

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Robeco QI Global Dynamic Duration DH CHF (LU2819787214)

This is a share class of Robeco Capital Growth Funds, Sicav

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco QI Global Dynamic Duration is an actively managed fund that invests worldwide in government bonds with investment grade quality. The fund's objective is to provide long term capital growth. The fund uses derivatives to dynamically adjust the duration (interest-rate sensitivity) of the portfolio. The duration positioning is based on our proprietary duration model, which predicts the direction of the bond markets using financial market data. The ESG scores of countries are a integral part of our bottom-up country allocation decisions.

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions.

All currency risks are hedged.

Benchmark: JPM GBI Global Investment Grade Index (hedged into CHF)

The portfolio is actively managed and uses – to a certain extent – the JPM GBI Global Index IG in defining the asset allocation of the portfolio, still allowing the Management Company to have discretion over the composition of the portfolio subject to the investment objectives. The Company can deviate from the weightings of the Benchmark. The Company aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the applications of limits (on currencies) to the extent of deviation from the Benchmark. This will consequently limit the deviation of the performance relative to the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Company.

This share class of the fund does not distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

Lower risk - Typically lower rewards

Higher risk - Typically higher rewards

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

This fund invests primarily in government bonds. Sovereign risks are the main hazard when investing in this type of bonds. The fund may use derivatives to attain its investment objectives. These instruments may present a leverage effect, which will increase the sensitivity of the fund to market fluctuations.

The following risk considerations are deemed material for this fund, and are not (adequately) reflected by the indicator:

- A derivative counterparty may fail to fulfil its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund is managed using quantitative models. Materialization of the model risk may be detrimental to fund performance.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.
- The fund is managed using quantitative models. Materialisation of the model risk may be detrimental to fund performance.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.

Charges

One-off charges taken before or after you invest

Entry charge*	3.00%
Switch charge	1.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charges	0.81%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The charges are used to pay the costs of running the fund, including the costs of marketing and distributing. The charges reduce the potential growth of the investment.

The entry and exit charges shown are the maximum figures. Contact your financial advisor or distributor to find out the actual entry or exit charge.

*Dependent on the distribution channel, it is possible that additional costs are charged by the distributor.

Ongoing charges are based on the expenses for the last calendar year ended 31-12-2024. This figure may vary from year to year and does not include performance fees or transaction costs, except in the case of exit/entry charges paid by the UCITS when buying or selling units in another collective investment undertaking. For funds launched or for fee changes that are implemented during the current calendar year, the ongoing charge is estimated.

For more information on fees, charges and performance fee calculation methods we refer to section Fees and Expenses within the prospectus, available on the website: www.robeco.com

Past performance

Changes

Up to 28 February 2013, the benchmark was the JPM GBI Global Index.

Currency: CHF

1st quotation date: 20-09-2024
