Robeco Transition Asian Bonds DH EUR

Robeco Transition Asian Bonds is an actively managed fund that invests in corporate and government bonds in Asia. The fund aims to make investments in assets with a sustainable objective as well as investments in assets that contribute to a transition. Transition pertains to activities that measurably and credibly contribute to the goals of the Paris Agreement and/or an environmental and/or social objective. This is achieved by investing in entities that have credible emission reduction targets, entities that provide solutions to enable climate change mitigation and bonds to finance sustainability transformation or refinance, in part or in full, new and/or existing projects with an environmental and/or social objective. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long-term capital growth.

Performance

Based on transaction prices, the fund's return was 0.02%.
Underweights in Hong Kong and Pakistan detracted from performance. Overweights in the banking, insurance and technology sectors contributed to performance, while the overweight in consumer cyclical and basic industry detracted from performance. Also, our positioning in the Chinese and Hong Kong property sectors contributed to performance.

Market development

Asian credit markets navigated a volatile November. Spreads widened throughout most of the month as markets priced out a December Fed cut and equity volatility rose, and stabilized in the last week of the month once softer labor data, dovish Fed commentary, and the resolution of the US government shutdown restored expectations for near-term easing and reduced fiscal uncertainty. 10-year US Treasury rates initially rose to 4.16% before ending the month at 4.01%. November saw a few credit events with Vanke, a Chinese property developer being downgraded to CCC by S&P which negatively affected investor sentiment in Asian HY, and Hong Kong's New World Development is undertaking a voluntary exchange offer expected to conclude in early December 2025. Technical conditions were mixed. November delivered one of the heaviest new issue calendars of the year in US investment grade, which resulted in Asian investment grade spreads outperforming their US counterparts. Also, Asia saw robust gross supply in November, but this was mainly concentrated in high-quality issuers. Finally, Asia led the non-USD EM issuance last month with USD 4.8 bln.

Expectation of fund manager

Asian corporates enter the final stretch of 2025 with solid fundamentals. Leverage and liquidity remain healthy. Asia's HY default rate is expected to end 2025 at 3.5%, down from 5.3% in 2024, and projected to ease further in 2026. Technicals remain supportive: net financing in Asia was negative year-to-date, and issuance is expected to stay light, especially in USD. Non-USD and ESG-linked issuance continue to gain traction, with strong demand from Asian investors. Asia IG remains well-bid, while HY spreads may face pressure from refinancing needs and policy uncertainty in China. Valuations are tight, limiting spread compression, but low supply and continued demand from Asian investors should prevent widening. We favor EUR over USD credit, maintain overweight in financials, and prefer BBB-BB rating buckets over the lower-rated segments. Sector-wise, banks and utilities offer relative strength, while the property sector warrants caution. Key risks include China's fiscal support which remains constrained and raises concerns about the near-term growth impact.

Sector allocation

In our portfolio management, we not only factor in weights, but also spreads and durations (DTS). On that basis, the largest underweights are in oil producers. The weaker oil price and increased output continue to weigh on these producers. Our largest overweights are in financial bonds issued by banks, as well as in basic industry. We have a combined underweight risk position in China and Hong Kong, driven by tight valuations. The largest underweights are in sovereigns, quasi-sovereigns and state-owned enterprises which have experienced significant tightening and where fiscal risks are on the rise. The property sector is also underweighted as issuers remain exposed to idiosyncratic risks, especially in mainland China and Hong Kong.

Sector allocation		Deviation index
Industrials	31.9%	11.8%
Financials	25.5%	6.4%
Agencies	22.8%	-15.6%
Utilities	7.6%	5.4%
Sovereign	6.3%	-11.8%
Local Authorities	0.9%	-1.2%
Cash and other instruments	4.9%	4.9%

Currency denomination allocation

Our exposure by currency of denomination may be driven by relative value between the markets on an aggregate level but is more typically the result of sector themes and issuer selection. All non-base currency exposure is hedged back to the benchmark by default.

Currency denomination allocation		Deviation index
U.S. Dollar	87.0%	-13.0%
Euro	4.9%	4.9%
Singapore Dollar	3.3%	3.3%

Duration allocation

Duration allocation		Deviation index
U.S. Dollar	4.1	-0.3
Singapore Dollar	0.2	0.2

Rating allocation

Our positioning across the different rating buckets is the result of beta positioning, sector themes, and issuer selection.

Rating allocation		Deviation index
AAA	3.5%	2.5%
AA	9.8%	-5.4%
A	25.3%	-7.2%
BAA	32.1%	-6.5%
BA	23.2%	17.0%
B		-2.0%
CAA	1.3%	-0.2%
NR		-3.0%
Cash and other instruments	4.9%	4.9%

Subordination allocation

In the allocation to the capital structure, we favor the bonds with solid risk-adjusted performance potential while taking into account the beta, sector themes, and the credit cycle. We prefer shorter-dated senior bonds. Within subordinated bonds, we favor Tier-2 over Tier-1 bonds.

Subordination type allocation		Deviation index
Senior	72.9%	-18.4%
Tier 2	13.7%	10.7%
Tier 1	5.0%	2.8%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

Sustainability is incorporated in the investment process by the means of a target universe, exclusions, ESG integration, and a minimum allocation to ESG-labeled bonds. The fund invests in credits issued by companies with a positive or neutral impact on the SDGs. The impact of issuers on the SDGs is determined by applying Robeco's internally developed three-step SDG Framework. The outcome is quantified with a proprietary SDG score methodology, considering both the contribution to the SDGs (positive, neutral or negative) and the extent of this contribution (high, medium or low). At least 50% of the fund is invested in Transition-related Investments contributing to the goals of the Paris Agreement and/or Transition-related Investments with an Environmental and/or Social objective. This is determined through Robeco’s Paris Alignment Assessment, which evaluates companies using a Climate Traffic light. In addition, the fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up security analysis to assess the impact on the issuer's fundamental credit quality. Furthermore, the fund invests at least 15% in green, social, sustainable, and/or sustainability-linked bonds. The fund limits exposure to elevated sustainability risks. Lastly, where a credit issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on JP Morgan Asia Credit Index.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco’s SDG Framework. The framework utilizes a three-step approach to assess a company’s impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.
Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

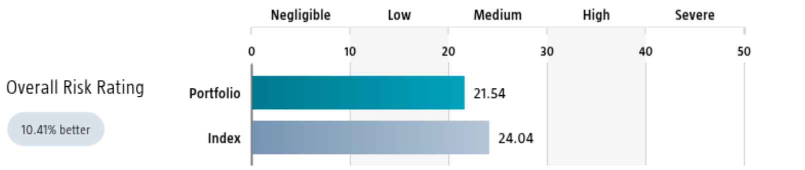
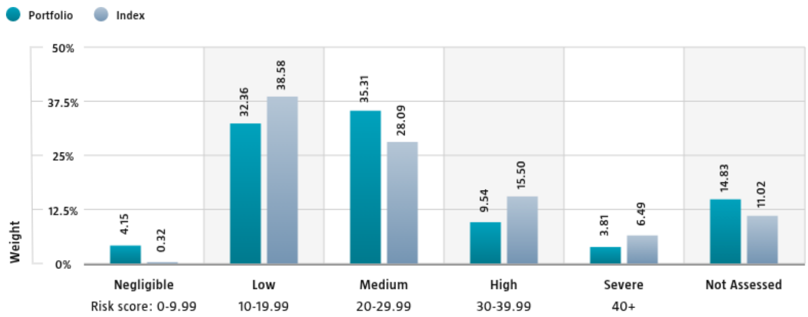
Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.





Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

Engagement

Robeco distinguishes between three types of engagement.
Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	11.48%	11	38
Environmental	8.22%	6	19
Social	3.26%	5	16
Governance	0.00%	0	0

Investment policy

Robeco Transition Asian Bonds is an actively managed fund that invests in corporate and government bonds in Asia. The fund aims to make investments in assets with a sustainable objective as well as investments in assets that contribute to a transition. Transition pertains to activities that measurably and credibly contribute to the goals of the Paris Agreement and/or an environmental and/or social objective. This is achieved by investing in entities that have credible emission reduction targets, entities that provide solutions to enable climate change mitigation and bonds to finance sustainability transformation or refinance, in part or in full, new and/or existing projects with an environmental and/or social objective. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long-term capital growth.

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions and engagement.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.

Additional information for investors with residence or seat in Singapore
This document has not been registered with the Monetary Authority of Singapore (“MAS”). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled “Important information for Singapore Investors”) contained in the prospectus. Investors should consult their professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled “Important information for Singapore Investors” of the prospectus (“Sub-Funds”) are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore (“SFA”) and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.
