

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Robeco Sustainable Dynamic Allocation IH GBP (LU2937691504)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco Sustainable Dynamic Allocation is an actively managed global multi asset fund. The fund's objective is to achieve a better return than the index. The fund has a relatively high risk profile and uses asset allocation strategies mainly investing directly in equities and taking exposure to other asset classes such as bonds, deposits and money market instruments. The asset allocation strategy is subject to investments and volatility restrictions. The portfolio management team can also use other investment instruments to enhance the riskreturn profile of the fund.

The Sub-fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The Sub-fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions.

The Sub-fund aims to align the currency exposure of the Sub-fund (excluding active currency positions) with the benchmark including through the use of derivatives. The Sub-fund may take active currency positions including through the use of derivatives. The active currency positions may cause the Sub-fund to deviate from the weights of the respective currencies in the relevant benchmark.

Benchmark: 75% MSCI All Country World Index 25% Bloomberg Global Aggregate (hedged to GBP)

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark. The Sub-fund aims to outperform the benchmark over the long run, whilst still controlling relative risk through the applications of limits (on VaR Ratio) to the extent of deviation from the benchmark. This will consequently limit the deviation of the performance relative to the benchmark. The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

This share class of the fund does not distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk - Typically lower rewards

Higher risk - Typically higher rewards

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Balanced funds combine different asset classes resulting in lower volatility than pure equity funds but higher than pure fixed income funds. The fund may use derivatives to attain its investment objectives. These instruments may present a leverage effect, which will increase the sensitivity of the fund to market fluctuations.

The following risk considerations are deemed material for this fund, and are not (adequately) reflected by the indicator:

- A derivative counterparty may fail to fulfil its obligations which could result in a loss.

Counterparty risk is reduced via the exchange of collateral.

- The fund invests in assets that could become less liquid in certain market conditions, which could have a significant impact on the value of these assets. Investors may face significant difficulties in terms of time or costs for disinvesting subject to specific market conditions.
- The fund invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks.
- The fund invests or may invest in (contingent) convertible bonds. Upon materialization of a pre-defined trigger, these instruments can convert into equity or face full or partial write down.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.

Charges

One-off charges taken before or after you invest

Entry charge*	0.50%
Switch charge	1.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	

Charges taken from the fund over a year

Ongoing charges	0.78%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are the maximum figures. Contact your financial advisor or distributor to find out the actual entry or exit charge.

*Dependent on the distribution channel, it is possible that additional costs are charged by the distributor.

Ongoing charges are based on the expenses for the last calendar year ended 31-12-2024. This figure may vary from year to year and does not include performance fees or transaction costs, except in the case of exit/entry charges paid by the UCITS when buying or selling units in another collective investment undertaking. For funds launched or for fee changes that are implemented during the current calendar year, the ongoing charge is estimated.

For more information on fees, charges and performance fee calculation methods we refer to section Fees and Expenses within the prospectus, available on the website: www.robeco.com

The charges are used to pay the costs of running the fund, including the costs of marketing and distributing. The charges reduce the potential growth of the investment.

Past performance

Changes

This share class shows performance information prior to its launch date. On the launch date of this share class, the fund absorbed Robeco Multi Asset Growth. Performance prior to the launch date has been simulated on the basis of the past performance of the absorbed fund that had similar investment policy and applied comparable charges.

Currency: GBP
1st quotation date: 03-12-2024
