

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Robeco Climate Euro Government Bond UCITS ETF EUR Acc (IE000D1DAP05)

This fund is a subfund of Robeco UCITS, ICAV

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco Climate Euro Government Bond UCITS ETF is actively managed and provides exposure to Euro denominated government bonds with an equal or better weighted average Country Transition Score as compared to the Benchmark: FTSE Climate Collective Transition EMU Broad Government Bond Index. To this end, the Fund invests in Euro denominated government bonds as defined by the Benchmark and/or the Parent Index: FTSE EMU Broad Government Bond Index to construct a portfolio with an equal or better weighted average Country Transition Score than the Benchmark. The Manager strives to align the risk and return profile of the Fund with the Parent Index by employing quantitative techniques. In this process, the Country Transition Score and Green Bond allocation serve as model constraints, followed by an optimization that allocates bonds to ensure the portfolio's yield and duration closely match those of the Parent Index. The Fund will hold an equal or higher allocation to Green Bonds relative to the Benchmark.

The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Fund takes explicitly into account the contribution of a company to the

United Nations Sustainable Development Goals (SDG). The Fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in the prospectus.

All currency risks are hedged.

Benchmark: FTSE EMU Broad Government Bond Index

Green Bonds are defined as debt instruments whose proceeds will be used for partial or full financing or pre-financing of new and/or existing projects that have a beneficial impact on the environment, and that pass the five-step analysis of Robeco's ESG Bond Framework. (<https://www.robeco.com/files/docm/docu-robeco-esg-bond-framework.pdf>).

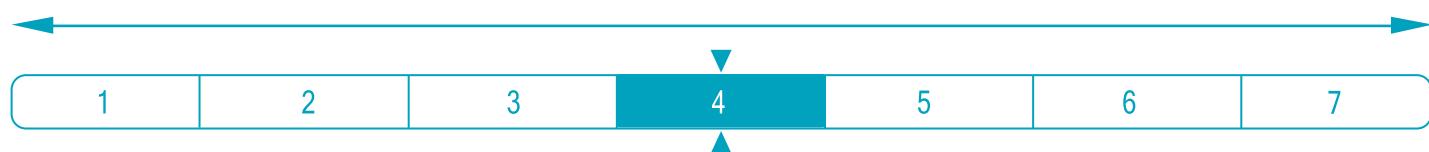

This share class of the fund does not distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

Lower risk - Typically lower rewards

Higher risk - Typically higher rewards

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

This fund invests primarily in government bonds. Sovereign risks are the main hazard when investing in this type of bonds. The fund may use derivatives to attain its investment objectives. These instruments may present a leverage effect, which will increase the sensitivity of the fund to market fluctuations.

The following risk considerations are deemed material for this fund, and are not (adequately)

reflected by the indicator:

- A derivative counterparty may fail to fulfil its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund is managed using quantitative models. Materialization of the model risk may be detrimental to fund performance.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.
- For more details about portfolio risks, see Section "Risk Factors" of the prospectus.

Charges

One-off charges taken before or after you invest

Entry charge*	None
Switch charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charges	0.12%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The charges are used to pay the costs of running the fund, including the costs of marketing and distributing. The charges reduce the potential growth of the investment.

The entry and exit charges shown are the maximum figures. Contact your financial advisor or distributor to find out the actual entry or exit charge.

*Dependent on the distribution channel, it is possible that additional costs are charged by the distributor.

Ongoing charges are based on the expenses for the last calendar year ended 31-12-2024. This figure may vary from year to year and does not include performance fees or transaction costs, except in the case of exit/entry charges paid by the UCITS when buying or selling units in another collective investment undertaking. For funds launched or for fee changes that are implemented during the current calendar year, the ongoing charge is estimated.

For more information on fees, charges and performance fee calculation methods we refer to section Fees and Expenses within the prospectus, available on the website: www.robeco.com
