastructure, Sustainable Cities and Communities, and Responsible Consumption and Production and Climate Action. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, carbon reduction target and proxy voting.

Key risks

- The value of shares is sensitive to market fluctuations, instrument prices, and changes in political, economic, or market conditions. Equity theme funds have a view on a specific segment of the equity market. By making the choice to focus on a specific segment the fund becomes more volatile as price movements of shares within this theme tend to have a larger impact on the value of the fund.
- The fund may use financial derivatives.
- A (derivative) counterparty may fail to fulfil its obligations. Counterparty risk is reduced by exchanging collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which may affect their value.
- Sustainability risk factors may negatively impact investment returns. This fund has a sustainable investment objective.

Additional information for investors with residence or seat in Singapore. This document has not been registered with the Monetary Authority of Singapore ("MAS"). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled "Important information for Singapore Investors") contained in the prospectus. Investors should consult their professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled "Important information for Singapore Investors" of the prospectus ("Sub-Funds") are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.
