The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Robeco Flexible Allocation GH GBP (LU2819742037)

A subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco Flexible Allocation is an actively managed global multi asset fund. The aim of the fund is to achieve long term capital growth by taking global exposure to asset classes such as equities, bonds, deposits, Alternative Investments and/or other generally accepted asset classes. The fund applies a flexible allocation strategy to various global asset classes, seeking to balance the trade-off between risk and return. This means the fund's portfolio composition will be determined and adjusted based on market conditions. The asset allocation strategy is subject to investments and volatility restrictions. The portfolio management team can also use other investment instruments to enhance the risk return profile of the fund.

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based

exclusions.

Currency risk will be hedged.

Benchmark: ICE BofA SONIA Overnight Rate Index

The fund uses the Benchmark for comparison purposes only. The fund aims to outperform the Benchmark over the long run, whilst there are no restrictions on the deviation of the performance relative to the Benchmark.

This share class of the fund will distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk - Typically lower rewards

Higher risk - Typically higher rewards

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Balanced funds combine different asset classes resulting in lower volatility than pure equity funds but higher than pure fixed income funds. The fund may use derivatives to attain its investment objectives. These instruments may present a leverage effect, which will increase the sensitivity of the fund to market fluctuations.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- A derivative counterparty may fail to fulfil its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.

- The fund invests in assets that could become less liquid in certain market conditions, which could have a significant impact on the value of these assets. Investors may face significant difficulties in terms of time or costs for disinvesting subject to specific market conditions.
- The fund invests or may invest in Chinese debt securities through Bond Connect. Investing in Chinese debt securities through Bond Connect carries increased risk, most notably liquidity, regulatory, custody and broker risks.
- The fund invests or may invest in (contingent) convertible bonds. Upon materialization of a pre-defined trigger, these instruments can convert into equity or face full or partial write down.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.

Charges
