

Summary document

Robeco Capital Growth Funds - Robeco QI US Beta Equities

This financial product promotes environmental or social characteristics, but does not have as its objective sustainable investment.

The Sub-fund has the following E/S characteristics:

1. The Sub-fund promotes having a substantially lower corporate Carbon Footprint than the General Market Index.
2. The Sub-fund promotes having a substantially lower water and waste footprint than the General Market Index.
3. The Sub-fund promotes certain minimum environmental and social safeguards through applying exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society, such as investments in controversial behaviour, controversial weapons, and fossil fuels.
4. The Sub-fund has a substantially better weighted average ESG score than the general market index.
5. The Sub-fund promotes having a larger share of companies with a positive SDG score (1,2,3) in the portfolio than the General Market Index.
6. The Sub-fund promotes investments in companies that have a better score than -3 on the internally developed SDG Framework.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

Investment Strategy

Robeco QI US Beta Equities is an actively managed fund that invests in equities of companies in the United States of America. The selection of these stocks is based on a quantitative model as described in the investment policy paragraph in Appendix I of this prospectus.

Beta stands for the investment management approach of the Sub-fund that follows the sole purpose of pursuing the sustainable investment objective of the Sub-fund. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Amongst others, the Sub-fund applies norms-based and activity-based exclusions, Robeco's SDG framework, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

Benchmark

Not applicable.

Planned asset allocation

The product plans to make a minimum of 60% sustainable investments. All investments are aligned with the E/S characteristics, with the exception of investments in the category "other" which are mostly cash and cash equivalents.

Monitoring and due diligence

Robeco has incorporated the sustainability aspects of the investment strategies into adequate investment due diligence processes and procedures for the selection and monitoring of investments, amongst others taking into account Robeco's risk appetite and sustainability risk management policies. Portfolio managers and analysts are primarily responsible for conducting investment due diligence on their strategies on a daily basis. They are supported by independent monitoring, performed by the Financial Risk Management and Investment Restrictions departments.

Data sources, methodologies and limitations

The product uses several sources for gathering sustainability data. Robeco scrutinises the data quality of each provider during due diligence assessments, that includes reviewing the data model, performing statistical checks and evaluating coverage. Data processing takes place in different forms, the preference is always to have data acquisition as automated as possible to avoid any operational risks or unnecessary human intervention.

Robeco maintains comprehensive methodology documents of our proprietary analytical frameworks on our website. In addition, for some social and environmental characteristics, Robeco relies on externally sourced content for which we aim to select the best of breed vendor for each of our target characteristics. The primary limitation to the methodology or data source is the lack of corporate disclosure. Like many other financial market participants, we struggle to find adequate information on the principal adverse indicators. To overcome this issue, Robeco has resorted to using multiple data providers, since each has its own respective strengths and weaknesses.

Engagement strategy

The holdings of the fund are subject to the selection process of Robeco's value engagement program, that consists of a constructive dialogue between investors and investee companies to discuss how they manage ESG risks and opportunities, as well as stakeholder impact. Although this type of engagement is not directly related to the sustainable investment objective of the fund, it can be that adverse

sustainability impacts are addressed via the value engagement program. More information can be found in Robeco's Stewardship Policy [Robeco's Stewardship Policy](#).
