Robeco Global Stars Equities Fund - EUR G ([NL0010366407](#))

Robeco Sustainable Global Stars Equities Fund - EUR G is a share class of Robeco Sustainable Global Stars Equities Fund N.V.

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco Global Stars Equities Fund N.V. is an actively managed fund that invests in liquid shares of companies listed on stock exchanges around the world, mainly in North America and developed countries in Europe, Oceania and Southeast Asia. In addition, there may be limited investments in liquid shares in companies in emerging markets. The Fund has a focused, concentrated portfolio with a small number of larger bets. Stock selection focuses on the shares of medium and large companies with the greatest growth potential. The Fund aims to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the MSCI World Index.

The fund aims for a better sustainability profile compared to the Benchmark by promoting certain E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrating sustainability risks in the investment process and applying Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, proxy voting, and aims for an improved environmental footprint.

The fund is allowed to pursue an active currency policy to generate extra returns and can engage

in currency hedging transactions.

Benchmark: MSCI World Index (Net Return, EUR)

The Fund does not use a Benchmark for its investment policy. The Fund is actively managed and uses the MSCI World Index for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Fund can deviate substantially from the weightings of the Benchmark. The Manager has discretion over the composition of the Portfolio subject to the Investment Guidelines. The MSCI World Index is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Fund.

This share class of the fund will distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Lower risk - Typically lower rewards

Higher risk - Typically higher rewards

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

The fund has a view on a specific segment of the equity market, which means that price movements of shares within this market segment tend to have a larger impact on the value of the fund. The fund may use financial derivatives.

The following risk considerations are deemed material for this fund, and are not (adequately)

reflected by the indicator:

- A derivative counterparty may fail to fulfil its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which could have a significant impact on the value of these assets.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.
