Performance

Performance

Based on transaction prices, the fund's return was 12.44%.
In February, the fund's value per share rose by 12.62% in euro terms, outperforming the reference index, which increased by 5.76%. The fund's performance was much better than the Developed Markets Index (+1.2%) and the Emerging Markets Index (+6.0%). Return differences between countries were huge. Four of our African markets rose with double-digit percentages, while four markets were down. Ghana was by far the best market with a 46.7% gain. A further normalization of inflation, the gold price remaining high and an extremely low starting valuation was enough to push Ghanaian share prices up, while the currency appreciated versus the euro. Nigeria, Kenya and South Africa also had a great month with gains of 19.5%, 13.7% and 10.1%, respectively. Senegal rallied 8.7%, while Zambia rose 8.1%. Tunisia went up by 6.0%. Egypt pulled back 0.8% after a great January, partly driven by worries around Iran (though the war had not yet started as per the last trading day of February). Botswana went down by 0.9%. Mauritius declined 2.4%. Morocco was the weakest market with a 3.4% loss.

Market development

South African macroeconomic numbers disclosed during February were mixed. In December, mining production and retail sales volumes were higher than a year earlier. The trade surplus in January was better than expected. Manufacturing production was weak in December. Inflation came down from 3.6% in December to 3.5% in January. On February 25th, Finance Minister Godongwana gave a government budget update and presented the budget for the fiscal year starting April 1st. The message was solid with an unchanged budget deficit expectation for the fiscal year ending in March of 4.5% of GDP, and the projection that the deficit will gradually decline to 2.9% of GDP in three years. Debt as a % of GDP is expected to peak this fiscal year at 78.9% and to slide down to 77.0% in three years. The government is having a tail wind as high metal prices are boosting the tax revenues from mining firms. In Nigeria, economic growth accelerated slightly from 3.98% in Q3 to 4.07% in Q4. Growth was broad-based, led by agriculture, ICT, trade and real estate, with supportive contributions from construction, manufacturing and oil & gas.

Expectation of fund manager

The long-term prospects for the African region are good. Firstly, commodity demand from China and other countries is likely to grow in the long run. This should result in higher tax income and employment, which in turn should boost demand by local consumers. Secondly, the business climate is improving. In an international context, most African countries currently do not score well, but governments are actively trying to reduce bureaucracy. Thirdly, investments in infrastructure are reducing logistics problems, which should boost economic growth and company earnings. Lastly, many companies now trade at low price/earnings multiples and have high dividend yields compared to other regions.

Country allocation

The fund invests in companies that are predominantly active in Africa. South Africa is the biggest country in the portfolio because of its market size, liquidity, good corporate governance and the fact that many South African companies are also active in other countries on the continent. Other countries are Nigeria, Kenya, Egypt, Ghana, Zambia, Botswana, Morocco, Mauritius, Tunisia and Senegal. In addition to these, we hold a number of companies that are predominantly active in Africa but have a stock market listing in Portugal or the UK. These are mainly telecom and construction companies.

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process through exclusions, ESG integration, engagement and voting. The fund does not invest in issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up investment analysis to assess existing and potential (long-term) ESG risks and opportunities. In the stock selection the fund limits exposure to elevated sustainability risks. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Engagement

Robeco distinguishes between three types of engagement.
Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	3.00%	3	22
Environmental	0.00%	0	0
Social	2.02%	1	2
Governance	0.98%	1	3
Sustainable Development Goals	0.00%	1	17
Voting Related	0.00%	0	0
Enhanced	0.00%	0	0

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy
Robeco Afrika Fonds – EUR E is an actively managed fund that invests in stocks in Africa, especially in countries such as South Africa, Egypt, Morocco and Nigeria. The selection of these stocks is based on a fundamental analysis. The fund's objective is to provide long term capital growth.The fund manager selects attractive countries for which economic and political developments are important factors in determining emerging market equity returns and frontier markets. The fund then selects the companies with the best profit potential, taking advantage of of growth across the African region.
The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, proxy voting and engagement.

Key risks
- The value of shares is sensitive to market fluctuations, instrument prices, and changes in political, economic, or market conditions. Emerging and frontier markets are usually characterised by less stable political and economic environment. This may result in larger price movements, increased volatility and potentially lower liquidity compared to developed markets. A small part of the fund is invested in countries in the Western African Economic Monetary Union. The risk with regards to settlement and loss of assets in these countries is high due to the immaturity of the markets settlement systems and geopolitical climate of those countries.
- The fund may use financial derivatives.
- A (derivative) counterparty may fail to fulfil its obligations. Counterparty risk is reduced by exchanging collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which may affect their value.
- Sustainability risk factors may negatively impact investment returns. This fund promotes ESG characteristics but does not have a sustainability objective.

Previously, he worked for Robeco as an investment strategist focusing on North America and Emerging Markets since 2005. Before joining Robeco in 2005, he worked for Credit Suisse First Boston as an Investment Banking Analyst, focusing on the transport and logistics sector. He started his career in the financial industry in 1998. Cornelis holds a Master's in Economics from Erasmus University Rotterdam and is a CFA® charterholder.

Fiscal product treatment
The fund is established in the Netherlands. The fund is managed as a 'naamloze vennootschap' (public limited company). The fund has the status of 'fiscal investment institution' in the sense of article 28 of the Dutch Corporate-Income Tax Act 1969, and, as such, is taxed at a corporate-income tax rate of 0%.The fund is obliged to pay out the realized current income in the form of dividend within 8 months after the end of the financial year. From 1 January 2007 the fund withholds Dutch dividend tax at a rate of 15% from these dividend payments. The fund can in principle use the Dutch treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor
For a private investor residing in the Netherlands, the actual received interest, dividends or capital gains are not relevant for tax purposes. For Dutch tax-resident private investors, their holdings fall under Box 3. Investors pay annual tax on a fixed yield calculated based on the value of their assets as of 1 January. The return depends on the pro-rata allocation of assets to different categories, namely savings, debts or other assets. The holdings qualify as other assets for which the return rate is set at 6.04% (as of 1/1/2024; 6.17% as of 1/1/2023). The return rate is adjusted annually based on historical returns from previous years. The balance of the different asset categories is referred to as the return base. The effective return rate is then calculated by dividing the return by the return base. This effective return rate is applied to the savings and investments base to calculate the benefit from savings and investments. The savings and investments base is equal to the return base minus the tax-free amount. Investors pay income tax (36% in 2024; 32% in 2023) on this calculated benefit from savings and investments. The withheld Dutch dividend tax (15% as of 1/1/2024) is creditable against the income tax payable for investors residing in the Netherlands.

Investors who are not subject to (exempt from) Dutch corporate tax (including Dutch pension funds) are not taxed on the result obtained. Dutch exempt entities can fully reclaim the 15% dividend tax withheld on dividends.

Investors subject to Dutch corporate tax may be taxed on the result obtained from their investment in the fund, including dividend income and capital gains. Dutch corporate taxpayers can, in principle, credit the withheld dividend tax (15% as of 1/1/2024) against corporate tax and, under certain conditions, credit the excess in later years.

For investors outside the Netherlands, their own national tax legislation applies to foreign investment funds. Shareholders who are not subject to tax in the Netherlands and reside in countries that have a double taxation treaty with the Netherlands may, depending on the treaty, reclaim (a portion of) the Dutch dividend tax from the Dutch tax authorities. A pension fund located in another EU member state or a country that has entered into an information exchange agreement with the Netherlands and is similar to a Dutch pension fund is also entitled to a refund of Dutch dividend tax. The above is based on current Dutch tax legislation.

Additional information for investors with residence or seat in Singapore

This document has not been registered with the Monetary Authority of Singapore ("MAS"). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled "Important information for Singapore Investors") contained in the prospectus. Investors should consult their professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled "Important information for Singapore Investors" of the prospectus ("Sub-Funds") are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.
