Subscriptions and publications

No subscription can be accepted on the basis of financial reports such as this report. Subscriptions may only be accepted on the basis of the current prospectus, supplemented by the Company's latest annual report, and in the event that the Company's annual report has been published more than eight months previously, its latest annual report. Financial reports, the prospectus and Key Investor Information Document are available in through the website www.robeco.com and may be obtained free of charge at the Company's registered office.

Representative and paying agent in Switzerland

ACOLIN Fund Services AG, Leutschenbachstrasse 50, CH-8050 Zürich, is the fund's representative in Switzerland. Copies of the Key Information Document and prospectus, articles of incorporation, annual reports and a list of all purchases and sales in the investment portfolio during the reporting period are available from the above address free of charge. UBS Switzerland A.G., Bahnhofstrasse 45, CH-8001 Zurich (Postal address Badenerstrasse 574, Postfach, CH-8098 Zürich) is the Company's paying agent in Switzerland.

Information service in Germany

Copies of the articles of incorporation, Key Information Document and prospectus and the annual and semi-annual reports may be obtained free of charge from the offices of the information service in Germany: Robeco Deutschland, Zweigniederlassung der Robeco Institutional Asset Management B.V., Taunusanlage 17, D-60325 Frankfurt am Main. The prices at which shares are issued and repurchased are published on www.robeco.de. A list of all purchases and sales in the Company's investment portfolio during the reporting period is available at the paying agent/information service in Germany free of charge.

Representative in Taiwan

Nomura Asset management Taiwan Ltd -30F, No.7, Sec. 5, Xinyi Road, Taipei 110, Taiwan.

Robeco

Where reference is made to 'Robeco', it should be read Robeco Institutional Asset Management B.V. including the activities of the other entities which are in the scope of Robeco's management.

Merger of J.P. Morgan Bank Luxembourg S.A.

As part of the implementation of the J.P. Morgan legal entity strategy within Europe, J.P. Morgan Bank Luxembourg S.A. merged into J.P. Morgan AG which at the same time changed its legal form from a German Stock Corporation (Aktiengesellschaft) to a European Company (Societas Europaea), being J.P. Morgan SE. As from 22 January 2022, J.P. Morgan SE, as the legal successor of J.P. Morgan Bank Luxembourg S.A., continued to act as Depositary through its Luxembourg Branch.

In the remainder of the report, including the notes to the Financial Statements, the new name ("J.P. Morgan SE") is used.

Report of the Board of Directors

General

Website

An information update on the fund's investment policies, returns and investment portfolio can be found on www.robeco.com/en/riam.

Code of conduct

The Board of Directors adheres to the 11 principles of the Association of the Luxembourg Fund Industry ("ALFI") Code of Conduct for Luxembourg investment funds and considers the Fund to be in compliance with the principles in all material respects.

Report of the Board of Directors (continued)

Report of the Investment manager

General market review

The year 2022 saw geopolitical upheaval joining elevated macro-economic volatility as the post-Covid economic boom came to an end. Emerging from the Covid pandemic on a strong footing early 2022, the global economy had to grapple with another major shock stemming from Russia's invasion of Ukraine on 24 February 2022. Consequently, the global economic business cycle transitioned from accelerated expansion into a broad based slowdown as rising energy prices dented consumer purchasing power and confidence. However, the nature and maturity of the slowdown showed regional divergencies. As China entered the year 2022, the slowdown was already well underway and the economy recovered as the country abandoned its zero Covid policy in the fourth quarter of 2022. In the US and Europe, the slowdown was in an early stage with both regions still enjoying unusually tight labor markets against a backdrop of resilient services activity by the end of 2022. Whereas the US and China were experiencing a classic boom-bust cycle, Europe was dealt a significant blow with Russian energy imports largely vanishing, resulting in spiking gas prices. Overall, global economic activity decelerated on the back of cooling manufacturing activity and goods based consumption, while demand for services was strong. The latest IMF projections indicate an annualized global real GDP growth to have decelerated from 6.0% in 2021 to 3.2% in 2022.

The year 2022 could be marked as a pivotal year that upended an era of low inflation in developed economies. Annual inflation in both the US and Europe accelerated to 8.6% by the end of June 2022 followed by a moderate easing in the second half for the US while Europe's inflation accelerated further. In the US, inflation declined to 7.7%, while Europe's inflation amounted to 10.1% by November. The highest inflation levels in 40 years in developed economies emerged as a result of a multiplicity of shocks. The unusual strong recovery in goods demand following the 2020 Covid recession (propelled by significant fiscal as well as monetary stimulus) and persisting supply constraints were aggravated by a major negative supply shock to commodities as Russian energy and wheat exports were impaired. The GSCI commodities total return index rose 34.2% in USD in 2022. All in all, these unanticipated shocks and their aftermath proved to have a large impact on inflation dynamics in 2022. Global core inflation, as measured by inflation excluding energy and food prices, gradually determined a larger share of the overall inflation picture as the year 2022 progressed, driven by rising rents, wages and lagged pass through of energy prices in services.

In response, central banks in developed economies embarked on an aggressive monetary tightening cycle in early 2022 to bring inflation back to target via demand destruction, following a similar tightening cycle initiated by emerging market central banks. Determined to contain inflation, the Fed raised policy rates from 0.25% to 4.5% during the year while also the ECB ended its negative policy rate regime and brought its policy rate to 2%. This pace of rate hikes has been unprecedented. Several leading inflation indicators have rolled over in the second half of 2022, hinting at fading supply and demand imbalances that initially spurred inflation. Attesting to central bank credibility in tackling inflation, long term inflation expectations have remained well behaved.

Except for cash and commodities, there were very few places to hide in 2022. Sovereign fixed income experienced the worst losses since the 19th century (global government bonds hedged to euro lost 14.1%) at a time when equity markets underwent a significant derating (the MSCI World hedged to euro shed 17.9%). The long standing TINA (there is no alternative for risky assets) narrative faltered as risk free assets started to offer competitive yields.

Risk Management

The presence of risks is inherent to the character of asset management. It is therefore very important to have a procedure for controlling these risks embedded in the company's day-to-day operations. The manager Robeco, ensures that risks are effectively controlled via the three lines model: Robeco management (first line), the Compliance and Risk Management departments (second line) and the Internal Audit department (third line).

The management of Robeco is primary responsible for risk management as part of its day-to-day activities. The Compliance and Risk Management departments develop and maintain policy, methods and systems that enable the management to fulfill their responsibilities relating to risk. Furthermore, portfolios are monitored by these departments to ensure that they remain within the investment restrictions under the Terms and Conditions for Management and Custody and the information memorandum, and to establish whether they comply with the internal guidelines. The Risk Management Committee decides how the risk-management policies are applied and monitors whether risks remain within the defined limits. The Group Internal Audit department carries out audits to assess the effectiveness of internal control.

Robeco uses a risk management and control framework that helps control all types of risk. Within this framework, risks are periodically identified and assessed as to their significance and materiality. Internal procedures and measures are focused on providing a structure to control both financial and operational risks. Management measures are included in the framework for each risk. Active monitoring is performed to establish the effectiveness of the procedures and measures of this framework.

Report of the Board of Directors (continued)

Risk Management (continued)

Operational risk

Operational risk is the risk of loss as a result of inadequate or failing processes, people or systems. Robeco constantly seeks opportunities to simplify processes and reduce complexity in order to mitigate operational risks. Robeco uses systems that can be seen as the market standard for financial institutions. The use of automation increases the IT risk. This risk can be divided into three categories. The risk that unauthorized persons gain access is managed by means of preventive and detective measures to control access to the network and to systems and data. Processes such as change management and operational management ensure monitoring of a working system landscape. Lastly, business continuity measures are in place to limit the risk of breakdown as far as possible and to restore operational effectiveness as soon as possible in the event of disaster. The effectiveness of these measures is tested regularly both internally and externally.

Compliance risk

Compliance & Integrity risks embody the risk of corporate and individual behaviour that leads to insufficient compliance with laws and regulations. Robeco's activities – collective and individual portfolio management – are subject to European and local rules of financial supervision. Observance of these rules is supervised by the national competent authorities (in the Netherlands the Authority for the Financial Markets, AFM and the Central Bank of the Netherlands, DNB and in Luxembourg the Commission de Surveillance du Secteur Financier, CSSF).

The past few years the level of regulation has increased consistently while the regulatory environment is evolving as well by moving from a principle-based to a more rule and evidence based environment. Robeco actively follows these regulatory developments and is in continuous effort to incorporate all regulatory changes to ensure compliance with rules and regulations. Robeco performs annual Systematic Integrity Risk Assessments (SIRAs) to further identify and assess compliance and integrity risks and the control measures that mitigate these risks. If needed, follow-up actions will be discussed with the business to further mitigate the integrity risks.

The new EU regulatory framework on sustainable finance, consisting of multiple pieces of legislation, including Sustainable Finance Disclosure Regulation (SFDR), Taxonomy Regulation and amendments to existing frameworks (including the UCITS Directive and AIFMD), introduced extended reporting and disclosures, aiming for increased comparability between sustainable funds and to avoid greenwashing. The framework also requires the integration of sustainability (risks) in the organization, governance, risk management and investment processes of Robeco. The requirements entered into force in 2021. In 2022 additional work has been undertaken to further implement the detailed SFDR Regulatory Technical Standards and Robeco disclosed the detailed sustainability related information of Robeco-managed funds, the so called article 6, 8, 9 disclosures.

Furthermore, Robeco implemented the new Key Investor Document for its funds offered to retail clients in line with the Packaged Retail Investment & Insurance -based Products (PRIIPs) which entered into force as of 1 January 2023.

Developments Financial Risk Management

Robeco has been continuously working to further enhance its risk management methodologies, infrastructure and processes.

To further improve the risk infrastructure and the storage of risk data, the risk Datawarehouse is being improved. Development of the Datawarehouse takes place in close cooperation with MSCI, as the vendor of our risk management platform. A more centralized storage of risk data allows for improved operational efficiency throughout the company.

In 2022, sustainability risk framework is enhanced and it was ensured that this is reflected in all external documentation. The sustainability risk policy describes sustainability risk limits and controls, and the way in which any possible risk exceedances are addressed. The Sustainability Risk Policy is fully aligned with the Sustainable Financial Disclosure Regulation (SFDR). Alongside, the monitoring of sustainability risks in the product range of Robeco was expanded. This includes a dashboard to identify outliers and the enhancement and expansion of our climate risk scenarios.

Global Equity sub-funds (continued)

Performance analysis

Robeco BP Global Premium Equities

Over the reporting period, Robeco BP Global Premium Equities generated a return of 3.3% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

The sub-fund outperformed the benchmark by a wide margin during a year in which global markets struggled. Driven primarily by stock selection, performance was strong across nearly all sectors, with all but two adding value for the year. Healthcare and communication services were the primary drivers of performance within stock selection, with consumer staples and utilities detracting slightly. Sector allocation also contributed meaningfully to outperformance, with the sub-fund's overweight to both energy and healthcare driving outperformance. Detractions in sector allocation came in consumer staples and utilities as well.

With respect to sustainability investing, the investment process qualitatively captures a range of ESG issues which directly and indirectly affect our decision-making during the course of the characteristics-based investment process.

Robeco QI Global Conservative Equities

Over the reporting period, Robeco QI Global Conservative Equities generated a return of -2.4% (gross of fees in EUR), against a return of -13.0% for its reference index, the MSCI All Country World Index (net return in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The principal objective of the sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund outperformed its reference index in 2022. The low risk, value and momentum factor contributed positively to relative performance. The risk profile of the sub-fund, as measured by volatility, was lower than that of the index.

Robeco Sustainable Global Stars Equities

Over the reporting period, Robeco Sustainable Global Stars Equities generated a return of -14.2% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

In 2022, the portfolio had a negative relative performance versus the benchmark. Strong stock-picking in the sectors of healthcare (Eli Lilly, AstraZeneca, UnitedHealth, Elevance Health) and technology (Aspen Tech, Visa) were offset by weaker stock selection in financials (Capital One), and materials (Crown Holdings). Even though Cheniere Energy was the top contributor over 2022, it was not enough to offset the strong performances of other energy names in the sector, in which the sub-fund does not hold any positions due to ESG considerations. Good sector allocation to healthcare and energy contributed to performance, while the reverse was true in the consumer staples and technology sectors. In general, 2022 proved to be a challenging year for sustainability funds, especially given the investment limitations in areas such as aerospace & defense, tobacco and energy which all enjoyed good relative performances during the year. Little to no exposure to such areas detracted from performance over the course of 2022. During the reporting period, the overall sustainability profile of the sub-fund was improved further by focusing on material information with regard to ESG factors. Furthermore, over half of our holdings under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to ESG issues. In addition, the environmental profile of the sub-fund in terms of water use, waste generation and greenhouse gas emissions of the sub-fund remained well below that of the benchmark. The sub-fund has an environmental profile that is more than 60% better than the benchmark average.

Robeco Emerging Stars Equities

Over the reporting period, Robeco Emerging Stars Equities generated a return of -14.8% (gross of fees in EUR), against a return of -14.9% for its reference index, the MSCI Emerging Markets Index (net return in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

Stock selection in China was the largest positive contributor to the relative return, while stock selection in South Africa, South Korea, Mexico and the UAE also contributed positively. The largest negative contributors were the overweight positions in Russia, South Korea, Vietnam and Hungary, and the underweight positions in India and the Middle East. The largest portfolio change during 2022 was the fall in Russia's weight, partly due to selling the position in Sberbank and partly due to the devaluation of all Russian securities to zero value after the start of the Russia-Ukraine war. Weights were increased for Brazil and Thailand and a new position was bought in Poland. ESG factors are fully integrated in the investment process, while the sub-fund limits investments in companies with an elevated sustainability risk profile. Through engagement the goal is to improve the sustainability profile of the companies in which we invest.

Performance analysis (continued)

Robeco Emerging Markets Equities

Over the reporting period, Robeco Emerging Markets Equities generated a return of -15.2% (gross of fees in EUR), against a return of -14.9% for its benchmark, the MSCI Emerging Markets Index (net return in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

Stock selection in China was the largest positive contributor to the relative return, while stock selection in India, South Korea, Mexico and the UAE also contributed positively. The largest negative contributors were the overweight positions in South Korea, Vietnam and Hungary, and the underweight positions in India and the Middle East. The largest portfolio change during 2022 was the fall in Russia's weight, partly due to selling the position in several names and partly due to the devaluation of all Russian securities to zero value after the start of the Russia-Ukraine war. Weights were increased for Brazil and Thailand and new positions were bought in Chile, Poland, UAE and Vietnam. ESG factors are fully integrated in the investment process while the sub-fund limits investments in companies with an elevated sustainability risk profile. Through engagement the goal is to improve the sustainability profile of the companies in which we invest.

Robeco QI Emerging Markets Active Equities

Over the reporting period, Robeco QI Emerging Markets Active Equities generated a return of -11.5% (gross of fees in EUR), against a return of -14.9% for its reference index, the MSCI Emerging Markets Index (net return in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The investment objective of the sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value and analyst revisions factors contributed positively to relative performance. The quality and momentum factors had a negative contribution to the sub-fund's relative performance. The volatility of the sub-fund was higher than that of the reference index, with a medium level of active risk.

Robeco QI Global Developed Sustainable Enhanced Index Equities

Over the reporting period, Robeco QI Global Developed Sustainable Enhanced Index Equities generated a return of -12.9% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World (net return in EUR).

The investment objective of the sub-fund is to outperform its reference index with the aid of a quantitative stock selection model with an improved sustainability profile. Using a combination of factors (value, quality, momentum, analyst revisions and sustainability), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was negative. The value and quality factors contributed positively to relative performance. Exposures to momentum, analyst revisions and sustainability contributed negatively to the sub-fund's relative performance. The volatility of the sub-fund was in line with that of the reference index, with a low level of active risk.

Robeco QI Emerging Conservative Equities

Over the reporting period, Robeco QI Emerging Conservative Equities generated a return of -12.3% (gross of fees in USD), against a return of -20.1% for its reference index, the MSCI Emerging Markets Index (net return in USD). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The principal objective of the sub-fund is to achieve a optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund outperformed its reference index in 2022. The low risk, value and momentum factor contributed positively to relative performance. The risk profile of the sub-fund, as measured by volatility, was lower than that of the index.

Robeco QI Global Value Equities

Over the reporting period, Robeco QI Global Value Equities generated a return of -3.2% (gross of fees in EUR), against a return of -13.0% for its reference index, the MSCI All Countries World (net return in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The sub-fund outperformed the reference index in 2022. The value factor had a positive contribution to relative performance, as did the momentum factor. The quality factor had a negative contribution to relative performance; the exposure to low risk had a neutral contribution. The risk profile of the sub-fund, as measured by volatility, was lower than that of the reference index.

Report of the Board of Directors (continued)

Performance analysis (continued)

Robeco QI Global Developed Multi-Factor Equities

Over the reporting period, Robeco QI Global Developed Multi-Factor Equities generated a return of -6.3% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World (net return in EUR).

The sub-fund outperformed the reference index in 2022. The value, low-risk and quality exposures contributed positively to relative performance. The exposure to momentum had a negative contribution to relative performance. The risk profile of the sub-fund, as measured by volatility, was lower than that of the reference index.

Robeco QI Emerging Markets Sustainable Active Equities

Over the reporting period, Robeco QI Emerging Markets Sustainable Active Equities generated a return of -12.1% (gross of fees in EUR), against a return of -14.9% for its reference index, the MSCI Emerging Markets Index (net return in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The investment objective of the sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive.

The value, momentum, quality and analyst revisions factors contributed positively to relative performance. The exposure to sustainability contributed negatively to the sub-fund's relative performance. The volatility of the sub-fund was higher than that of the reference index, with a medium level of active risk.

Robeco QI Global Developed Conservative Equities

Over the reporting period, Robeco QI Global Developed Conservative Equities generated a return of -1.5% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

The principal objective of the sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund outperformed its reference index in 2022. The low risk, value and momentum factor contributed positively to relative performance. The risk profile of the sub-fund, as measured by volatility, was lower than that of the index.

Robeco QI Global Developed Enhanced Index Equities

Over the reporting period, Robeco QI Global Developed Enhanced Index Equities generated a return of -11.0% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

The investment objective of the sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value and quality factors contributed positively to relative performance. The momentum and analyst revisions factors had a negative contribution to the sub-fund's relative performance. The volatility of the sub-fund was lower than that of the reference index, with a low level of active risk.

Robeco QI Emerging Markets Sustainable Enhanced Index Equities

Over the reporting period, Robeco QI Emerging Markets Sustainable Enhanced Index Equities generated a return of -19.6% (gross of fees in USD), against a return of -20.1% for its reference index, the MSCI Emerging Markets Index (net return in USD). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The investment objective of the sub-fund is to outperform its reference index with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value, quality and analyst revisions factors contributed positively to relative performance. The exposure to momentum and sustainability contributed negatively to the sub-fund's relative performance. The volatility of the sub-fund was lower than that of the reference index, with a medium level of active risk.

RobecoSAM Global SDG Equities

Over the reporting period, the RobecoSAM Global SDG Equities generated a return of -12.4% (gross of fees in EUR) against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

The main reason for the outperformance came from positive stock selection and the lower risk profile of the sub-fund versus the overall market, with a beta of around 0.9. A negative contribution was made by the large underweight position of the sub-fund in energy as well as metals and mining names which are considered to have a negative or too low positive contribution to the sustainable development goals. Stock selection was particularly strong within the consumer discretionary, healthcare and financials sectors. This was offset somewhat by weaker contribution from stock picking in the materials, consumer staples and industrials sectors.

Report of the Board of Directors (continued)

Global Equity sub-funds (continued)

Performance analysis (continued)

RobecoSAM Global SDG Equities (continued)

The sub-fund focuses on companies that generate a positive social/environmental impact by contributing to the achievement of the UN SDGs. The companies eligible for the sub-fund are selected using Robeco's proprietary SDG framework and are considered to contribute strongly to one or more of the SDGs, without doing significant harm to any of the others.

RobecoSAM Global SDG Engagement Equities

Over the reporting period, RobecoSAM Global SDG Engagement Equities generated a return of -18.6% (gross of fees in EUR), against a return of -13.0% for its reference index, the MSCI All Country World Index (net return in EUR).

The sub-fund underperformed the benchmark over the reporting period, mainly due to negative results from stock-picking in the financials, communication services and the consumer sectors. The sub-fund suffered from weak stock-picking in financials driven by rising rates and a negative yield curve as central banks continued to tighten monetary policy, while the global economic growth outlook continued to worsen significantly. Digital advertisement names suffered from a tightening regulatory stance, as well as from a weaker overall advertisement environment due to high inflation and weakening consumer spending. The sub-fund benefited from good stock selection in the materials and healthcare sector, where commodities and relatively defensive pharmaceutical and exposure to the medical care operators helped performance.

The sub-fund invests in high quality companies where engagement can add value by communicating with the companies in the portfolio to improve their policies with regards to on one or more of the UN SDGs. The goal is to achieve all of the targets set forth by the United Nations by 2030. The sub-fund supports a better overall sustainability profile than the benchmark and has a lower environmental footprint versus the MSCI World Index.

RobecoSAM QI Global SDG & Climate Beta Equities

Over the reporting period, RobecoSAM QI Global SDG & Climate Beta Equities generated a return of -13.8% (gross of fees in EUR), against a return of -13.0% for its reference index, MSCI All Country World Index (net return in euros). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value

The sub-fund aims to advance the United Nations Sustainable Development Goals (UN SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs, and aims to reduce the carbon footprint of the portfolio and thereby contribute towards the goals of the Paris Agreement to keeping the maximum global temperature rise to well below 2°C above pre-industrial temperatures.

Robeco Quantum Equities

Over the reporting period, Robeco Quantum Equities generated a return of -5.5% (gross of fees in EUR), against a return of -5.3% for its reference index, the MSCI World Index (net return in EUR).

As the sub-fund was launched by the end of 2022, no attribution is given for the different performance drivers is given for this period.

Regional & Country Equity sub-funds (continued)

Performance analysis

Robeco Asia-Pacific Equities

Over the reporting period, Robeco Asia-Pacific Equities generated a return of -5.1% (gross of fees in EUR), against a return of -11.8% for its reference index, the MSCI AC Asia Pacific (net return in EUR).

The sub-fund generated solid relative performance in 2022 owing to strong selection and an avoidance of overvalued stocks and sectors. Many names derated in the internet related business areas where the sub-fund had minimal exposure. Healthcare was another significant contributor owing to strong bottom up stock selection in Japan. Lack of exposure in the defensive utilities sector however did detract. From a country perspective almost all countries contributed positively, with a few minor detractors. Japan, China and Singapore were the standouts for alpha generation. From a stock perspective, Japanese financial names Sumitomo Mitsui Financial Group (SMFG) and T&D were top contributors, as was Swire Pacific in Hong Kong. The sub-funds underweight in Taiwan Semiconductors Manufacturing (TSMC) also helped as high historical valuations reverted on declining demand. Z Holdings, a Japanese technology holding company suffered de-rating in the general tech malaise as did Taiwanese wafer company Global Wafers.

We have continued to engage with companies on more transparency particularly on environmental data. We find quite a collaborative attitude from many companies in the region and have taken a stronger initiative with institutions with the addition of engagement and SI analysts based in the region. The sub-fund limits investments in companies with an elevated sustainability risk profile and takes sustainability risks into account in company valuations, but the focus is on engagement and improvement rather than exclusion.

Robeco Sustainable European Stars Equities

Over the reporting period, Robeco Sustainable European Stars Equities generated a return of -10.5% (gross of fees in EUR), against a return of -9.5% for its reference index, the MSCI Europe Index (net return in EUR). Despite a high active share of around 80%, the sub-fund's risk was lower compared to the index. The tracking error remained at around 4%.

This underperformance is the result of the rally in energy, commodity and defense related stocks in which the strategy does not have material exposure due to its ESG focus. The allocation effect was larger than the positive selection effect. The energy, industrials and materials sector thus detracted from the relative performance only partly offset by strong relative returns in financials, communication services and consumer discretionary.

As the strategy seeks to have a lower environmental footprint and a better ESG risk rating (using Sustainalytics ESG Risk Score) than the benchmark, investment decisions are considering the effect of adding or exiting positions on these KPIs, related to the environmental footprint and the ESG risk rating. Consequently, the strategy's carbon (Scope 1 and 2), water and waste footprint are materially lower and the aggregate ESG risk rating better than that of the benchmark.

Robeco QI European Active Equities (formerly Robeco QI European Conservative Equities)

Over the reporting period, Robeco QI European Conservative Equities generated a return of -10.3% (gross of fees in EUR), against a return of -9.5% for its reference index, the MSCI Europe Index (net return in EUR).

The principal objective of the sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund underperformed its reference index in 2022. The low risk factor contributed negatively to relative performance. The value and momentum factors contributed positively to relative performance. The risk profile of the sub-fund, as measured by volatility, was lower than that of the index.

Robeco QI US Conservative Equities

Over the reporting period, Robeco QI US Conservative Equities generated a return of -6.6% (gross of fees in USD), against a return of -19.5% for its reference index, the MSCI North America Index (net return in USD).

The principal objective of the sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund outperformed its reference index in 2022. The low risk, value and momentum factor contributed positively to relative performance. The risk profile of the sub-fund, as measured by volatility, was lower than that of the index.

Robeco BP US Premium Equities

Over the reporting period, Robeco BP US Premium Equities generated a return of -2.4% (gross of fees in USD), against a return of -8.0% for its reference index, the Russell 3000 Value Index (gross return in USD).

The sub-fund outperformed the benchmark for the year with stock selection the driving outperformance, while sector allocation ended flat for the year. Stock selection in financials, healthcare and information technology added meaningfully, leading outperformance for the year. Sector allocation was supported by the sub-fund's continued lack of exposure in real estate and underweight allocation to communication services while an overweight allocation to information technology and an underweight to consumer staples detracted slightly.

Report of the Board of Directors (continued)

Regional & Country Equity sub-funds (continued)

Performance analysis (continued)

Robeco BP US Premium Equities (continued)

With respect to sustainable investing, we qualitatively capture a range of ESG issues which directly and indirectly affect our decision-making during the course of our characteristics-based investment process.

Robeco Chinese Equities

Over the reporting period, Robeco Chinese Equities generated a return of -25.1% (gross of fees in EUR), against a return of -16.4% for its reference index, the MSCI China 10/40 (net return in EUR).

The Chinese equities market had another volatile year in 2022. Outlooks on China's macro and corporate earnings fluctuated violently due to uncertainty regarding the country's pandemic policies and political transition. Geopolitics and a sharp increase in the US Fed rate added to the complexity. The sub-fund underperformed the MSCI China 10/40 Index. While we aimed for a barbell strategy by owning defensives and companies with non-China exposures, their outperformance was not enough to offset the negatives from the growth names. The internet and consumer sectors were very volatile and we did not capture the opportunities well. Our overweight in the property sector contributed most positively, as we were right to position for policy easing. The sub-fund has integrated ESG factors in the investment process and maintains our exposure in alternative energy and Electric Vehicles (EV). The sub-fund continued to focus on three long-term structural growth themes: consumption upgrade, technology innovation and structural reforms.

Robeco Indian Equities

Over the reporting period, the sub-fund generated a return of -2.2% (gross of fees in EUR), against a return of -1.9% for its reference index, the MSCI India Index (net return in EUR).

Utilities, consumer discretionary and industrials detracted from performance during the year. A large underweight in utilities impaired portfolio performance, due to sharp outperformance of the Adani group stocks, where we do not have any exposure due to governance and balance sheet reasons. Export-oriented exposure within the consumer discretionary sector – a large overweight – also detracted from performance.

Performance was aided by financials, real estate and information technology sectors. Within these sectors, stock selection was a primary driver of the performance. The financial services sector was the best performer, aided primarily by stock selection.

Apart from exclusions of weapons, tobacco and coal utility companies, the sub-fund's ESG focus stresses integration, focusing on key sustainability parameters and how these impact companies' income statements through both risk and opportunity factors.

The sub-fund's ESG lens puts emphasis on companies that practice good governance, and which have articulated a coherent strategy on moving towards decarbonization. Where needed, we have consciously engaged with the companies to understand how they are handling issues which had been highlighted using sustainability and governance criteria.

Robeco Asian Stars Equities

Over the reporting period, Robeco Asian Stars Equities generated a return of -12.7% (gross of fees in USD), against a return of -19.7% for its reference index, the MSCI All Country Asia ex Japan (net return in USD).

The sub-fund invests in value stocks with a healthy future while maintaining positive earnings and price momentum. It is a high-conviction strategy with a concentrated portfolio of 43 stocks. This strategy delivered strong relative returns in Asian markets. Solid stock selection in China and Indonesia was the main driver of performance in 2022. Avoiding expensive stocks with high expectations worked well in China for most of the year, up until the country abandoned its strict zero-Covid policy abruptly in November. ESG integration continues to play an important role in the investment cases. Conversations with Asian companies on ESG topics appear to be much more positively accepted. The sub-fund limits investments in companies with an elevated sustainability risk profile.

Robeco Sustainable Asian Stars Equities

Over the reporting period, Robeco Sustainable Asian Stars Equities generated a return of -17.6% (gross of fees in USD), against a return of -19.7% for its reference index, the MSCI All Country Asia ex Japan (net return in USD).

The sub-fund invests in underappreciated beneficiaries of the Asian pivot towards a sustainable future. It is a high-conviction strategy with a concentrated portfolio of 46 stocks, has a good sustainability profile and maintained an excellent carbon footprint ownership of 70% below benchmark in 2022. The strategy delivered positive relative returns in Asian markets. Stocks within the financial inclusion & fintech and healthy living themes drove positive performance, as did little exposure to overvalued growth stocks in internet, EV and solar supply chain. Although technology is a structural driver of Asia's sustainability transition, in 2022 the sector saw sharp earnings cuts and valuation compression. Sustainability is integrated in the entire investment process of the sub-fund from stock selection to portfolio construction. A thematic approach highlights the drivers of sustainable development in the region. New climate and gender equality engagements, as well as conversations with portfolio companies, aim to push for more achievement on sustainability improvements in Asia.

Performance analysis (continued)

Robeco BP US Large Cap Equities

Over the reporting period, Robeco BP US Large Cap Equities generated a return of -4.6 % (gross of fees in USD), against a return of -7.5% for its reference index, the Russell 1000 Value Index (gross return in USD).

The sub-fund outperformed the benchmark for the year as markets were roiled by a tumultuous year of macro-economic pressures. The sub-fund added value through a variety of sectors, with sector allocation and stock selection both contributing to outperformance for the year and sector allocation driving performance. Within sector allocation, the sub-fund's overweight allocation to energy and continued underweight allocation to real estate drove outperformance. From a stock selection perspective, fund positions in financials and consumer discretionary added the most to fund outperformance.

With respect to sustainable investing, we qualitatively capture a range of ESG issues which directly and indirectly affect our decision-making during the course of our characteristics-based investment process.

Robeco BP US Select Opportunities Equities

Over the reporting period, Robeco BP US Select Opportunities Equities generated a return of -6.7% (gross of fees in USD), against a return of -12.0% for its reference index, the Russell Mid Cap Value index (gross return in USD).

The sub-fund outperformed the benchmark for the year by a wide margin as global markets suffered a tumultuous year following a variety of macro-economic pressures. Both stock selection and sector allocation contributed meaningfully to outperformance, with stock selection driving outperformance for the year. Within stock selection, sub-fund holdings in financials and consumer discretionary nearly doubled the performance of benchmark positions, driving outperformance. In sector allocation, the sub-fund's overweight allocation to energy fueled outperformance, with an underweight allocation to communication services also contributing.

With respect to sustainable investing, we qualitatively capture a range of ESG issues which directly and indirectly affect our decision-making during the course of our characteristics-based investment process.

Robeco Chinese A-share Equities

Over the reporting period, Robeco Chinese A-share Equities generated a return of -27.6% (gross of fees in EUR), against a return of -20.9% for its reference index, the MSCI China A International Index (net returns in EUR).

The China A shares market had a very volatile 2022. The market declined sharply due to the onset of the Russia-Ukraine war, which was exacerbated when Shanghai was locked down amid the Omicron outbreak in April. After the reopening of Shanghai, the market rebounded gradually. In July, the market corrected sharply again due to concerns on China's property sector, led by mortgage payment boycott from homeowners. After the 20th Party Congress in October, the market dropped as investors worried China could shift away from growth with the political power consolidation. However, in November, the market rebounded quickly on reopening hopes after China made a dramatic U-turn by abandoning its zero-Covid policy.

The Chinese A shares Equities strategy underperformed its index. The focus on theme such as technology and innovation, in particular the information technology sector, performed. Real estate quality leaders performed as they were more resilient in the downturn. Healthcare and consumer names were the main detractors as these were disrupted by Covid lockdowns. Renewable energy names underperformed due to elevated material cost issues. ESG integration is fully incorporated in our investment process and the sub-fund maintained a better Sustainability risk score than the reference index and has a Febelfin label.

Robeco QI Chinese A-share Conservative Equities

Over the reporting period, Robeco QI Chinese A-share Conservative Equities generated a return of -6.7% (gross of fees in EUR), against a return of -20.9% for its reference index, the MSCI China A International Index (net returns in EUR).

The principal objective of the sub-fund is to achieve an optimal relationship between absolute return and absolute risk. Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund outperformed its reference index in 2022. The low risk factor contributed positively to relative performance, the value factor as well. The momentum factor contributed negatively to relative performance. The risk profile of the sub-fund, as measured by volatility, was lower than that of the index.

Performance analysis

Robeco New World Financials

Over the reporting period, Robeco New World Financials generated a return of -14.0% (gross of fees in euros) against a return of -3.9% for the benchmark, the MSCI All Country World Financials Index (net return in euros). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The sub-fund underperformed the benchmark during the reporting period. With the continued rise in global interest rates, the market rotation away from growth stocks that started in Q4 2021 and continued in 2022, especially in the first half of the year. In this environment, our digital finance stocks continued to derate and despite de-risking measures caused the bulk of the underperformance. The valuation write-off of our Russia exposure in view of the sanctions undermined our emerging finance attribution, which for the rest was strong. Aging finance stock picking was strong too as many of our insurance holdings rallied.

The sub-fund systematically integrates ESG factors into the investment process and excludes the 10% worst-scoring companies from an ESG risk perspective. More attention is also given to corporate governance and to the climate, while actively engaging with invested companies. Post-pandemic we have seen profound behavioral changes which benefit digitally native companies. Especially in emerging markets we have seen a mobile-only wave of consumers coming online for the first time, leapfrogging bricks and mortar infrastructure, promoting efficiency and inclusion.

Robeco Sustainable Property Equities

Over the reporting period, Robeco Sustainable Property Equities generated a return of -20.6% (gross of fees in EUR), against a return of -20.1% for its reference index, the S&P Developed Property Index (net return in EUR).

High inflation, rising (real) interest rates and the re-open theme were important factors behind performance differences between regions and sectors in 2022. The post-Covid reopening was a theme in most Asian countries in the first half year. Europe significantly underperformed as the continent's real estate companies rank among the highest in terms of financial leverage ratios.

The sub-fund underperformed the benchmark driven mainly by negative stock selection in the US and partly offset by positive stock selection in Europe and Asia/Pacific (ex-Japan). Except for the prime retail trend, the three other trends, prime office, proptech and lifestyle, made a positive performance attribution. While fundamentals remain supportive for property stocks, financing costs are rising. This will affect the investment market and in particular the pricing of lower quality assets. The sector's implied yield has risen between 50-100 basis points and offers an attractive entry point and particular in a low-growth, high-inflation environment.

The sub-fund integrates ESG factors (RobecoSAM, Sustainalytics, GRESB) into its investment process and actively monitors and engages companies on GHG emissions. The sub-fund has a better ESG score and actively steers on a carbon intensity below the benchmark average. In addition, the sub-fund limits investments in companies with an elevated sustainability risk profile.

Robeco Global Consumer Trends

Over the reporting period, Robeco Global Consumer Trends generated a return of -32.1% (gross of fees in EUR), against a return of -13.0% for its reference index, the MSCI All Country World Index (net return in EUR).

Global bond and equity markets showed negative returns during 2022, as the rising inflation numbers caused all central banks to sharply raise interest rates. These sharply rising interest rates caused a derating of the broader equity market and more prominently in growth stocks. The strategy's high exposure to these growth stocks was an important reason for the lagging performance versus the reference index. Both the higher growth digital transformation trend as well as the defensive health & wellbeing trend lagged the overall market, given their above-average valuation at start of the year. Many digital companies had a large growth slowdown during 2022 from the high growth rates in the Covid period and impact of slowing economy, which pressured their share prices.

Our strategy has integrated ESG factors in its investment process by adhering to our binding elements like limiting exposure to elevated risk investments, voting in line with Robeco's Proxy Voting Policy and complying with Robeco's exclusion policy.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

Robeco MegaTrends

Over the reporting period, Robeco MegaTrends generated a return of -27.7% (gross of fees in EUR), against a return of -13.0% for its reference index, the MSCI All Country World Index (net return in EUR).

Driven by persistent supply-chain issues and the effects from the Russia-Ukraine war, inflation continued its upward trajectory in 2022. Central banks around the world reacted with a series of rate hikes to fight these rising prices. Tighter monetary policies, combined with persistently high inflation, made the market wary of an economic slowdown, potentially even a recession. The continued rise in interest rates and bond yields also prolonged the growth-to-value rotation that had started in the fourth quarter of 2021.

All five trends that the sub-fund distinguishes registered significant declines over the year. Healthy Aging and Connected Enterprise were the best-performing trends (both down 25%, all performances measured in EUR), while Digital World and the new Resource Stewardship fell 36%, with Emerging Middleclass in the middle. Resource Stewardship tries to capitalize on the growing need for improving our use of energy and natural resources to lower humankind's ecological footprint and was added at the start of 2022. PT Bank Rakyat, Informa and Visa contributed most to performance, while big tech companies Amazon, Taiwan Semiconductor Manufacturing and Alphabet detracted the most.

With respect to sustainable investing, the sub-fund uses insights from both RobecoSAM and Sustainalytics in its investment process. The sub-fund limits investments in companies with an elevated sustainability risk profile and at the end of December, the ESG risk score for the portfolio ("low") was substantially lower than that of the reference index ("medium").

Robeco Digital Innovations

Over the reporting period, Robeco Digital Innovations generated a return of -26.4% (gross of fees in EUR), against a return of -13.0% for its reference index, the MSCI All Country World Index (net return in EUR).

While the digital transformation of the business world, the overarching investment theme of the sub-fund, remains very much on track, investment performance suffered from the one-two-punch of a broad selloff in growth stocks caused by spiking interest rates, and a selloff in cyclical stocks in anticipation of an economic slowdown. All three trends posted negative returns and lagged the reference index. During the reporting period, the sub-fund's managers continued to implement their long-standing strategy of gradually increasing the portfolio weight of software- versus hardware-based businesses, as long-term economic value creation is concentrated in software-based companies. In view of the volatile market conditions, trading activity was kept to a minimum.

With respect to sustainable investing, the sub-fund uses insights from both internal and outside SI specialists its investment process. The sub-fund limits investments in companies with an elevated sustainability risk profile and at the end of December, the ESG risk score for the portfolio ("low") was substantially lower than that of the reference index ("medium").

Robeco FinTech

Over the reporting period, the sub-fund generated a return of -34.6% (gross of fees in euros) against a return of -13.0% for its reference index, the MSCI All Country World Index (net return in euros). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

In 2022 the Federal Reserve increased policy rates by 425 bps leading to a much higher discount rate. Clearly this had an impact on FinTech stocks. The purest exposures in FinTech are high long-term revenue growth businesses, building their business disrupting the financial industry. We are focused on profitable long-term growth. Most of the high-growth investments are captured in the Challengers category which contributed most negatively to performance, though Enablers and Winners were also negative performance contributors. Looking at our investment universe, our investments in payments had the highest weight and the largest negative contribution. Data analytics was the best relative performer, especially in second half of the year when it started to contribute positively to performance. Our investments in financial management and financial infrastructure are very important in terms of improving financial inclusion, as unbanked people in emerging markets are financially enabled by our invested companies. Digital assets went through a year of the so-called crypto winter and better regulation should help to institutionalize this segment. After solid returns in 2020 and most of 2021, fintech valuation levels are now close to the lows of March 2020. We believe the growth prospects remain promising, driven by trends such as financial inclusion, digitization and embedded finance.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

Robeco FinTech (continued)

The sub-fund systematically integrates ESG factors in a disciplined investment process, with more attention going to corporate governance and the climate.

RobecoSAM Circular Economy Equities

Over the reporting period, RobecoSAM Circular Economy Equities generated a return of -18.7% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

Over the full year of 2022, the sub-fund outperformed its investable universe, but lagged broader global markets. This was largely due to the sub-fund's thematic sector exposure, which was not neutralized by the positive contribution of individual stock selection. The best performing area in 2022 encompassed waste managers, which benefited from their defensive nature, and maintenance, repair and operations distribution and service providers, which offered an alternative in the face of supply chain challenges.

The sub-fund has the following sustainable investment objective: to finance solutions that support the transition from traditional production and consumption patterns toward a circular economy. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Among others, the sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

RobecoSAM Smart Energy Equities

Over the reporting period, RobecoSAM Smart Energy Equities generated a return of -15.0% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

Performance in 2022 was below the global equity markets but substantially above the investable universe. The renewable energy cluster was by far the strongest cluster in 2022, driven by very strong returns from the solar companies. Solar sector demand in Europe increased on the back of the heavily rising electricity price and the urgent need to become more energy independent, whereas US companies benefited from the improved growth outlook given the newly passed Inflation Reduction Act. Furthermore, electric network companies benefited from the networks' defensive characteristics, as they are remunerated from their regulated asset base and often have inflation protection built into their tariff framework.

The sub-fund has the following sustainable investment objective: to further the transformation and decarbonization of the global energy sector. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Among others, the sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

RobecoSAM Smart Materials Equities

Over the reporting period, RobecoSAM Smart Materials Equities generated a return of -19.9% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

The sub-fund underperformed the reference index in 2022, affected by inflationary pressures, recession fears, supply chain issues and disruptions from the Russia-Ukraine war.

The end-of-year relative recovery was driven by strong performance from advanced materials, especially efficient building materials, as energy-intensive European producer prices recovered following the decline in gas and electricity prices. On the other hand, bio-based materials closed the year with a negative contribution to performance on the back of lowering lithium price expectations after the 2022 rally.

The sub-fund has the following sustainable investment objective: to help mitigate the resource scarcity challenge within industries while supporting economic growth. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Among others, the sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

RobecoSAM Smart Mobility Equities

Over the reporting period, RobecoSAM Smart Mobility Equities generated a return of -20.8% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

The sub-fund underperformed the reference index in 2022, strongly impacted by the effect of the Russia-Ukraine war on already tight energy and commodity markets. 2022 highlighted the relative opportunities afforded by automotive end-markets for semiconductor companies, as the Covid-era consumer electronics boom drew to a close. The highest positive contribution to performance came from battery companies, where the upstream part of the value chain benefited from a strong first quarter increase in raw material prices (due to growing Electrical Vehicles demand and Russia's nickel market issues). After first quarter, most prices stabilized, except for lithium, which doubled in first half of the year 2022 and continued to rise in second half of the year 2022.

The sub-fund has the following sustainable investment objective: to support the transformation and decarbonization of the global transportation sector. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Among others, the sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

RobecoSAM Sustainable Healthy Living Equities

Over the reporting period, RobecoSAM Sustainable Healthy Living Equities generated a return of -14.2% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

Over the full year of 2022, the sub-fund mostly lagged broader global markets. This was largely influenced by the sub-fund's thematic sector exposure – for example, the absence of such sectors as Energy, which strongly outperformed in 2022. Additionally, a large portion of sub-fund's holdings have Consumer Discretionary characteristics, which underperformed in an environment of declining economic growth expectations. Furthermore, 2022 saw a remarkable market rotation from growth to value stocks, which negatively impacted performance given the sub-fund's preference for growth investments.

The sub-fund has the following sustainable investment objective: to promote good health and well-being and contributing to an efficient healthcare system. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Among others, the sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

RobecoSAM Sustainable Water Equities

Over the reporting period, RobecoSAM Sustainable Water Equities generated a return of -20.2% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

Over the full year of 2022, the sub-fund mostly lagged broader global markets. This was largely due to the sub-fund's thematic sector exposure, which was not neutralized by the positive contribution of individual stock selection. Some of the major sectors and sub-sectors held in the water fund underperformed, like water-related building materials and other industrials, often without negative news but rather driven by macro-economic related fears. Building materials, especially the residential construction-related ones, were weaker due to fears about increasing interest rates and commodity pricing which might impact purchases by private individuals however were nevertheless maintained in the sub-fund thanks to relatively attractive valuations.

The sub-fund has the following sustainable investment objective: to help mitigate the global challenges related to scarcity, quality, and allocation of water. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Among others, the sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

Report of the Board of Directors (continued)

Theme Equity sub-funds (continued)

Performance analysis (continued)

RobecoSAM Global Gender Equality Equities

Over the reporting period, the sub-fund generated a return of -16.9% (gross of fees in EUR), against a return of -12.8% for its reference index, the MSCI World Index (net return in EUR).

A consistent underweight to the energy sector accounted for about half of the relative underperformance. Stock selection, primarily in industrials and materials, especially among high-rated combined ESG score and gender score companies within those cyclical sectors, also had a negative effect on relative returns. Conversely stock selection in the healthcare sector and the underweight to communication services (particularly social media companies) yielded the largest positive contribution to relative return. The latter generally score poorly on gender equality.

The sub-fund selects leading gender equality companies which focus not only on board-level diversity, but also items including senior and junior management diversity, overall workforce equality, talent retention, and ensuring gender pay equality. The sub-fund focuses on a holistic approach to diversity and inclusion and seeks companies broadly supporting health and wellness and employee engagement policies. The sub-fund also has a lower environmental footprint versus the MSCI World Index.

Robeco Next Digital Billion

Over the reporting period, the sub-fund generated a return of -39.4% (gross of fees in EUR) against a return of -14.9% for the reference index, the MSCI Emerging market Index (net return in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The sub-fund underperformed the reference index during the reporting period. With the continued rise in global interest rates, the market rotation away from growth stocks that started in 4Q21 continued in 2022, especially in the first half of the year. In this environment, many of our digital platform stocks continued to derate and caused the bulk of the underperformance. Stock picking in fintech and enterprise also contributed negatively. The valuation write-off of our Russia exposure in view of the sanctions explains almost a quarter of relative performance. Throughout the year we derisked the portfolio and in the second half of 2022 relative performance clearly improved, but not enough to compensate for earlier losses. Many of our holdings continued to show strong operating results despite a tough macro-environment, highlighting that the structural growth outlook is intact.

The sub-fund systematically integrates ESG factors in the investment process and the portfolio has a better Sustainalytics score than the reference index and limits investments in companies with elevated ESG risks. Many of the companies in the portfolio are mission-driven and contribute positively to financial inclusion and other SDG targets.

RobecoSAM Biodiversity Equities

Since its launch in November 2022, RobecoSAM Biodiversity Equities generated a return of 0.7% (gross of fees in EUR), against a return of -5.2% for its reference index, the MSCI World Index (net return in EUR).

On 31 October 2022, the Biodiversity Equities sub-fund was launched with its critical focus on investing in companies that will contribute to and benefit from the transition to a nature-positive world. The investment universe of some 230 companies has been designed to bring a clear focus on the biggest biodiversity threats with an emphasis on loss reduction and biodiversity enabling solutions. The sub-fund closed the year outperforming both the general markets and the investable universe, with top performers in salmon farming.

The sub-fund has the following sustainable investment objective: to contribute to and benefit from the transition to a nature-positive world. The strategy invests in companies that support the sustainable use of natural resources and ecosystem services, as well as technologies, products and services that help to reduce biodiversity threats and or restore natural habitats. The strategy integrates sustainability indicators on a continuous basis as part of the stock selection process. Among others, the sub-fund applies norms-based and activity-based exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.

RobecoSAM Net Zero 2050 Climate Equities

The sub-fund was launched in July 2022. Since August 2022, it generated a return of -5.8% (gross of fees in EUR), against a return of -5.8% for its reference index, the MSCI World Climate Change Index (net return in EUR).

The portfolio performed in line with the reference index. Strong stock selection in technology (Aspen Technology, SolarEdge), consumer staples (Bakkafrost, Sprouts Farmers Market) and materials (Linde Plc) helped performance most, whereas stock selection in consumer discretionary (TopBuild) detracted most. From a sector positioning perspective, being overweight industrials and underweight communication services served relative performance well, while the underweight position in the healthcare sector detracted most from performance. In terms of the sub-fund's carbon footprint, the portfolio remains in line with the Climate Transition Benchmark (CTB), meaning that it is positioned at least 30% below the overall market (on Scope 1, 2 and 3 emissions), is decarbonizing at 7% per year and is thus aligned with the pathway to net zero by 2050. At a more granular level, we've seen roughly equal performance contribution and deduction from both higher and lower carbon-emitting holdings.

Report of the Board of Directors (continued)

Global Bond sub-fund (continued)

Performance analysis

Robeco High Yield Bonds

Over the reporting period, Robeco High Yield Bonds generated a return of -9.5% (gross of fees hedged into EUR), against a return of -12.6% for its reference index, the Bloomberg US Corp. HY & Pan Eur. HY. ex Fin. 2.5% Issuer Cap (hedged into EUR).

With inflation spiking, central banks hiked rates aggressively, tightening financial conditions. Add to that the Russia-Ukraine war, gas shortages in Europe, and Covid-related disruptions: all these worries fed recession fears. As a result, high yield credit spreads rose sharply in 2022, with CCCs underperforming the most. The on average underweight beta position contributed positively to the relative performance. In addition we added performance with active tactical beta positioning throughout the year. The up-in-quality positioning of the sub-fund also added outperformance. Most of the outperformance was realized with issuer selection, by avoiding the companies with the most vulnerable balance sheets in sectors like retail, pharma or telecom.

With respect to sustainable investing, the sub-fund has integrated ESG factors in the investment process. Integrating ESG factors in the analysis strengthens the ability to assess the downside risk of the credit investments. RobecoSAM sustainability data and external sources are used to make an ESG assessment as part of fundamental analysis.

Robeco Global Credits

Over the reporting period, Robeco Global Credits posted a gross return of -16.4% (EUR hedged), against a return of -16.3% for its reference index, the Bloomberg Global Aggregate Corporates (hedged into EUR).

The negative total return of the sub-fund was for the largest part driven by an increase in underlying government bond yields. Credit spreads increased as well, which added to the negative return. The sub-fund's top-down positioning added to performance, the sub-fund started the year with a beta below 1 while adding beta throughout the year as spreads widened. Issuer selection had a negative contribution to performance as the sub-fund held an overweight position in European credits, which underperformed US credits. European credits suffered from both from the energy crisis in Europe and also the rise in swap spreads, which have become a key component of European credit spreads. In the investment process, the sub-fund focuses on top-down risk taking through beta and bottom-up issuer selection to assess return versus risk. ESG factors are considered when assessing the fundamental credit quality of individual issuers.

Robeco QI Dynamic High Yield

Over the reporting period, Robeco QI Dynamic High Yield generated a return of -11.3% (gross of fees hedged into EUR), against a return of -13.0% for its reference index, the Bloomberg Global High Yield Corporate (hedged into EUR).

The sub-fund provides liquid exposure to high yield through credit default swap (CDS) indices on top of a portfolio of government bonds. The position in CDS indices is based on a quantitative model: the position is increased to 150% when the model is positive and vice versa reduced to 50% when negative. The sub-fund held an underweight position from February to October, only briefly interrupted by short-lived neutral positions in March and September. In November the position switched to an overweight. Both the underweight and overweight positions contributed positively to the performance. The overweight in Europe and underweight in the US made a neutral contribution over the year. The outperformance is explained by a positive contribution from the model-based active positions and a contribution from CDS indices outperforming high yield bonds. In the long run we do not expect structural return differences between CDS indices and bonds. Given the type of instruments used to implement the investment strategy, ESG integration does not play a role in the investment strategy.

Report of the Board of Directors (continued)

Global Bond sub-fund (continued)

Performance analysis (continued)

Robeco QI Global Multi-Factor Credits

Over the reporting period, Robeco QI Global Multi-Factor Credits generated a return of -16.1% (gross, euro-hedged) compared to -16.3% for its index, the Bloomberg Global Aggregate Corporates index (hedged into EUR).

This sub-fund offers balanced exposure to the value, momentum, low-risk, quality, and size factors in the global investment grade corporate bond market by using a highly systematic investment process. Analysts perform a fundamental check on additional downside risks beyond the scope of the quantitative multi-factor model, including sustainability risks. The portfolio construction ensures that the portfolio's Sustainalytics ESG Risk Rating is better than the benchmark, that the carbon footprint is lower than the benchmark and also that the water consumption and waste disposal footprints are lower than the benchmark.

Issuer selection delivered a strong positive contribution and beta allocation delivered a strong negative contribution, as did duration hedging inaccuracies on the long end of the curve due to curve flattening. The low-risk/quality factor delivered the largest positive contribution, driven by both the underweight in longer-dated bonds and the defensive company selection. The value factor, and to a lesser extent the momentum factor, also delivered positive contributions. The size factor detracted. Sector allocation delivered a large positive contribution, mainly due to the overweights in the energy and agency sectors and the underweights in banking, REITs and the financial other sector. Currency allocation detracted somewhat, due to the overweight in EUR bonds. Country allocation delivered a large negative contribution due to the overweights in various European countries; the underweight in emerging markets contributed positively. The allocation to subordination groups made a large positive contribution, due to the underweight in senior financials and the overweight in senior corporates. Rating allocation delivered a positive contribution, primarily due to the overweights in AAAs and AAs and the off-benchmark position in BAs.

Robeco QI Global Multi-Factor Bonds

Over the reporting period, Robeco QI Global Multi-Factor Bonds generated a return of -14.1% (gross of fees hedged into EUR), against a return of -13.3% for its reference index, the Bloomberg Global Aggregate Index (hedged into EUR).

This sub-fund offers balanced exposure to the value, momentum, low-risk, quality and size factors. The bottom-up selection of bonds aims to systematically harvest factor premiums with a risk profile similar to the index and with the weighted average ESG scores and CO2 emissions of the government bonds and the credits in the portfolio better than in the index. The sub-fund incorporates an active duration overlay that is fully driven by the outcomes of the manager's quantitative duration model.

The factor-based government bond selection detracted from the performance. The value and low-risk factor detracted; this was only partly offset by the momentum factor. The systematic duration overlay made a minor negative contribution. It earned from rising US yields in the first half of the year, but overweight duration positions in the second half detracted. The factor-based credit selection made a neutral contribution to the performance. Within credit selection the low-risk/quality factor was the strongest factor, while the size factor detracted.

Robeco Global Credits – Short Maturity

Over the reporting period, Robeco Global Credits – Short Maturity generated a return of -7.6% (gross of fees hedged into EUR), against a return of -7.9% for its reference index, the Bloomberg Global Aggregate Corporate 1-5 yr (hedged into EUR).

Beta positioning of the sub-fund had a small negative contribution in 2022. The sub-fund had a small overweight beta position for most of 2022 which contributed negatively as spreads increased. The beta was increased towards the end of the third quarter as spreads had risen, in the fourth quarter the sub-fund recouped most of the earlier losses from the beta overweight position. The long position in euro swap spreads contributed negatively. Issuer selection had a strong positive contribution in 2022. The allocation towards BB-rated credits contributed positively, examples of these are Bancolombia, Itau Unibanco and Autostrade SpA. The sub-fund also benefited from positive issuer selection in the banking and basic industry sectors. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers. The sub-fund also invests in green, social and sustainability bonds; the exposure in the sub-fund has grown to approximately 7%.

Robeco Corporate Hybrid Bonds

Over the reporting period, Robeco Corporate Hybrid Bonds sub-fund generated a return of -10.8% (gross of fees hedged into EUR), against a return of -11.5% for its benchmark, the Bloomberg Global Corporate Hybrids (3% issuer cap) index (hedged into EUR). The negative total return was driven by increases in both underlying government bond yields and credit spreads.

The sub-fund outperformed its index, mainly driven by a positive result from issuer-selection while beta positioning made a small negative contribution. The sub-fund's beta position was close to neutral over the reporting period. However, when the market rallied in the last quarter of the year the beta was just below one which had a negative effect on performance. Issuer selection made a positive contribution to the sub-fund's performance. The largest positive contributions came from the overweight in Southern Company, while the overweight in Nextera Energy was a drag on performance. The underweights in Chinese issuers contributed negatively. This was mainly driven by a year-end rally, after the Chinese government announced support for the real estate sector and ended Covid lockdown measures. An underweight in Japan Tobacco was a positive performance driver. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers.

Report of the Board of Directors (continued)

Global Bond sub-fund (continued)

Performance analysis (continued)

Robeco QI Global Multi-Factor High Yield

Over the reporting period, Robeco QI Global Multi-Factor High Yield, generated a return of -11.5% (gross, euro-hedged) compared to -12.6% for its benchmark, the Bloomberg Global High Yield Corporates ex Financials index (hedged into EUR).

This sub-fund offers balanced exposure to the value, momentum, low-risk, quality, and size factors in the global high yield corporate bond market by using a highly systematic investment process. Analysts perform a fundamental check on additional downside risks beyond the scope of the quantitative multi-factor model, including sustainability risks. The portfolio construction ensures that the portfolio's Sustainalytics ESG Risk Rating is better than the benchmark, that the carbon footprint is lower than the benchmark and that the water consumption and waste disposal footprints are lower than the benchmark.

Issuer selection delivered a strong positive contribution. The value factor made the largest positive contribution, while the momentum, low-risk/quality and size factors also delivered large positive contributions. Sector allocation contributed strongly positively, mainly thanks to the overweight in the energy sector and to a lesser extent the underweight in the consumer non-cyclical sector. Currency allocation delivered a positive contribution, thanks to the underweight in USD bonds and the overweight in EUR bonds; the overweight in GBP bonds detracted somewhat. Country allocation slightly detracted, mostly due to the underweight in emerging markets; the overweight in Canada delivered a positive contribution. The allocation to subordination groups contributed neutrally. Rating allocation delivered a very large positive contribution, thanks to the underweight in CAAs and the overweight in BAs. Beta allocation delivered a large positive contribution: the underweight beta position of the bond portfolio contributed strongly, while the CDS index beta hedge detracted.

RobecoSAM SDG Credit Income

Over the reporting period, RobecoSAM SDG Credit Income generated a return of -9.3% (gross of fees hedged into USD).

The sub-fund is managed on a total return basis and not versus an index. The negative total return is mainly driven by the sub-fund's duration exposure as Treasury yields rose over the year. In the start of the year the duration was 3 years. In the first half this was increased to 5 years as yields had risen. In the remainder of 2022, the duration was kept at 5 years.

Contribution from credit returns was close to neutral for the sub-fund. The sub-fund started the year with a cautious credit allocation. During the year the sub-fund added risk when spreads peaked in, for example, subordinated financials and Chinese corporates. The timing of these credit risk additions led the contribution from credit returns to be close to neutral in a year where most credit segments posted negative excess returns. The sub-fund focuses on issuers that contribute positively to the UN SDGs. That means that companies that contribute negatively to one or more SDGs, like brewing companies or oil companies are excluded from the sub-fund. All sub-fund companies have good governance practices.

RobecoSAM Global SDG Credits

Over the reporting period, RobecoSAM Global SDG Credits posted a return of -16.6% (gross of fees hedged into EUR), underperforming the Bloomberg Global Aggregate Corporates (hedged into EUR) by -0.2%.

The negative total return of the sub-fund was for the largest part driven by an increase in underlying government bond yields. Credit spreads increased as well, which added to the negative return. The sub-fund's top-down positioning added to performance, the sub-fund started the year with a beta below 1 while adding beta throughout the year as spreads widened. Issuer selection had a negative contribution to performance as the sub-fund held an overweight position in European credits, which underperformed US credits.

European credits suffered from both from the energy crisis in Europe and also the rise in swap spreads which have become a key component of European credit spreads. In the investment process, the sub-fund focuses on issuers that contribute positively to the UN SDGs. That means that companies that contribute negatively to one or more SDGs are excluded from the sub-fund, for example, energy companies and producers of alcohol and unhealthy food. These sectors turned out to be strong performers in a high inflation and potential recessionary environment.

RobecoSAM SDG High Yield Bonds

Over the reporting period, RobecoSAM SDG High Yield Bonds generated a return of -10.9% (gross of fees hedged into EUR), against a return of -13.0% for its reference index, the Bloomberg Global High Yield Corporate Index (hedged into EUR).

With inflation spiking, central banks hiked rates aggressively, tightening financial conditions. Add to that the Russia-Ukraine war, gas shortages in Europe, and Covid-related disruptions: all these worries fed recession fears. As a result, high yield credit spreads rose sharply in 2022, with CCCs underperforming the most. The on average underweight beta position contributed positively to the relative performance. In addition, we added performance with active tactical beta positioning throughout the year. The up-in-quality positioning of the sub-fund also added outperformance. Most of the outperformance was realized with issuer selection, by avoiding the companies with the most vulnerable balance sheets, in sectors like retail, pharma or telecom.

In the investment process, the sub-fund focuses on issuers that contribute positively to the UN SDGs. That means that companies that contribute negatively to one or more SDGs are excluded from the portfolio. The allocation effect of this SDG investment policy was slightly negative, as the underweight in negative SDG sectors like energy contributed negatively.

Performance analysis (continued)

RobecoSAM Global Green Bonds

Over the reporting period, RobecoSAM Global Green bonds generated a return of -17.8% (gross of fees hedged into EUR), against a return of -19.0% for its reference index, the Bloomberg MSCI Global Green bond index (hedged into EUR).

The sub-fund provides diversified exposure to the global green bonds market. The proceeds of green bonds are employed to finance projects with a positive environmental impact. A screening process is applied to determine the eligibility of a green bond for the sub-fund. The negative total return of the portfolio was for the largest part driven by an increase in underlying government bond yields. Credit spreads increased as well, which added to the negative return. For a substantial part of the year the sub-fund held a below index duration position in EUR, USD and YEN rates, which added to performance as globally yields increased significantly. In addition, the sub-fund benefited from a US-EUR rates spread tightener. The ECB sounded particularly hawkish and this resulted in a sharply higher German bund yield relative to US treasuries. A steeper position in US rates subtracted from performance later in the year as the US 2s10s curve inverted significantly. Top-down positioning added to performance as the sub-fund started the year with a beta below 1, while adding beta throughout the year as spreads widened. Issuer selection had a positive contribution to performance as the sub-fund added in European credits in the second half of the year. Additionally, holdings in US utilities and below index exposure in cyclical sectors like real estate made a relatively large positive contribution. Total issuance of green bonds in 2022 amounted to a sizeable USD 482bn. Europe remained an important region for green bonds, accounting for 48% of new issuance, followed by Asia (27%) and the US (15%).

RobecoSAM Climate Global Credits

Over the reporting period, RobecoSAM Climate Global Credits posted a gross return of -16.5% (gross of fees hedged into GBP), compared to -15.5% for its index the Solactive Paris Aligned Global Corporate Index (hedged into GBP).

The negative total return was driven by increases in both underlying government bond yields and credit spreads. The sub-fund underperformed its index, as a positive contribution from beta positioning was more than offset by negative effects from issuer selection. The sub-fund's credit beta position was cautious at the start of the year, and credit subsequently underperformed treasuries. The beta was increased to an overweight position as spreads widened, but the beta remained close to neutral. Issuer selection made a negative contribution to the portfolio's performance. The largest contributions came from overweights in the banking sector and underweights in consumer non-cyclicals. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers. The average carbon intensity of the sub-fund was below that of its Paris-aligned Benchmark throughout the period. The sub-fund also invests in green, social and sustainability bonds, with exposure around 11% at year-end.

RobecoSAM Climate Global Bonds

Over the reporting period, RobecoSAM Climate Global Bonds generated a return of -14.9% (gross of fees hedged into EUR) against a return of -13.6% for its reference index, the Solactive Paris Aware Global Aggregate Index (hedged into EUR).

The main drivers of outperformance were country selection and credit derivative strategies through the year. Given the last phase of the global reopening, the Russia-Ukraine war and subsequent strong surge in inflation forcing central banks to forcefully hike policy rates, the sub-fund was underweight duration throughout a big part of the year mainly via 5-year bonds and/or curve flatteners between 2-year and 5-year bonds in the US and Germany mainly. In the Japan the same was expressed via curve flattener between 10-year and 30-year bonds. Equally, the sub-fund was conservatively invested in corporate bonds given geopolitical risks, strong monetary tightening and upcoming recession. The sub-fund is selectively underweight high-polluting countries like the United States and Japan while being overweight low-polluting countries such as France, the United Kingdom and Denmark.

The sub-fund achieved its sustainable investment objective by having a lower (better) carbon intensity, not only with regard to the broad market index but also the reference sustainability benchmark.

Robeco Sustainable Emerging Credits (formerly named RobecoSAM Emerging SDG Credits)

Over the reporting period, Robeco Sustainable Emerging Credits posted a gross return of -9.7% hedged in USD, outperforming the JP Morgan Corporate EMBI index (USD hedged) by 2.6%.

The negative total return of the sub-fund was for the largest part driven by an increase in underlying government bond yields. Credit spreads increased as well, which added to the negative return. The sub-fund's top-down positioning had a neutral contribution to performance; the sub-fund started the year with a beta below 1 but added beta too soon as spreads widened. The outperformance was the result of issuer selection. With commodity prices moving up, many emerging markets benefited from rising commodity prices. The sub-fund held an overweight position in credits from commodity exporting nations. The sub-fund held a large underweight in Russian credits and Chinese real estate, which added to the outperformance. In October the position in Asian credits, including Chinese ones, moved back to neutral as valuations became very compelling. In the investment process, the sub-fund mostly focuses on issuers that contribute to or are transitioning towards the UN SDGs. The sub-fund does not invest in issuers that have an SDG score of -2 or -3 (on a scale of -3 to +3).

Performance analysis

Robeco Euro Government Bonds

Over the reporting period, Robeco Euro Government Bonds generated a return of -18.3% (gross of fees in EUR), against a return of -18.5% for its reference index, the Bloomberg Euro-Aggregate Treasury (in EUR).

For a large part of the year the sub-fund held a below index duration position which added to performance as yields in the eurozone increased significantly. In addition, a position in German inflation-linked bonds benefitted the sub-fund, as sharply rising gas prices resulted in record high inflation across Europe. Furthermore, the sub-fund profited from an overweight in Swedish government bonds versus an underweight in German Bunds, as the yield-differential between them decreased notably. Positions in highly rated government-related bonds versus below index positions in lower rated government bonds anticipating an increasing yield differential between them nonetheless detracted from performance. Government-related bond yields were dragged along with higher swap yields and underperformed government bonds. The sub-fund continued its active participation in sustainable issuance. At the end of December 2022, circa 24% of the sub-fund was invested in green, social and sustainability bonds.

Robeco Euro Credit Bonds

Over the reporting period, Robeco Euro Credit Bonds generated a return of -13.0% (gross of fees in EUR), against a return of -13.7% for its reference index, the Bloomberg Euro-Aggregate: Corporates (in EUR).

The sub-fund outperformed its index, mainly because of the top-down beta allocation. The sub-fund started the year with a fairly cautious beta positioning but following the spread widening in February and March the beta of the sub-fund was increased to an overweight positioning. Issuer selection had a positive contribution, too. Important drivers within issuer selection were the underweight in real estate names and the overweight in corporate hybrids. A negative contribution came from the long position in 5-year euro swap spreads, as swap spreads widened. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers. The sub-fund also invests in green bonds; the exposure in the portfolio has grown to approximately 12%.

Robeco All Strategy Euro Bonds

Over the reporting period, Robeco All Strategies Euro Bonds, generated a return of -17.0% (gross of fees in EUR), against a return of -17.2% for its reference index, the Bloomberg Euro-Aggregate Index (in EUR).

The main reason for the negative return was the strong rise in yields globally, as among others sharply rising gas prices resulted in record high inflation. Duration management, yield curve positioning and currency strategies subtracted from performance, while country allocation, credit allocation and credit selection contributed positively to performance. The sub-fund was positioned for a decline in euro swap spreads, the difference between swap yields and German Bund yields. However, up until October Bunds outperformed swaps. The allocation to government-related bonds also subtracted from performance, as these bonds were dragged along with widening swap spreads. The underweight position in Italian government bonds benefitted relative returns and also the conservative allocation to credits and single name selection contributed positively to the relative performance. ESG factors are taken into account when assessing the fundamentals individual issuers. The sub-fund also invests in green, social and sustainable bonds; the exposure in the portfolio was approximately 20% at the end of the year.

Report of the Board of Directors (continued)

Regional Bond sub-funds (continued)

Performance analysis (continued)

Robeco European High Yield Bonds

Over the reporting period, Robeco European High Yield Bonds generated a return of -8.8% (gross of fees hedged into EUR), against a return of -10.0% for its reference index, the Bloomberg Pan-Eur. HY Corp. ex Fin. 2.5% Issuer Cap (hedged into EUR).

With inflation spiking, central banks hiked rates aggressively, tightening financial conditions. Add to that the Russia-Ukraine war, gas shortages in Europe, and Covid-related disruptions: all these worries fed recession fears. As a result, high yield credit spreads rose sharply in 2022, with CCCs underperforming the most. The up-in-quality positioning of the sub-fund added nicely to the outperformance. The sub-fund's underweight in UK HY also contributed positively. This regional allocation is very much a matter of underlying stock picking. However, the more negative stance on the UK economic outlook added to avoidance of UK issuers that ended up performing badly. Most of the outperformance was realized with issuer selection, by avoiding the companies with the most vulnerable balance sheets, in sectors like retail and telecom.

With respect to sustainable investing, the sub-fund has integrated ESG factors in the investment process. Integrating ESG factors in the analysis strengthens the ability to assess the downside risk of the credit investments. RobecoSAM sustainability data and external sources are used to make an ESG assessment as part of fundamental analysis.

Robeco Sustainable Asian Bonds

Since its launch in May 2022, Robeco Sustainable Asian Bonds returned -2.9% (gross in USD), against a return of -1.8% for its reference index, the JP Morgan Asian Credit Index (in USD).

The sub-fund's underperformance was mainly attributed beta positioning, while issuer selection added to the performance. Within country selection, active underweights to Indonesia, Sri Lanka, and Pakistan added to performance as frontier sovereigns were under pressure from the rising rate environment and tough fiscal positions. Within sectors, the sub-fund's overweight to basic industry and China property added to the outperformance while the overweight to telecom and consumer cyclicals detracted from the performance. Within issuer selection, the exposure to Country Garden, a Chinese developer, was increased in December, which benefited from China's reopening and policy support gave a boost to the performance. The sub-fund's holding in Hong Kong Telecom's CAS Capital detracted performance.

The investment process is focused on choosing companies that enable Asia to transition towards a more sustainable future and as a result, the sub-fund is predominately invested in corporates with a neutral or positive SDG score.

RobecoSAM Euro SDG Credits

Over the reporting period, RobecoSAM Euro SDG Credits generated a return of -13.3% (gross of fees in EUR), against a return of -13.7% for its reference index, the Bloomberg Euro-Aggregate: Corporates (in EUR).

The sub-fund outperformed its index because of the top-down beta allocation. The sub-fund started the year with a fairly cautious beta positioning but following the spread widening in February and March the beta of the sub-fund was increased to an overweight positioning. Issuer selection had a very small negative contribution, a bigger negative contribution came from the long position in 5-year euro swap spreads. In the investment process, the sub-fund focuses on issuers that contribute positively to the UN SDGs. That means that companies that contribute negatively to one or more SDGs are excluded from the portfolio. The allocation effect of this SDG investment policy was slightly negative, as the underweight in negative SDG sectors like energy contributed negatively. The sub-fund also invests in green, social and sustainability bonds; the exposure in the portfolio is approximately 18%.

Robeco Financial Institutions Bonds

Over the reporting period, Robeco Financial Institutions Bonds generated a return of -12.5% (gross of fees in EUR), against a return of -13.9% for its reference index, the Bloomberg Euro-Aggregate: Corp. Fin. Subordinated 2% Issuer Cap (in EUR).

The sub-fund outperformed its index, mainly because of issuer selection. Important drivers within issuer selection were the overweight in bank and insurance CoCos and the underweight in real estate hybrids. The top-down positioning (credit beta-allocation) contributed positively too. The sub-fund started the year with a fairly cautious positioning but following the spread widening in February and March the beta of the sub-fund was increased to an overweight positioning. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers. The sub-fund also invests in subordinated green, social and sustainability bonds; the exposure in the portfolio has grown to approximately 6.5%.

Report of the Board of Directors (continued)

Regional Bond sub-funds (continued)

Performance analysis (continued)

Robeco Investment Grade Corporate Bonds

Over the reporting period, the sub-fund posted a gross return of -13.4% (gross of fees in EUR), compared to -13.9% for its index the Bloomberg Euro Corporate ex Financials (2% issuer cap). The negative total return was driven by increases in both underlying government bond yields and credit spreads.

The sub-fund outperformed its index, as both top-down beta positioning and bottom-up issuer selection made positive contributions. The sub-fund's credit beta position was cautious at the start of the year, and credit subsequently underperformed treasuries. The beta was increased to an overweight position as spreads widened, but the beta remained close to 1 (neutral). Issuer selection also made a positive contribution to the portfolio's performance. The largest positive contributions came from overweight in the consumer sector. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers. The sub-fund also invests in green, social and sustainability bonds, with exposure around 7% at year-end.

RobecoSAM US Green Bonds

Over the reporting period, Robeco SAM US Green Bonds generated a return of -12.1% (gross of fees in USD), against a return of -12.3% for its reference index, the Bloomberg MSCI US Green Bond index (in USD).

The sub-fund provides diversified exposure to the US green bonds market. The proceeds of green bonds are employed to finance projects with a positive environmental impact. A screening process is applied to determine the eligibility of a green bond for the sub-fund. The negative total return of the portfolio was for the largest part driven by an increase in underlying government bond yields. Credit spreads increased as well, which added to the negative return. For a substantial part of the year the sub-fund held an underweight duration position in EUR, USD and YEN rates, which added to performance as globally yields increased significantly. In addition the sub-fund benefitted from a US-EUR rates spread tightener. The ECB sounded particularly hawkish and this resulted in sharply higher German bund yield relative to US treasuries. A steepener position in US rates subtracted from performance later in the year as the US curve inverted significantly. The overall beta contribution was neutral for the year. Holdings in US utilities and below index exposure in cyclical sectors like real estate made a positive contribution as did exposure to European credits in the second half of year. Certain underweights in cyclical sectors, like real estate, made relatively large positive contribution. Total issuance of green bonds in 2022 amounted to a sizeable USD 482 billion, of which about 22% issued was issued in US dollars bonds.

Performance analysis

Robeco QI Multi Factor Absolute Return

Over the reporting period, Robeco QI Multi Factor Absolute Return generated a return of 8.2% (gross of fees in EUR), against a return of -0.0% for its reference index, the ICE BofA ESTR Overnight Rate Index (in EUR). One of the key events was the war in Ukraine, leading to halting of trading in Russian securities and a write-down of Russian securities to zero value.

The sub-fund harvests factor premiums through bottom-up credit and equity selection and at market level through top-down factor-based allocation. The sub-fund targets a low correlation with equity and bond markets and market agnostic returns.

Momentum, quality, carry, value and flow all added positively to performance. Low-risk detracted. Equity selection and commodity allocation were the main positive contributors, followed by equity allocation, credit allocation and currency allocation. Credit selection contributed neutrally while government bond allocation detracted somewhat.

Environmental footprint and ESG factors are integrated. The equity sleeves realized their targets of reducing the environmental footprint metrics, greenhouse gas emissions, water usage and waste generation by 30%, 20% and 20% respectively relative to the benchmark. In addition, the Sustainalytics ESG Risk rating was at least 10% lower than that of the benchmark. The credit sleeve incorporates better ESG than the benchmark and lower carbon/water/waste than the benchmark.

Report of the Board of Directors (continued)

Sustainable Investing

All Robeco's investment activities comply with the Principles for Responsible Investing (PRI). Responsibility for implementing Sustainable investing lies with Robeco's CIO Fixed Income and Sustainability, who has a seat on Robeco's Executive Committee.

Fulfilling the responsibilities in the field of stewardship forms an integral part of Robeco's approach to Sustainable investing. Robeco publishes its own stewardship policy on the website. This policy describes how Robeco deals with possible conflicts of interest, how the companies in which the sub-funds invest are monitored, how the activities in the field of engagement and voting are conducted, and how the stewardship activities are reported.

Constructive and effective activities under active ownership encourage companies to improve their management of risks and opportunities in the field of ESG which in turn establish a better competitive position and improve profitability and moreover have a positive impact on the community. Active ownership involves voting and engagement. Robeco exercises its voting rights for the shares in its investment funds all over the world. Robeco uses this engagement to address strategic ESG issues that might affect value creation in the long term.

Robeco has research available from leading sustainability experts, including own proprietary research from the sustainable investing research team. This dedicated Sustainable Investing research team works together very closely with the investment teams to provide them with in-depth sustainability information. The investment analysis focuses on the most material ESG factors and the connection with the financial performance of a company. Robeco can then focus on the most relevant information in performing the investment-analysis and can reach enhanced investment decisions.

To help customers contribute to their sustainable investment objectives, Robeco has developed a methodology that analyses the contribution of investee companies to the Sustainable Development Goals (SDGs) and has developed SDG investment solutions. Furthermore, Robeco contributes to the SDGs by integrating ESG factors in its decision-making process for investments and encourages companies to act in support of these goals by means of a constructive dialogue.

Robeco's climate change policy is focused on integrating climate issues in investments when financially material and engaging with companies. Furthermore Climate risks for our funds are assessed and monitored by Robeco's financial risk management department.

Robeco pursues an exclusion policy for companies that are involved in the production of or trade in controversial weapons such as cluster munitions and anti-personnel mines, for tobacco companies and for companies that seriously and habitually violate either the United Nations Global Compact (UNGC) or the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. Robeco applies strict criteria for this last category and if a dialogue fails, the company can be excluded. Robeco publishes its exclusion policy and the list of exclusions on its website.

The SFDR classifications of the Robeco Capital Growth sub-funds are shown in the table below. More information is available in the precontractual SFDR disclosures of the fund on our website. In this annual report for each article 8 sub-fund an Annex IV disclosure can be found with details of the achieved ESG characteristics over the reporting period. For each article 9 sub-fund an Annex V disclosure is attached with detailed information on the achievement of the sustainability goals over the reporting period.

Notes to the financial statements as at 31 December 2022

1. General

Robeco Capital Growth Funds (the 'Company') was incorporated on 2 May 1997 for an undetermined period of time as an open ended investment company based in Luxembourg, issuing and redeeming its shares on demand at prices based on the respective Net Asset Values per share. Its Articles of Incorporation were published in the 'Memorial, Recueil des Societes et Associations' of the Grand Duchy of Luxembourg (the 'Memorial') on 6 June 1997. The Articles of Incorporation were last amended effective as per 1 January 2022. Robeco Capital Growth Funds is a 'Societe d'Investissement a Capital Variable' (SICAV) pursuant to the law of 10 August 1915, as amended, on commercial companies and to part I of the law of 17 December 2010, on undertakings for collective investment of the Grand Duchy of Luxembourg.

The Company takes the form of an umbrella fund. It is made up of several sub-funds each representing an investment portfolio and other assets and liabilities corresponding to a different investment policy. Each sub-fund is therefore represented by different types of shares with one or more classes of shares. The Board of Directors has authority to issue different categories of shares within each of the sub-funds. The Directors of the Company may at any time establish new sub-funds and/or may decide upon the issue of class A, AH, D, D2, D2H, D3H, DH, DHL, DL, F, FH, FHL, FL, I, IH, IHL, IL, IM, IMH, J, K, KH, M, M2, M2H, MH, ML, S, SEH, SH, XH, XG, XGH, Y, Z, Z2, Z2H, 0DH, 0MH, 0FH, 0IH, 2FH, 2IH and IHHi shares (accumulating classes) and class A1, A1H, B, Ba, BaH, BH, Bx, BxH, C, CH, Cx, CxH, D3, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEx, IExH, KE, M2, M3, M3H, MB, MBx, MBxH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0EH, 0IEH, 2CH and 2EH shares (distributing classes) in existing or new sub-funds. The reference currency of the classes of shares may be the Euro (EUR), the US Dollar (USD), the British Pound (GBP), the Swiss Franc (CHF), the Japanese Yen (JPY), the Canadian Dollar (CAD), the Chinese Renminbi (RMB), the Mexican Peso (MXN), the Hong Kong Dollar (HKD), the Singapore Dollar (SGD), the Swedish Crown (SEK), the Norwegian Crown (NOK), the Danish Crown (DKK), the Australian Dollar (AUD), the South African Rand (ZAR), the Brazilian Real (BRL) and the Israeli Shekel (ILS).

Legal entity

The Company as a whole constitutes a single legal entity but the assets of any one sub-fund will only be available to satisfy the rights of investors in relation to that sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of the sub-fund. For the purpose of the relations as between shareholders, each sub-fund is deemed to be a separate entity.

Dividend policy

The general policy regarding the appropriation of net income and capital gains is as follows:

Class D, D2, DH, DL, F, FH, FL, I, IH, IL, IM, IMH, J, K, KH, M, M2, MH, ML, Z, Z2H, 0DH, 0MH, 0FH, 0IH, 2FH, 2IH and IHHi shares (accumulating)

Income is reinvested and added to the relevant sub-funds and contributes to a further increase in value of the total net assets.

Class A1, A1H, B, Ba, BaH, BH, Bx, BxH, C, CH, Cx, CxH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IEx, IExH, KE, M3, MB, MBx, MBxH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0EH, 0IEH, 2CH and 2EH shares (distributing)

After the end of the reporting period, the Company can recommend what distribution shall be made from the net investment income and net capital gains attributable to the Class A1, A1H, B, Ba, BaH, BH, Bx, BxH, C, CH, Cx, CxH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IEx, IExH, IMB, KE, M3, MB, MBx, MBxH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0EH, 0IEH, 2CH and 2EH shares. The Annual General Meeting of Shareholders will determine the dividend payment. The Board of Directors of the Company may decide to distribute interim dividends, in accordance with Luxembourg law.

General remarks

As provided by the 2010 law, the Company may decide to distribute dividends with no other limit than the obligation that any such dividend distribution does not reduce the net asset value of the Company below the legal minimum amount. Similarly, the Company may distribute interim dividends and may decide to pay dividends in shares. If dividends are distributed, payments of cash dividends to registered shareholders will be made in the currency of the relevant share class to such shareholders at the addresses they have given to the Registrar Agent. Dividend announcements (including names of paying agents) and all other financial notices concerning Robeco Capital Growth Funds shall be published on www.robeco.com/riam and published in those newspapers as the Board of Directors shall determine from time to time. Dividends not collected within five years will lapse and accrue for the benefit of the Company in accordance with Luxembourg law.

Open-ended fund

Robeco Capital Growth Funds is an open-ended investment Company, meaning that, barring exceptional circumstances, Robeco Capital Growth Funds issues and purchases its shares on a daily basis at prices at net asset value per share. The Company reserves the right to refuse any subscription request at any time.

Notes to the financial statements as at 31 December 2022 (continued)

1. General (continued)

Swing pricing

Shares are issued and redeemed on the basis of the net asset value per share. However, the actual costs of purchasing or selling assets and investments for a sub-fund may deviate from the latest available prices, as appropriate, in calculating the net asset value per share. This deviation can be caused by duties and charges and spread from buying and selling prices of the underlying investments ('spreads'). These costs have an adverse effect on the value of a sub-fund and its underlying share classes and are known as dilution. To mitigate the effects of dilution, the company may, at its discretion, make a dilution adjustment to the net asset value per share on any valuation day. The company will retain the discretion in relation to the circumstances under which to make such a dilution adjustment. At the end of the reporting period, no swing adjustments were made.

The dilution adjustment will involve adding to, when the sub-fund is in a net subscription position, and deducting from, when the sub-fund is in a net redemption position, the Net Asset Value per Share such figure as the Company considers representing an appropriate figure to meet the Cash Flow Costs. The resultant amount will be the Price rounded to such number of decimal places as the Company deems appropriate. The dilution adjustments may vary depending on the order type (net subscription or net redemption), on the underlying asset classes for any sub-fund or on the market conditions. The dilution adjustments as well as the dealing levels from which they become applicable may be amended from time to time depending on market conditions or any other situation where the Company is of the opinion that the interests of the Shareholders require such amendment(s).

For any given valuation day, the swing factor adjustment is limited to a maximum of 2% of what the Net Asset Value would otherwise be. In exceptional circumstances, the Board of Directors may, in the best interest of Shareholders, decide to temporarily increase the swing factor above the maximum stated level. Such exceptional circumstances can be triggered by (but not limited to) high market volatility, disruption of markets or slowdown of the economy caused by terrorist attack or war (or other hostilities), serious pandemic or a natural disaster (such as a hurricane or a super typhoon).

Additional details on the anti-dilution/swing pricing adjustments and actual swing factors can be found on www.robeco.com/riam.

For the avoidance of doubt, Shareholders placed in the same situation will be treated in an identical manner.

Pooling and co-management

For the purpose of efficient management and to reduce administrative costs and if the investment policies of the sub-funds allow such, the Board of Directors may decide to co-manage some or all of the assets of certain sub-funds with assets of other Luxembourg UCIs of the Robeco Group (co-managed units). In this case, the assets from different co-managed units will be jointly managed using the technique of pooling. Assets that are co-managed will be referred to using the term 'pool'. Such pools will only be used for the purposes of internal management. They will not constitute distinct legal entities and will not be directly accessible to investors. Each co-managed unit will have its own assets allocated to it. During the reporting period no pooling or co-management took place.

Affiliated parties

The Directors of the Company have appointed the affiliated entity Robeco Institutional Asset Management B.V. ("RIAM") as the management company of the Company to be responsible on a day-to-day basis, under supervision of the Directors of the Company, for providing administration, marketing, portfolio management and investment advisory services in respect of all Sub-funds. The Management Company may, from time to time, carry out its portfolio management activities through one or more of its European branches, which will in such case not be fully in charge of the day-to-day management of the relevant Sub-fund. The Management Company has delegated the administration, registrar and transfer functions to J.P. Morgan S.E., Luxembourg Branch. The different sub-funds and share-classes will incur an annual management fee which reflects all expenses related to the management of the Company which is payable to the Management Company. The Directors of the Company are also Director of Robeco QI Global Dynamic Duration, Robeco Global Total Return Bond Fund, Robeco All Strategies Funds, Robeco (LU) Funds III and and Robeco Institutional Solutions Fund.

The delegated portfolio managers, Boston Partners Global Investors Inc., Robeco Hong Kong Ltd, Robeco Schweiz AG and Robeco Singapore Private Ltd are affiliated entities. The delegated portfolio managers are charged with the day-to-day management of the assets and receive a fee for that service.

Robeco Capital Growth Funds is affiliated to the entities belonging to ORIX Corporation Europe N.V. The affiliation with ORIX Corporation Europe N.V. is the result of the possibility of having decisive control or a substantial influence on the Company's business policy. ORIX Corporation Europe N.V. is part of ORIX Corporation. The management structure of ORIX Corporation Europe N.V. is such that ORIX Corporation does not have any meaningful say in or influence on the Company's business policy. ORIX Corporation Europe N.V. pursues an independent investment policy on behalf of its affiliated investment companies, taking into account the interest of the investors involved. Besides services of other market parties, Robeco Capital Growth Funds may also utilize the services of one or more of these affiliated entities including transactions relating to securities, treasury, derivatives, securities lending, and subscriptions and redemptions of its own shares, as well as management activities. Transactions are executed at market rates.

Financial instruments

Risks

Transactions in financial instruments may lead the sub-funds to be subject to the risks described below or to the sub-funds transferring these risks to another party.

Notes to the financial statements as at 31 December 2022 (continued)

1. General (continued)

Financial instruments (continued)

Risks (continued)

General investment risk

The value of the investments may fluctuate. Past performance is no guarantee of future results. The net asset value of the sub-funds is affected by developments in the financial markets and may both rise and fall. Shareholders run the risk that their investments may end up being worth less than the amount invested or even worth nothing. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities and any amounts paid on such securities. This may in turn affect the NAV per share. General investment risk can be broken down into market risk, concentration risk, counterparty risk and currency risk:

Market risk

The net asset value of the sub-funds is sensitive to market movements. In addition, investors should be aware of the possibility that the value of investments may vary as a result of changes in political, economic or market circumstances. No assurance can, therefore, be given that the sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a share in a sub-fund will not fall below its value at the time of acquisition.

Concentration risk

Based on its investment policies, each sub-fund may invest in financial instruments from issuing institutions that (mainly) operate within the same sector or region, or in the same market. If this is the case, the concentration of the investment portfolio of the sub-fund may cause events that have an effect on these issuing institutions to have a greater effect on the sub-fund's assets than would occur with a less concentrated investment portfolio.

Currency risk

All or part of the investment portfolio of a sub-fund may be invested in currencies or financial instruments denominated in currencies other than its reference currency. As a result, fluctuations in exchange rates may have both a negative and a positive effect on the investment result of the sub-fund. The Equity sub-funds minimize the risks by investing mainly in well-known companies and by making a balanced selection with regard to distribution across regions, sectors, individual stocks and currencies. The risk relative to their index is minimized by using quantitative techniques. The Bond sub-funds minimize the risks by making a balanced selection with regard to distribution across regions, sectors, individual bonds and currencies and by investing in bonds with a minimum rating depending on the sub-funds investment policy. The risk relative to their index is minimized by using quantitative techniques.

Counterparty risk

A counterparty of a sub-fund may fail to fulfil its obligations towards that sub-fund. In case of hedging transactions in classes of shares, the relevant sub-fund carries the counterparty risk. This risk is limited as much as possible by taking every possible care in the selection of counterparties. Wherever it is customary in the market, the sub-funds will demand and obtain collateral. The sub-funds minimize this risk by trading exclusively with reputable counterparties with a minimum rating of A in the Standard & Poor's or other recognized credit rating agencies lists. The positions that each Sub-fund takes in terms of interest-rate swaps and credit default (index) swaps (where possible) are centrally cleared at a clearing house. This means that the Sub-fund has a single central counter party (CCP) for derivative instruments with which the required collateral (Margin) is exchanged on a daily basis. To hedge the initial required collateral (Initial Margin) and for the variable required collateral (Variation Margin), the Sub-funds use cash.

Risk of lending financial instruments

In the case of financial instrument lending transactions, the Company and its respective sub-funds concerned run the risk that the borrower cannot comply with its obligation to return the financial instruments on the agreed date or furnish the requested collateral. The lending policy of the Company is designed to control these risks as much as possible.

The credit worthiness of counterparties in securities-lending transactions is assessed on the basis of how independent rating agencies regard their short-term credit worthiness and on the basis of their net assets. Guarantees given by parent companies are also taken into account. The fund only accepts collateral from OECD countries in the form of:

- government bonds with a minimum credit rating of BBB;
- the bonds of supranational bodies with a minimum credit rating of BBB-;
- stocks listed on the main indexes of stock markets in OECD countries; and to a limited extent in the form of
- index trackers;
- stocks issued by financial institutions;
- cash.

As of balance-sheet date, the fund had received collateral ensuing from securities-lending transactions. More information can be found on page 152.

Notes to the financial statements as at 31 December 2022 (continued)

1. General (continued)

Financial instruments (continued)

Risks (continued)

Liquidity risk

The actual buying and selling prices of financial instruments in which the sub-funds invest partly depend upon the liquidity of the financial instruments in question. It is possible that a position taken on behalf of a sub-fund cannot be quickly liquidated in a good time at a reasonable price due to a lack of liquidity in the market in terms of supply and demand. The sub-funds minimize this risk by mainly investing in financial instruments that are tradable on a daily basis.

Euro currency risk

All or part of the assets of sub-funds may be invested in securities denominated in Euro. In the event of any adjustments, including a full break-up, an exit of individual countries or other circumstances that may result in the emergence or reintroduction of national currencies, each sub-fund runs the risks that the value of its investments is reduced and/or the liquidity of its investments is (temporarily) reduced, regardless of the measures the Company may seek to reduce this risk.

Sustainability risk

RIAM systematically incorporates sustainability factors, to the extent these present a material risk to a sub-fund, into its investment and portfolio construction processes, alongside traditional financial risk factors. This is done through ESG scoring methodologies using proprietary sustainability research and external resources which are built into the portfolio construction process.

Processes and controls for sustainability risk integration are embedded in a designated Sustainability Risk Policy which is maintained by the risk management function and governed by the Risk Management Committee (RMC). The Sustainability Risk Policy is built on three pillars. The environmental or social characteristics promoted by a Sub-fund or sustainable investment objective of a sub-fund is used to identify and assess the relevant material sustainability risk topics. Based on these characteristics or investment objectives sustainability risk is monitored. Sensitivity and scenario analyses are conducted on a frequent basis to assess any material impact climate change risk may have on the portfolio of a Sub-fund.

Operational risk

The operational risk is the non inherent risk remaining after determining the risks as detailed above (general investment risk, counterparty risk, liquidity risk, Euro currency risk or risk of lending financial instruments). It mainly includes risks resulting from breakdowns in internal procedures, people and systems.

Insight into actual risks

The report of the Board of Directors, the Statement of net assets, the Notes to the financial statements and the Schedule of Investments, which include currency classification of the investments, give an insight into the actual risks at the end of the reporting period.

Risk management

Managing risk is a part of the investment process as a whole and with the help of advanced systems, the risks outlined above are limited, measured and monitored on the basis of fixed risk measures.

Policy regarding the use of derivatives

Investing implies that positions are taken. As it is possible to use various instruments, including derivative instruments, to construct an identical position, the selection of derivatives is subordinate to the positioning of an investment portfolio. In our published information, attention is given primarily to the overall position, and secondarily to the nature and volume of the financial instruments employed.

Derivative instruments

The unrealized results of derivative instruments are reported in the Statement of net assets. Commitments to derivatives are not included in the Statement of net assets. They are, however, explained in the Schedule of Investments. The unrealized results presented in the Statement of net assets are disclosed by contract in the Schedule of Investments.

The derivative instruments listed in the Notes are transacted through third party brokers. Those brokers hold/paid collateral as described on pages 149 to 151. The Company is exposed to counterparty risk in respect of all amounts including collateral due to it from such brokers.

2. Summary of significant accounting principles

General

Unless stated otherwise, the items shown in the financial statements are included at their nominal value and expressed in the reference currency of the sub-fund. This annual report covers the reporting period from 1 January 2022 until 31 December 2022.

Preparation and presentation of financial statements

The financial statements are prepared on the basis of the last NAV calculated during the year (30 December 2022 for all sub-fund) and presented in accordance with Luxembourg generally accepted accounting principles for investment funds. The going concern basis was applied for the preparation of the financial statements of the Fund and its sub-funds, except for the sub-funds liquidated during the year and subsequent to the financial year-end.

Notes to the financial statements as at 31 December 2022 (continued)

2. Summary of significant accounting principles (continued)

Combined figures

The combined figures are expressed in Euro and are presented for information purpose only. The combined figures are the sum of the statements of each sub-funds. The Combined Statement of net assets is presented in EUR at the exchange rates prevailing at the end of the reporting period, while the Combined Statement of operations and changes in net assets is presented in EUR at the average exchange rates during the year. Cross sub-funds investments (where one sub-fund invested within sub-fund of the Company) have not been eliminated from the Combined Statement.

Foreign currencies

Transactions in currencies other than the reference currency of the relevant sub-fund are converted into the reference currency at the exchange rates prevailing at the time of the transaction. The market value of the investments, assets and liabilities expressed in currencies other than the reference currency of the sub-fund are converted into the sub-fund's reference currency at the exchange rates prevailing at the end of the reporting period. Any positive or negative exchange differences arising are accounted for in the Statement of operations and changes in net assets. The table on page 215 shows the exchange rates as at 30 December 2022.

Valuation of investments

Transferable securities, money market instruments and financial derivative instruments listed on an official stock exchange listing

These instruments are valued at their last available market price; in the event that there should be several such markets, on the basis of the last available price of the main market for the relevant security or asset. Should the last available market price for a given transferable security, money market instrument or financial derivative instrument not truly reflects its fair market value, then that transferable security, money market instrument or financial derivative instrument is valued on the basis of the probable sales price which the Board of Directors deems prudent to assume. Fixed income securities not traded on such markets are generally valued at the last available price or yield equivalents obtained from one or more dealers or pricing services approved by the Board of Directors or any other price deemed appropriate by the Board of Directors. According to the valuation policy which is approved by the Fund Board a fair value adjustment will be made to reflect the current market values for securities traded in markets with a different timezone (mainly Asia Pacific) where new market information surfaces after the close of the local market but before the calculation of the NAV.

Transferable securities and/or money market instruments dealt in on another regulated market

These instruments are valued on the basis of their last available market price. Should the last available market price for a given transferable security and/or money market instrument not truly reflects its fair market value, then that transferable security and/or money market instrument is valued by the Board of Directors on the basis of the probable sales price which the Board of Directors deems prudent to assume.

Transferable securities and/or money market instruments not listed or dealt in on any stock exchange or on any regulated market

In the event that any assets are not listed or dealt in on any stock exchange or on any regulated market, or if, with respect to assets listed or dealt in on any stock exchange, or on any regulated market as aforesaid, where the above valuation methods are inappropriate or misleading, the Board of Directors may adopt any other appropriate valuation principles for the assets of the Company.

Investment transactions and investment income

Securities are initially recorded at cost, and where applicable on the basis of exchange rates prevailing on the date they are purchased. Results on sales of securities are determined on the basis of the average cost method (for futures first in first out method). Investment transactions are accounted for on the trade date. Dividends are accounted for on the ex-dividend date. Interest income is recorded on an accrual basis. Discounts/Premiums on zero coupon bonds are accreted as adjustments to interest income. Interest and capital gains on securities may be subject to withholding or capital gains taxes in certain countries.

Valuation of Russian Investments as at financial year-end:

As at 31 December 2022, the securities issued by Russian companies are valued at 'Nil' in the Schedules of Investments of the respective Sub-Funds exposed to such securities. This Nil value may not reflect the intrinsic value of those companies but rather reflect the fact that those securities are not tradable as of 31 December 2022.

3. Open forward exchange transactions

Open forward exchange transactions are valued with market practice valuation models using forwards rates based on exchange and interest rates applicable at 30 December 2022. The unrealized results of these transactions have been recorded gross in the Statement of net assets under the heading 'Unrealised gain/loss on forward currency exchange contracts' and changes in unrealized results are recorded in the Statement of operations and changes in net assets under the heading 'Net change in unrealised appreciation/(depreciation) on forward currency exchange contracts'. The contracts outstanding as at 31 December 2022 are disclosed in the Schedule of Investments. Information on the collateral received or paid on these positions is stated in the table on pages 149 to 151. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'.

Notes to the financial statements as at 31 December 2022 (continued)

4. Interest rate swaps

Interest rate swaps are valued with market practice valuation models using exchange and interest rates applicable at 31 December 2022. The unrealized gains/losses on interest rate swaps are recorded gross in the Statement of net assets under the heading 'Swap contracts at fair value' and changes in unrealized results are recorded in the Statement of operations and changes in net assets under the heading 'Net change in unrealised appreciation/(depreciation) on Swaps contracts'. The contracts outstanding as at 31 December 2022 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on pages 149 to 151. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'.

5. Credit default swaps

Credit default swaps are valued at fair value under procedures approved by the Board of Directors. The valuation is based on recognised market models with observable market inputs used to perform the valuation. The unrealized gains/losses on credit default swaps are recorded gross in the Statement of net assets under the heading 'Swap contracts at fair value' and changes in unrealized results are recorded in the Statement of operations and changes in net assets under the heading 'Net change in unrealised appreciation/(depreciation) on Swaps contracts'. The contracts outstanding as at 31 December 2022 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on pages 149 to 151. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'.

6. Financial futures contracts

Regulated futures contracts are valued at their exchange quoted settlement price. Initial margin deposits are made upon entering into futures contracts. Variation margin payments are made or received, depending on the daily fluctuation in market value of the contract and are recorded by the fund as unrealized appreciation or depreciation. When the contract is closed, the Company records a realized gain or loss equal to difference between the value of the contract at the time it was opened and the value at the time it was closed. All margin deposits are included in the Statement of net assets under the heading 'Cash at bank and at brokers'.

Changes in unrealized results and realized results during the year are both recorded in the Statement of operations and changes in net assets. The contracts outstanding as at 31 December 2022 are disclosed in the Schedule of Investments.

7. Collateral

Several sub-funds received or paid collateral to cover the unrealized results on derivative instruments. Collaterals are calculated and settled on a daily basis per counterparty. The collateral is primarily cash held at the broker in the name of the sub-fund. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'. No cash collateral has been reinvested. The amounts per sub-fund and counterparty are shown in the table below.

Sub-fund name	Currency	Counterparty	Type of collateral	Collateral received	Collateral pledged

8. Schedule of Investments

The Schedule of Investments of the sub-funds are included at the end of this report.

Notes to the financial statements as at 31 December 2022 (continued)

9. Securities lending

J.P. Morgan S.E. is a lending agent for all Robeco Capital Growth Funds securities lending transactions. J.P. Morgan SE is authorized to retain a fee in an amount equal to (A) 25% of the income from securities lending transactions for any loans which generate a return of 0.5% or less and (B) 10% of the income from securities lending transactions for any loans which generate a return greater than 0.5% of the sum of (i) earnings derived from Authorised Investments (as adjusted for any Rebate paid or received by J.P. Morgan SE) (ii) any fee, paid or payable by Borrower with respect to loans (including any loan fee but excluding any compensation payable by borrower under the Master Securities Lending Agreement (MSLA) in connection with a loan (net, however, of any other amount payable by Lender in connection with such loan). Gains and losses on Cash Collateral investments shall not be taken into account in calculating earnings for the purpose of J.P. Morgan's fees. The following table shows the position of the collateralized securities lending transactions with first-class financial institutions as described in the prospectus at the end of the reporting period as well as the income from securities lending over the reporting period for the Company and the income for J.P. Morgan SE. Income on securities lending transactions is recorded under the heading 'Securities lending income' in the Statement of operations and changes in net assets. Collateral received in the frame of the lending activity, primarily securities, is held in the name of the fund on an escrow account with external agents. In exceptional cases, the collateral is received in cash, which is not subject to reinvestment. More information on collateral received can be found on pages 791 and further.

Notes to the financial statements as at 31 December 2022 (continued)

10. Taxes

The classes of shares of the sub-funds are liable in Luxembourg to an annual duty ('taxe d'abonnement'/'subscription tax') at the rate of 0.05% of their net assets calculated and payable at the end of each quarter. This rate is 0.01% per annum for institutional classes of shares such as class I, IB, IBH, IBxH, IH, OIH, 2IH, IE, IEH, OIEH, IHHi, IL, IExH, IMH, IMBxH, J, K, KE, KH, Y, YH, Z2H, ZB, ZBH, and ZH shares. To the extent that the assets of the sub-funds are invested in investment funds which are established in Luxembourg, no such tax is payable, provided that the relevant investment funds have been subject to this tax. The sub-funds will receive income from their investments after deduction of applicable withholding taxes in the country of origin. There are no Luxembourg income, withholding, capital gains, estate or inheritance taxes payable by the sub-funds.

Taxation of Chinese A shares:

Capital gains derived from the transfer of Chinese A shares on or after 17 November 2014 are (temporarily) exempt from the 10% capital withholding tax ('CWT').

Taxation Indian listed stocks

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 15% Indian capital gains tax. The disposal of Indian listed stocks after 12 months after purchase (long term gains) were exempt until April 1st 2018. Starting April 1st 2018 India also introduced a capital gains tax on long term gains at a rate of 10%. The capital gains taxes are taken into account on an arisen basis at the applicable rates for a short term gain or a long term gain without taking a provision into account. Since 17 December 2019, the capital gains taxes are accrued in the Net Asset Value and included in the Statement of net assets under the heading 'Other liabilities' and included in the Statement of Operations and Changes in Net Assets under 'Net realized gain/(loss) on currency exchange' for the capital gain taxes linked to realized gains and under 'Net Change in unrealised appreciation/depreciation on : currency exchange ' for the unrealized appreciation of investments during the year.

11. Management Company

The Board of Directors of the Company has appointed Robeco Institutional Asset Management B.V. as the Management Company to be responsible on a day-to-day basis for providing administration, marketing and investment management services in respect of the sub-funds.

Robeco Institutional Asset Management ("RIAM") is incorporated under the laws of The Netherlands on 21 May 1974 and at that time called Rotrusco B.V. On 25 February 1997, the name was changed into RIAM. RIAM holds an AIFMD license as referred to in Section 2:65 Wft. In addition, RIAM is licensed as a manager of UCITS (2:69b Wft, the Dutch Financial Supervision Act). RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (Stichting Autoriteit Financiële Markten, "AFM").

The Management Company has delegated the administration functions and registrar agent functions to J.P. Morgan SE.

RIAM is part of ORIX Corporation Europe N.V. and also acts as the Management Company for other Luxembourg and Dutch domiciled funds.

Notes to the financial statements as at 31 December 2022 (continued)

12. Portfolio Manager

Robeco Institutional Asset Management B.V. (RIAM), an investment management company forming part of the Robeco Group in Rotterdam, the Netherlands, manages the assets of the sub-funds on a day-to-day basis. The Portfolio Management Agreement between the Management Company and RIAM was concluded on 1 June 2019 for an undetermined period.

The Management Company Adviser has appointed Boston Partners Global Investors Inc. as its Sub Delegated Portfolio Manager for the sub-funds Robeco BP Global Premium Equities, Robeco BP US Premium Equities, Robeco BP US Large Cap Equities and Robeco BP US Select Opportunities Equities.

The Sub Delegated Portfolio Manager for the sub-funds Robeco Asia-Pacific Equities, Robeco Chinese Equities, Robeco Indian Equities, Robeco Asian Stars Equities, Robeco Sustainable Asian Stars Equities and Robeco Chinese A-Share Equities is Robeco Hong Kong Ltd.

The Sub Delegated Portfolio Manager for the sub-funds Robeco Sustainable European Stars Equities, RobecoSAM Circular Economy Equities, RobecoSAM Smart Energy Equities, RobecoSAM Smart Materials Equities, RobecoSAM Smart Mobility Equities, RobecoSAM Sustainable Healthy Living Equities, RobecoSAM Sustainable Water Equities, RobecoSAM Global Gender Equality Equities and RobecoSAM Biodiversity Equities is Robeco Schweiz AG.

The Portfolio Manager for Robeco Sustainable Asian Bonds is Robeco Singapore Private Ltd.

13. Cross investment between sub-funds

The Company is permitted to engage in cross investment between sub-funds within the umbrella structure. In case there are management fees or service fees charged on the cross investments, these fees are returned to the investor sub-fund. The following information pertains to the cross-investment between sub-funds within the Company as at 31 December 2022:

Investment	Sub-fund Currency	Market Value	% of net assets
Robeco QI Global Conservative Equities			
Robeco QI Chinese A-share Conservative Equities - Z EUR		4,760,411	1.12
	EUR	4,760,411	1.12
Robeco QI Emerging Markets Active Equities			
Robeco QI Chinese A-share Active Equities - Z EUR		33,966,008	4.68
	EUR	33,966,008	4.68
Robeco Chinese Equities			
Robeco Chinese A-Share Equities - I EUR		950,126	0.43
	EUR	950,126	0.43
Robeco Global Credits			
RobecoSAM Emerging SDG Credits - Z USD		101,927,304	3.99
	EUR	101,927,304	3.99
Robeco QI Multi Factor Absolute Return			
Robeco QI Global Multi-Factor Credits - ZH EUR		155,159	3.84
Robeco QI Global Multi-Factor High Yield - IH EUR		78,848	1.95
	EUR	234,007	5.79

Notes to the financial statements as at 31 December 2022 (continued)

13. Cross investment between sub-funds (continued)

If the sub-funds invest in UCITS/UCI's that are not part of the Robeco Group, all costs at the level of these UCITS/UCI's (including the non recoverable management fees, service fees, performance fees and/or transactions costs) shall be borne by the sub-funds ultimately and therefore by the shareholders. The management fee and service fee paid in the Robeco funds is restituted to the sub-funds and recorded in the Statement of operations and changes in net assets. During the year, the cross investments between the sub-funds mainly occurred in share-class Z of Robeco sub-fund which does not pay any management fees.

14. Management, service and performance fees

The different sub-funds or class of shares incur an annual management fee payable to the Management Company, which reflects all expenses 1 related to the management of the sub-funds. Furthermore the different sub-funds or classes of shares incur an annual service fee payable to the Management Company reflecting expenses 1 such as the fees of the administration agent, the registrar agent, auditors and legal advisers, the costs of preparing, printing and distributing all prospectuses, memorandums, reports and other necessary documents concerning the Company, any fees and expenses involved in the registration of the Company with any governmental agency and stock exchange, the costs of publishing prices and operational expenses, and the cost of holding shareholders' meetings.

"1" Additional expenses maybe charged to the Fund on an exceptional basis as disclosed in the prospectus."

The annual charges, both management fee and service fee, are expressed as a percentage of the net asset value. The charges, paid quarterly, are based on the net asset value of the relevant period and are reflected in the share price.

The share classes Z do not pay management fees. For some sub-funds the Management Company is entitled to a performance fee, payable annually in arrears after the end of the reporting period. A performance fee for the relevant class of shares of the sub-fund is only due at the end of the financial year when the relevant class of shares of the sub-fund outperforms the relevant index or hurdle rate as indicated in the prospectus. Note that an outperformance of the relevant class of shares of the sub-fund does not imply a positive return of the of the relevant class of shares of the sub-fund, a performance fee is also due when the relevant class of shares of the sub-fund has a negative return but an outperformance over the relevant index or hurdle rate as indicated in the prospectus. This outperformance must have taken place since inception of the relevant class of share of the sub-fund or since the time that a performance fee was due. In the event that payment of the performance fee is due, the basis for the performance fee calculation for the next financial year will start at 0 (reset). In the event that no payment of the performance fee is due no reset will take place. In addition if a shareholder redeems or switches all or part of their shares before the end of a performance period, any accrued performance fee with respect to such shares will crystallize on that Valuation Day and will then become payable to the Management Company. The basis for the performance fee calculation will not reset on those valuation days at which performance fees crystallize following the redemption or switch of shares.

The following table shows the maximum percentages for the different outstanding classes of shares on an annual basis.

	Sub Fund currency	Performance fee	Percentage of average net assets
Robeco Sustainable Global Stars Equities			
E EUR	EUR	27	–
Robeco Asian Stars Equities

If the net asset value per share class exceeds EUR 1 billion the service fee will be reduced by 0.02% for the portion above 1 billion. If the net asset per share class value exceeds EUR 5 billion, the service fee will be reduced by a further 0.02% for the portion above EUR 5 billion.

Notes to the financial statements as at 31 December 2022 (continued)

15. Depositary fees

The Depositary bank is remunerated in accordance with the agreement between J.P. Morgan S.E. (acting as the depositary) and the Company. The depositary fees are paid by RIAM out of the service fee.

16. Other operating expenses

The banking fees relating to the assets of the sub-funds or expenses incurred thereof, such as proxy voting are paid by RIAM out of the service fee. The costs of establishing the Company have been paid entirely. If additional sub-funds are created in the future, these sub-funds will bear, in principle, their own formation expenses.

Notes to the financial statements as at 31 December 2022 (continued)

17. Transaction costs

The sub-funds and their classes of shares pay directly commissions, brokerage fees and taxes resulting from financial transactions. Transaction costs are included in the purchase/sale price of the securities.

18. Total Expense Ratio (TER)

The Total Expense Ratio ('TER') expresses the operational costs (e.g. management fee, service fee, performance fee, taxe d'abonnement and bank charges) charged to the sub-funds as a percentage of the average assets entrusted, calculated on a daily basis, during the reporting period. The TER as shown below do not include transaction costs. The other costs concern mainly bank charges and taxe d'abonnement. Total Expense Ratio are annualized for periods less than one year.

The total expense ratio (TER) was calculated based on the version currently applicable of the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Asset Management Association Switzerland (AMAS).

Notes to the financial statements as at 31 December 2022 (continued)

Notes to the financial statements as at 31 December 2022 (continued)

19. Broker commission

Robeco will ensure that the selection of counterparties for trade execution ('Brokers') will take place according to defined procedures and criteria to ensure best execution, taking into account execution capability and - where applicable - quality of investment research ('Research').

Under the influence of the MIFID II regulation RIAM decided to bear the research costs for most of the sub-funds of Robeco Capital Growth Funds from 2018. Only for the funds for which the American based asset manager Boston Partners is the Sub Delegated Portfolio Manager, the research costs are charged to the fund. Below text on research costs is only applicable to the funds in the table below.

Brokers may charge execution only fees (excluding a fee for Research) and brokers may also charge a transaction fee consisting of two elements: a fee for the execution of an order and a fee for Research. Robeco will only pay a fee for Research if such Research is directly instrumental for improving the investment decision-making process within Robeco (via full service fees and via Commission Sharing Agreements ('CSA')). Having CSAs enables Robeco to unbundle research and execution services to fulfill best execution criteria. By using CSAs, we can obtain research services from those providers who do not have an execution business or do not fit our best execution criteria. It is Robeco's policy that the abovementioned arrangements are only allowed as long as the research services under consideration research, securities advice, etc.) are related to the enhancement of our investment process. Robeco makes use of:

1. Execution only fees for quantitatively managed equity sub-funds;
2. Full services fees for fundamentally managed equity sub-funds; and
3. CSAs for fundamentally managed equity sub-funds.

Research costs paid

Sub-Fund	Sub-Fund Currency	Total research costs paid
Robeco BP Global Premium Equities	EUR	933,736
Robeco BP US Premium Equities	USD	462,771
Robeco BP US Large Cap Equities	USD	156,167
Robeco BP US Select Opportunities Equities	USD	336,832

20. Portfolio Turnover Ratio (PTR)

This is the turnover ratio of the investments, against the average assets entrusted and this is a measure of the incurred transaction costs resulting from the investment portfolio policies pursued and the ensuing investment transactions. In the calculation method that is used the amount of turnover is determined by the sum of purchases and sales of investments, excluding derivative and liquidity instruments, less the sum of issuance and repurchase of own shares, divided by the daily average of the net assets. The portfolio turnover ratio is determined by expressing the amount of turnover as a percentage of the average assets entrusted. Following table shows the portfolio turnover ratios of the sub-funds.

Notes to the financial statements as at 31 December 2022 (continued)

Other data (unaudited) (continued)

Remuneration policy and remuneration paid

The fund itself does not employ any personnel and is managed by Robeco Institutional Asset Management B.V. ('RIAM'). The remuneration for persons working for RIAM comes out of the management fee.

Remuneration policy

RIAM's remuneration policy, which applies to all staff working under its responsibility, complies with the applicable requirements laid down in the European framework documents of the UCITS Directive and the ESMA guidelines for a responsible remuneration policy under the UCITS Directive.

The remuneration policy of RIAM can be obtained free of charge at the offices of the Company.

This remuneration policy applies to all staff of RIAM, including individuals who may have a material impact on the risk profile of the fund. These persons are designated to be 'Identified Staff'.

Responsibility for and application of the policy

RIAM's Remuneration Policy is determined, applied and annually reviewed by and on behalf of RIAM with the approval of its shareholder, the (Board of) Robeco Holding B.V. For each review (the Board of) Robeco Holding B.V. shall obtain prior advice from the Supervisory Board of RIAM, which acts as its Supervisory Board. In the application and evaluation of the remuneration policy, RIAM occasionally makes use of the services of various external advisers.

Remuneration in 2022

The total remuneration granted for RIAM over the performance year 2022 is shown in the table below:

Total remuneration RIAM in EUR x 1		
Staff category	Fixed pay for 2022	Variable pay for 2022
Board (3 members)	1,725,610	2,125,000
Identified Staff (102) (ex Board)	19,406,389	15,003,448
Other employees (730 employees)	65,442,019	20,237,538

Of the total amounts granted in remuneration in 2022 to the Board Identified Staff and Other Employees, the following amounts are attributable to the fund:

Remuneration assigned to the fund in EUR x 1		
Staff category	Fixed pay for 2022	Variable pay for 2022
Board (3 members)	733,954	903,826
Identified Staff (102) (ex Board)	8,254,120	6,381,417
Other employees (730 employees)	27,834,455	8,607,632

The total of the fixed and variable remuneration attributable to the fund is EUR 52,715,404. Imputation occurs according to the following key:

$$\text{Total remuneration (fixed and variable) x } \frac{\text{Total fund assets}}{\text{Total assets under management (RIAM)}}$$

As mentioned above the remuneration, which comes out of the management fee, is paid by RIAM and is therefore not charged to the fund separately.

Board Remuneration

The Board believes that the remuneration of its members should reflect the responsibilities and experience of the Board as a whole and be fair and appropriate given the size, complexity and investment objectives of the Fund. The remuneration is reviewed on an annual basis. The Independent directors have been paid EUR 110,000 for the year ended 31 December 2022. No variable remuneration is paid to the independent directors. The other directors have agreed to waive their remuneration.

Additional information Securities Financing Transaction (continued)

Securities Financing Transactions

The fund engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions (SFTs) include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions) and/or Total Return Swaps. In accordance with Article 13 of the Regulation, the funds involvement in and exposures related to SFTs and Total Return Swaps for the reporting date are detailed below.

Securities Lending

Global Data

Amount of securities on loan

The total value of securities on loan as a proportion of the Sub-Funds' total lendable assets as at the reporting date is detailed below. Total lendable assets represent the aggregate value of asset types forming part of the Sub-Funds' securities lending programme.

Securities Lending (continued)

Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point. The Fund's securities lending transactions have open maturity.

Settlement and clearing

The Company's securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

Re-use of collateral

Non cash collateral, received in a securities lending transaction may not be sold, re-invested or pledged. Cash collateral received from such transactions is re-used in a reverse repurchase transaction.

Safekeeping of collateral

Collateral received

J.P. Morgan SE, as securities lending agent of the Funds, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The J.P. Morgan SE is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

Return and cost

The total income earned from securities lending transactions is split between the fund and the securities lending agent. Details of this split are disclosed in notes to the financial statements on pages 152. Income earned during the year by the Funds from securities lending transactions is disclosed in the statement of operations and changes in net assets from pages 88 to 115.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP Global Premium Equities
Legal entity identifier: 2138001L9IU6WM5R6H47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1549 agenda items at 108 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.15% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 4.36% better than that of the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 7.53% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 10.52% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.32% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 16 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

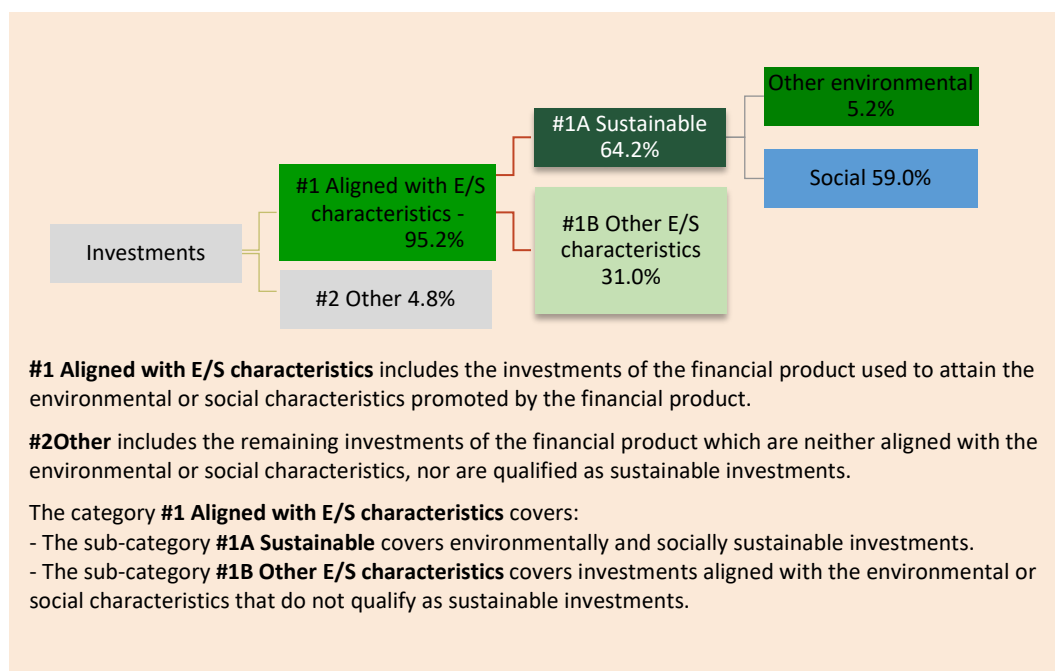

Largest investments	Sector	% Assets	Country
AbbVie Inc	Biotechnology	2.18	United States
Cigna Group/The	Health Care Providers & Services	2.13	United States

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

59.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 16 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon footprint of the fund was better than that of the reference index.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Conservative Equities
Legal entity identifier: 213800OYIDN8AF8MZF04

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.4% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2080 agenda items at 147 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 31.29%, 80.83% and 28.01% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.78 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.72% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.02% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 12.68% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.4% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 46.5 tCO₂ per million EUR, compared to 67.7 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -42.36%, 80.83% and 28.01% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 8 cases. PAI 2, table 1: Carbon footprint 8 cases. PAI 3, table 1: GHG intensity of investee companies 8 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 8 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 8 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 8 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and

Sustainability disclosures (unaudited)

- Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

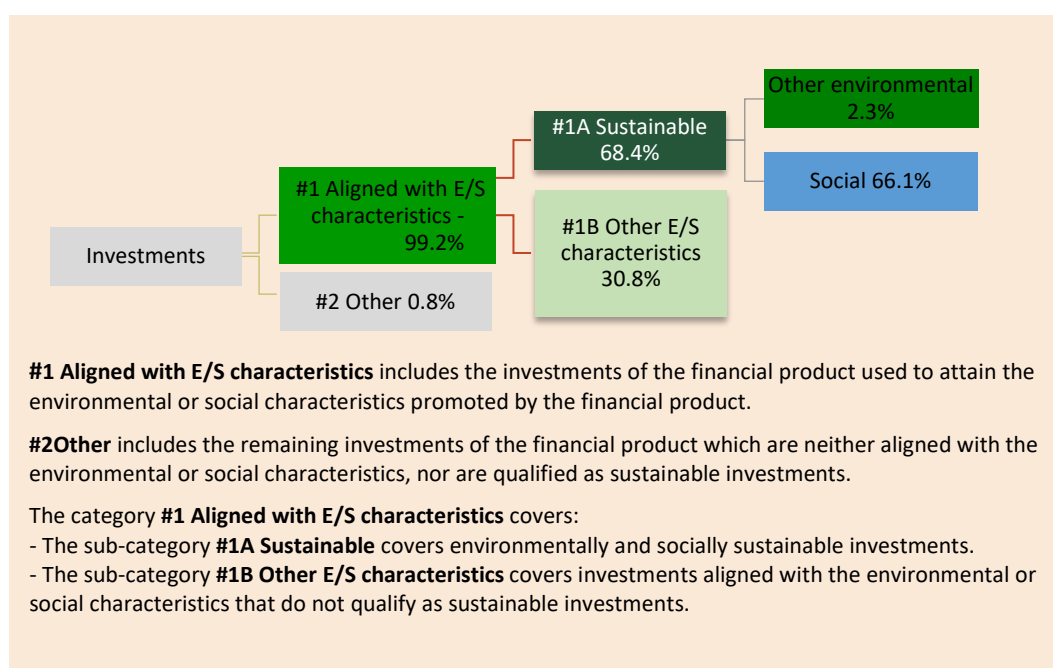

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	2.29	United States
Merck & Co Inc	Pharmaceuticals	1.97	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

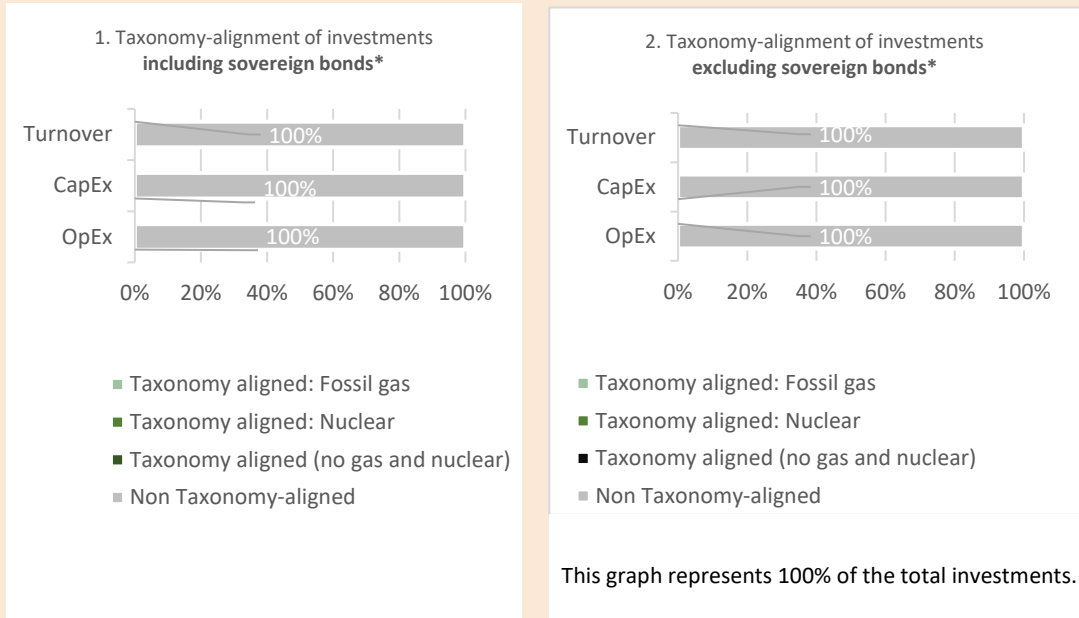

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Global Stars Equities
Legal entity identifier: 213800STHRWFUJPF10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 81.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 2% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 667 agenda items at 44 shareholders' meetings.
2. The portfolio contained on average 5.92% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 74.83%, 90.21% and 89.18% better than the general market index.
6. The sub-fund's weighted average ESG score was 17.47 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable

Sustainability disclosures (unaudited)

investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the

Sustainability disclosures (unaudited)

following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 5.33% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.58% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.34% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 14 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 93.95%, 90.21% and 89.18% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 24 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.

Sustainability disclosures (unaudited)

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	5.95	United States

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

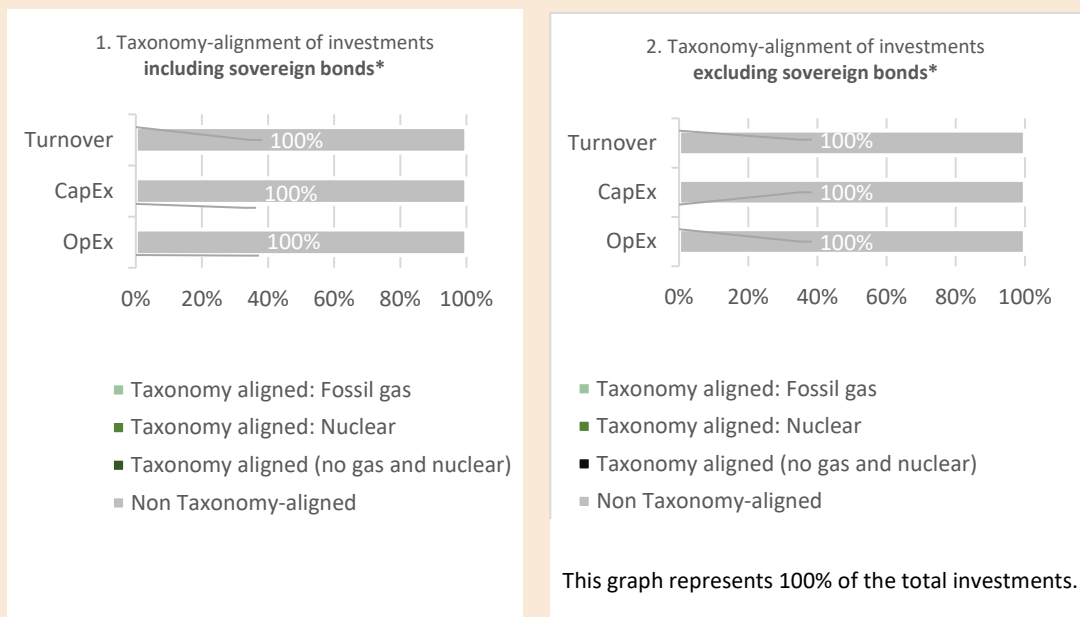

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

76.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, we have over half of our holdings under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 60% better than the benchmark.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Emerging Stars Equities
Legal entity identifier: 213800QZQKHD6N2CO791

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 625 agenda items at 61 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.01% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.98% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.96% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

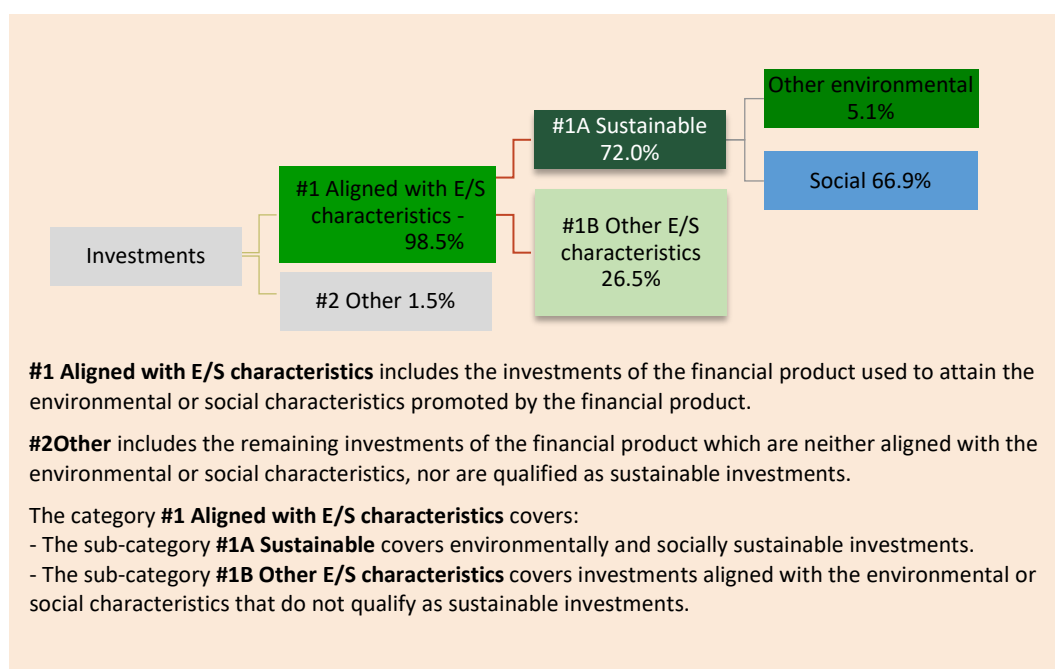

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	7.74	Taiwan
Samsung Electronics Co Ltd	Technology Hardware, Storage & Peripherals	5.02	South Korea
Naspers Ltd	Internet & Direct Marketing Retail	4.54	South Africa
China Resources Land Ltd	Real Estate Management & Development	3.14	China
Hana Financial Group Inc	Banks	3.13	South Korea
Grupo Financiero Banorte SAB de CV	Banks	2.91	Mexico

Paper & Forest Products	0.00
Cash and other instruments	0.92

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, none of the holdings has an elevated sustainability risk.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Emerging Markets Equities
Legal entity identifier: 213800G7572JDNM7PW92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1236 agenda items at 124 shareholders' meetings.
2. The portfolio contained on average 3.59% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 2.77% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.99% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.45% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.07% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.94% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 20 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 8 cases. PAI 2, table 1: Carbon footprint 8 cases. PAI 3, table 1: GHG intensity of investee companies 8 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 8 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 8 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 8 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

67.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 20 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Markets Active Equities
Legal entity identifier: 21380047HP5WHXG9ER08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 3485 agenda items at 374 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 16.63%, 72.38% and 49.38% better than the general market index.
5. The sub-fund's weighted average ESG score was 24.92 against 25.23 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.85% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.25% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.85% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.01% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 137.7 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 26.01%, 72.38% and 49.38% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 20 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 2 cases. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and

Sustainability disclosures (unaudited)

- Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

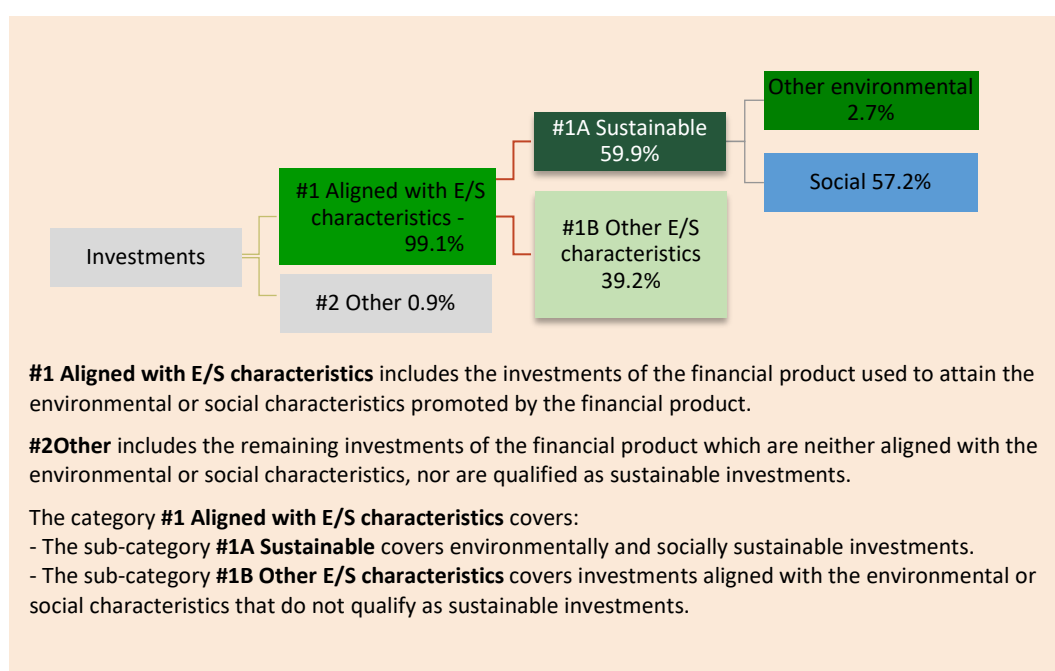

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Ltd	Semiconductors & Semiconductor Equipment	5.38	Taiwan

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

57.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 20 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Sustainable Enhanced Index Equities

Legal entity identifier: 213800XPIJOYMY8KOZ42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
5. The sub-fund's weighted average ESG score was at least 10% better than that of the general market index.
6. The sub-fund excluded all high or medium negative SDG scores (-3 or -2).

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 10844 agenda items at 729 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 34.48%, 23.14% and 47.76% better than the general market index.
5. The sub-fund's weighted average ESG score was 19.11 against 21.48 for the general market index.
6. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision ‘Besluit marktmisbruik’ art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.93% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.99% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.32% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 36.3 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 26.88%, 23.14% and 47.76% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 65 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 5 cases. PAI 12, table 1: Unadjusted gender pay gap 3 cases. PAI 13, table 1: Board gender diversity 3 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

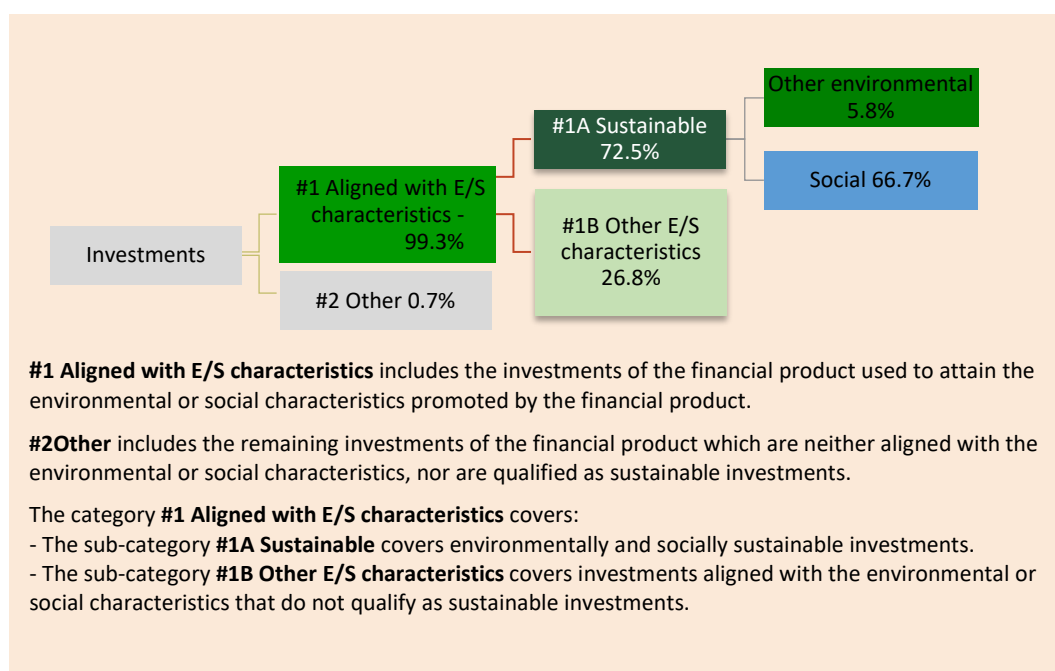

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	4.26	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 65 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Conservative Equities
Legal entity identifier: 213800KLJOYPGHWQQA07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.6% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 3518 agenda items at 340 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 56.09%, 23.66% and 83.34% better than the general market index.
5. The sub-fund's weighted average ESG score was 24.93 against 25.23 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.93% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 1.34% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.23% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.02% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 72.5 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 93.91%, 23.66% and 83.34% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

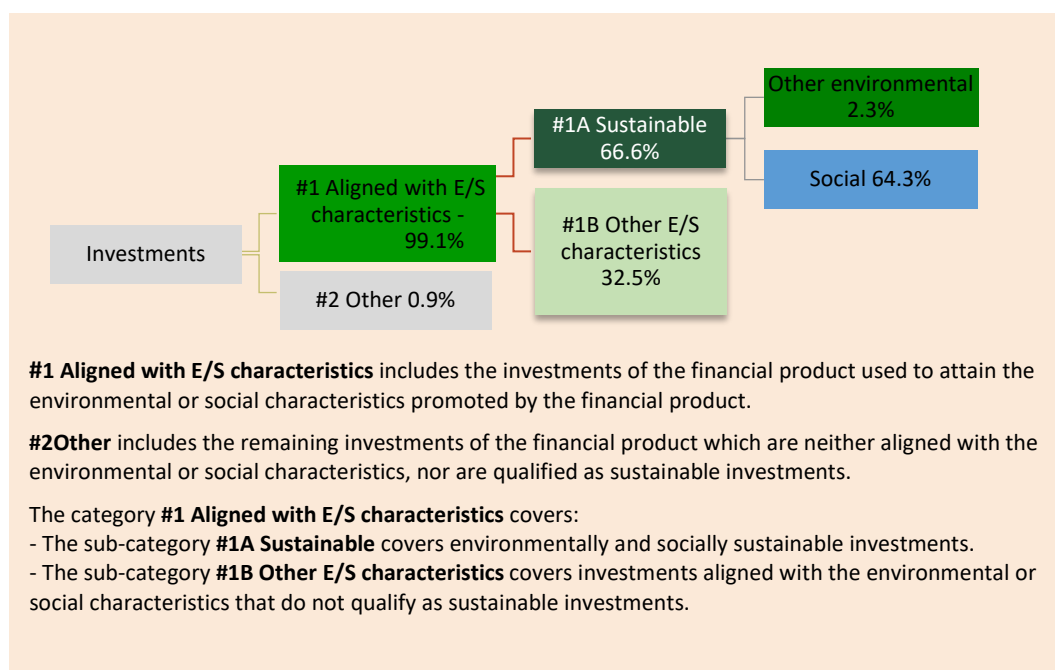

Largest investments	Sector	% Assets	Country
Samsung Electronics Co Ltd	Technology Hardware, Storage & Peripherals	2.32	South Korea
Bank of China Ltd	Banks	2.25	China

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

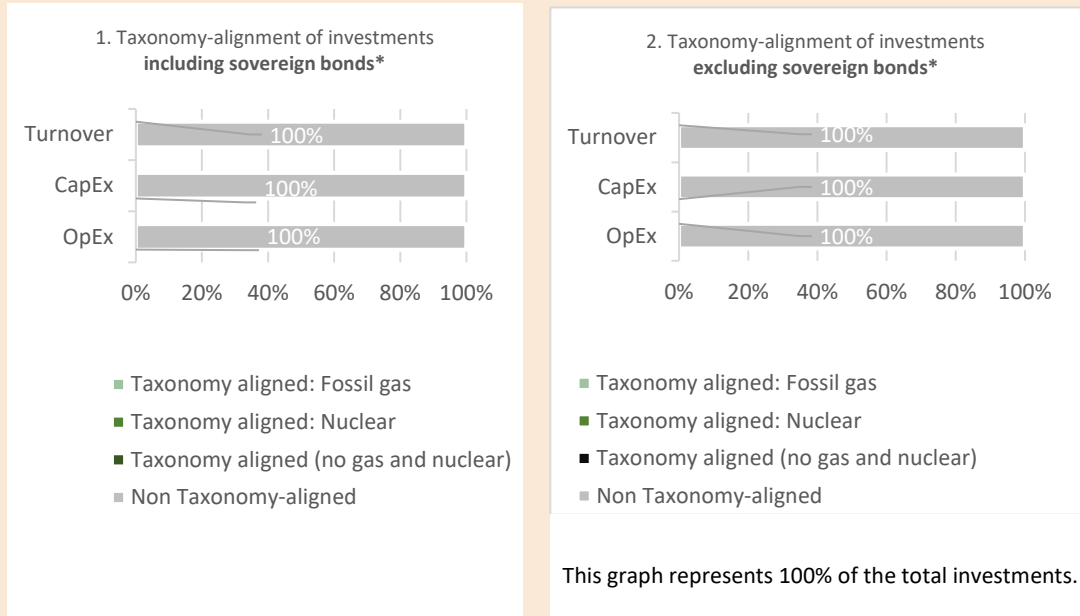

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

64.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Value Equities
Legal entity identifier: 2138008GOSJ2FFNDBA15

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2699 agenda items at 206 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 13.70%, 76.93% and 5.14% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.73 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 5.15% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 11.41% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.58% of the benchmark
 - Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 58.5 tCO₂ per million EUR, compared to 67.7 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -28.12%, 76.93% and 5.14% better than the benchmark.
 - Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
 - Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
 - Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 13 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 7 cases. PAI 2, table 1: Carbon footprint 7 cases. PAI 3, table 1: GHG intensity of investee companies 7 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 7 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 7 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 7 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

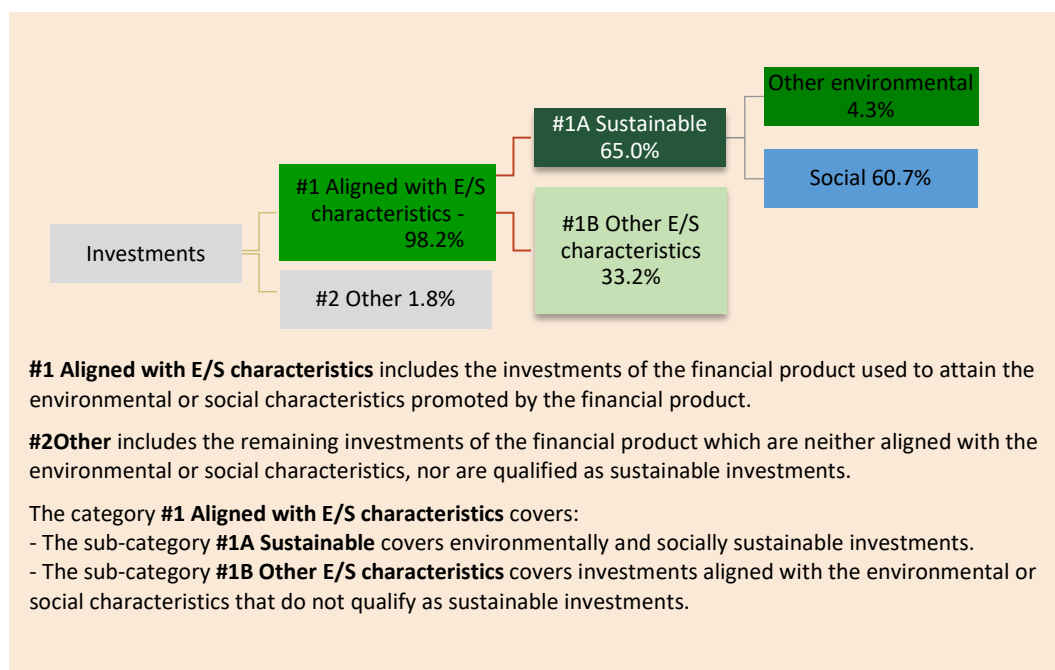

Largest investments	Sector	% Assets	Country
Bristol-Myers Squibb Co	Pharmaceuticals	2.02	United States
Pfizer Inc	Pharmaceuticals	1.99	United States
AbbVie Inc	Biotechnology	1.99	United States
Verizon Communications Inc	Diversified Telecommunication Services	1.90	United States
AT&T Inc	Diversified Telecommunication Services	1.88	United States
International Business Machines Corp	IT Services	1.85	United States
Intel Corp	Semiconductors & Semiconductor Equipment	1.69	United States
Gilead Sciences Inc	Biotechnology	1.55	United States
Shell PLC	Oil, Gas & Consumable Fuels	1.48	United Kingdom
Petroleo Brasileiro SA ADR	Oil, Gas & Consumable Fuels	1.15	Brazil
McKesson Corp	Health Care Providers & Services	1.14	United States
Mercedes-Benz Group AG	Automobiles	1.12	Germany
China Construction Bank Corp	Banks	1.11	China
Kroger Co/The	Food & Staples Retailing	1.07	United States
HP Inc	Technology Hardware, Storage & Peripherals	1.02	United States

What was the proportion of sustainability-related investments?

98.2%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.7%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Multi-Factor Equities
Legal entity identifier: 2138004BTUICV15VA168

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 6032 agenda items at 454 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 20.38%, 78.95% and 51.10% better than the general market index.
5. The sub-fund's weighted average ESG score was 20.89 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.17% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 7.58% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.34% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 44.1 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 20.66%, 78.95% and 51.1% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 38 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 10 cases. PAI 2, table 1: Carbon footprint 10 cases. PAI 3, table 1: GHG intensity of investee companies 10 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 10 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 10 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 10 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

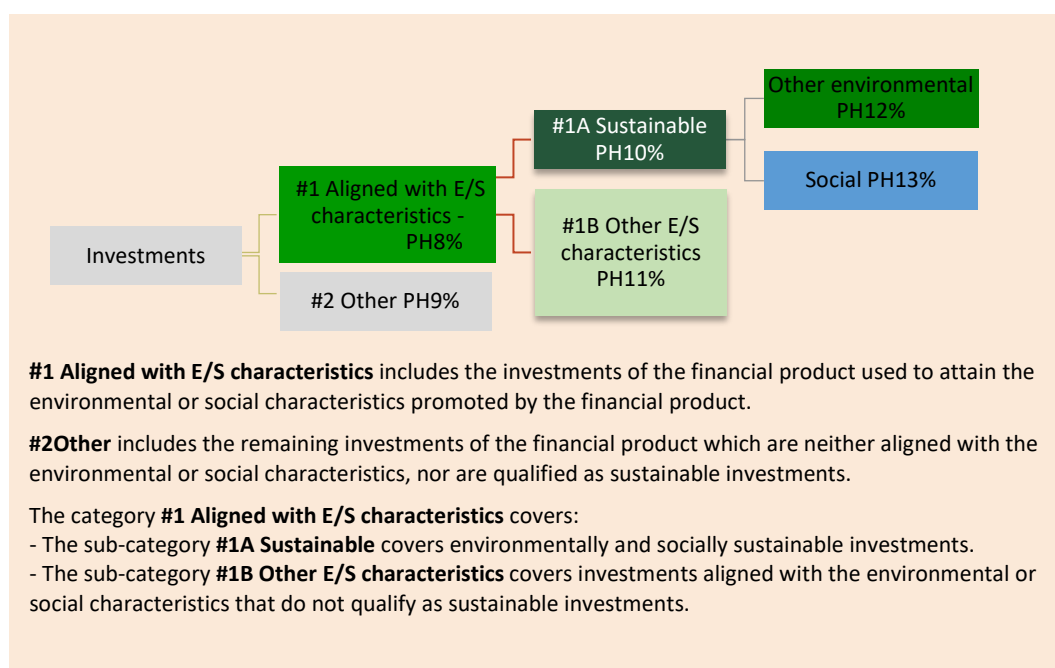

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	1.30	United States
Pfizer Inc	Pharmaceuticals	0.94	United States
AutoZone Inc	Specialty Retail	0.88	United States
Merck & Co Inc	Pharmaceuticals	0.79	United States
Bristol-Myers Squibb Co	Pharmaceuticals	0.78	United States
Costco Wholesale Corp	Food & Staples Retailing	0.73	United States
Roche Holding AG	Pharmaceuticals	0.72	Switzerland
Koninklijke Ahold Delhaize NV	Food & Staples Retailing	0.70	The Netherlands
Amgen Inc	Biotechnology	0.65	United States
Verizon Communications Inc	Diversified Telecommunication Services	0.65	United States
Colgate-Palmolive Co	Household Products	0.62	United States
Cisco Systems Inc	Communications Equipment	0.55	United States
Equinor ASA	Oil, Gas & Consumable Fuels	0.55	Norway
Paychex Inc	IT Services	0.55	United States
Gilead Sciences Inc	Biotechnology	0.42	United States

What was the proportion of sustainability-related investments?

98.9%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

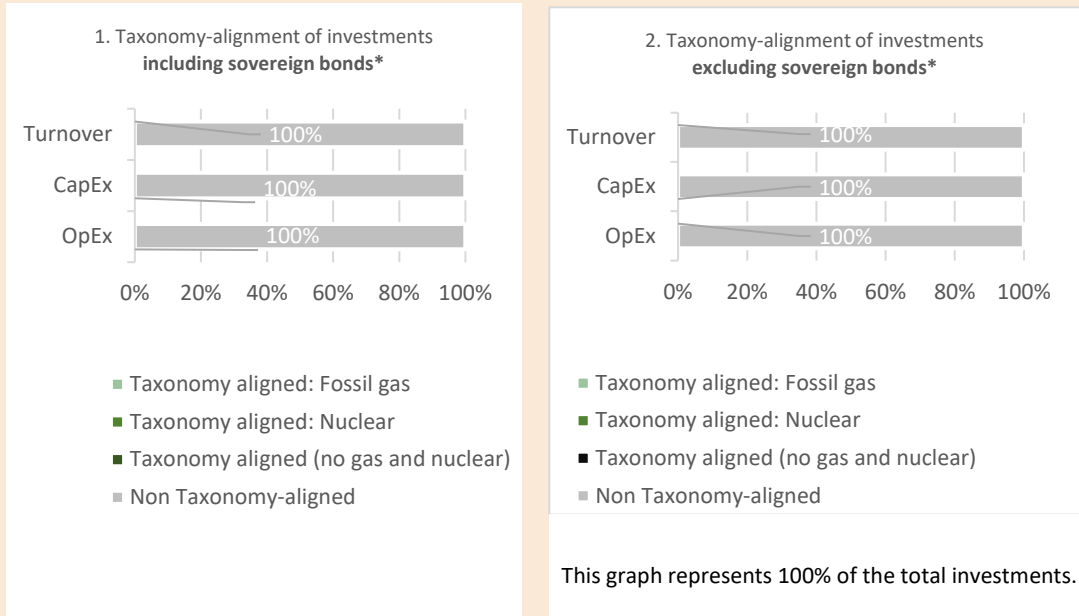

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.4%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 38 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Emerging Markets Sustainable Active Equities
Legal entity identifier: 549300CZ8S23ZD8TW786

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
5. The sub-fund's weighted average ESG score was at least 10% better than that of the general market index.
6. The sub-fund excluded all high or medium negative SDG scores (-3 or -2).

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 3239 agenda items at 348 shareholders' meetings.
2. The portfolio contained on average 3.17% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 53.21%, 90.20% and 85.01% better than the general market index.
5. The sub-fund's weighted average ESG score was 22.45 against 25.23 for the general market index.
6. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision ‘Besluit marktmisbruik’ art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.79% of the net assets, compared to 2.88% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.11% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.52% of the net assets, compared to 2.93% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.7% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 77.3 tCO₂ per million EUR, compared to 165.2 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 48.17%, 90.2% and 85.01% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

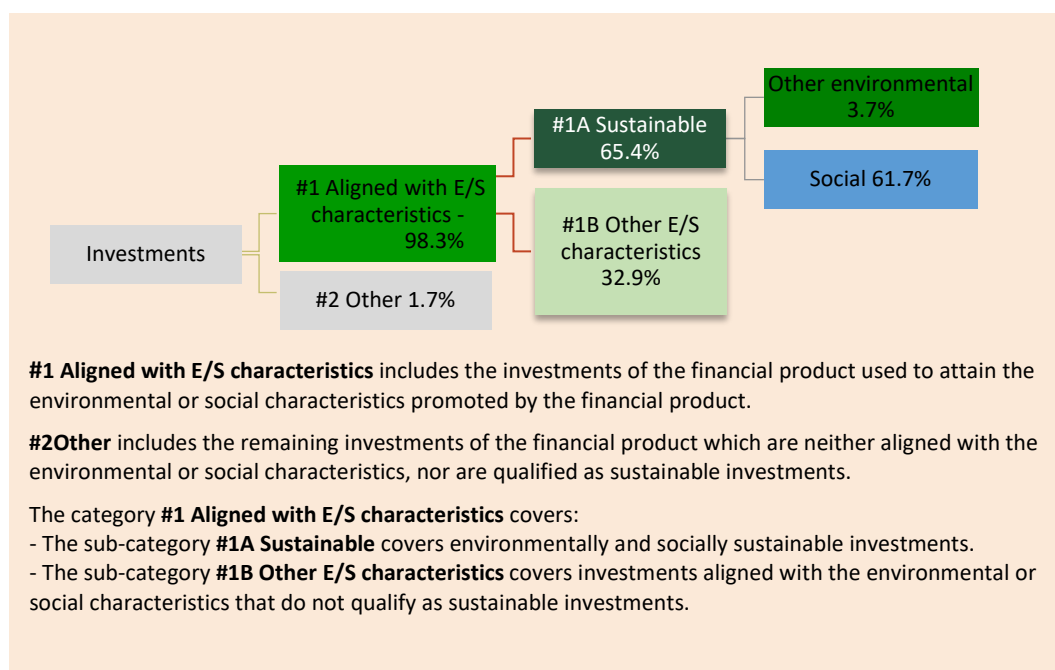

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co Lt	Semiconductors & Semiconductor Equipment	5.66	Taiwan
Tencent Holdings Ltd	Interactive Media & Services	3.17	China

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 50% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Conservative Equities
Legal entity identifier: 213800WBAS5AB8ING173

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2309 agenda items at 162 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 13.90%, 18.89% and 14.50% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.33 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.94% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 12.37% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.24% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 47.7 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -29.52%, 18.89% and 14.5% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 7 cases. PAI 2, table 1: Carbon footprint 7 cases. PAI 3, table 1: GHG intensity of investee companies 7 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 7 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 7 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 7 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

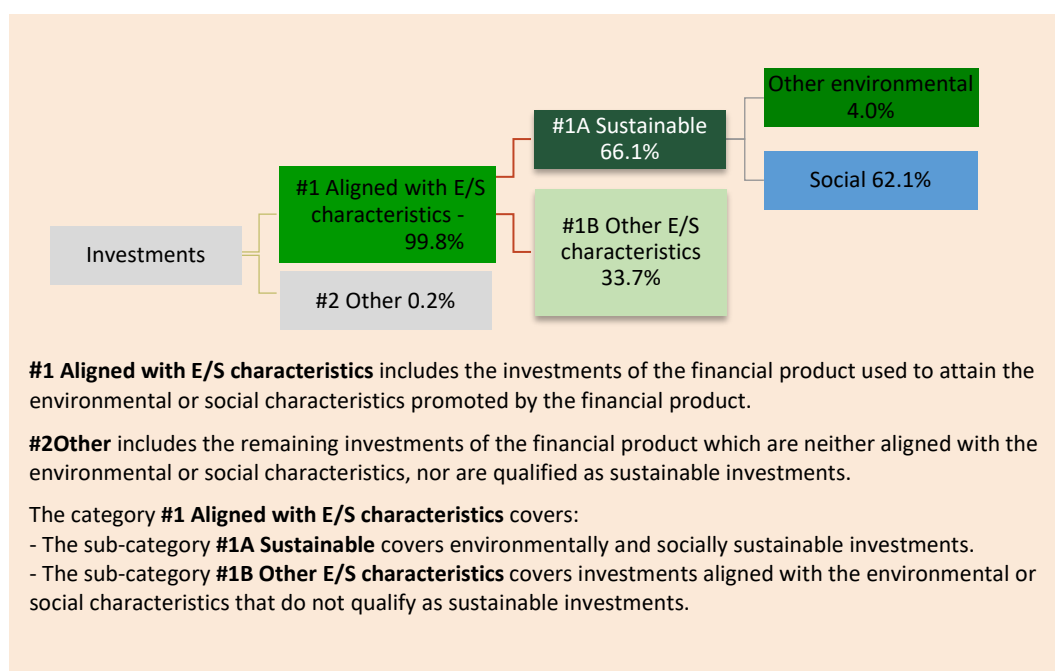

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	2.47	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

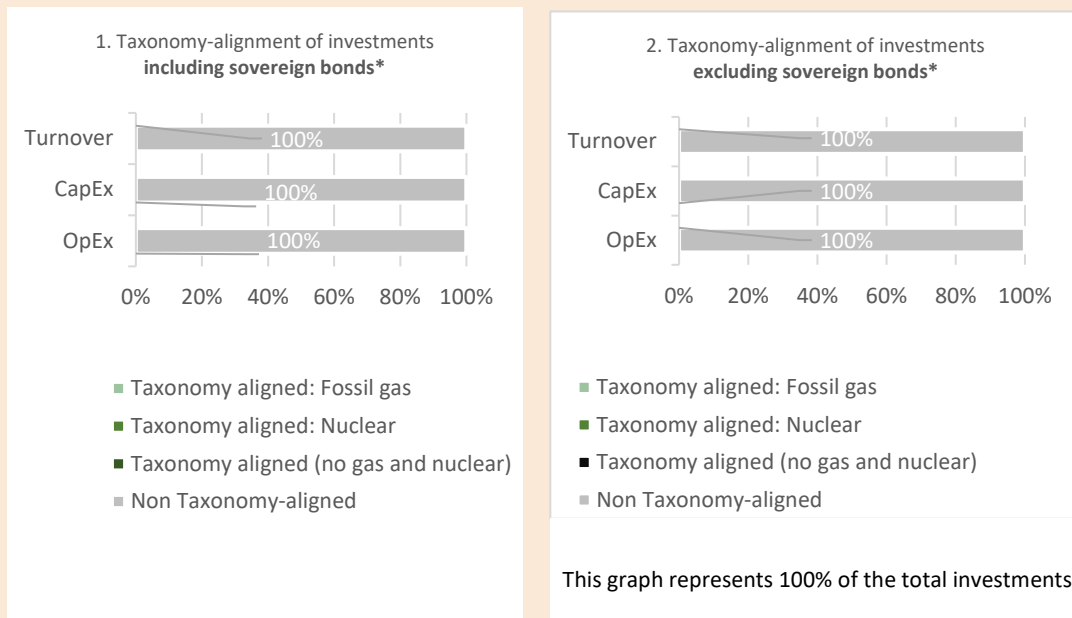

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

62.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Developed Enhanced Index Equities
Legal entity identifier: 213800W6NOMU3QTJAP16

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 5.66%, 15.16% and 28.49% better than the general market index.
4. The sub-fund's weighted average ESG score was 21.23 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China).⁶ The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a.⁷ The Belgian Loi Mahoux, the ban on uranium weapons.⁸ Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:

Sustainability disclosures (unaudited)

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.71% of the net assets, compared to 5.12% of the benchmark
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 9.45% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.02% of the net assets, compared to 0.24% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 52.3 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 1.07%, 15.16% and 28.49% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 91 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 18 cases. PAI 2, table 1: Carbon footprint 18 cases. PAI 3, table 1: GHG intensity of investee companies 18 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 18 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 18 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 18 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 8, table 1: Emissions to water 3 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 3 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 2 cases. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 2 cases. PAI 12, table 1: Unadjusted gender pay gap 3 cases. PAI 13, table 1: Board gender diversity 3 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

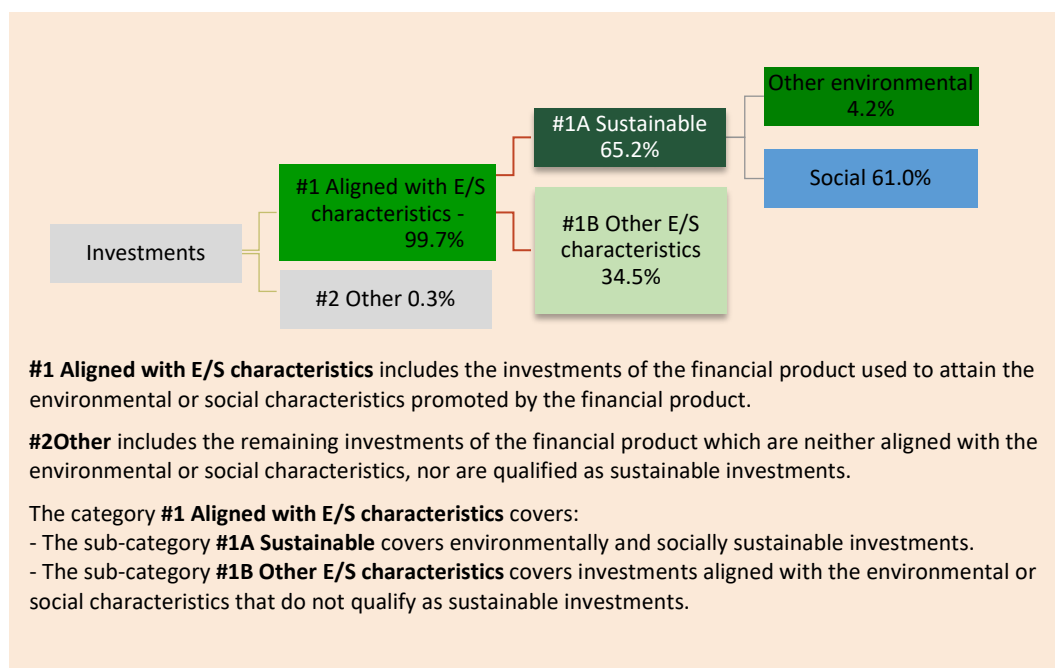

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	4.53	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

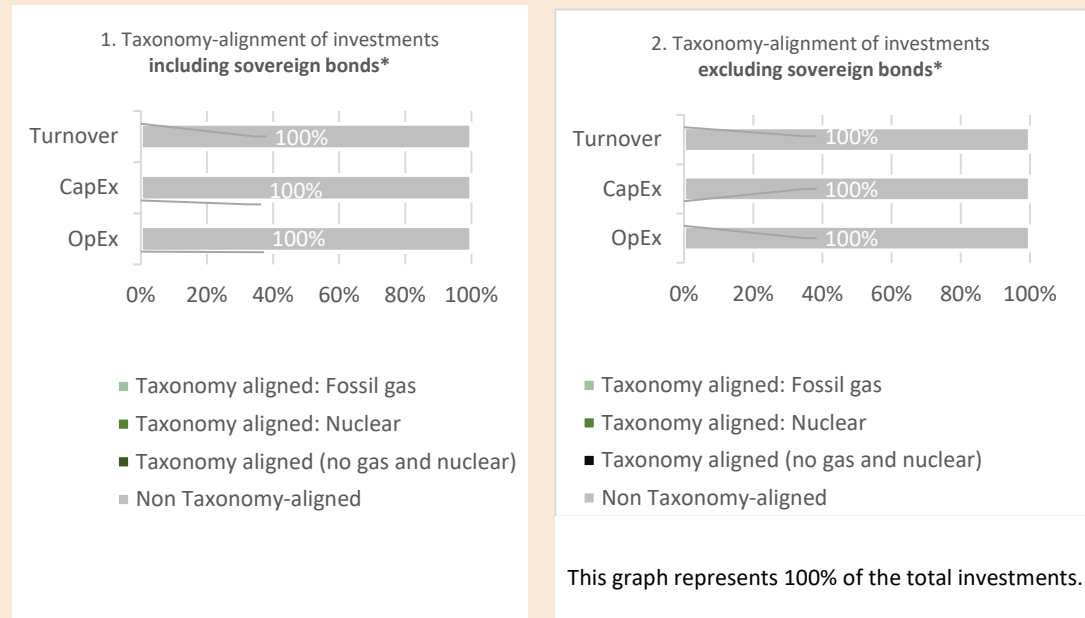

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 91 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global SDG Equities

Legal entity identifier: 213800NVKQZ68I4DWL83

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 8.8%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 87.1%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

100% of the companies in portfolio held a medium or high positive SDG score (+2 or +3) based on the internally developed SDG framework. 95.9% of the assets of the sub-fund had a positive SDG score, and contributed to the United Nation's Sustainable Development Goals (SDGs). The average SDG score of the portfolio was 2.0361.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 769 agenda items at 48 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.

Sustainability disclosures (unaudited)

3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00% of the companies held a medium or high positive SDG score (+2 or +3) based on the internally developed SDG framework.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and

Sustainability disclosures (unaudited)

Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.

- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there were no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 2.0361.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 13 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	4.95%	United States
KB Financial Group Inc	Banks	3.34%	South Korea
PNC Financial Services Group	Banks	3.26%	United States
AstraZeneca PLC	Pharmaceuticals	2.96%	United Kingdom
Merck & Co Inc	Pharmaceuticals	2.92%	United States
CVS Health Corp	Health Care	2.90%	United States
UnitedHealth Group Inc	Health Care	2.63%	United States
ON Semiconductor Corp	Semiconductors &	2.62%	United States
Columbia Sportswear Co	Textiles, Apparel &	2.26%	United States
Nomad Foods Ltd	Food Products	2.17%	United Kingdom
Roche Holding AG	Pharmaceuticals	2.07%	Switzerland
Thermo Fisher Scientific Inc	Life Sciences Tools	2.08%	United States
Zebra Technologies Corp	Electronic	2.02%	United States
Colgate-Palmolive Co	Household	2.05%	United States
Sekisui House Ltd	Household	2.00%	Japan

What was the proportion of sustainability-related investments?

95.9%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Pharmaceuticals	11.28
Banks	8.41
Software	7.27
IT Services	7.01
Insurance	5.82
Health Care Providers & Services	5.53
Electrical Equipment	4.74
Semiconductors & Semiconductor Equipment	4.67
Food Products	4.03

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

Yes:

In fossil gas

In nuclear energy

No

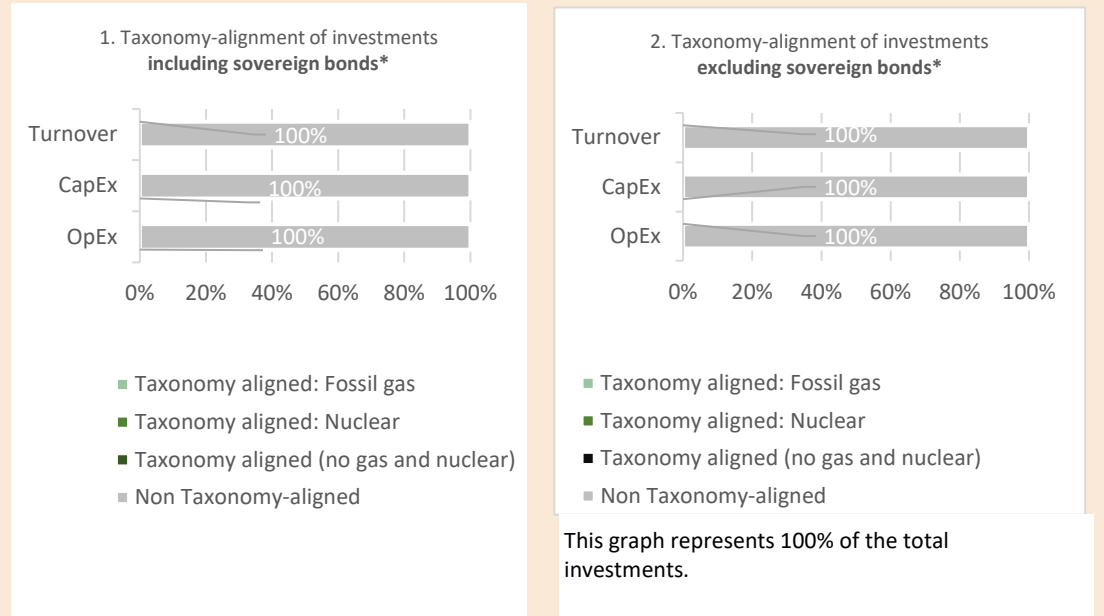

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

8.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

87.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global SDG Engagement Equities
Legal entity identifier: 2138007Y9W8ZMOEUOL93

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.6% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund actively engaged with 100% of the corporate holdings in the portfolio, typically for a period of 3 to 5 years. The engagement trajectories are assessed annually, considering the progress of pre-determined objectives that focus on contributing to specific sub targets of the SDGs. Once the company in scope falls out of the universe as a result of (a) a successful engagement (resulting in

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

SDG scores of +2, +3) or (b) an unsuccessful engagement, then a selling strategy will be designed for divestment.

3. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
4. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
5. The sub-fund was solely invested in companies that hold a -1, 0 (zero) or positive SDG score. The Sub-fund excludes all high or medium negative SDG scores (-3 or -2) and all high or medium positive SDG scores (+3 or +2) based on the internally developed SDG Framework.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 699 agenda items at 44 shareholders' meetings.
2. The Sub-fund actively engaged with 100% of the corporate holdings in the portfolio, typically for a period of 3 to 5 years. The engagement trajectories are assessed annually, considering the progress of pre-determined objectives that focus on contributing to specific sub targets of the SDGs. Once the company in scope falls out of the universe as a result of (a) a successful engagement (resulting in SDG scores of +2, +3) or (b) an unsuccessful engagement, then a selling strategy will be designed for divestment.
3. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
4. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
5. 100.00% of the companies (on average) held a SDG score of -1, 0 (zero) or +1 based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

Sustainability disclosures (unaudited)

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons

Sustainability disclosures (unaudited)

that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.5% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.84% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.59% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 36 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Apple Inc	Technology Hardware, Storage & Peripherals	5.67	United States
Deutsche Boerse AG	Capital Markets	5.29	Germany

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

57.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 36 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM QI Global SDG & Climate Beta Equities

Legal entity identifier: 213800PTYQMOZRCQMR91

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 77.5%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 21.2%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 23.9% better than as of 31 December 2021. Both at the start and at the end of the reporting period, the carbon footprint was better than the MSCI All Country World Climate Paris Aligned Benchmark.

84.2% of the investments of the sub-fund had a positive SDG score, and contributed to the United Nation's Sustainable Development Goals (SDGs).

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 21 agenda items at 3 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 1.5% better than the MSCI All Country World Climate Paris Aligned Benchmark.
5. The Sub-fund's weighted score for the carbon (scope level 1, 2 and 3), water and waste footprint were respectively 76.00%, 75.27% and 26.94% better than the general market index.
6. The sub-fund's weighted average ESG score was 19.51 against 21.90 for the general market index.
7. 0.00% of the companies held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the MSCI All Country World Climate Paris Aligned Benchmark and investments with a positive SDG score are classified as sustainable investment. A positive SDG score indicates that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1, 2 and 3 Carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

Sustainability disclosures (unaudited)

- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4.

Sustainability disclosures (unaudited)

Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there were no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered: Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.64% of the net assets, compared to 4.98% of the benchmark

Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark

Sustainability disclosures (unaudited)

Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 4.6% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.4% of the benchmark

- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 104.6 tCO₂ per million EUR, compared to 106.2 tCO₂ per million EUR for the MSCI All Country World Climate Paris Aligned Benchmark.
 - Water and waste indicators (PAI 8-9, Table 1). The scores for water and waste were respectively 85.3% and 4.8% better than the general market index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 74 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 12, table 1: Unadjusted gender pay gap 5 cases. PAI 13, table 1: Board gender diversity 5 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

Yes:

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

77.5%. This concerns investments that are either part of the MSCI All Country World Paris Aligned Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

21.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Paris Aligned Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 1.50% better than the Paris Aligned Benchmark.

● How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Beta Equities	19.5	84.2	104.6
MSCI All Country World Climate Paris Aligned Index	20.2	75.4%	106.2

● How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM QI Global SDG & Climate Beta Equities	19.5	84.2	104.6
MSCI All Country World Index	21.9	64.2%	436.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Quantum Equities
Legal entity identifier: 2138009S4X65QC6GSJ11

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The sub-fund was launched in November 2022, so no votes were casted on behalf of the sub-fund yet.
2. The portfolio contained on average 0.07% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 21.16%, 53.91% and 4.01% better than the general market index.
5. The sub-fund's weighted average ESG score was 21.05 against 21.48 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 6.03% of the net assets, compared to 5.65% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 10.44% of the net assets, compared to 9.6% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.35% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 43.7 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively -8.73%, 53.91% and 4.01% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 36 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 10 cases. PAI 2, table 1: Carbon footprint 10 cases. PAI 3, table 1: GHG intensity of investee companies 10 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 10 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 10 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 10 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 36 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Asia-Pacific Equities
Legal entity identifier: 213800R6QI6SB393PI50

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.6% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1087 agenda items at 108 shareholders' meetings.
2. The portfolio contained on average 0.09% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 3.48% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.53% of the net assets, compared to 2.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 1.11% of the net assets, compared to 0.56% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 5.24% of the net assets, compared to 4.56% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.11% of the net assets, compared to 0.67% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.3 compared to 0.3 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 17 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable European Stars Equities
Legal entity identifier: 21380089E1HSI8JRUS47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 2% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.
7. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 786 agenda items at 36 shareholders' meetings.
2. The portfolio contained on average 0.26% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 65.54%, 87.48% and 85.06% better than the general market index.
6. The sub-fund's weighted average ESG score was 17.21 against 20.43 for the general market index.
7. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

Sustainability disclosures (unaudited)

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (≥ 20% of the revenues), oil sands (≥ 10% of the revenues) and arctic drilling (≥ 5% of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons

Sustainability disclosures (unaudited)

that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.75% of the net assets, compared to 5.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.27% of the net assets, compared to 16.17% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.49% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.7 compared to 0.7 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

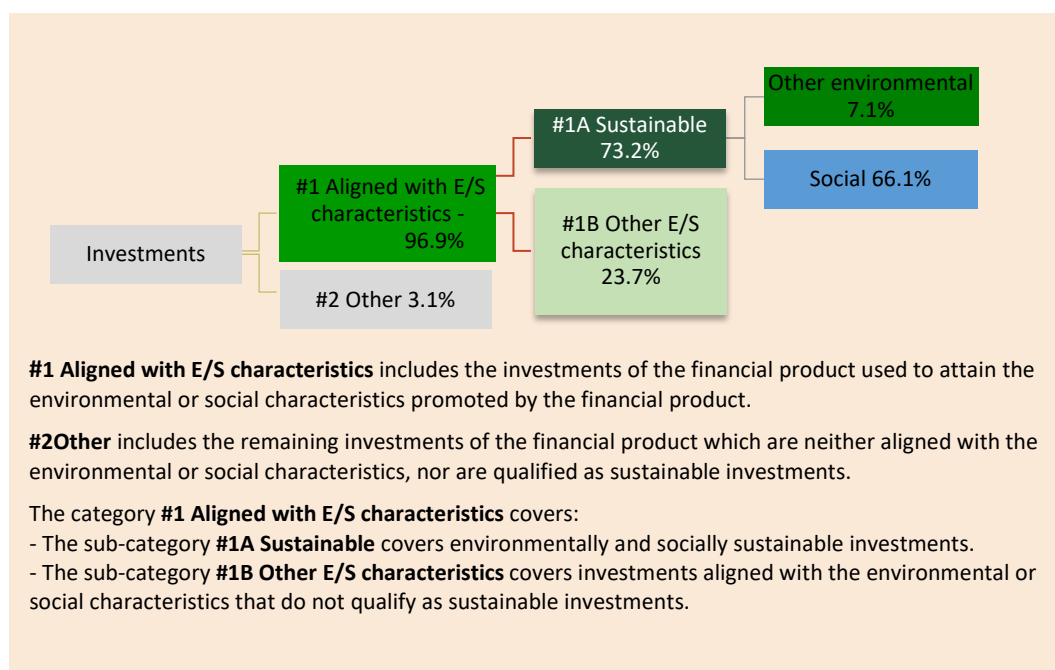

Largest investments	Sector	% Assets	Country
Roche Holding AG	Pharmaceuticals	5.31	Switzerland
Deutsche Boerse AG	Capital Markets	3.96	Germany
Allianz SE	Insurance	3.87	Germany
SAP SE	Software	3.81	Germany
Linde PLC/old	Chemicals	3.62	United Kingdom
Novo Nordisk A/S	Pharmaceuticals	3.61	Denmark
Compass Group PLC	Hotels, Restaurants & Leisure	3.55	United Kingdom
Deutsche Telekom AG	Diversified Telecommunication Services	3.50	Germany
Koninklijke Ahold Delhaize NV	Food & Staples Retailing	3.33	Netherlands
Industria de Diseno Textil SA	Specialty Retail	3.29	Spain
Schindler Holding AG	Machinery	2.99	Switzerland
RELX PLC	Professional Services	2.83	United Kingdom
Unilever PLC	Personal Products	2.72	United Kingdom
Nordea Bank Abp	Banks	2.69	Sweden
Svenska Handelsbanken AB	Banks	2.51	Sweden

What was the proportion of sustainability-related investments?

96.9%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy Equipment & Services	0.26
Other sectors	
Pharmaceuticals	12.73
Banks	7.85
Machinery	5.65
Hotels, Restaurants & Leisure	5.61
Insurance	5.59
Chemicals	5.44

Construction & Engineering	1.29
Food Products	1.07
Electronic Equipment, Instruments & Components	1.06
Paper & Forest Products	1.06
Trading Companies & Distributors	0.82
Household Products	0.01
Cash and other instruments	2.80

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 60% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI European Conservative Equities
Legal entity identifier: 2138001XRMBVMGLO9954

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 2239 agenda items at 128 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 13.03%, 62.62% and 67.30% better than the general market index.
5. The sub-fund's weighted average ESG score was 20.32 against 20.43 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 8.45% of the net assets, compared to 5.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 14.45% of the net assets, compared to 16.17% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.35% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 62.5 tCO₂ per million EUR, compared to 71.9 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 10.61%, 62.62% and 67.3% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

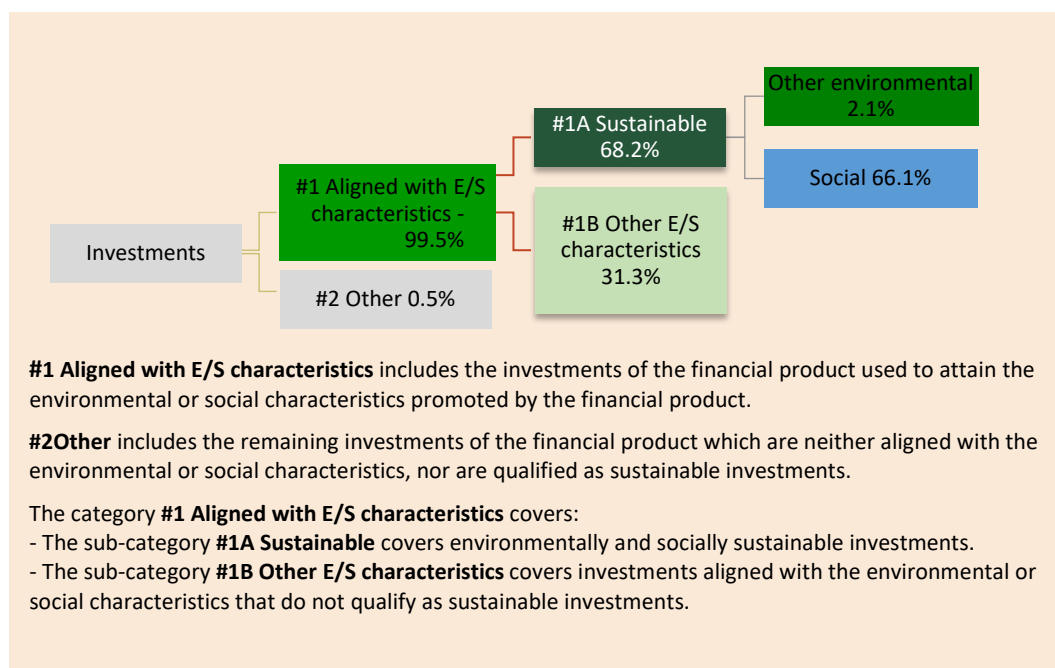

Largest investments	Sector	% Assets	Country
Nestle SA	Food Products	3.58	Switzerland
GSK PLC	Pharmaceuticals	2.93	United Kingdom

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Sector for Cash and other instruments

Average exposure in % over the reporting period

1.41

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI US Conservative Equities
Legal entity identifier: 549300LR60B223QXB617

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1425 agenda items at 103 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 3.62%, 85.19% and 32.79% better than the general market index.
5. The sub-fund's weighted average ESG score was 20.80 against 21.62 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.24% of the net assets, compared to 5.27% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 8.09% of the net assets, compared to 8.22% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 2.13% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 46.2 tCO₂ per million EUR, compared to 48 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 1.54%, 85.19% and 32.79% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 15 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.4%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 15 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is better than the benchmark.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP US Premium Equities
Legal entity identifier: 213800NHT998V29TM914

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.8% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1947 agenda items at 138 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 2.02% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 58.48% better than that of the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 6.68% of the net assets, compared to 7.86% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 8.88% of the net assets, compared to 9.15% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.56% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 17 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has a carbon footprint that is more than 50% better than the benchmark.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Chinese Equities
Legal entity identifier: 213800TJUGS6VH4REL60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 905 agenda items at 81 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 4.28% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.45% of the net assets, compared to 2.23% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.2% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.08% of the net assets, compared to 0.09% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 6 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

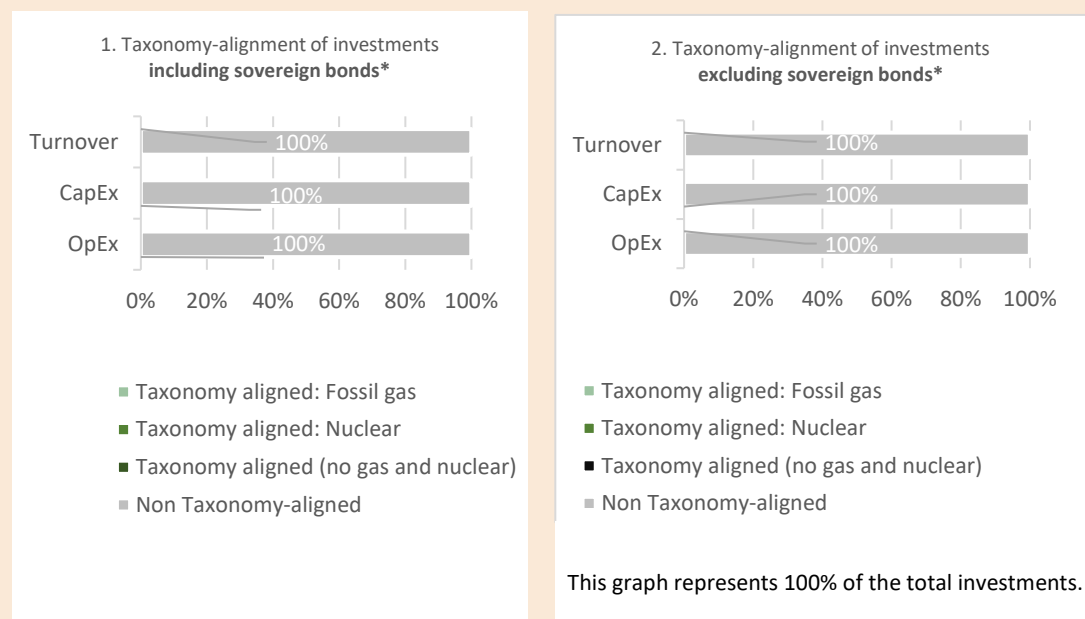

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.7%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 6 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Product name: Robeco Capital Growth Funds - Robeco Indian Equities
Legal entity identifier: 213800F2XL8JYTIUE403

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 693 agenda items at 124 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 7.03% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.32% of the net assets, compared to 7.53% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.63% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.12% of the net assets, compared to 4.87% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 6.43% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.3 compared to 0.3 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

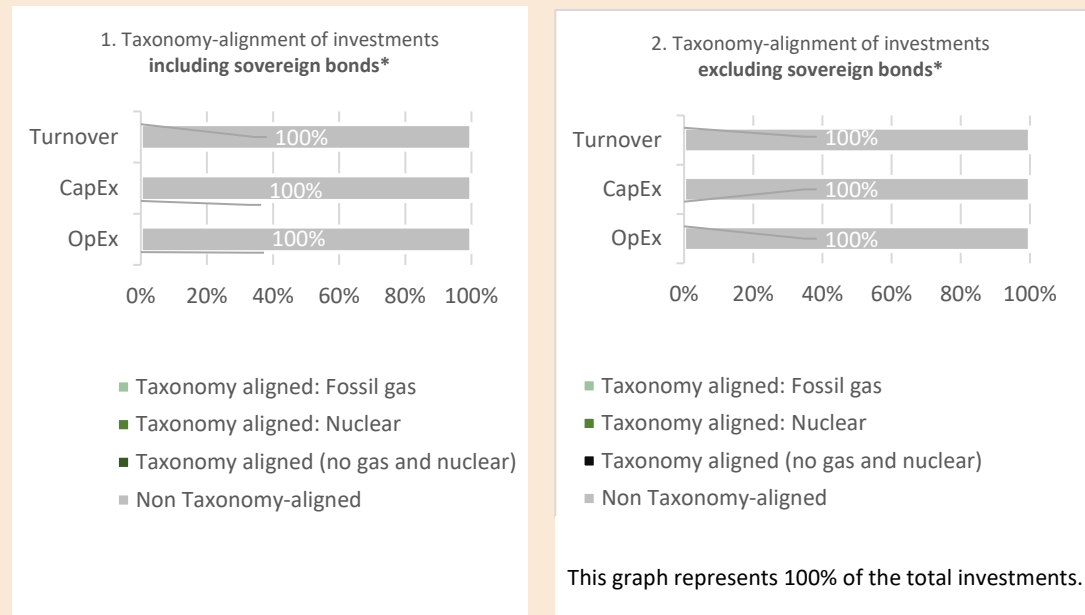

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

63.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Asian Stars Equities
Legal entity identifier: 213800G5JUR75POVU193

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.5% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 582 agenda items at 66 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 6.34% of the holdings in portfolio had an elevated sustainability risk profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 4.63% of the net assets, compared to 3.07% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 2.78% of the net assets, compared to 0.59% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.55% of the net assets, compared to 1.91% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.05% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

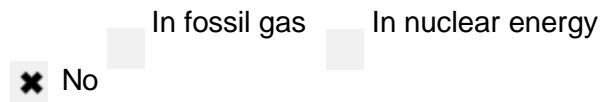

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 8 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Asian Stars Equities
Legal entity identifier: 213800C3QE3BF5TD6K08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 5% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 719 agenda items at 75 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 79.99%, 25.62% and 51.86% better than the general market index.
6. The sub-fund's weighted average ESG score was 23.00 against 24.07 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.11% of the net assets, compared to 3.07% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.59% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 1.91% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.13% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

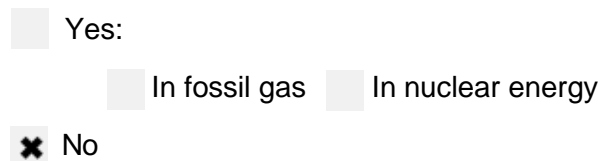

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

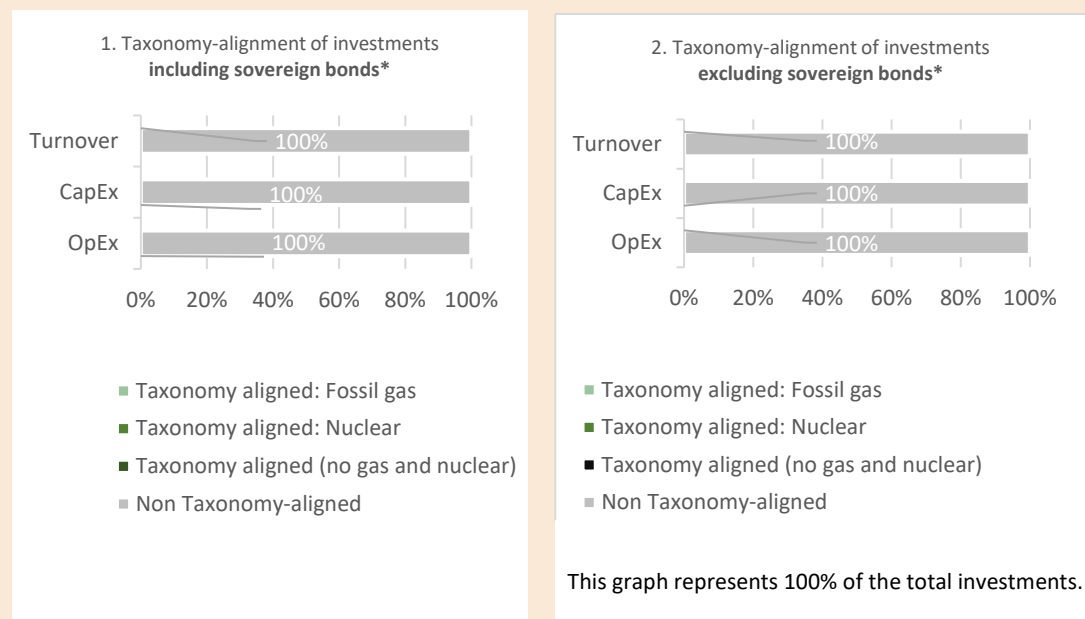

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 8 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP US Large Cap Equities
Legal entity identifier: 213800JOQ7MWBS9GH642

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1222 agenda items at 82 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.83% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 22.70% better than that of the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 9.75% of the net assets, compared to 7.93% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 5.43% of the net assets, compared to 9.73% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.55% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 4 cases. PAI 2, table 1: Carbon footprint 4 cases. PAI 3, table 1: GHG intensity of investee companies 4 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 4 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 4 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 4 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco BP US Select Opportunities Equities
Legal entity identifier: 213800YIJJ667CDPK983

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 48.4% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon footprint was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1827 agenda items at 141 shareholders' meetings.
2. The portfolio contained on average 0.06% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.67% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted carbon footprint was 41.59% better than that of the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 7.81% of the net assets, compared to 7.03% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 3.95% of the net assets, compared to 1.33% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.4 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 5 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 2 cases. PAI 2, table 1: Carbon footprint 2 cases. PAI 3, table 1: GHG intensity of investee companies 2 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 2 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 2 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

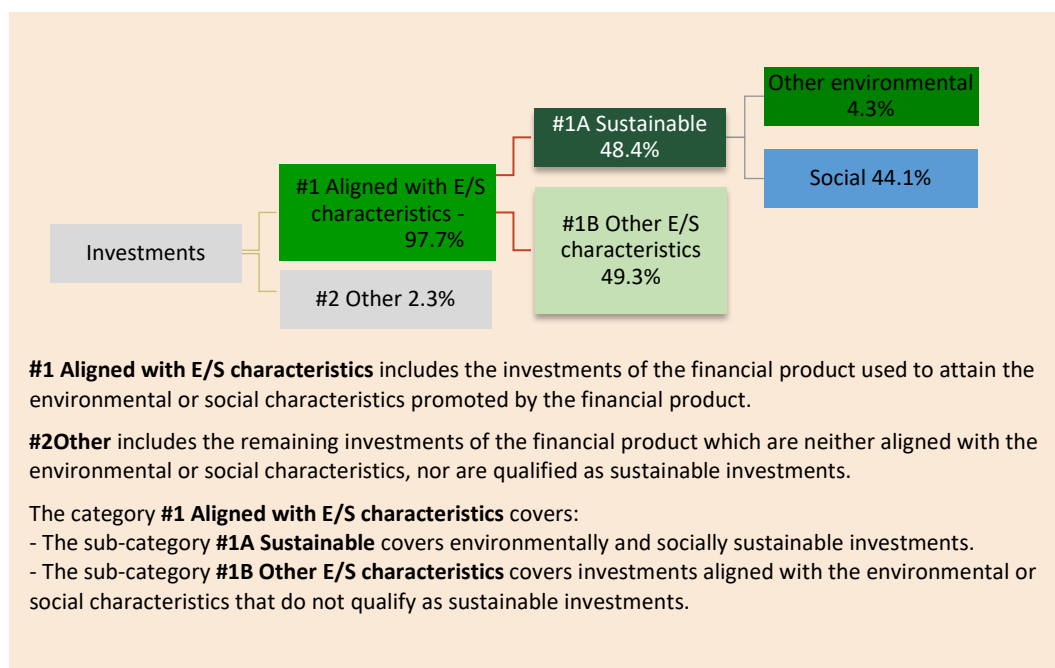

Largest investments	Sector	% Assets	Country
Ameriprise Financial Inc	Capital Markets	2.29	United States

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

44.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has a carbon footprint that is more than 40% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Chinese A-share Equities
Legal entity identifier: 213800GE9C6GVRJ3AM62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 25% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1579 agenda items at 157 shareholders' meetings.
2. The portfolio contained on average 1.16% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 12.57% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted average ESG score was 31.05 against 32.63 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.81% of the net assets, compared to 2.57% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.64% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.84% of the net assets, compared to 0.27% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 3 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

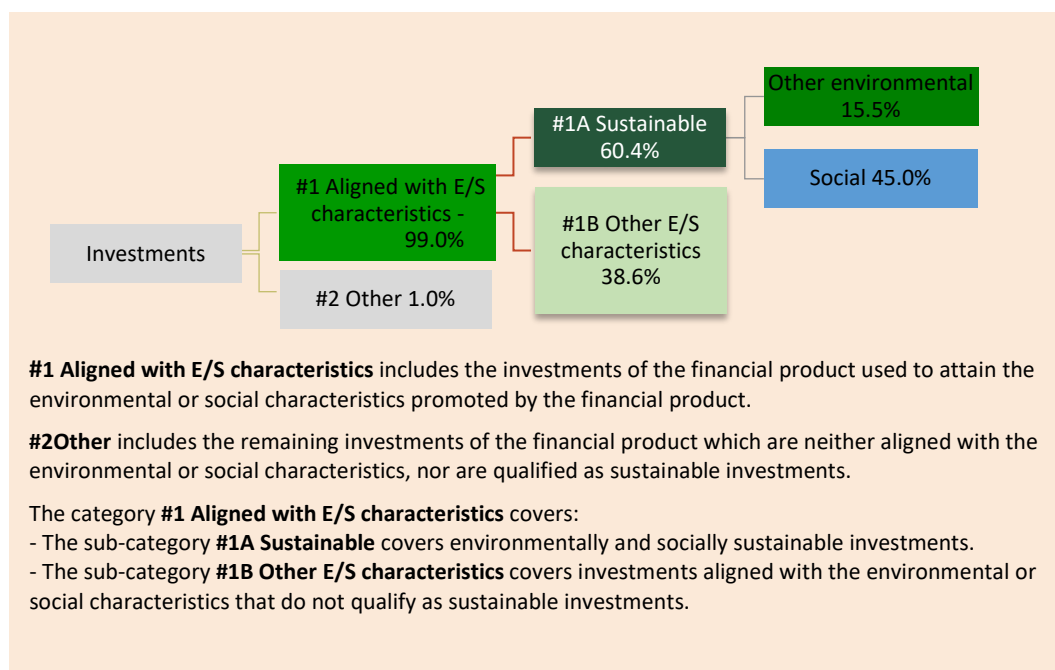

Largest investments	Sector	% Assets	Country
Kweichow Moutai Co Ltd	Beverages	7.12	China
Contemporary Amperex Technology Ltd	Electrical Equipment	4.33	China
China Yangtze Power Co Ltd	Independent Power and Renewable Electricity Producers	4.32	China
Poly Developments and Holdings Group Co	Real Estate Management & Development	3.35	China
Inner Mongolia Yili Industrial Group Co	Food Products	3.28	China
LONGi Green Energy Technology Co Ltd	Semiconductors & Semiconductor Equipment	2.96	China
China Three Gorges Renewables Group	Independent Power and Renewable Electricity Producers	2.50	China
China Tourism Group Duty Free Corp Ltd	Specialty Retail	2.46	China
Hubei Xingfa Chemicals Group Co Ltd	Chemicals	2.46	China

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

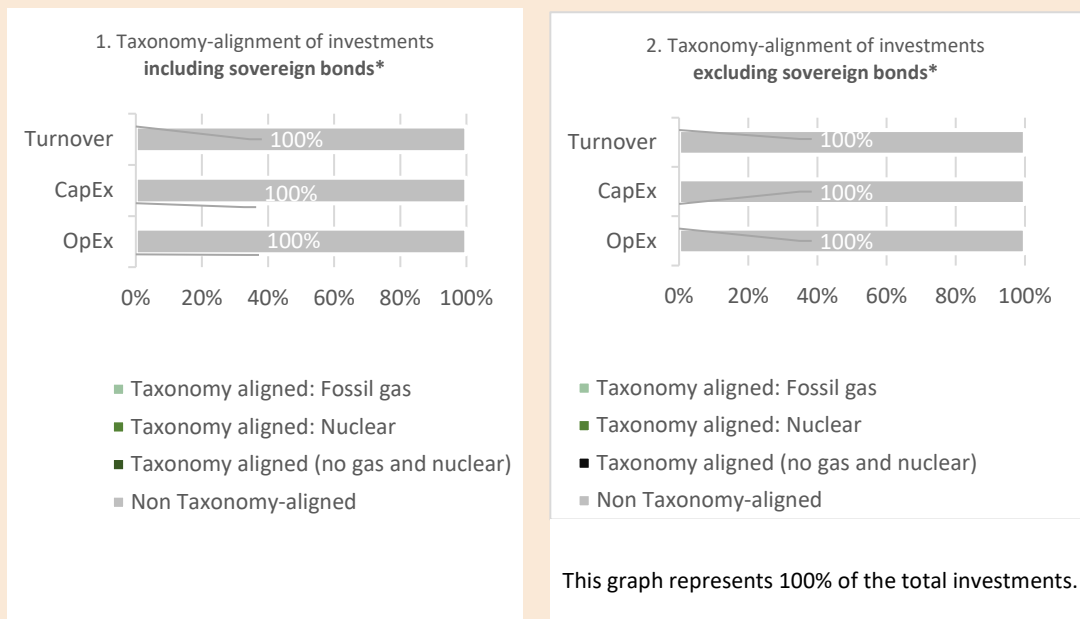

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

 In fossil gas In nuclear energy

 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

45.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 3 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Chinese A-share Conservative Equities
Legal entity identifier: 213800XWLW8UPEKC9R39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.1% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.69% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 37.30%, 2.46% and 66.85% better than the general market index.
4. The sub-fund's weighted average ESG score was 31.40 against 32.63 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via engagement under the engagement program "Responsible Executive Remuneration".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Sustainability disclosures (unaudited)

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.48% of the net assets, compared to 2.57% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 1.45% of the net assets, compared to 0.64% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0.27% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 15076788.03% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 113.2 tCO₂ per million EUR, compared to 180.5 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 100%, 2.46% and 66.85% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)

What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

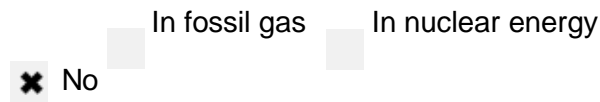

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

59.7%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco New World Financials
Legal entity identifier: 213800WE9J7OV8DOET07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 83.8% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 1023 agenda items at 81 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.07% of the net assets, compared to 0.42% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

83.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Property Equities
Legal entity identifier: 2138003BSHS5NJ9EBX10

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.7% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 2% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was at least 20% better than that of the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 677 agenda items at 58 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 34.80%, 31.66% and 26.93% better than the general market index.
6. The sub-fund's weighted average ESG score was 12.51 against 13.99 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are

Sustainability disclosures (unaudited)

calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
 - PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
 - PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The

Sustainability disclosures (unaudited)

Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.04% of the net assets, compared to 0.04% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0.74% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.4 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 2 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

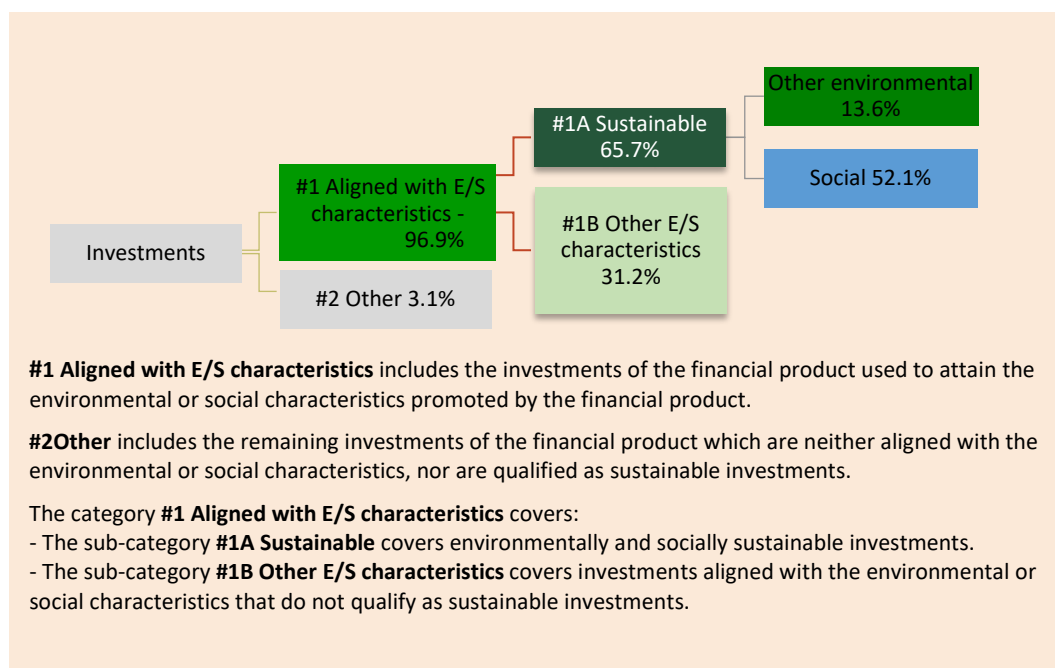

Largest investments	Sector	% Assets	Country
Prologis Inc	Equity Real Estate Investment Trusts (REITs)	6.84	United States
Equinix Inc	Equity Real Estate Investment Trusts (REITs)	5.63	United States

Cash and other instruments	2.92

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

13.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

52.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 2 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

Product name: Robeco Capital Growth Funds - Robeco Global Consumer Trends
Legal entity identifier: 213800PFG7CLST9A1742

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
5. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 603 agenda items at 45 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
5. The sub-fund's weighted average ESG score was 20.32 against 21.90 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.1% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 5.09% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 16872643.4% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

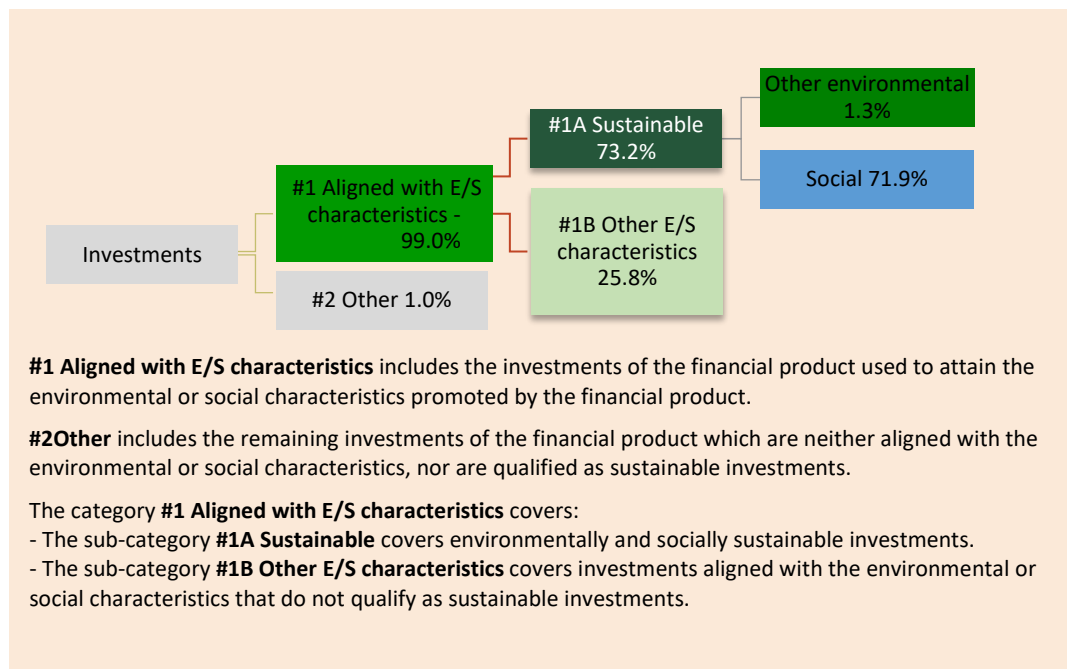

Largest investments	Sector	% Assets	Country
Visa Inc	IT Services	4.58	United States
Alphabet Inc (Class A)	Interactive Media & Services	4.09	United States
Microsoft Corp	Software	3.88	United States
Nestle SA	Food Products	3.76	Switzerland
Costco Wholesale Corp	Food & Staples Retailing	3.71	United States
Intuit Inc	Software	3.33	United States
Lululemon Athletica Inc	Textiles, Apparel & Luxury Goods	3.28	United States
LVMH Moet Hennessy Louis Vuitton SE	Textiles, Apparel & Luxury Goods	3.25	France
L'Oreal SA	Personal Products	3.22	France
Adyen NV	IT Services	3.07	Netherlands
Amazon.com Inc	Internet & Direct Marketing Retail	2.92	United States
Symrise AG	Chemicals	2.92	Germany
NVIDIA Corp	Semiconductors & Semiconductor Equipment	2.90	United States
NIKE Inc	Textiles, Apparel & Luxury Goods	2.84	United States
Zoetis Inc	Pharmaceuticals	2.79	United States

What was the proportion of sustainability-related investments?

99.0%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Not applicable	0.00%
Other sectors

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

71.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco MegaTrends
Legal entity identifier: 2138006ECAW1JTN4V89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 80.5% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 761 agenda items at 57 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.42% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.93% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.42% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.6 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 17 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

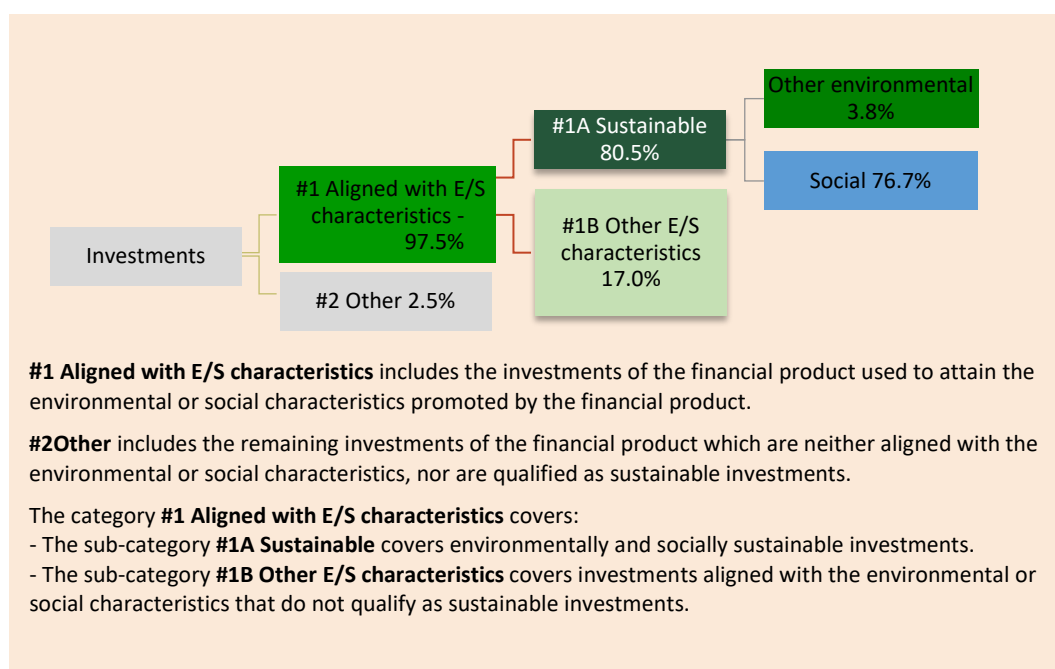

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	3.95	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

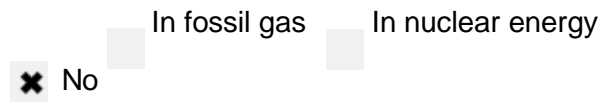

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

■ Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**
0%.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

3.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

76.7%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Digital Innovations
Legal entity identifier: 213800WH91CRLWH4AL56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 91.7% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 679 agenda items at 49 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".
-

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.41% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.39% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.01% of the net assets, compared to 0.4% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

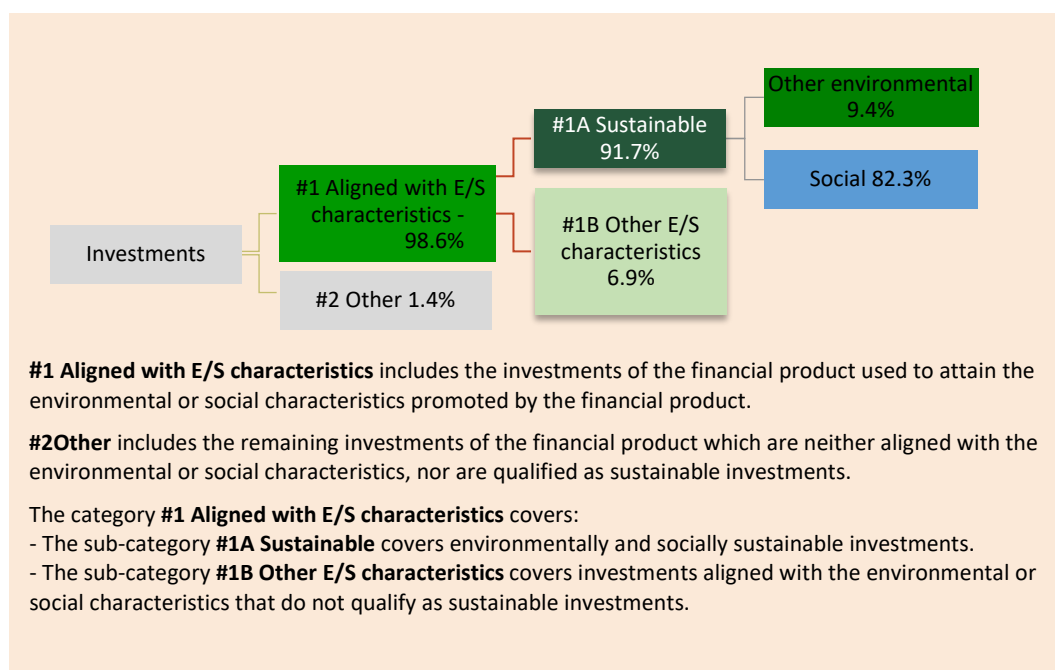

Largest investments	Sector	% Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

82.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 8 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco FinTech
Legal entity identifier: 213800XVWPYZAY58YG68

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 694 agenda items at 70 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.05% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 8.9% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.4% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.5 compared to 0.5 for the benchmark.
 - Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 4 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Circular Economy Equities

Legal entity identifier: 21380076KKDPDXSFG955

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 24.2%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 71.6%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund's sustainable investment objective is: to finance solutions that support the transition from traditional production and consumption patterns toward a circular economy. The sustainable investment objective was attained by mainly investing in companies that advanced the following United Nations Sustainable Development Goals (SDGs): 6 companies in portfolio had a positive score on Zero Hunger (SDG 2), 14 companies in portfolio had a positive score on Good health and well-being (SDG 3), 12 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 23 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 10 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 11 companies in portfolio had a positive score on Responsible consumption and production (SDG 12).

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 696 agenda items at 55 shareholders' meetings.
2. The portfolio contained on average 0.68% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the

Sustainability disclosures (unaudited)

- revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and

Sustainability disclosures (unaudited)

Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaint handling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.5668.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Applied Industrial	Trading Companies	2.32%	United States
Prysmian SpA	Electrical	2.30%	Italy
Gruma SAB de CV	Food Products	2.23%	Mexico
Sensient Technologies Corp	Chemicals	2.27%	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

Yes:

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

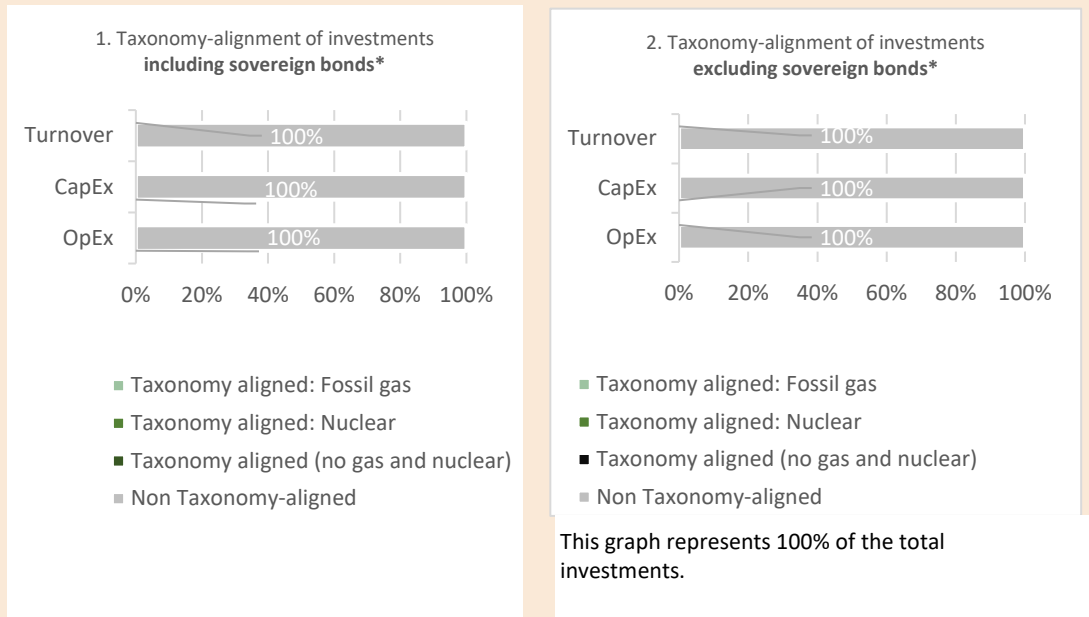

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

24.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

Sustainability disclosures (unaudited)

71.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. All investments in the sub-fund had a neutral or positive SDG score based on the internally developed SDG framework.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Smart Energy Equities

Legal entity identifier: 213800XOKIZRP1SLWA28

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: 33.8%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 64.1%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund aimed to further the transformation and decarbonization of the global energy sector. The sustainable investment objective was attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 25 companies in portfolio had a positive score on Affordable and clean energy goal (SDG 7), 18 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 28 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 10 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 14 companies in portfolio had a positive score on Climate action (SDG 13).

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 31.6% better than the Custom Bloomberg Climate Transition Benchmark.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 680 agenda items at 56 shareholders' meetings.
2. The portfolio contained on average 0.80% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 31.61% better than that of the Custom Bloomberg Climate Transition Benchmark.
5. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **"How did the sustainable investments not cause significant harm to any sustainable investment objective?"**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the

Sustainability disclosures (unaudited)

- exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

Sustainability disclosures (unaudited)

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council

Sustainability disclosures (unaudited)

Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.8777.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)

Sustainability disclosures (unaudited)

- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 4 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco’s performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What were the top investments of this financial product?

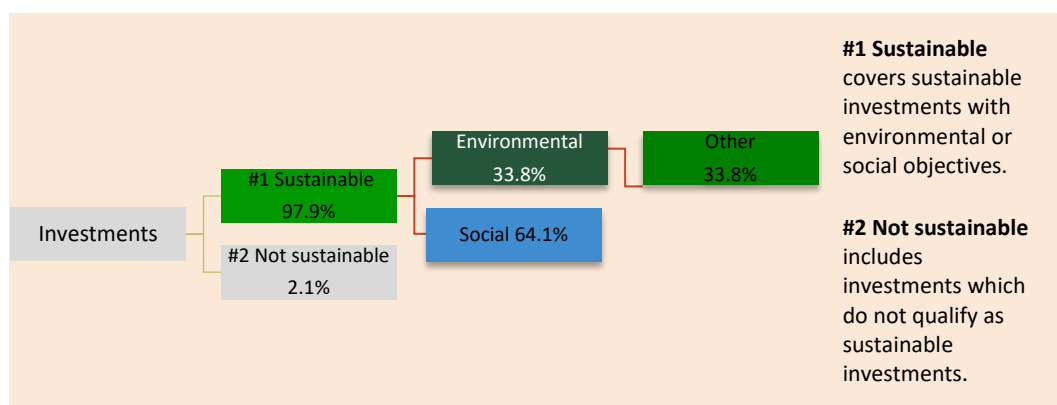

Largest investments	Sector	% Assets	Country
ON Semiconductor Corp	Semiconductors &	4.17%	United States
Schneider Electric SE	Electrical	3.68%	France
SSE PLC	Electric Utilities	3.56%	United Kingdom
Albemarle Corp	Chemicals	3.48%	United States

Oil, Gas & Consumable Fuels	0.18
Cash and other instruments	1.60

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

33.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

64.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 4 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Custom Bloomberg Climate Transition Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 31.61% better than the Custom Bloomberg Climate Transition Benchmark.

How did this financial product perform compared with the reference benchmark?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Energy Equities	97.9%	505.8
Custom Bloomberg Climate Transition Benchmark	77.0%	739.6

How did this financial product perform compared with the broad market index?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Energy Equities	97.9%	505.8
MSCI World Index	65.1%	437.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Smart Materials Equities

Legal entity identifier: 213800HUVXY434VECO29

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 33.3%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 62.5%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund aim to help mitigate the resource scarcity challenge within industries while supporting economic growth. The sustainable investment objective was attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 12 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 28 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 16 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11), 12 companies in portfolio had a positive score on Responsible consumption and production (SDG 12) and 9 companies in portfolio had a positive score on Climate action (SDG 13).

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 9.3% better than the Custom Bloomberg Climate Transition Benchmark.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 613 agenda items at 52 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 9.33% better than that of the Custom Bloomberg Climate Transition Benchmark.
5. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of

Sustainability disclosures (unaudited)

- activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global

Sustainability disclosures (unaudited)

Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.891.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 3 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period:
PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: 29.8%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 66.1%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the Sub-fund aim to support the transformation and decarbonization of the global transportation sector. The sustainable investment objective was attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 14 companies in portfolio had a positive score on Affordable and clean energy goal (SDG 7), 18 companies in portfolio had a positive score on Decent work and economic growth (SDG 8), 21 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 12 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 9 companies in portfolio had a positive score on Climate action (SDG 13).

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 34.6% better than the Custom Bloomberg Climate Transition Benchmark.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainability indicators perform?***

1. On behalf of the sub-funds votes, were cast on 613 agenda items at 52 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 34.60% better than that of the Custom Bloomberg Climate Transition Benchmark.
5. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of

Sustainability disclosures (unaudited)

activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global

Sustainability disclosures (unaudited)

Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaint handling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.688.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 5 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
ON Semiconductor Corp	Semiconductors &	4.73%	United States
Sociedad Quimica y Minera	Chemicals	4.56%	Chile
Albemarle Corp	Chemicals	4.37%	United States
Schneider Electric SE	Electrical	3.92%	France
Analog Devices Inc	Semiconductors &	3.86%	United States
NXP Semiconductors NV	Semiconductors &	3.54%	United States
Delta Electronics Inc	Electronic	3.53%	Taiwan
Samsung SDI Co Ltd	Electronic	3.51%	South Korea
BYD Co Ltd	Automobiles	3.49%	China
XPeng Inc ADR	Automobiles	3.38%	China
TE Connectivity Ltd	Electronic	3.21%	United States
ABB Ltd	Electrical	3.17%	Switzerland
Aptiv PLC	Auto Components	2.96%	United States
QUALCOMM Inc	Semiconductors &	2.93%	United States
Texas Instruments Inc	Semiconductors &	2.95%	United States

What was the proportion of sustainability-related investments?

95.9%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● **In which economic sectors were the investments made?**

Sector	Average exposure in % over the reporting period
Semiconductors & Semiconductor Equipment	34.65
Electrical Equipment	16.55
Electronic Equipment, Instruments & Components	13.37
Chemicals	10.21
Automobiles	9.42
Auto Components	8.11
Software	1.76
Machinery	1.71
Household Durables	1.07
Oil, Gas & Consumable Fuels	0.23
Cash and other instruments	2.91

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

29.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

66.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 5 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Custom Bloomberg Climate Transition Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 34.60% better than the Custom Bloomberg Climate Transition Benchmark.

● How did this financial product perform compared with the reference benchmark?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Mobility Equities	95.9%	483.7
Custom Bloomberg Climate Transition Benchmark	77.0%	739.6

● How did this financial product perform compared with the broad market index?

	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Smart Mobility Equities	95.9%	483.7
MSCI world index	65.1%	437.8

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Sustainable Healthy Living Equities

Legal entity identifier: 213800KMESITUG55WI14

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 18.6%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 77.2%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments contributed to the Sustainable Development Goals, promoting good health and well-being and contributed to an efficient healthcare system. 89.1% of the assets were invested in companies with a positive score on Good Health and Well Being (SDG 3). The financial product did not take into account the EU criteria for environmentally sustainable economic activities. The sub-fund did make sustainable investments with a social objective.

Sustainability disclosures (unaudited)

Sustainability indicators

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 621 agenda items at 42 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to

Sustainability disclosures (unaudited)

mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Sustainability disclosures (unaudited)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

"Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.8565.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 8 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments **Sector** **% Assets** **Country**

Largest investments	Sector	% Assets	Country
UnitedHealth Group Inc	Health Care	4.04%	United States

Cash and other instruments	3.32

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

18.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

77.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. All investments in the sub-fund had a neutral or positive SDG score based on the internally developed SDG framework.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Sustainable Water Equities

Legal entity identifier: 2138006TSIFH5ZD97319

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 14.0%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 75.9%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund helped to mitigate the global challenges related to scarcity, quality, and allocation of water. The sustainable investment objective is attained by mainly investing in companies that advance the following United Nations Sustainable Development Goals (SDGs): 13 companies in portfolio had a positive score on Good health and well-being (SDG 3), 31 companies in portfolio had a positive score on Clean water and sanitation (SDG 6), 36 companies in portfolio had a positive score on Industry, innovation and infrastructure (SDG 9), 25 companies in portfolio had a positive score on Sustainable cities and communities (SDG 11) and 13 companies in portfolio had a positive score on Responsible consumption and production (SDG 12), and 7 companies in portfolio had a positive score on Life below water (SDG 14).

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainability indicators perform?***

1. On behalf of the sub-funds votes, were cast on 959 agenda items at 75 shareholders' meetings.
2. The portfolio contained on average 1.87% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
3. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
4. 100.00 % of the investments in portfolio held a neutral or positive SDG score based on the internally developed SDG framework.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and

Sustainability disclosures (unaudited)

exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.

Sustainability disclosures (unaudited)

- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.7426.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:

At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were

Sustainability disclosures (unaudited)

active on portfolio holdings, during the reporting period: PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Avantor Inc	Life Sciences Tools	4.67%	United States

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

14.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

75.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments with a neutral scores under Robeco’s proprietary SDG Framework and the use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global Gender Equality Equities
Legal entity identifier: 213800FAEA843S2ACV24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 90.3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund invested a minimum of 66.7% in companies with a Gender Equality score of 50 or higher.
3. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

4. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.
5. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
6. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 882 agenda items at 53 shareholders' meetings.
2. The sub-fund invested 15.09% of its assets in companies with a Gender Equality score of 50 or higher.
3. The portfolio contained on average 1.64% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
4. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
5. 97.07 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
6. The Sub-fund excluded the bottom 20% ranked companies on ESG from the investment universe.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.22% of the net assets, compared to 5.12% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.2% of the net assets, compared to 9.55% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.34% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 15.2 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 35.05%, 88.99% and 95.06% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 24 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 2 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

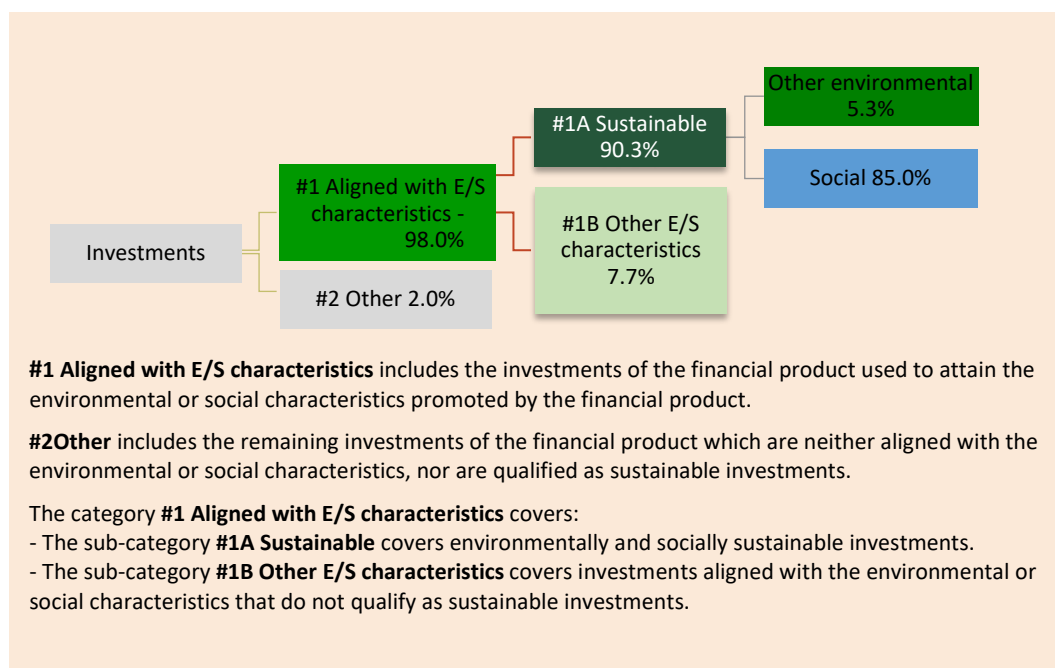

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	5.03	United States
AstraZeneca PLC	Pharmaceuticals	3.50	United Kingdom
CVS Health Corp	Health Care Providers & Services	3.09	United States
UnitedHealth Group Inc	Health Care Providers & Services	2.93	United States
Accenture PLC	IT Services	2.89	United States
Elevance Health Inc	Health Care Providers & Services	2.86	United States
Procter & Gamble Co/The	Household Products	2.72	United States

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

85.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 24 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Next Digital Billion
Legal entity identifier: 213800MRQK7VNZMYS210

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.8% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

4. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. On behalf of the sub-funds votes, were cast on 409 agenda items at 48 shareholders' meetings.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. 4.83% of the holdings in portfolio had an elevated sustainability risk profile.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which

Sustainability disclosures (unaudited)

prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.04% of the net assets, compared to 3.84% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.5% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 3.85% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 1.01% of the benchmark
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector
 - The board gender diversity (PAI 13, Table 1), expressed as the weighted average ratio of female to male board members of the portfolio was 0.2 compared to 0.2 for the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 2 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

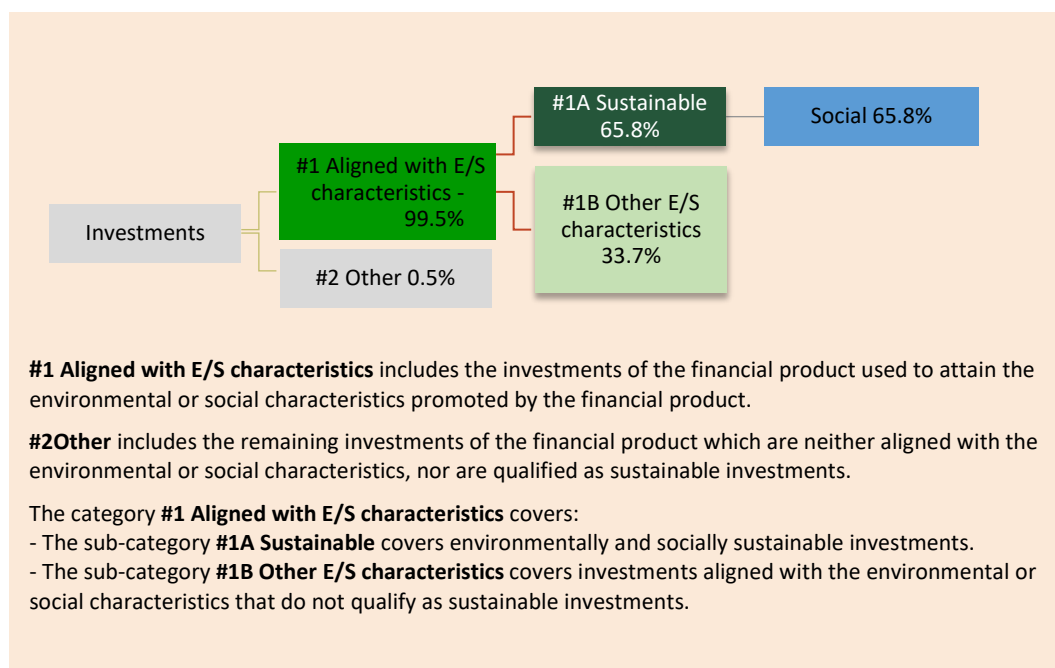

Largest investments	Sector	% Assets	Country
Prosus NV	Internet & Direct Marketing Retail	5.64	Netherlands

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:
 In fossil gas In nuclear energy
 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

0.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 2 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Biodiversity Equities

Legal entity identifier: 213800YFIUFHGS8PLX94

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 35.2%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 60.3%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sustainable investments of the sub-fund supported the sustainable use of natural resources and ecosystem services, as well as technologies, products and services that help to reduce Biodiversity threats or restore natural habitats. The foregoing is implemented by mainly invested in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): 21 companies in portfolio had a positive score on Good health and well-being (SDG 3), 10 companies in portfolio had a positive score on Industry, Innovation and infrastructure (SDG 9), 13 companies in portfolio had a positive score on Responsible consumption and production (SDG 12), 11 companies in portfolio had a positive score on Life below water (SDG 14) and 12 companies in portfolio had a positive score on Life on Land (SDG 15).

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

● **How did the sustainability indicators perform?**

1. The sub-fund was launched in November 2022, so no votes were casted on behalf of the sub-fund yet.
2. The sub-fund engaged with 28.57% of the holdings in portfolio
3. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
4. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
5. 99.01 % of the assets were invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the

Sustainability disclosures (unaudited)

- revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and

Sustainability disclosures (unaudited)

Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaint handling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.

Sustainability disclosures (unaudited)

- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program “Responsible Executive Remuneration”.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco’s Exclusion Policy and Robeco’s SDG Framework. Robeco’s SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco’s Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.4961.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco’s entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 9 cases. PAI 8,

Sustainability disclosures (unaudited)

table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case.

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What were the top investments of this financial product?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

35.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

60.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues.

Sustainability disclosures (unaudited)

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Net Zero 2050 Climate Equities

Legal entity identifier: 213800T59KJ3I92BUA65

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 81.6%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 14.1%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 0.6% better than the MSCI World Climate Change Index.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. On behalf of the sub-funds votes, were cast on 75 agenda items at 6 shareholders' meetings.
2. The sub-fund invested 91.20% of its assets in companies with an established Net Zero target by 2050 or earlier.
3. The portfolio contained on average 1.48% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
4. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
5. The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 0.60% better than that of the MSCI World Climate Change Index.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the MSCI World Climate Change Benchmark and investments with a positive SDG score are classified as sustainable investment. A positive SDG score indicates that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the

Sustainability disclosures (unaudited)

- revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1, 2 and 3 Carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
 - PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
 - PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste.

Sustainability disclosures (unaudited)

When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGP), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear

Sustainability disclosures (unaudited)

weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.83% of the net assets, compared to 1.28% of the broad market index.
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.04% of the broad market index.
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 4.27% of the net assets, compared to 8.14% of the broad market index. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the broad market index.
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 141.1 tCO₂ per million EUR, compared to 141.9 tCO₂ per million EUR for the MSCI World Climate Change Index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via the application of the voting policy, the following PAIs were considered:
 - All indicators related to GHG emissions (PAI 1-6, Table 1)
 - Indicators in related to social and employee matters (PAI 10-13, Table 1; PAI 5-8, Table 3)
- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 12 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
Microsoft Corp	Software	4.95%	United States
Tetra Tech Inc	Commercial	4.76%	United States
Tesla Inc	Automobiles	4.09%	United States
Aspen Technology Inc	Software	3.91%	United States
Thermo Fisher Scientific Inc	Life Sciences Tools	3.78%	United States
Hannon Armstrong	Mortgage Real	3.73%	United States
Schneider Electric SE	Electrical	3.59%	France
Hydro One Ltd	Electric Utilities	3.58%	Canada
UnitedHealth Group Inc	Health Care	3.38%	United States
Intercontinental Exchange	Capital Markets	3.33%	United States
TopBuild Corp	Household	3.29%	United States
SolarEdge Technologies Inc	Semiconductors &	2.94%	United States
Neste Oyj	Oil, Gas &	2.96%	Finland
Aon PLC	Insurance	2.74%	United States
RELX PLC	Professional	2.70%	United Kingdom

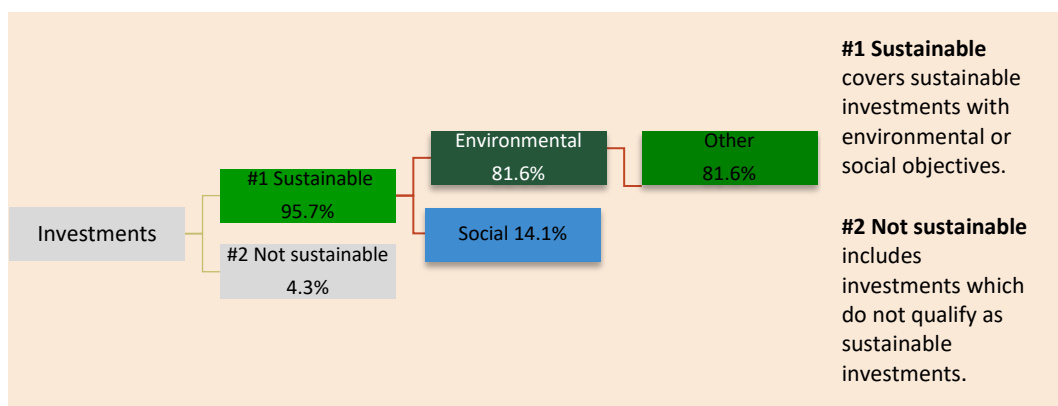

Sustainability disclosures (unaudited)

What was the proportion of sustainability-related investments?

95.7%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Semiconductors & Semiconductor Equipment	11.97
Software	8.86
Capital Markets	5.89
Commercial Services & Supplies	5.77
Electrical Equipment	5.77
Insurance	4.85
Automobiles	4.09
Machinery	4.07
Life Sciences Tools & Services	3.78
Mortgage Real Estate Investment Trusts (REITs)	3.73
Food Products	3.71
Electric Utilities	3.58
Health Care Providers & Services	3.38

Construction & Engineering	1.99
Equity Real Estate Investment Trusts (REITs)	1.84
Real Estate Management & Development	0.66
Cash and other instruments	4.25

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

81.6%. This concerns investments that are either part of the MSCI World Climate Change Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

14.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 12 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Paris Aligned Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria on the carbon reduction objective and carbon footprint of companies.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 0.6% better than the MSCI World Climate Change Index.

● How did this financial product perform compared with the reference benchmark?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Net Zero 2050 Climate Equities	18.6	91.4%	141.1
MSCI World Climate Change Index	20.0	74.5%	141.9

● How did this financial product perform compared with the broad market index?

	Sustainalytics ESG risk rating	SDG score (% positive)	Greenhouse gas emissions (t CO ₂ -eq/mUSD)
RobecoSAM Net Zero 2050 Climate Equities	18.6	91.4%	141.1
MSCI world index (net return in EUR)	21.5	65.1%	403.4

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco High Yield Bonds
Legal entity identifier: 21380044N3COGER50K12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.2% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
- The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 2% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 4.88% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 4.87% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 10.47% of the net assets, compared to 11.49% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.42% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.61% of the net assets, compared to 2.41% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.03% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets Country

Whole Business	0.30

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for utility Other

fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Average exposure in % over the reporting period

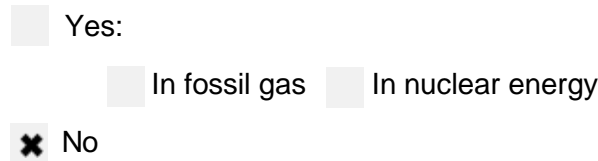

0.17

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

14.4%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

43.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 4.87% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Global Credits
Legal entity identifier: 5493003I7YFQHV1J8E29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0.84% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 11.47% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.1% of the net assets, compared to 6.87% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.22% of the net assets, compared to 4.48% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.25% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 29 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 2 cases. PAI 2, table 1: Carbon footprint 2 cases. PAI 3, table 1: GHG intensity of investee companies 2 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 2 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 2 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 2 cases. PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.2%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

63.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 11.47% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Multi-Factor Credits
Legal entity identifier: 2138004NM2KLQ7YMDZ55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 12.43%, 66.11% and 79.10% better than the general market index.
4. The sub-fund's weighted average ESG score was 22.59 against 22.94 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 16.66% of the net assets, compared to 6.87% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.06% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 7.04% of the net assets, compared to 4.48% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.23% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:

Sustainability disclosures (unaudited)

- All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
- Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 18 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 2 cases. PAI 2, table 1: Carbon footprint 2 cases. PAI 3, table 1: GHG intensity of investee companies 2 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 2 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 2 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 2 cases. PAI 8, table 1: Emissions to water 2 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 2 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

58.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 18 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Multi-Factor Bonds
Legal entity identifier: 2138009INGIOSX2F6B58

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 18.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy that is based on exclusion criteria that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom. This means that the Sub-fund has no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

2. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
3. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
4. The sub-fund's weighted carbon emissions per capita of the government bonds in portfolio was better than that of the government bonds in the general market index.
5. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score of corporate bonds in the portfolio was better than those of corporate bonds in the general market index.
6. The sub-fund's weighted average ESG score was better than that of the general market index.
7. The sub-fund's weighted average Country Sustainability Ranking was better than the average ranking of the index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
3. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The Sub-fund's weighted carbon emissions per capita of the government bonds in portfolio was 22.42% better than that of the government bonds in the general market index.
5. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 22.42%, 85.99% and 11.18% better than the corporate bonds in the general market index.
6. The sub-fund's weighted average ESG score was 22.48 against 22.05 for the general market index.
7. The sub-fund's weighted average Country Sustainability Ranking was 7.51 against 7.02 for the average ranking of the index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy,

Sustainability disclosures (unaudited)

society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Sustainability disclosures (unaudited)

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 15.35% of the net assets, compared to 4.71% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.14% of the benchmark

Sustainability disclosures (unaudited)

- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 7.84% of the net assets, compared to 3.4% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.16% of the benchmark
- Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
 - o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 3 cases. PAI 2, table 1: Carbon footprint 3 cases. PAI 3, table 1: GHG intensity of investee companies 3 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 3 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 3 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 3 cases. PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

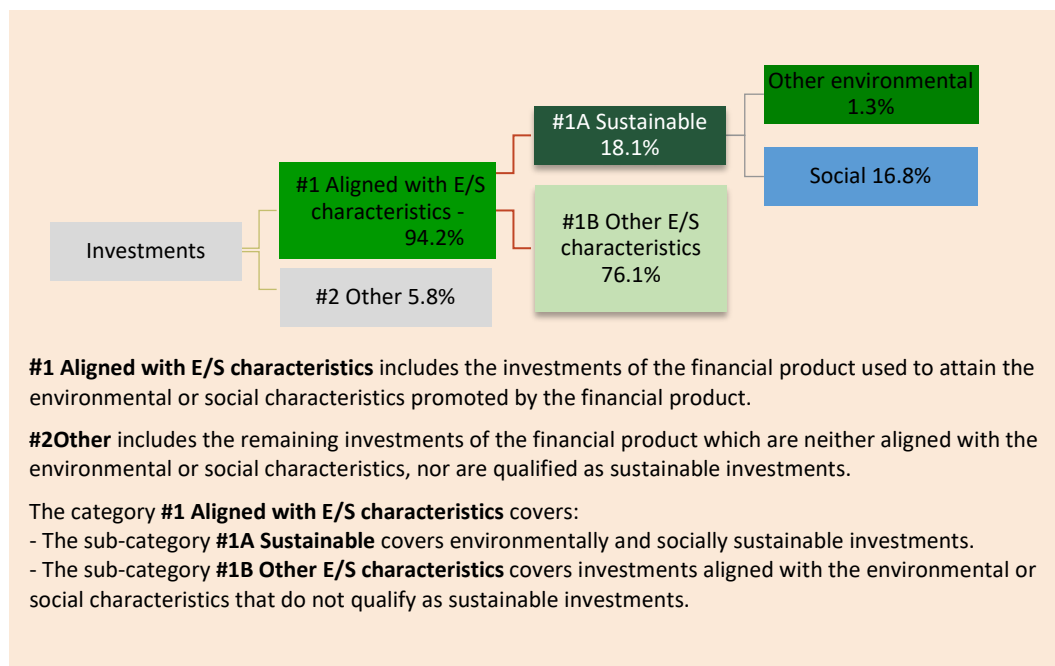

Largest investments	Sector	% Assets	Country
3.030 CHINA GOVERNMENT BOND 11-MAR-2026	Treasuries	4.53	China
1.000 AUSTRALIAN GOVERNMENT 21-DEC-2030	Treasuries	3.45	Australia
0.000 BUNDESOBLIGATION 16-APR-2027	Treasuries	2.39	Germany
0.000 BUNDESREPUB. DEUTSCHLAND 15-AUG-2030	Treasuries	2.34	Germany
0.000 BUNDESREPUB. DEUTSCHLAND 15-AUG-2031	Treasuries	2.19	Germany
0.500 JAPAN (20 YEAR ISSUE) 20-SEP-2041	Treasuries	2.18	Japan
3.270 CHINA GOVERNMENT BOND 19-NOV-2030	Treasuries	1.69	China

2.500 AUSTRALIAN GOVERNMENT 21-MAY-2030	Treasuries	0.77	Australia

What was the proportion of sustainability-related investments?

94.2%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy	4.79
Natural Gas	0.04
Other sectors	
Treasuries	64.40
Consumer Non Cyclical	4.33
Banking	4.18
Technology	3.33
Communications	2.62
Insurance	2.60
Consumer Cyclical	2.56
Capital Goods	1.14
Basic Industry	0.95
Transportation	0.70
Owned No Guarantee	0.59
Electric	0.41
Industrial Other	0.32
Utility Other	0.28
Brokerage, Asset Managers, Exchanges	0.11
Financial Other	0.04
Cash and other instruments	6.59

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

16.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 10% better than the benchmark.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Global Credits - Short Maturity
Legal entity identifier: 2138001CC7H5L9AYFW22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 8.69% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.54% of the net assets, compared to 4.98% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.02% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.37% of the net assets, compared to 3.61% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.2% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 19 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country

Whole Business	0.80
Transportation	0.66
Supranational	0.60
Local Authorities	0.41
Car Loan	0.30
Cash and other instruments	5.08

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

68.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 19 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 8.69% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Corporate Hybrid Bonds
Legal entity identifier: 213800KXAXX8MJC82S52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 1.25% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 7.50% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 20.69% of the net assets, compared to 19.61% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 34.14% of the net assets, compared to 24.43% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - All indicators related to GHG emissions, as part of the required Climate Risk analysis (PAI 1-6, Table 1, PAI 4, Table 2)
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1) when relevant for the sector

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 2 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
5.625 BHP BILLITON FINANCE LTD 22-OCT-2079	Basic Industry	3.31	Australia

Sustainability disclosures (unaudited)

What was the proportion of sustainability-related investments?

95.1%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy	19.03
Natural Gas	4.76
Other sectors	
Electric	18.29
Communications	9.82
Consumer Non Cyclical	8.61
Treasuries	7.99
Owned No Guarantee	7.10
Consumer Cyclical	6.31
Basic Industry	5.59
Banking	2.96
Industrial Other	2.42
Insurance	1.20
Local Authorities	0.92
Cash and other instruments	5.01

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

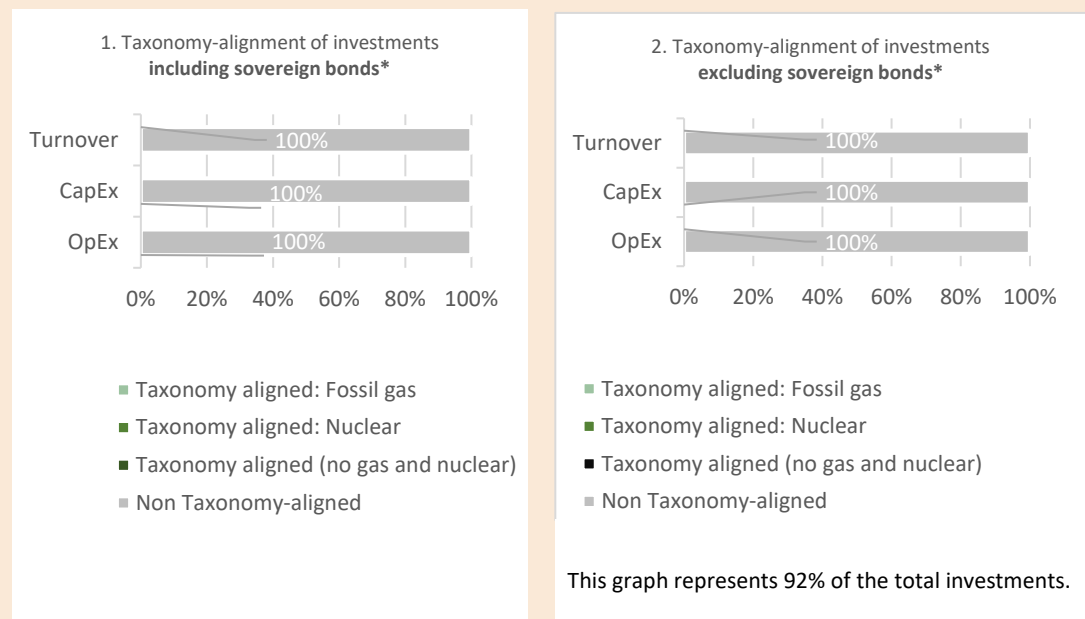

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

13.9%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

36.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 2 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 7.50% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Global Multi-Factor High Yield
Legal entity identifier: 213800AQRERU8HLM03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 22.89%, 38.18% and 70.29% better than the general market index.
4. The sub-fund's weighted average ESG score was 23.89 against 26.11 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 18.65% of the net assets, compared to 11.85% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 1.41% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.98% of the net assets, compared to 3.26% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:

Sustainability disclosures (unaudited)

- The Carbon footprint (PAI 2, Table 1) of the portfolio was 118.5 tCO₂ per million EUR, compared to 153.7 tCO₂ per million EUR for the benchmark.
- Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 69.87%, 38.18% and 70.29% better than the benchmark.
- Post-investment, the following principal adverse impacts on sustainability factors were taken into account:
 - o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 6 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5.8%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

42.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 17 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has a carbon footprint that is more than 20% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM SDG Credit Income
Legal entity identifier: 213800T791CO7EB3NL58

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.49% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 90.74 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 6.80% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.2418.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 11 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

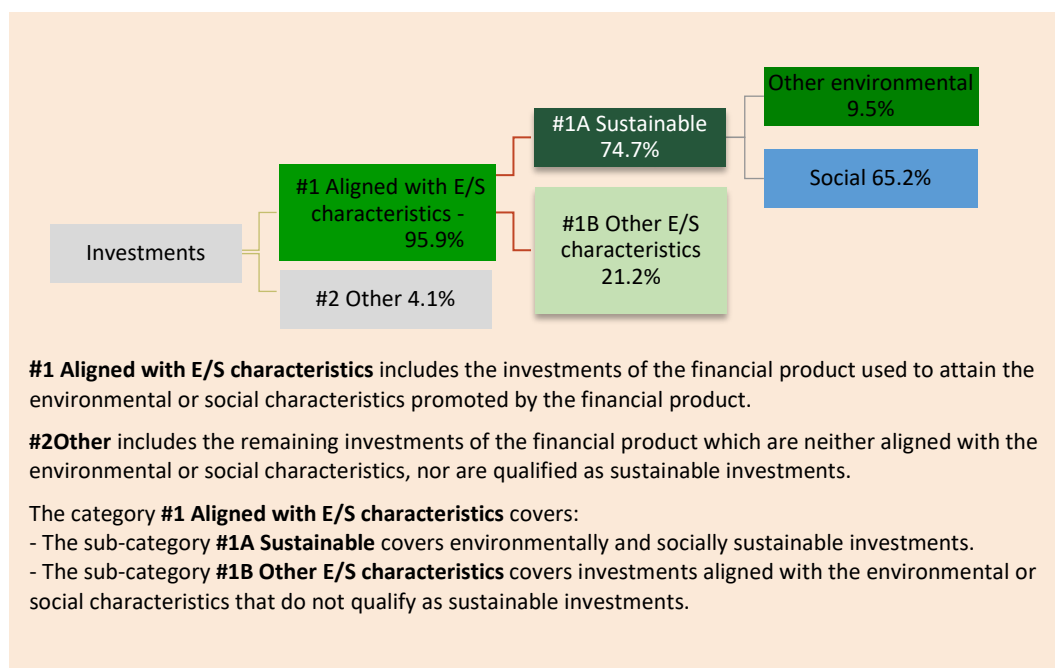

Largest investments	Sector	% Assets	Country
5.625 CLOVERIE PLC ZURICH INS 24-JUN-2046	Insurance	1.05	Switzerland

What was the proportion of sustainability-related investments?

95.9%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Natural Gas	0.08
Energy	0.05
Other sectors	
Banking	28.03
Insurance	17.97
Basic Industry	10.44
Communications	8.28
Consumer Cyclical	5.39
Capital Goods	5.30
Treasuries	4.28
Owned No Guarantee	3.15
Technology	3.02
Consumer Non Cyclical	2.72
Financial Other	1.44
Supranational	1.27
Transportation	1.20
Electric	1.04
REITS	0.97
Non-Agency CMBS	0.16
Cash and other instruments	5.22

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

Yes:

In fossil gas In nuclear energy

No

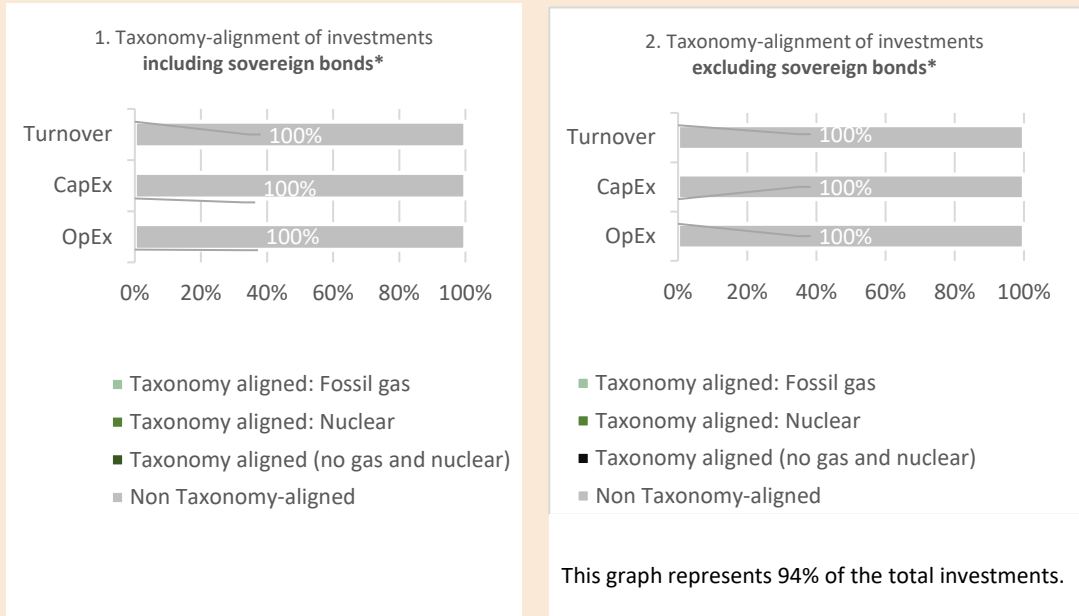

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 11 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 6.80% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Global SDG Credits
Legal entity identifier: 213800CKSU373L6J3U62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.4% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 10% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 1.76% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 92.40 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 13.52% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.2383.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 21 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- ✘ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

70.4%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 21 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 13.52% of the assets were invested in green bonds.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM SDG High Yield Bonds
Legal entity identifier: 2138004EB4XIM39VFW48

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.8% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 2% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 0.95% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 100.00 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 5.51% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.1509.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 6 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

59.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 6 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 5.51% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds – RobecoSAM Global Green Bonds

Legal entity identifier: 213800TZF6IC5ZUI3146

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 92.6% <ul style="list-style-type: none"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 1.8%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sub-fund invested 94.4% of its asset in green bonds, social bond, sustainable bonds and sustainability linke bonds. With this investments, the sub-fund contributed to environmental goals.

● **How did the sustainability indicators perform?**

1. The portfolio contained on average 4.42% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.

Sustainability disclosures (unaudited)

2. The sub-fund invested 90.15% of its assets in green bonds, social bond, sustainable bonds and sustainability linked bonds.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investments did no significant harm to any environmental or social sustainable investment objective by considering a principal adverse impact and aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments that are either Green, Social or Sustainable Bonds, significant harm is avoided by the application of Green Bonds Principles. For a large share of Green, Social and Sustainable bonds, Robeco adds an extra assessment on sustainability factors by applying Robeco's Green Bonds Framework or Social Bond Framework. Via these frameworks, the following adverse impacts were directly considered:

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

Furthermore, post investment, the following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant

Sustainability disclosures (unaudited)

negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Pre-investment, green, social and sustainable bonds were assessed via Robeco's Green Bond Framework and Social Framework, as well as via Robeco's SDG Framework. These Framework directly and indirectly assess PAI indicators. The percentage green, social and sustainability linked bonds in portfolio was 90.15%.
- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.3942.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 5 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-13, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
European Investment Bank	Supranational	7.62%	European Union
Kreditanstalt fuer Wiederaufbau	Government Guarantee	6.74%	Germany

What was the proportion of sustainability-related investments?

94.4%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Treasuries	27.78
Banking	19.70
Owned No Guarantee	10.38
Government Guarantee	9.04
Local Authorities	7.29
Electric	5.78
Mortgage Assets	2.70
Consumer Cyclical	2.53
Technology	2.35
Treasuries	1.46
Natural Gas	1.26
Financial Other	1.25
Consumer Non Cyclical	1.12
Basic Industry	1.11
Insurance	1.05
Industrial Other	0.70
REITS	0.44
Communications	0.31
Cash and other instruments	3.77

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sustainability disclosures (unaudited)

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

This graph represents 72% of the total investments.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

0%.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

92.6%. This concerns investments in green bonds, sustainable bonds and sustainability linked bonds.

● **What was the share of socially sustainable investments?**

1.8%. This concerns investments in social bonds.

● **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 5 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 94.4% of the sub-funds’ assets were invested in green bonds, social bonds, sustainable bonds and sustainability linked bonds.

● **How did this financial product perform compared to the reference sustainable benchmark?**

● **How did the reference benchmark differ from a broad market index?**

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for eligibility and inclusion of green bonds.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

96.5% of the sub-fund’s investments were green bonds, social bonds, sustainable bonds or sustainability linked bonds compared to .99.6% for the Bloomberg MSCI Global Green Bond Index.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

- ***How did this financial product perform compared with the reference benchmark?***

	% green bonds
RobecoSAM Global Green Bonds	92.2%
Bloomberg MSCI Global Green Bond Index	99.6%

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Climate Global Credits

Legal entity identifier: 213800LB657HDJBI4637

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 79.9%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 8.8%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sub-fund carbon footprint (scope level; 1, 2 and 3) as of 31 December 2022 was 24.5% better than the Solactive Paris Aligned Global Corporate Index.

The sub-fund invested 94.4% of its asset in green bonds, social bond, sustainable bonds and sustainability linked bonds. With these investments, the sub-fund contributed to environmental goals.

As at the end of the reporting period, the sub-fund's sustainable investments with environmental objectives were not made in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Sustainability disclosures (unaudited)

Sustainability

indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainability indicators perform?**

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The sub-fund's weighted carbon footprint (scope level 1 and 2) was 23.85% better than the Solactive Paris Aligned Global Corporate Index.
4. The sub-fund invested 12.71% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the Solactive Paris Aligned Global Corporate Index and investments with a positive SDG score are classified as sustainable investment. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

Sustainability disclosures (unaudited)

- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco

Sustainability disclosures (unaudited)

deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

Sustainability disclosures (unaudited)

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.89% of the net assets, compared to 0.36% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0.93% of the net assets, compared to 2.82% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.08% of the benchmark
- Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 269.69 tCO₂ per million EUR, compared to 357.25 tCO₂ per million EUR for the Solactive Paris Aligned Global Corporate Index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 15 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
United States Treasury Bill	Treasuries	1.83%	United States
Deutsche Bank AG	Banking	1.72%	Germany

Government Guarantee	0.06
Cash and other instruments	6.64

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

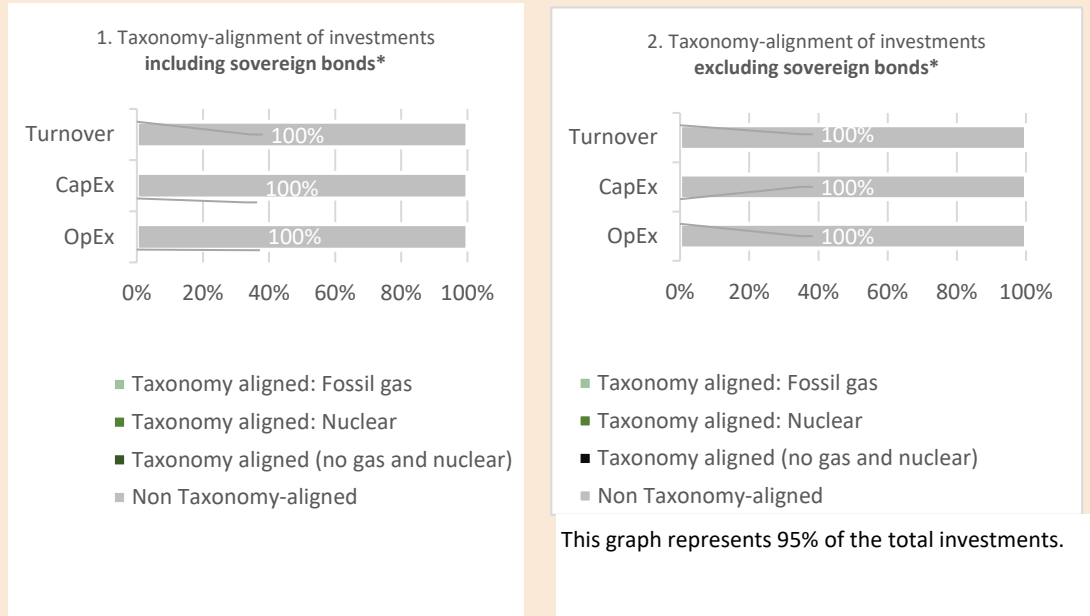

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

79.9%. This concerns investments that are either part of the Solactive Paris Aligned Global Corporate Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

8.8%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 15 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the carbon foot print of the sub-fund increased over the reporting period and is better than that of the Solactive Paris Aligned Global Corporate Index.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 24.51% better than the Solactive Paris Aligned Global Corporate Index.

● How did this financial product perform compared with the reference benchmark?

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)	% green bonds
RobecoSAM Climate Global Credits	269.69	12.7%
Solactive Paris Aligned Global Corporate Index	357.25	4.3%

● How did this financial product perform compared with the broad market index?

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)	% green bonds
RobecoSAM Climate Global Credits	269.69	12.7%
Bloomberg Global-Aggregate Index	366.92	2.9%

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Climate Global Bonds
Legal entity identifier: 213800QNYW5DK72HBQ97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon emissions per capita was equal to or better than that of the Paris Aware Benchmark
4. The sub-fund invested a minimum of 2.5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. The Sub-fund's weighted carbon emissions per capita was 26.31% better than that of the Solactive Paris Aware Global Aggregate Index.
4. The sub-fund invested 10.58% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Investments that are part of the Solactive Paris Aware Global Aggregate Index and investments with a positive SDG score are classified as sustainable investment. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion

Sustainability disclosures (unaudited)

of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for

Sustainability disclosures (unaudited)

breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.89% of the net assets, compared to 0.36% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 1.23% of the net assets, compared to 2.82% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.3% of the benchmark
- o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:

Sustainability disclosures (unaudited)

- The Carbon footprint (PAI 2, Table 1) of the portfolio was 239.26 tCO₂ per million EUR, compared to 325.61 tCO₂ per million EUR for the Solactive Paris Aware Global Aggregate Index.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 13 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

What were the top investments of this financial product?

To comply with the EU Cash and other instruments Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.1%. This concerns investments that are either part of the Solactive Paris Aware Global Aggregate Index or investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

17.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 13 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 10.58% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

How did this financial product perform compared to the reference sustainable benchmark?

- **How did the reference benchmark differ from a broad market index?**

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

The sub-fund's weighted carbon footprint (scope level 1, 2 and 3) was 26.52% better than the Solactive Paris Aware Global Aggregate Index.

- **How did this financial product perform compared with the reference benchmark?**

	Greenhouse gas emissions (t CO ₂ -eq/mUSD)	% green bonds

Bloomberg Global-Aggregate Index	366.92	2.9%

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Emerging Credits
Legal entity identifier: 5493008QKCFW6Q0H681

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 5% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- For corporate bond investments, at least 80% of the Sub-fund was invested in companies with a neutral or positive SDG score. No more than 20% was invested in a holding with a low-negative score. The average company SDG score of the Sub-fund is greater than zero.
- For corporate bond investments, the Sub-fund excluded all high or medium negative SDG scores (-3 or -2).
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained on average 11.15% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 2.68% of the holdings in portfolio had an elevated sustainability risk profile.
- 88.18% of the companies (on average) held a neutral or positive SDG score. Overall the average SDG score of the sub-fund was 81.53 based on the internally developed SDG framework.
- 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.
- The sub-fund invested 18.34% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

Sustainability disclosures (unaudited)

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, “SDG scores” are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco’s proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco’s Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

- of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans \geq 300 MW)).
 - PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
 - For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
 - PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
 - PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
 - PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.4447.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 9 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)

Sustainability disclosures (unaudited)

- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

What was the proportion of sustainability-related investments?

96.9%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy	1.57
Natural Gas	1.48
Other sectors	
Banking	24.62
Communications	12.13
Basic Industry	10.55
Owned No Guarantee	8.48
Treasuries	7.45
Consumer Cyclical	4.78
Technology	4.34
Capital Goods	4.33
Electric	3.56
Insurance	3.19
Sovereign	2.59
Supranational	2.50
Transportation	1.90
Consumer Non Cyclical	1.51
Mortgage Assets	0.78
Government Sponsored	0.75
Financial Other	0.49
Industrial Other	0.12
Cash and other instruments	2.88

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

68.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 9 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 18.39% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Euro Government Bonds
Legal entity identifier: 2138004UVBQIDUAW9R66

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy that is based on exclusion criteria that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom. This means that the Sub-fund has no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

2. The sub-fund excluded sovereign bonds issued by the bottom 15% of the WGI Control of Corruption ranking.
3. The sub-fund invested a minimum of 10% in green, social, sustainable, and/or sustainability-linked bonds.
4. The sub-fund's portfolio had a minimum weighted average score of at least 6.5 on Robeco's Country Sustainability Ranking.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. The Sub-fund excluded sovereign bonds issued by the bottom 15% of the WGI Control of Corruption ranking.
3. The sub-fund invested 24.18% of its assets in green, social, sustainable and/or sustainability-linked bonds.
4. The sub-fund's portfolio had a minimum weighted average score of 7.79 on Robeco's Country Sustainability Ranking.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 15, table 1 regarding green house gas intensity was considered via engagement. Robeco monitors a set of country data on climate performance. These include GHG intensity (such as CO₂/GDP), CO₂ per capita data, emission trends and policy metrics. This dataset has been incorporated in the Country Sustainability Ranking, which is used for the fundamental analysis of government bonds.
- PAI 16, table 1 regarding investee countries subject to social violations was considered via exclusions. The PRS political risk data, used for the measurement of this indicator, are an important component of Robeco's Country Sustainability Ranking. The PRS internal conflict score is used as an instrument to detect countries that run the risk of getting involved in serious internal conflict. The PRS metric is based on three components: civil disorder, terrorism, and civil war.
- PAI 17, table 2 regarding the share of securities not issued under Union legislation on environmentally sustainable bonds was considered via targets in relation to investments in green, social, sustainable and sustainable linked bonds.
- PAI 21, table 3 regarding the average corruption score was considered by setting targets on the country sustainability ranking (CSR).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Sustainability disclosures (unaudited)

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- As part of Country Sustainability ranking, used for The Fundamental analysis of bonds, the following PAIs were considered:
 - Table 1, PAI 15: The Green House Gas intensity (scope 1 and 2) of the sub-fund was 14.1% better than the benchmark.
 - Table 1, PAI 16: 0% of the assets was invested in countries subject to social violations.
 - In addition, the Fund has Environmental and Social promoting characteristics in relation to:
 - Table 2, PAI 17: The Share of bonds not certified as green under a future EU act setting up an EU Green Bond Standard was 64.46%.
 - Table 3, PAI 21: The average Corruption score was 2% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Table 1, PAI 15: The Green House Gas intensity (scope 1 and 2) of the sub-fund was 14.1% better than the benchmark.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Sovereign	0.13
Cash and other instruments	2.64

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
- In fossil gas In nuclear energy
- No

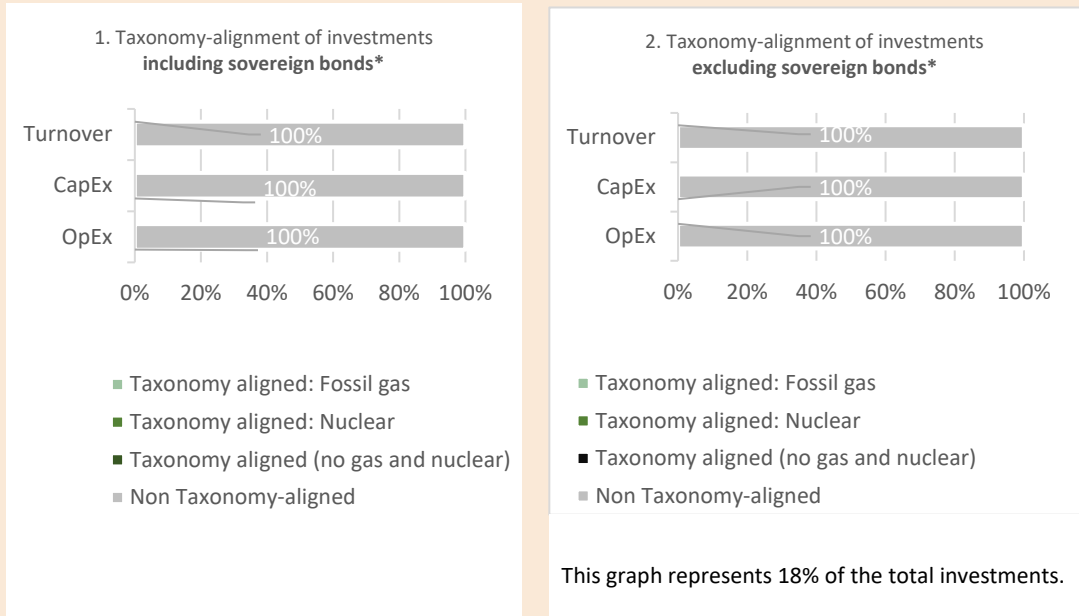

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.9%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

19.2%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 24.18% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Euro Credit Bonds
Legal entity identifier: 213800CVNA3PA3BONW52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 67.4% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

- The sub-fund's portfolio complied with Robeco's Exclusion Policy that is based on exclusion criteria that Robeco believes are detrimental to society and incompatible with sustainable investment strategies. Robeco deems investing in government bonds (federal or local) of countries where serious violations of human rights or a collapse of the governance structure take place as unsustainable. In addition, Robeco will follow applicable sanctions of the UN, EU or US to which it is subject and follows any mandatory (investment) restrictions deriving therefrom. This means that the Sub-fund has no exposure to excluded securities, taking into account a grace period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. The sub-fund invested 13.41% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 1.99% of the net assets, compared to 4.66% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.77% of the net assets, compared to 4.7% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 18 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1: Hazardous waste and radioactive waste ratio 1 case. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Cash and other instruments

2.94

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

61.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 18 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 13.41% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.9% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 10% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 2% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained on average 0.38% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 9.47% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0.95% of the net assets, compared to 3.05% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.3% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 2.21% of the net assets, compared to 0.36% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 3 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
3.875 TELEFONICA EUROPE BV (Perp)	Communications	1.64	Spain

Financial Other	0.85
Owned No Guarantee	0.44
REITS	0.24
Brokerage, Asset Managers, Exchanges	0.11
Cash and other instruments	3.94

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.  **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

17.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

 **What was the share of socially sustainable investments?**

52.5%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 3 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 9.47% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Sustainable Asian Bonds
Legal entity identifier: 21380096HMIZ4YU8CM47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 5% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. For corporate bond investments, at least 80% of the Sub-fund was invested in companies with a neutral or positive SDG score. No more than 20% was invested in a holding with a low-negative score. The average company SDG score of the Sub-fund is greater than zero.
5. For corporate bond investments, the Sub-fund excluded all high or medium negative SDG scores (-3 or -2).

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. 85.39% of the companies (on average) held a neutral or positive SDG score. Overall the average SDG score of the sub-fund was 76.02 based on the internally developed SDG framework.
5. 0.00% of the companies (on average) held a high or medium negative SDG score (-2 or -3) based on the internally developed SDG framework.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.3314.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

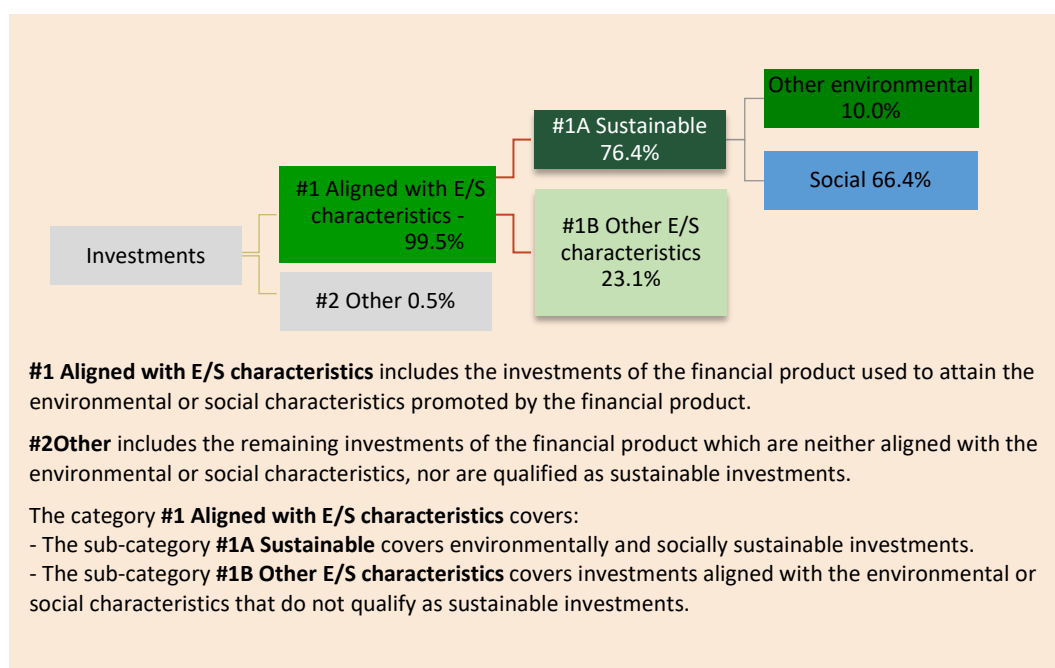

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

99.5%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Natural Gas	1.74
Energy	0.52
Other sectors	
Banking	16.07
Owned No Guarantee	15.62
Technology	10.26
Treasuries	10.01
Communications	8.69
Consumer Cyclical	8.62
Basic Industry	5.32
Insurance	4.24
Financial Other	4.04
Sovereign	3.96
Electric	2.84
Capital Goods	2.35
Industrial Other	1.83
Transportation	1.80
Consumer Non Cyclical	0.65
Cash and other instruments	1.45

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.0%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

65.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, over 80% of the holdings had a neutral or positive SDG score.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM Euro SDG Credits
Legal entity identifier: 213800MQYJBFHGNZW597

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.7% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies that breached the international norms were excluded from the investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund was solely invested in companies that hold a positive or neutral SDG score based on the internally developed SDG Framework.
4. The sub-fund invested a minimum of 10% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained on average 2.47% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.
3. 93.53 % of the assets (on average) was invested in investments holding a neutral or positive SDG score based on the internally developed SDG framework.
4. The sub-fund invested 19.18% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in

Sustainability disclosures (unaudited)

any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.3115.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 16 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 12, table 1: Unadjusted gender pay gap 2 cases. PAI 13, table 1: Board gender diversity 2 cases. PAI 1, table 1: GHG emissions 1 case. PAI 2, table 1: Carbon footprint 1 case. PAI 3, table 1: GHG intensity of investee companies 1 case. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 1 case. PAI 5, table 1: Share of nonrenewable energy consumption and production 1 case. PAI 6, table 1: Energy consumption intensity per high impact climate sector 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)

Sustainability disclosures (unaudited)

- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Sustainability disclosures (unaudited)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

70.1%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 16 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 19.18% of the assets were invested in green bonds.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Financial Institutions Bonds
Legal entity identifier: 213800M7K3R9AYOXVL19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 84.1% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

- Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
- The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

- The portfolio contained on average 2.76% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
- The sub-fund invested 6.59% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability disclosures (unaudited)

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 0% of the net assets, compared to 0% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.

Sustainability disclosures (unaudited)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.27% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
4.375 MAPFRE SA 31-MAR-2047	Insurance	1.98	Spain
4.032 BNP PARIBAS CARDIF (Perp)	Insurance	1.93	France
4.250 ACHMEA BV (Perp)	Insurance	1.89	Netherlands

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

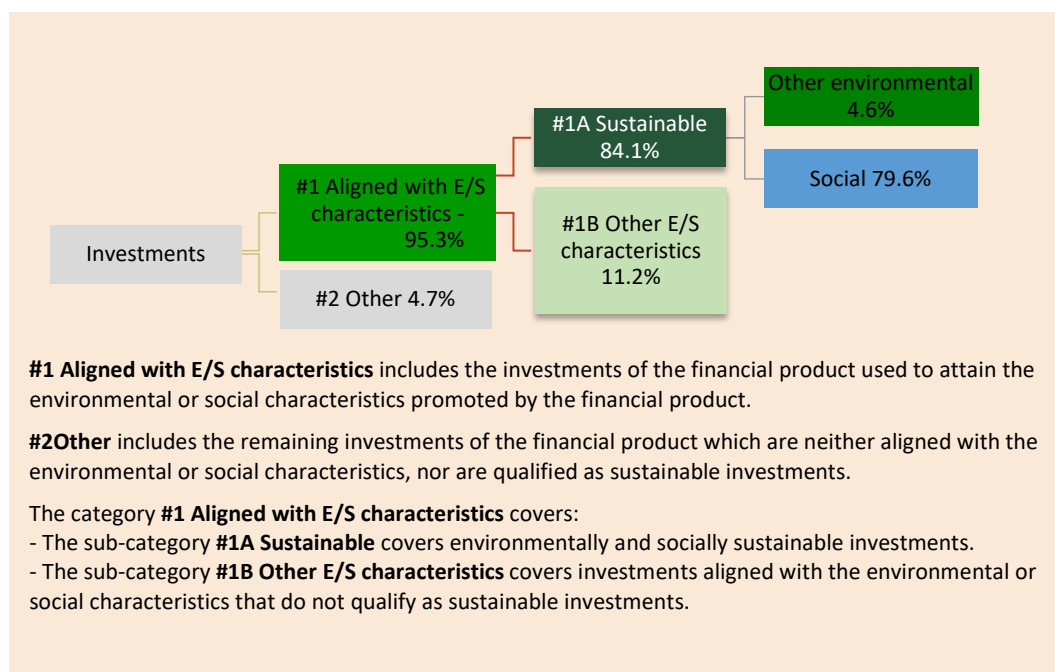

Sustainability disclosures (unaudited)

What was the proportion of sustainability-related investments?

95.3%

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Not applicable	0.00
Other sectors	Average exposure in % over the reporting period
Banking	48.59
Insurance	42.42
Treasuries	4.42
Financial Other	0.78
Owned No Guarantee	0.06
Cash and other instruments	3.72

Sustainability disclosures (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.6%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

79.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 6.59% of the assets were invested in green bonds.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco Investment Grade Corporate Bonds
Legal entity identifier: 213800ZDFG81MWTU5M51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The sub-fund was limited to a maximum exposure of 3% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.
4. The sub-fund invested a minimum of 5% in green, social, sustainable, and/or sustainability-linked bonds.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.
4. The sub-fund invested 8.94% of its assets in green, social, sustainable and/or sustainability-linked bonds.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on

Sustainability disclosures (unaudited)

such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.

- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks

Sustainability disclosures (unaudited)

whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 6.41% of the net assets, compared to 8.29% of the benchmark
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0% of the benchmark
 - Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 11.18% of the net assets, compared to 9.75% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.1% of the benchmark

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 10 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 1 case. PAI 8, table 1: Emissions to water 1 case. PAI 9, table 1:

Sustainability disclosures (unaudited)

Hazardous waste and radioactive waste ratio 1 case. PAI 12, table 1: Unadjusted gender pay gap 1 case.

- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

Largest investments	Sector	% Assets	Country
1.375 DEUTSCHE TELEKOM INT FIN 30-JAN-2027	Communications	2.04	Germany

What was the proportion of sustainability-related investments?

95.6%

- *What was the asset allocation?*

Asset allocation describes the share of investments in specific assets.

Sustainability disclosures (unaudited)

Sustainability disclosures (unaudited)

● In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Energy	6.16
Natural Gas	1.86
Other sectors	
Consumer Non Cyclical	30.10
Consumer Cyclical	15.92
Communications	11.39
Owned No Guarantee	6.11
Technology	6.05
Electric	5.65
Treasuries	4.32
Basic Industry	4.31
Transportation	1.21
Capital Goods	1.20
Industrial Other	1.07
Local Authorities	0.66
Cash and other instruments	3.99

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.1%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

49.9%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainability disclosures (unaudited)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under “#2 Other”. The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 10 holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 8.94% of the assets were invested in green bonds.

Sustainability disclosures (unaudited)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - RobecoSAM US Green Bonds

Legal entity identifier: 213800N8SFP1LXXF4380

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 88.6%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 3.1%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The sub-fund invested 91.7% of its asset in green bonds, social bond, sustainable bonds and sustainability linke bonds. With this investments, the sub-fund contributed to environmental goals.

How did the sustainability indicators perform?

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0.00% of the holdings in portfolio was in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises.

Sustainability disclosures (unaudited)

3. The sub-fund invested 91.67% of its assets in green bonds, social bond, sustainable bonds and sustainability linke bonds.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The sustainable investments did no significant harm to any environmental or social sustainable investment objective by considering a principal adverse impact and aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

For sustainable investments that are either Green, Social or Sustainable Bonds, significant harm is avoided by the application of Green Bonds Principles. For a large share of Green, Social and Sustainable bonds, Robeco adds an extra assessment on sustainability factors by applying Robeco's Green Bonds Framework or Social Bond Framework. Via these frameworks, the following adverse impacts were directly considered:

- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement, proxy voting and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosures (unaudited)

Furthermore, post investment, the following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1, 2 and 3 Green House Gas intensity of investee companies via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement, proxy voting and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement, proxy voting and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant

Sustainability disclosures (unaudited)

negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement and proxy voting. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement and proxy voting. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.
- PAI 6, table 3 regarding insufficient whistleblower protection was considered.
- PAI 7, table 3 regarding incidents of discrimination was considered.
- PAI 8, table 3 regarding excessive CEO pay ratio was considered via proxy voting and engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco

Sustainability disclosures (unaudited)

continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Pre-investment, green, social and sustainable bonds were assessed via Robeco's Green Bond Framework and Social Framework, as well as via Robeco's SDG Framework. These Framework directly and indirectly assess PAI indicators. The percentage green, social and sustainability linked bonds in portfolio was 91.67%.
- Robeco's SDG Framework assesses companies' positive and negative contributions to the Sustainable Development Goals (SDG's). Robeco's SDG Framework directly and/or indirectly screens companies on many of the topics considered by the PAI indicators. The average SDG score of the portfolio was 1.6642.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 7 companies in portfolio were subject to the Robeco Entity Engagement program.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
European Investment Bank	Supranational	7.56%	European Union

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainability disclosures (unaudited)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

88.6%. This concerns investments in green bonds, sustainable bonds and sustainability linked bonds.

What was the share of socially sustainable investments?

3.1%. This concerns investments in social bonds.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainability disclosures (unaudited)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under “not sustainable”. The sub-fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the sub-fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 7 of the sub-fund’s holdings were under active engagement either within Robeco’s thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, 91.7% of the sub-funds’ assets were invested in green bonds, social bonds, sustainable bonds and sustainability linked bonds.

How did this financial product perform compared to the reference sustainable benchmark?

● How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for eligibility and inclusion of green bonds.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

91.7% of the sub-fund’s investments were green bonds, social bonds, sustainable bonds or sustainability linked bonds compared to .99.1% for the Bloomberg MSCI USD Green Bond Index.

● How did this financial product perform compared with the reference benchmark?

	% green bonds
RobecoSAM US Green Bonds	91.7%
Bloomberg MSCI USD Green Bond Index	99.1%

● How did this financial product perform compared with the broad market index?

	% green bonds
RobecoSAM US Green Bonds	91.7%
Bloomberg Global-Aggregate Index	2.9%

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainability disclosures (unaudited)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Robeco Capital Growth Funds - Robeco QI Multi Factor Absolute Return
Legal entity identifier: 213800AERXVYQM6ZR607

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.2% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The sub-fund's portfolio complied with Robeco's Exclusion Policy excluding investments in companies that are exposed to controversial behavior and controversial products. This means that the Sub-fund had no exposure to excluded securities, taking into account a grace period.
2. The sub-fund scrutinized investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosures (unaudited)

3. The sub-fund's weighted carbon (scope level 1 and 2), water and waste footprint score was better than that of the general market index.
4. The sub-fund's weighted average ESG score was better than that of the general market index.

● ***How did the sustainability indicators perform?***

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as at 31 December 2022.

1. The portfolio contained no investments that are on the Exclusion list as result of the application of the applicable exclusion policy.
2. 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
3. The Sub-fund's weighted score for the carbon (scope level 1 and 2), water and waste footprint were respectively 28.76%, 83.25% and 67.00% better than the general market index.
4. The sub-fund's weighted average ESG score was 20.12 against 21.92 for the general market index.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Robeco uses its proprietary SDG framework to determine if an investment qualifies as sustainable investment. Robeco's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society and the natural environment. Positive scores imply that the investment do not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. Robeco used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) are deemed to contribute to the UN SDGs.

Sustainability disclosures (unaudited)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) are considered in the calculation of SDG scores under Robeco's proprietary SDG Framework. Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score can be classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 or -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators are either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the fund:

- PAI 1, table 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2, table 1 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3, table 1 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.
- PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

Sustainability disclosures (unaudited)

- PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.
- For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.
- PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.
- PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPR), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.
- PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons:1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines.2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological

Sustainability disclosures (unaudited)

Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.⁵ The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China).⁶ The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a.⁷ The Belgian Loi Mahoux, the ban on uranium weapons.⁸ Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework. Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. Robeco continuously screens its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:

Sustainability disclosures (unaudited)

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 3.56% of the net assets, compared to 4.93% of the benchmark
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0% of the net assets, compared to 0.21% of the benchmark
- Exposure to companies exploiting activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1) was 6.36% of the net assets, compared to 8.23% of the benchmark. The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0% of the net assets, compared to 0.37% of the benchmark
- o Via the environmental footprint performance targets of The Sub-fund, the following PAIs were considered:
 - The Carbon footprint (PAI 2, Table 1) of the portfolio was 39.5 tCO₂ per million EUR, compared to 55.4 tCO₂ per million EUR for the benchmark.
 - Biodiversity, water and waste indicators (PAI 7-9, Table 1). The scores for biodiversity, water and waste were respectively 22.73%, 83.25% and 67% better than the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors were taken into account:

- o Via Robeco's entity engagement program, the following PAIs were considered:
 - At year end 45 companies in portfolio were subject to the Robeco Entity Engagement program. Via the Robeco Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1, table 1: GHG emissions 5 cases. PAI 2, table 1: Carbon footprint 5 cases. PAI 3, table 1: GHG intensity of investee companies 5 cases. PAI 4, table 1: Exposure to companies active in the fossil fuel sector 5 cases. PAI 5, table 1: Share of nonrenewable energy consumption and production 5 cases. PAI 6, table 1: Energy consumption intensity per high impact climate sector 5 cases. PAI 7, table 1: Activities negatively affecting biodiversity sensitive areas 3 cases. PAI 8, table 1: Emissions to water 3 cases. PAI 9, table 1: Hazardous waste and radioactive waste ratio 3 cases. PAI 12, table 1: Unadjusted gender pay gap 3 cases. PAI 13, table 1: Board gender diversity 3 cases. PAI 10, table 1: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 1 case. PAI 11, table 1: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 1 case.
 - All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)
 - Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)
 - In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of The Sub-fund that cause adverse impact might be selected for engagement.

Sustainability disclosures (unaudited)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2022 through 31 December 2022

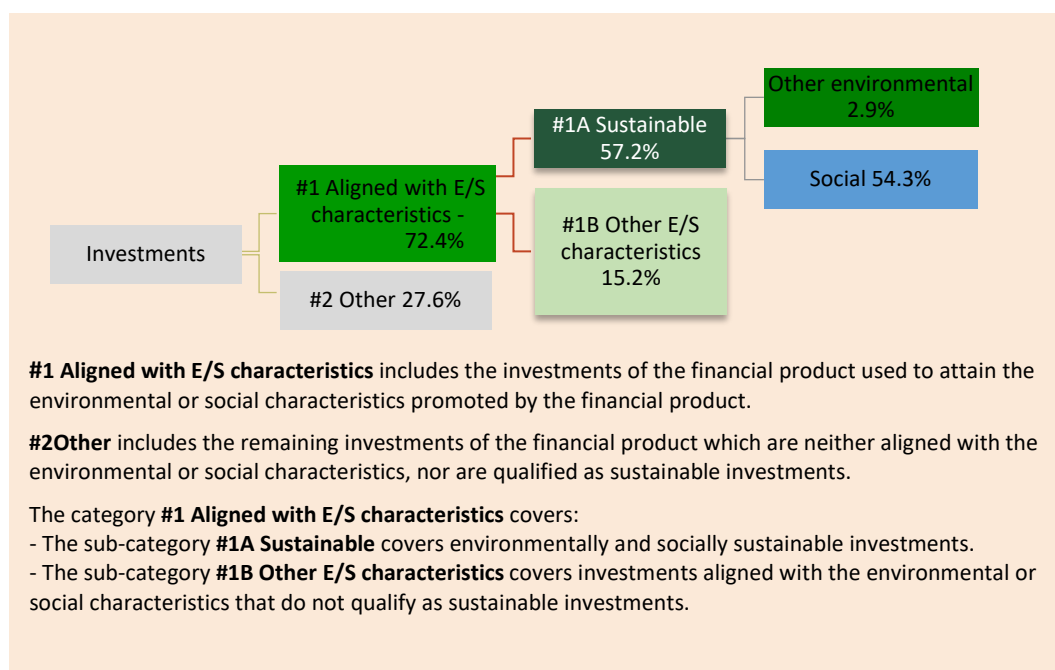

Largest investments	Sector	% Assets	Country
GOLDMAN SACHS Commodity certificate	Commodities	3.98	United States
3.750 NETHERLANDS GOVERNMENT 15-JAN-2023	Treasuries	2.41	The Netherlands

Sustainability disclosures (unaudited)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosures (unaudited)

0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.9%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

54.3%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The fund may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the fund were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, 45 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 20% better than the benchmark.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.
