Report by the manager

General information

Legal aspects

Robeco Global Stars Equities Fund N.V. (the 'Fund') is an investment company with variable capital established in the Netherlands. The Fund is an Undertaking for Collective Investment in Transferable Securities (UCITS), as referred to in Section 1:1 of the Dutch Financial Supervision Act (hereinafter: 'Wft') and the EU Directive for Undertakings for Collective Investment in Transferable Securities (2014/91/EU, UCITS V). UCITS have to comply with certain restrictions to their investment policy in order to protect investors.

Robeco Institutional Asset Management B.V. ('RIAM') manages the Fund. In this capacity, RIAM handles the asset management, risk management, administration, marketing and distribution of the Fund. RIAM holds an AIFMD license as referred to in Section 2:65 Wft, as well as a license to manage UCITS as referred to in Section 2:69b Wft. RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (the 'AFM').

The assets of the Fund are held in custody by J.P. Morgan SE, Amsterdam Branch. J.P. Morgan SE, Amsterdam Branch is appointed as the depository of the Fund as referred to in Section 4:62n Wft. The depository is responsible for supervising the Fund insofar as required under and in accordance with the applicable legislation e.g. monitoring the Fund's cashflows, monitoring investments, checking whether the net asset value of the Fund is determined in the correct manner, checking that the equivalent value of transactions relating to the Fund assets is transferred, checking that the income from the Fund is used as prescribed in applicable law and regulations and the Fund documentation, etc. The manager, the Fund and J.P. Morgan SE, Amsterdam Branch have concluded a depository and custodian agreement. In this agreement the responsibilities of the depository are described. Besides the abovementioned supervising tasks, the main responsibilities of the depository are e.g. holding in custody the assets of the Fund, establishing that the assets have been acquired by the Fund and that this has been recorded in the accounts, establishing that the issuance, repurchase, repayment and withdrawal of the Fund's shares takes place in accordance with the Fund documentation and applicable law and regulations and carrying out the managers instructions.

The Fund is subject to statutory supervision by the AFM. The Fund is entered in the register as stated in Section 1:107 Wft.

Robeco

When 'Robeco' is mentioned it means RIAM as well as the activities of other companies that fall within the scope of Robeco's management.

Changes of the Articles of Association, name change and addition of new share-classes

On 10 April 2025, the Extraordinary General Meeting of Shareholders decided to change the Articles of Association of the Fund in order to change the name to Robeco Global Stars Equities Fund N.V., effective 2 May 2025. In the remainder of the report, the new name is used.

On 17 December 2025, the Extraordinary General Meeting of Shareholders decided to change the Articles of Association of the Fund in order to add the possibility to open two more share-classes in the fund, effective 12 January 2026

Supervision by the Supervisory Board of Robeco Institutional Asset Management B.V.

The Supervisory Board of Robeco Institutional Asset Management B.V. supervises the general affairs of Robeco and its businesses as managed by the Management Board and Executive Committee, including the funds under management.

During the meetings of the Supervisory Board, attention was paid, among other things, to developments in the financial markets and the performance of the funds managed by RIAM. The interests of clients are considered to be a key issue and, consequently, an important point of focus.

Based on periodic reports, the Supervisory Board discussed the results of these funds with the Management Board and Executive Committee. These discussions focused on the investment results, the development of assets under management as a result of market movements and the net inflow of new money as well as operational matters.

In the meetings of the Audit & Risk Committee of the Supervisory Board, amongst other things the (interim) financial reports of the funds were shared and the reports of the independent auditor were discussed. In addition, risk management, incident management, tax, legal, compliance issues and quarterly reports from internal audit, compliance, legal affairs and risk management were discussed.

Report by the manager (continued)

General information (continued)

Share classes

The ordinary shares are divided into two series, two of which were open at balance sheet date. Each series is designated as a share class. This concerns the following series:

Share class A: Robeco Global Stars Equities Fund - EUR E

Share class B: Robeco Global Stars Equities Fund - EUR G

Share class C: Robeco Global Stars Equities Fund - EUR GH (launched effective 23 March 2026)

Share class D: Robeco Global Stars Equities Fund - EUR EH (not launched yet)

The management fee for the Robeco Global Stars Equities Fund - EUR G and EUR GH share classes (without distribution fee) is lower than for the Robeco Global Stars Equities Fund – EUR E and EUR EH share classes.

Liquidity of ordinary shares

The Fund is an open-end investment company, meaning that, barring exceptional circumstances, it issues and repurchases ordinary shares on a daily basis at prices approximating net asset value, augmented or reduced by a limited surcharge or discount. The only purpose of this surcharge or discount is to cover the costs made by the Fund related to the entry and exit of investors. The actual maximum surcharge or discount is published on www.robeco.com/riam. The surcharges and discounts are recognized in the profit and loss account.

Robeco Global Stars Equities Fund – EUR E share class is listed on Euronext Amsterdam, Euronext Fund Service segment. In addition, Robeco Global Stars Equities Fund - EUR E share class is listed on the stock exchange of Berlin, Dusseldorf, Frankfurt, Hamburg, Luxembourg, Munich, Vienna and Zurich.

Attribution to share classes

The administration of the Fund is such that attribution of the results to the different share classes takes place on a daily basis and pro rata. Issues and repurchases of own shares are registered per share class. The differences between the various share classes are explained in notes 9, 12 and 14 to the financial statements.

Conversion of bearer shares

In the past, the Fund issued shares in the form of bearer shares (also known as ‘K-certificates’). In connection with the coming into effect of the Dutch Conversion of Bearer Shares Act (Wet omzetting aandelen aan toonder, the ‘Act’), the holders of bearer shares could exchange their K-certificate for a replacement registered share until 31 December 2025. After 31 December 2025, all K-certificates are null and void.

Tax features

On the basis of Section 28 of the Dutch Corporation Tax Act, the Fund has the status of a fiscal investment company. This means that 0% corporate income tax is due, providing that, after deducting 15% in Dutch dividend tax, the Fund makes its profit available for distribution to shareholders in the form of dividend within eight months of the close of the financial year and satisfies any other relevant regulations.

Key Information Document and Prospectus

A Prospectus for the Fund and a key information document for each share class with information on the Fund and its associated costs and risks are available for Robeco Global Stars Equities Fund N.V. Both documents are available free of charge at the Fund’s offices and at www.robeco.com.

Audit committee tasks

An audit committee must be set up for investment funds that are classified as public interest entities (PIE). The Robeco funds are exempt from appointing an audit committee on the basis of Article 3 of the ‘Besluit instelling auditcommissie’. This means that Robeco's funds with PIE status do not have an audit committee. However, the absence of an audit committee does not mean that the associated tasks will be canceled, but that they must have been assigned elsewhere in the Robeco organization. Within Robeco, these tasks will be performed by the Executive Committee of Robeco Institutional Asset Management B.V. (the "ExCo"). The ExCo is supervised by its Audit & Risk Committee where relevant and/or required..

Dividend in EUR ⁴	1.40	1.20	1.00	1.00	1.00	
Total net assets ⁵	2.4	2.5	2.0	1.7	2.1	

¹ The differences between the performance based on market price and the performance based on net asset value is caused by the fact that the market price is the NAV of the previous trading day corrected for the surcharge or discount as described under Liquidity of ordinary shares.

² Any dividend payments that are distributed in any year are assumed to have been reinvested in the Fund.

³ Currencies have been converted at rates supplied by World Market Reuters.

⁴ The dividend per share relates to the reporting year mentioned and is distributed in the following year. The figure for 2025 is a proposal. Further information on the proposed dividend can be found in the section Proposed profit appropriation on page 34.

⁵ EUR x billion.

Report by the manager (continued)

General introduction

Financial markets environment

The global economy proved resilient in 2025, growing by 3.2% despite a landmark shift in global trade dynamics, persistent uncertainty about economic policy, concerns about central bank independence and elevated public debt levels.

Substantial investments in AI, led by the US and China, are reshaping the economy. Meanwhile, after several years marked by volatile inflation and supply-chain disruptions, inflation further normalized in 2025, supported by easing pressure on the prices of goods outside the US, falling energy prices, a weaker US dollar and cooling labor markets in advanced economies.

In the US, economic activity was stronger than had been anticipated in the wake of the announcement in April of the highest US tariffs since the 1930s. Real GDP grew by 2.2%, supported by solid private consumption and continued investments in productivity-enhancing AI. The US labor market entered a “low hiring, low firing” environment, with unemployment hovering around 4.3% throughout the year, around 30 basis points higher than in 2024 but still consistent with a tight labor market. Core inflation fell to 2.6%, enabling the Federal Reserve to cut interest rates modestly. Fiscal policy remained expansionary, with rising borrowing costs for the US Treasury and high defense expenditure outweighing revenues from tariffs, resulting in a US budget deficit of 6.2% over the year. Companies spent substantial amounts on digital infrastructure, data centers and AI-related projects, reinforcing medium-term productivity expectations while solidifying the US’s technological leadership.

The Eurozone’s GDP grew by a more modest 1.5% in 2025, with this growth primarily driven by rising real incomes, which underpinned a recovery in consumption. A small but meaningful rebound in industrial production thanks to European energy prices falling over the year also contributed. Inflation continued to fall toward the European Central Bank’s (ECB) target, sinking to 2.0% by the end of the year, reducing the pressure on household purchasing power. As a result, the ECB considered itself to be in a “good place”, with interest rates at 2.0% at the end of 2025. Germany’s ratification in March of a major constitutional amendment to relax the country’s debt rules, enabling defense spending to surpass 1% of GDP without borrowing limits, represented a major shift in Germany’s fiscal stance. After a weak 2024 the German economy only recovered moderately in 2025, expanding by 0.2%, with peripheral Eurozone economies growing more strongly thanks to resilient services demand. High household savings, subdued consumer sentiment, the Russia-Ukraine conflict, the imposition of US tariffs and a stronger euro continued to put a lid on the Eurozone’s overall economic momentum.

Economic growth in emerging markets varied considerably over the year. China’s GDP grew by around 5.0%. While the property sector remained weak and cautious household sentiment held back growth, stabilizing industrial activity and stimulus measures, including targeted liquidity support and small reductions in policy rates and reserve requirements, were supportive. Strong overall exports, particularly to Southeast Asia and Europe, offset weaker domestic demand and a steep decline in exports to the US on the back of reciprocal tariffs. The Indian economy again outperformed other major emerging economies, growing by 6.7%, driven by robust domestic consumption, the roll-out of new infrastructure and efficiency gains linked to ongoing tax reforms. Meanwhile, Southeast Asian economies benefited from resilient tourism and the diversification of global supply chains, although they continued to face external headwinds. Oil-exporting economies faced a challenging environment. Brent Crude prices averaged around USD 65 to 70 per barrel throughout 2025, down from an average of between USD 75 to 80 the previous year as a result of oversupply and weaker-than-expected demand from China and Europe. Several oil-dependent economies adjusted their fiscal frameworks accordingly, revising their budget assumptions and accelerating plans to diversify. For example, producers in Latin America and the Middle East continued to invest in energy-transition-related projects.

Overall, 2025 could be seen as a year of adjustment, with economies adapting to lower inflation, which enabled most central banks to stay in easing mode, and a cyclical softening in trade due to tariffs and barriers to trade increasing. The structural forces of digitalization, the energy transition and geopolitics, led by the US assuming a new position in the world order, contributed to macroeconomic dynamics over the year.

Outlook for the equity markets

Equities provided above-average returns once again in 2025. The late-cycle equity bull market continued, despite all the twists and turns in US trade policy, broader geopolitical turmoil and high starting valuations. Ample liquidity, central banks continuing to cut rates and leading technology companies’ strong earnings helped markets fully recover after falling sharply on the back of the US’s tariff announcements in April, with the result that the MSCI World (hedged in EUR) ended the year up 16.7%. A weaker dollar (having fallen by 13.4% against the euro over the year) contributed to very strong performance from emerging market equities, which gained 31.3% in local-currency terms and 17.8% unhedged in euro terms.

Coming into 2026, we saw at least three reasons for a constructive equity outlook. First, our 2026 outlook view of a synchronized cyclical global upswing would underpin a broadening earnings delivery in a late cycle equity bull market. Second, while inflation in developed markets was expected to remain above target in 2026, crucially, it would not exceed 4%. Historically, a moderate inflation environment has been a sweet spot for strong real returns from equities as corporate pricing power remains intact. Third, we expected continued ample liquidity, especially as the guidance from the incoming new Fed governor might be conducive to equity risk-taking.

While leading producer confidence metrics across the globe did signal a ‘synchronized shift’ in the first months of 2026, the escalation in the Middle East in March 2026, particularly with Iran’s involvement, has clearly tilted the risks around our constructive outlook to the downside. According to the International Energy Agency (IEA) we are confronted by the “largest supply disruption in the history of the global oil market” at the time of writing. Crude oil prices in Europe jumped more than 50% between 28 February and 20 March.

Report by the manager (continued)

General introduction (continued)

Outlook for the equity markets (continued)

Because oil market shocks can produce non-linear effects, our scenario analysis concentrates on intensity, duration and propagation of these shocks. As IMF's Managing Director Kristalina Georgieva noted, "we must think of the unthinkable and prepare for it". While our central scenario remains unchanged, probabilities have shifted. We observe that persistent geopolitical tensions have amplified volatility in energy markets, dampened risk sentiment, tightened liquidity conditions, and raised inflationary pressures. Every 10% increase in oil prices raises inflation by roughly 0.3% and lowers GDP growth by 0.4%. As a result, our downside risk scenario of a stagflationary environment emerging in 2026 has become more pronounced.

Another signpost for equity investors in 2026 will be whether the steep increase in capex-to-sales ratios at leading technology companies in recent years will prove to be justified by subsequent earnings growth. Signs of overcapacity in AI datacenters could precede underwhelming earnings delivery.

Investment policy

Introduction

The Fund is a globally invested equity fund that has been in existence since 1929, making it one of the oldest existing investment companies in the Netherlands.

Investment objective

The Fund has the objective of offering asset growth in the long term while at the same time aiming for a better sustainability profile compared to the MSCI World Index by promoting certain ESG (i.e. Environmental, Social and Governance) characteristics and integrating sustainability risks in the investment process. The Fund also aims for an improved environmental footprint compared to the MSCI World Index.

Robeco Global Stars Equities Fund N.V. is classified as Article 8 under the SFDR. More information is available in the precontractual SFDR disclosures of the fund on the Robeco website. Attached to this annual report the Annex IV disclosure can be found with detailed information on the achievement of the sustainability goals over the reporting period.

Implementation of the investment policy

During the reporting period, the portfolio managers of the strategy have continued to focus on the three pillars of the strategy; return on invested capital, good free cash flow generation and good sustainability profiles. Robeco Global Stars Equities Fund N.V. had a small absolute return in 2025, but underperformed the reference index for the full year. Stock selection in a number of important sectors contributed negatively to the performance. Most positive contributions came from stock-selection in the Communication Services and Healthcare sectors, while the Fund had negative contributions from stock-selection in Information Technology, Industrials and the Financials sector. Overall selection of high quality names, with good free cash flow generation and healthy sustainability profiles contributed negatively to performance this year, as it was mostly lower quality names, with high levels of leverage that outperformed for the full year.

Currency policy

An active currency policy is pursued with the euro as base currency. The fund may use forward exchange transactions to adjust the currency weights. Further quantitative information on the currency risk can be found in the information on currency risk provided on page 24.

Policy on derivatives

In constructing the portfolio for Robeco Global Stars Equities Fund N.V., individual stocks form the starting point (bottom-up selection process). Allocation to countries and regions results from the stocks selected. A top-down check is then performed on this allocation to regions and countries to establish whether the allocation complies with expectations for these countries and regions and/or the risks involved. The weights for regions and countries can be adjusted during this process with the help of futures. During the reporting period, no futures or other derivatives were used.

Net result	0.95	21.25	12.95	-11.09	16.93

¹ Based on the average amount of shares outstanding during the reporting year. The average number of shares is calculated on a daily basis.

Over the reporting period, Robeco Global Stars Equities Fund N.V. generated a return of 1.9% (gross of fees in EUR), against a return of 6.8% for its reference index, the MSCI World Index (net return in EUR).

The main drivers of the negative excess performance for the full year 2025 were adverse results from stock-picking in the sectors Financials, Information Technology and Industrials. For most of the year, the portfolio was too defensively positioned, as the fund managers were concerned about the overall impact of tariffs and geopolitical uncertainty on the growth rate of the global economy. Also, our quality style of investing underperformed for most of the year, as momentum and low valuation cyclical names outperformed strongly.

Return and risk

The tracking error is a frequently used measure to gauge portfolio risk. It indicates the degree to which positions in the portfolio can diverge from those in the reference index. The tracking error for the Fund was 3% for the reporting period on average.

Another measure used, is the active part of the portfolio, the active share. The active share measures the part that diverges from the reference index. For instance, if Microsoft has a weight of 3% in the reference index and a weight of 5% in the Fund's portfolio, the active part for this position is 2%. In comparison: an index-tracking fund, or ETF, that follows the reference index has an active share of close to zero. The active share of the portfolio has declined a little bit during the reporting period as a consequence of the increased dominance of some of the large information technology holdings- and communication services names in the portfolio that have become even more dominant in the MSCI World Developed Index that serves as the Fund's reference index. The active share of the portfolio is now 67%.

A third measure of risk is the portfolio's beta, a means of gauging the degree to which the portfolio moves along with the market. A portfolio with a beta above 1 is subject to greater fluctuations than the market. The Fund's beta came to 1.03 at the end of the reporting period. Clearly, the value of beta does not represent a goal in itself but rather results from the stocks selected for the portfolio.

The Fund has a long-term investment horizon of three to five years: the Fund buys stocks that are expected to remain in the portfolio for an average of three to five years. This is also the time period that is used to evaluate the sustainability performance of the holdings in the portfolio.

Report by the manager (continued)

Risk management

The presence of risks is inherent to asset management. It is therefore very important to have a procedure for controlling these risks embedded in the Fund's day-to-day operations. The manager (RIAM) ensures that risks are effectively controlled via the three lines model: RIAM management (first line), the Compliance and Risk Management departments (second line) and the Internal Audit department (third line).

The management of RIAM has primary responsibility for risk management as part of its day-to-day activities. The Compliance and Risk Management departments develop and maintain policies, methods and systems that enable the management to fulfill their responsibilities relating to risk. Furthermore, portfolios are monitored by these departments to ensure that they remain within the investment restrictions under the Terms and Conditions for Management and Custody and/or the prospectus, and to establish whether they comply with the internal guidelines. The Risk Management Committee decides how the risk management policies are applied and monitors whether risks remain within the defined limits. The Internal Audit department carries out audits to assess the effectiveness of internal control.

RIAM uses a risk-management and control framework that helps control all types of risk. Within this framework, risks are periodically identified and assessed as to their significance and materiality. Internal procedures and measures are focused on providing a structure to control both financial and operational risks. Control measures are included in the framework for each risk. Active monitoring is performed to establish the effectiveness of the procedures and measures of this framework.

Operational risk

Operational risk is the risk of loss as a result of inadequate or failing processes, people or systems. Robeco constantly seeks opportunities to simplify processes and reduce complexity in order to mitigate operational risks. Automation is a key resource in this regard and Robeco uses systems that can be seen as the market standard for financial institutions. The use of automation increases the risk associated with IT. This risk can be divided into three categories. The risk of access by unauthorized persons is managed using preventive and detective measures to control access to both the network and systems and data. Processes such as change management and operational management provide for monitoring of an operating system landscape. Finally, business continuity measures are in place to limit the risk of breakdown as far as possible and to recover operational status as quickly as possible in the event of a disaster. The effectiveness of these measures is tested periodically by means of internal and external testing.

Compliance risk

Compliance & Integrity risks embody the risk of corporate and individual behaviour that leads to insufficient compliance with laws and regulations and internal policies to such an extent that in the end this may cause serious damage to the confidence in the Fund, Robeco and in the financial markets. Incompliance with laws, regulations and policies might also result in penalties from regulators. Robeco's activities – collective and individual portfolio management – are subject to European and local rules of financial supervision. Observance of these rules is supervised by the national competent authorities (in the Netherlands the Authority for the Financial Markets, AFM and the Central Bank of the Netherlands, DNB).

Outsourcing risk

The risk of outsourcing the activities is that the third party cannot meet its obligations, despite the existing contracts, and that the Fund may incur a loss that cannot be recovered from the third party. To mitigate this risk, Robeco has implemented a Third Party Management Policy which provides a framework for managing a third-party's lifecycle. The main goal is to provide controlled and sound business management regarding third-parties.

Fraud risk

Maintaining a strong reputation for integrity is essential for Robeco, as it underpins market confidence and public trust. Because fraud can significantly erode this trust, Robeco has established a centralized framework to manage and mitigate fraud risk. This framework combines preventive and detective measures and includes regular evaluations of the effectiveness of internal controls.

To support this framework, Robeco has appointed two Anti-Fraud Officers (AFOs): one from Operational Risk Management, responsible for External Fraud, and one from Compliance, responsible for Internal Fraud. They act as the primary point of contact for potential fraud indicators and ensure that any signals are addressed promptly and effectively. Their responsibilities include:

- Conducting periodic Fraud Risk Assessments and reporting the results to the Enterprise Risk Management Committee (ERMC) and the Audit & Risk Committee (A&RC);
- Performing gap analyses to identify missing controls within the Risk Control Framework (RCF);
- Coordinating with IT Security on existing anti-fraud measures and identifying further opportunities to enhance fraud detection;
- Monitoring appropriate follow-up of both internal and external fraud incidents.

Fraud risk exists throughout the organization. To mitigate this, Robeco has implemented a range of internal controls—such as (but not limited to); segregation of duties, access controls, and the four-eye principle—that significantly reduce the likelihood of internal fraud. Although some inherent risk remains, including the potential for overriding established controls, Robeco considers this risk limited due to its organizational structure and strong asset-segregation practices. Fund assets are safeguarded by independent custodians and can only be transferred through predefined, authorized procedures, making the risk of misappropriation extremely remote.

Robeco also maintains a dedicated SOx control framework to prevent fraudulent financial reporting.

A quantification of the risks can be found in the notes to the financial statements on pages 24 through 27

Report by the manager (continued)

Remuneration policy

The Fund itself does not employ any personnel and is managed by Robeco Institutional Asset Management B.V. (hereafter 'RIAM'). In the Netherlands, persons performing duties for the Fund at management-board level and portfolio managers are employed by Robeco Nederland B.V. The remuneration for these persons comes out of the management fee.

This is a reflection of the Remuneration Policy of RIAM. The remuneration policy of RIAM applies to all employees of RIAM. The policy follows applicable laws, rules, regulations and regulatory guidance including, without limitation, chapter 1.7 of the Wft, article 5 of SFDR, the ESMA Remuneration Guidelines under UCITS, the ESMA Remuneration Guidelines under AIFMD and the ESMA Guidelines under MIFID.

Responsibility for and application of the policy

The RIAM Remuneration Policy is determined and applied by and on behalf of RIAM with the approval, where applicable, of the Supervisory Board of RIAM on the advice of the Nomination & Remuneration Committee (a committee of the Supervisory Board of RIAM) and, where applicable, the shareholders (Robeco Holding B.V. and ORIX Corporation Europe N.V.).

Introduction and scope

Our employees and their knowledge and capabilities represent Robeco's most important asset. In order to attract and retain staff who enable Robeco to help our clients achieve their goals, providing an attractive remuneration and benefits package is vital. It is equally vital to reward our people based on their performance fairly and competitively. To achieve this, we have a remuneration policy in place.

Objective of the remuneration policy

In line with our reputation as a leader in sustainability, Robeco compensates its employees in a non-discriminatory and gender neutral manner. The key objectives of our remuneration policy are:

- incentivizing employees to act in our clients' best interests and preventing potential poor business conduct or conflicts of interest from adversely affecting our clients;
- supporting our risk management processes and preventing our employees from taking unnecessary risks;
- helping us foster a healthy corporate culture focused on achieving sustainable results in accordance with the long-term objectives of Robeco, its clients and other stakeholders;
- ensuring our remuneration policy takes into account ESG risks and our sustainable investment objectives by incorporating these criteria in the key performance indicators (KPIs) used to determine individual staff members' variable compensation;
- providing competitive remuneration to help us attract and retain talented people

We review the policy every year to ensure it is aligned with regulatory requirements, internal standards and client interests. We also immediately review the remuneration policy in response to any significant changes in our business activities or organizational structure.

The regulatory environment

Robeco is active in a strictly regulated sector. This impacts every aspect of our business model, including our remuneration policy and practices. All of the remuneration regulations that Robeco is subject to as an asset manager endeavor to align, at least in general terms, our company's interests with those of our stakeholders. The regulations state that we should achieve this aim through the use of deferral mechanisms, retention periods and restrictions on disproportionate ratios between fixed and variable remuneration. We incorporate these requirements – both in letter and in spirit – in our remuneration policy. Therefore, annual variable remuneration in principle does not exceed 200% of fixed remuneration. In recognition of Robeco's responsibility to address sustainability challenges, we have explicitly integrated sustainability risk factors in the performance indicators of relevant employees.

Monitoring of and changes to our remuneration policy

Robeco constantly seeks and receives input from clients, its shareholder, regulators and other stakeholder groups about its approach to remuneration. We have put in place robust governance and monitoring arrangements to ensure our remuneration policy remains aligned not just with applicable laws, but also with the interests of our stakeholders. Our Management Board is ultimately responsible for approving changes to our remuneration policy (apart from changes to their own remuneration). The remuneration of the Management Board (statutory directors) is determined by our shareholder, based on a proposal from the Supervisory Board, which is advised by the Nomination & Remuneration Committee. The proposal is based on a prior proposal of the CEO, except when it concerns the remuneration of the CEO herself.

Report by the manager (continued)

Remuneration policy (continued)

Components of remuneration

All remuneration our employees receive can be divided into fixed remuneration (payments or benefits that do not take into account any performance criteria) and variable remuneration (additional payments or benefits that depend on performance). When determining employees' total remuneration, we periodically perform a benchmark review.

Fixed remuneration

Each individual employee's monthly fixed pay is determined based on their function and/or level of responsibility and experience according to set salary ranges and with reference to investment management benchmarks in the relevant region. The fixed remuneration we pay is sufficient to remunerate the staff member for the professional services they perform, in line with their level of education, degree of seniority, level of expertise, skills required for their role and work experience, and the part of our business and region they work in. Under certain circumstances, temporary allowances may be awarded. In general, these are solely function- and/or responsibility based and are not linked to the performance of the employee or Robeco. Allowances are granted based on strict guidelines and principles.

Variable remuneration

The variable remuneration pool is determined based on Robeco's financial results and a risk assessment that takes into account both financial and non-financial factors. This is to ensure any variable remuneration grants are warranted given the financial strength of the company and based on effective risk management. The variable remuneration of all staff members is appropriately balanced with the fixed remuneration that they receive.

Key performance Indicators (KPIs)

To the extent that the variable remuneration pool allows, each employee's variable remuneration is determined by taking into account the employee's behavior and personal and team performance based on pre-determined financial and non-financial KPIs. The actual amount of variable remuneration awarded is at the discretion of the employee's manager.

The financial KPIs for our investment professionals are mainly based on risk-adjusted excess returns over one, three and five years. For sales professionals, financial KPIs are mostly related to generated additional revenues (net revenue run rate) and client relationship management. KPIs for support professionals are mainly non-financial and role specific. KPIs for control functions are predominantly (70% or more) function- and/or responsibility-specific and non-financial in nature. KPIs for staff members in control functions are not based on the financial results of the part of the business they oversee in their monitoring role. At least 50% of all employees' KPIs are non-financial.

All employees have a mandatory risk and compliance KPI. Their risk and compliance performance is assessed and used to adjust their overall performance downward if it does not meet the required level. Unethical or non-compliant behavior overrides any good performance generated by a staff member and will result in reduced or no variable remuneration.

All employees also have a sustainability KPI. Our Sustainability and Impact Strategy Committee develops KPIs to measure how successfully we are implementing our sustainable investing strategy. The KPIs are role-specific, and can be qualitative or quantitative. They are used as a starting point to develop KPIs for different employee groups. Where relevant, sustainability risk factors form a part of the annual goals of employees so that their remuneration is linked to sustainability risk management.

For example, portfolio managers have decarbonization and ESGintegration-related KPIs, while risk professionals have sustainability risk and monitoring-related KPIs. Sustainability KPIs for the members of our Management Board depend on the domain they are responsible for; they include KPIs linked to sustainability reporting projects, ensuring we adhere to emission reduction targets for our own operations, and monitoring and ensuring we comply with sustainability regulatory requirements. Management Board members have both individual and team KPIs. Sustainability is integrated in some of the individual KPIs of our Management Board members. The individual goals have a total weight of 50% and are based on both qualitative and quantitative aspects.

Report by the manager (continued)

Remuneration policy (continued)

Conversion into Robeco Cash Appreciation Rights

To stimulate a healthy corporate culture focused on achieving sustainable results in accordance with the long-term objectives of Robeco and its stakeholders, we use deferrals and instruments called 'Robeco Cash Appreciation Rights' (R-CARs), the value of which reflects the financial results of Robeco over a rolling eight-quarter period.

Variable remuneration up to EUR 100,000 is paid in cash immediately after being awarded. If an employee's variable remuneration exceeds EUR 100,000, 40% of the variable remuneration in excess of EUR 75,000 is deferred and converted into R-CARs as shown in the table below, and the remainder is paid in cash.

	<i>Year 1</i>	<i>Year 2</i>	<i>Year 3</i>	<i>Year 4</i>
Cash payment	60%			
R-CARs redemption		13.34%	13.33%	13.33%

Severance payments

We pay no severance if an employee voluntarily resigns or is dismissed for malpractice. Severance payments to daily policymakers as defined in the Wet op het financieel toezicht (Wft; Dutch Financial Supervision Act) are capped at 100% of fixed remuneration. No severance would be paid to daily policymakers if they are dismissed due to a failure of Robeco (for example, in the event of a request for state aid or if substantial sanctions are imposed by the regulator).

Rules for Identified Staff and Control Function Staff

Additional rules apply to Identified Staff and Control Function Staff.

Identified Staff

Identified Staff are employees who can have a material impact on Robeco's risk profile and/or the funds we manage. Identified Staff include the Management Board, ExCo members, senior portfolio management staff, the heads of control functions (such as Compliance, Risk Management and Internal Audit) and other risk-takers as defined in the Alternative Investment Fund Managers Directive (AIFMD) and the Undertakings for Collective Investment in Transferable Securities Directive V (UCITS V) whose total remuneration places them in the same remuneration bracket as the other staff members we refer to.

Additional rules that apply to Identified Staff include part of their variable remuneration being paid in cash and part of it being deferred and converted into R-CARs, as set out in the payment/redemption table below. The threshold of EUR 100,000 does not apply to these staff members. In the occasional event that variable remuneration is more than twice the amount of fixed remuneration, the percentages in brackets in the table below apply.

	<i>Year 1</i>	<i>Year 2</i>	<i>Year 3</i>	<i>Year 4</i>	<i>Year 5</i>
Cash payment	30% (20%)	6.67% (10%)	6.66% (10%)	6.66% (10%)	
R-CARs redemption		30% (20%)	6.67% (10%)	6.66% (10%)	6.66% (10%)

Control Function Staff

Control Function Staff are employees who work in our Compliance, Risk Management and Internal Audit departments. The following rules apply to the fixed and variable remuneration of Control Function Staff.

- The fixed remuneration is sufficient to guarantee that Robeco can attract qualified and experienced staff.
- The KPIs of Control Function Staff are predominantly role-specific and non-financial.
- The financial KPIs are not based on the financial results of the part of the business that the employee covers in their monitoring role.
- The KPIs may not be based on the financial results of the business part they oversee in their monitoring role.
- The rules above apply in addition to the rules that apply to Identified Staff if an employee is part of both the Control Function Staff and Identified Staff.
- The Supervisory Board, as advised by the Nomination & Remuneration approves the remuneration of the Head of Compliance, Head of Internal Audit and Head of Risk.

Report by the manager (continued)

Remuneration policy (continued)

Risk control measures

Robeco has set out clear risk control procedures to prevent and address remuneration-related risks. These include an assessment of possible risks, an annual remuneration policy review process and shareholder approval of our remuneration policy. We elaborate on these aspects below.

Identified risks

Robeco has identified the following risks that must be taken into account in applying its remuneration policy:

- misconduct or a serious error of judgement on the part of employees (such as taking non-permitted risks, violating compliance guidelines or exhibiting behavior that conflicts with our core values) in order to meet business objectives or other objectives;
- a considerable deterioration in Robeco's financial results;
- a serious violation of the risk management system;
- evidence that fraudulent acts have been committed by employees;
- behavior that results in considerable losses. The following risk control measures apply, all of which are monitored by the Supervisory Board of RIAM.

Claw back – for all employees

Robeco may reclaim all or part of the variable remuneration paid to an employee if:

- the payment was made on the basis of incorrect information;
- it becomes clear that the employee committed fraud;
- they have engaged in serious improper behavior or demonstrated serious negligence in the performance of their tasks;
- their behavior has resulted in considerable losses for the organization.

Ex-post malus – for Identified Staff

- Before paying any part of a deferred remuneration payment, Robeco may reduce the amount to be paid on the following grounds. Evidence of fundamental misconduct, errors or integrity issues by the staff member, such as a breach of the Code of Conduct or other internal rules, especially related to risks.
- If there is evidence the staff member caused a considerable deterioration in the financial performance of Robeco or any fund we manage.
- A significant deficiency in Robeco's risk management or the risk management of any fund we manage.
- Significant changes in Robeco's financial situation.

Ex-ante risk assessment – for Identified Staff

Before granting variable remuneration to Identified Staff, Robeco may decide to reduce the variable remuneration proposal, potentially to zero, in the event of collective or individual compliance- or risk-related issues.

Shareholder approval

The remuneration of the Management Board is determined by our shareholder, based on a proposal from the Supervisory Board of RIAM, which is advised by the Nomination & Remuneration Committee of the Supervisory Board of RIAM. The proposal will be based on a prior proposal of the CEO, except when it concerns the remuneration of the CEO itself. With regards to RIAM, the remuneration policy for the Management Board as adopted by the General Meeting will be taken into account. Remuneration for employees who earn more than EUR 750,000 per year or who are granted variable remuneration in excess of 200% of their fixed remuneration requires the approval of the Supervisory Board of RIAM (advised by the Nomination & Remuneration Committee of the Supervisory Board of RIAM) and our shareholder.

Annual review

Our remuneration processes are audited and reviewed each year internally. Any relevant changes made by regulators are incorporated in our remuneration policies and guidelines. Every year, an independent external party reviews our remuneration policy to ensure it is fully compliant with all relevant regulations. There are no differences between the retirement benefit schemes and the contribution rates for the highest governance body members, senior executives and all other employees.

Supervisory Board of RIAM compensation

Members of the Supervisory Board of RIAM receive fees for their service on the Supervisory Board. All fees are paid out fully in cash.

No variable remuneration is provided, ensuring the members of the Supervisory Board of RIAM act impartially. Members of the Supervisory Board of RIAM are not eligible to receive any benefits in relation to their position on the Supervisory Board of RIAM.

Report by the manager (continued)

Remuneration policy (continued)

Remuneration in 2025

Of the total amounts granted in remuneration¹ by RIAM in 2025 to RIAM's Board, Identified Staff and Other Employees, the following amounts are to be assigned to the Fund:

Remuneration in EUR x 1

Staff category	Fixed pay for 2025	Variable pay for 2025
Board (3 members)	44,040	68,782
Identified Staff (53) (ex Board)	341,517	205,432
Other employees (747 employees)	1,581,043	481,127

The total of the fixed and variable remuneration charged to the Fund is EUR 2,721,941. Imputation occurs according to the following key:

$$\text{Total remuneration (fixed and variable) x } \frac{\text{Total Fund assets}}{\text{Total assets under management (RIAM)}}$$

The Fund itself does not employ any personnel and has therefore not paid any remuneration above EUR 1 million.

¹ The remunerations relate to activities performed for one or more Robeco entities.

Remuneration manager

The manager (RIAM) has paid to 4 employees a total remuneration above EUR 1 million.

Report by the manager (continued)

Sustainable investing

Sustainable investing

Robeco believes that safeguarding economic, environmental and social assets is a prerequisite for a healthy economy and the generation of attractive returns. Robeco's mission therefore, is to enable its clients to achieve their financial and sustainability goals by providing superior investment returns and solutions. Robeco is an active owner, integrating material ESG issues systematically into investment processes, having a net zero roadmap in place and a broad range of sustainable solutions. Responsibility for implementing sustainable investing lies with the Chief Investment Officer, who also has a seat on Robeco's Executive Committee.

Focus on stewardship

Fulfilling its stewardship responsibilities is an integral part of Robeco's approach to Sustainable Investing. A core aspect of Robeco's mission is fulfilling the fiduciary duties towards its clients and beneficiaries. Robeco manages investments for a variety of clients with different investment needs. Robeco strives in everything it does to serve its clients' interests to the best of its ability. Robeco publishes its approach to stewardship on its website describing how it deals with potential conflicts of interest, how it monitors the companies in which it invests, how it conducts activities in the field of engagement and voting, and how it reports on its stewardship activities. To mark Robeco's strong commitment to stewardship, Robeco is signatory to many different stewardship codes across the globe.

Active ownership

Robeco's active ownership activities encourage investee companies or sovereigns to improve their management of ESG risks and adverse impacts, as well as seize business and economic opportunities associated with sustainability challenges. Robeco aims to improve a company's behavior on ESG issues in order to enhance long-term performance of the company and therefore to enhance the quality of investments for its clients. Robeco's Active Ownership activities includes both voting and engagement.

More information on Robeco's processes and current engagement themes can be found in Robeco's Stewardship Approach and Guidelines and in Robeco's quarterly Active Ownership Reports published on the Robeco website.

Exclusions

Robeco's Exclusion Policy sets minimum standards for company activities and products that are detrimental to society to avoid investments clients would deem unsuitable. Robeco excludes companies involved in the production or trade of controversial weapons such as cluster munition and anti-personnel mines, tobacco production, the most pollutive fossil fuel activities. Robeco also excludes companies in non-RSPO (Roundtable on Sustainable Palm Oil) certified palm oil producers and other forest risk commodities in relation to deforestation risk management. Finally, Robeco excludes companies that severely and structurally violate either the United Nations Global Compact (UNGC) or OECD Guidelines for Multinational Enterprises. Robeco publishes its Exclusion Policy and the list of excluded companies on its website.

Contributing to the Sustainable Development Goals

Robeco is a signatory in the Netherlands to the Sustainable Development Goals Investing Agenda as defined by the United Nations. To help clients contribute to the objectives, Robeco developed a framework to analyze the SDG contribution of companies and SDG investment solutions. Companies with positive SDG scores are deemed to be sustainable investments under SFDR.

ESG integration by Robeco

Sustainability brings about change in markets, countries, and companies in the long term. Since changes affect future performance, Robeco believes the analysis of ESG factors can add value to its investment process. Robeco therefore looks at these factors in the same way as it considers a company's financial position or market momentum. To analyze ESG factors, Robeco has research available from leading sustainability experts, including Robeco's own proprietary research from the Sustainable Alpha research team. This dedicated team works closely together with Robeco's investment teams to provide in-depth sustainability information to the investment process. Investment analysis focuses on the most financially material ESG factors and how these factors may drive the financial performance of a company. The objective of structurally integrating financially material issues is to reach better informed investment decisions.

SFDR classification

Robeco Global Stars Equities Fund N.V. is classified as Article 8 under the SFDR. More information is available in the precontractual SFDR disclosures of the Fund on the Robeco website. Attached to this annual report the Annex IV disclosure can be found with detailed information on the achievement of the sustainability goals over the reporting period.

Report by the manager (continued)

Sustainable investing (continued)

Actions taken to meet the environmental and/or social characteristics

Sustainability factors are integrated in the investment process as part of the bottom-up approach of ESG integration in the portfolio. Furthermore, the portfolio managers have applied the Robeco exclusion policy to ensure that no investments were made in excluded securities. In addition, the portfolio managers continued to ensure that the overall ESG profile of the portfolio in terms of the Sustainalytics ESG risk rating is substantially better than the benchmark by focusing on both environmental- and social factors that influence the overall sustainability profile of the portfolio. In terms of active engagement, the portfolio managers continue to work together closely with the active ownership team. During 2025, on behalf of the Fund, votes have been cast at the AGMs of the holdings in portfolio and Robeco has an ongoing engagement with several portfolio holdings.

During the reporting period, the portfolio has a carbon footprint that is lower than that of the index. This was achieved by having an underweight position in the Energy, Materials and Utilities sectors, and by only selecting companies within those sectors that have a relatively modest overall environmental footprint. As an example, during the reporting period, the portfolio managers have sold off positions in Fortescue Materials in Australia, while adding to Steel Dynamics and Jabil Inc. This has had the effect of raising the carbon footprint of the portfolio slightly, whilst still performing substantially better than the index in terms of carbon emissions.

In control statement

Robeco Institutional Asset Management B.V. has a description of internal control, which is in line with the requirements of the Dutch Financial Supervision Act (Wet op het financieel toezicht, or 'Wft') and the Dutch Market Conduct Supervision of Financial Enterprises Decree (Besluit Gedragtoezicht financiële ondernemingen, or 'BGfo').

Report of internal control

We noted nothing that would lead us to conclude that operational management does not function as described in this statement. We, as the Management Board of Robeco Institutional Asset Management B.V., therefore declare with reasonable assurance that the design of internal control, as mentioned in article 121 BGfo meets the requirements of the Wft and related regulations and that operational management has been effective and has functioned as described throughout the reporting year.

Notes

General

The annual financial statements have been drawn up in conformity with Part 9, Book 2 of the Dutch Civil Code. The Fund's financial year is the same as the calendar year. The notes referring to Fund shares concern ordinary shares outstanding.

The ordinary shares are divided into four series, three of which are open. Each series is designated as a share class. The series include the following share classes:

Share class A: Robeco Global Stars Equities Fund - EUR E

Share class B: Robeco Global Stars Equities Fund - EUR G

Share class C: Robeco Global Stars Equities Fund - EUR GH (launched effective 23 March 2026)

Share class D: Robeco Global Stars Equities Fund - EUR EH (not launched yet)

Accounting principles

General

The financial statements are produced according to the going concern assumption. Unless stated otherwise, items shown in the financial statements are stated at nominal value and expressed in thousands of euros. Assets and liabilities are recognized or derecognized in the balance sheet on the transaction date.

Liquidity of ordinary shares

The Fund is an open-end investment company, meaning that, barring exceptional circumstances, it issues and repurchases ordinary shares on a daily basis at prices approximating net asset value, augmented or reduced by a limited surcharge or discount. The only purpose of this surcharge or discount is to cover the costs incurred by the Fund for the entry and exit of investors. The actual maximum surcharge or discount is published on www.robeco.com/riam. The surcharges and discounts are recognized in the profit and loss account.

Shareholders' equity

The outstanding ordinary shares of the Fund are treated as equity.

Financial investments

Financial investments are classified as trading portfolio and are valued at fair value, unless stated otherwise. The fair value of stocks is determined on the basis of market prices and other market quotations at closing date. For derivatives and futures, the value is based on the market price and other market quotations at closing date. For forward exchange contracts, internal valuation models are used and the value is based on quoted currency rates and reference interest rates at closing date. Transaction costs incurred in the purchase and sale of investments are included in the purchase or sale price as appropriate. Transaction costs incurred in the purchase of investments are therefore recognized in the first period of valuation as part of the value changes in the profit and loss account. Transaction costs incurred in the sale of investments are part of the realized results in the profit and loss account. Changes to the valuation model for forward currency contracts may lead to a different valuation. Derivative instruments with a negative fair value are recognized under the derivatives item under investments on the liability side of the balance sheet.

Recognition and derecognition of items in the balance sheet

Investments are recognized or derecognized in the balance sheet on the transaction date. Equities and derivatives are recognized in the balance sheet on the date the purchase transaction is concluded. Equities are derecognized in the balance sheet on the date the sale transaction is concluded. Derivatives are fully or partially derecognized in the balance sheet on the date the sales transaction is concluded or if the contract is settled on the expiry date. Accounts receivable and payable are recognized in the balance sheet on the date that contractual rights or obligations with respect to the receivables or payables arise. Receivables and payables are derecognized in the balance sheet when, as a result of a transaction, the contractual rights or obligations with respect to the receivables or payables no longer exist.

Presentation and valuation of derivatives

Derivatives are recognized in the balance sheet at fair value. The presentation of the fair value is based on the liabilities and receivables per contract. The receivables are reported under assets and obligations are reported under liabilities. The value of the derivatives' underlying instruments is not included on the balance sheet. Where applicable, the underlying value of derivatives is included in the information provided on the currency and concentration risk.

Netting

Financial assets and liabilities with the same party are offset, and the net amount is reported in the statement of financial position, when the Fund has a current, legally enforceable right to set off the recognised amounts and intends to either settle on a net basis, or to realise the asset and settle the liability at the same time.

Use of estimates

In preparing these financial statements, the manager has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.
Robeco Global Stars Equities Fund N.V. 22

Notes (continued)

Accounting principles (continued)

Cash and cash equivalents

Cash and cash equivalents are carried at nominal value. If cash is not freely disposable, this is factored into the valuation.

Cash expressed in foreign currencies is converted into the functional currency as at the balance sheet date at the exchange rate applicable on that day. Please refer to the currency table on page 35.

Accounts receivable

Receivables are initially – and after recognition – valued at amortized cost based on the effective interest method, less impairments. Given the short-term character of the receivables, the value is equal to the nominal value.

Debt

Non-current debts and other financial obligations are initially – and after recognition – valued at the amortized cost price based on the effective interest method. Given the short-term character of the debt, the value is equal to the nominal value.

Foreign currencies

Transactions in currencies other than the euro are converted into euros at the exchange rates valid at the time. Assets and liabilities expressed in other currencies are converted into euros at the exchange rate prevailing at balance-sheet date. The exchange rate differences thus arising or exchange rate differences arising on settlement are recognized in the profit and loss account. Investments in foreign currencies are converted into euros at the rate prevailing on the balance sheet date. This valuation is part of the valuation at fair value. Exchange rate differences are recognized in the profit and loss account under changes in value.

Securities lending

Investments for which the legal ownership has been transferred by the Fund for a given period of time as a result of securities-lending transactions, will continue to be included in the Fund's Balance sheet during this period, since their economic advantages and disadvantages, in the form of investment income and changes in value, will be added to or deducted from the Fund's result. The way in which collateral ensuing from securities-lending transactions is reported depends on the nature of this collateral. If the collateral is received in the form of investments these are not recognized in the balance sheet as the economic advantages and disadvantages relating to the collateral will be for the account and risk of the counterparty. If the collateral is received in cash it will be recognized in the balance sheet as in this case the economic advantages and disadvantages will be for the account and risk of the Fund.

Principles for determining the result

General

Investment results are determined by investment income, rises or declines in stock prices, rises or declines in foreign exchange rates and results of transactions in currencies, including forward transactions and other derivatives. Results are allocated to the period to which they relate and are accounted for in the profit and loss account.

Recognition of income

Income items are recognized in the profit and loss account when an increase of the economic potential associated with an increase of an asset or a reduction of a liability has occurred and the amount of this can be reliably established.

Recognition of expenses

Expense items are recognized when a reduction of the economic potential associated with a reduction of an asset or an increase of a liability has occurred and the amount of this can be reliably established.

Investment income

This includes the net cash dividends declared during the year under review, the nominal value of stock dividends declared, interest received and paid and proceeds. Accrued interest at balance sheet date is taken into account.

Changes in value

Realized and unrealized capital gains and losses on securities and currencies are presented under this heading. Realization of capital gains takes place on selling as the difference between the sales value and the average historical cost price. Unrealized capital gains relate to value changes in the portfolio between the beginning of the financial year and the balance sheet date, corrected by the realized gains when positions are sold or settlement takes place.

Notes (continued)

Principles for cash flow statement

General

This cash flow statement has been prepared using the indirect method. Cash comprises items that may or may not be directly callable. Accounts payable to credit institutions include debit balances in bank accounts.

Attribution to share classes

The administration of the Fund is such that attribution of the results to the different share classes takes place on a daily basis and pro rata. Issues and repurchases of own shares are registered per share class.

Risks relating to financial instruments

General investment risk

The value of investments may fluctuate. Past performance is no guarantee of future results. The net asset value of the Fund depends on developments in the financial markets and may both rise and fall. Shareholders run the risk that their investments may end up being worth less than the amount invested, or even worth nothing. General investment risk can be broken down into different types of risk:

Market risk

The net asset value of the Fund is sensitive to market movements. In addition, investors should be aware of the possibility that value of investments may vary as a result of changes in political, economic or market circumstances. Therefore, no assurance can be given that the sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a share in a sub-fund will not fall below its value at the time of acquisition. More detailed information on the risk profile of the Fund's portfolio can be found in the section on Return and risk on page 10.

Currency risk

All or part of the securities portfolio of the Fund may be invested in currencies, or financial instruments denominated in currencies other than the euro. As a result, fluctuations in exchange rates may have both a negative and a positive effect on the investment result of the Fund. Currency risks may be hedged with currency forward transactions and currency options. Currency risks can be limited by applying relative or absolute currency concentration limits.

The table below shows the gross and net exposure to the various currencies, including cash, receivables and debts. Further information on the currency policy can be found on page 9.

Currency exposure	31/12/2025	31/12/2025	31/12/2025	31/12/2025	31/12/2024
	Gross position EUR' 000	Exposure to forward exchange contracts EUR' 000	Net position EUR' 000	% of net assets	% of net assets
AUD	40	–	40	–	1.13
CHF	569	–	569	0.01	1.09
DKK	170	–	170	–	0.50
EUR	322,947	5,378	328,325	8.04	6.29
GBP	277,661	–	277,661	6.80	7.02
HKD	68,331	–	68,331	1.67	–
JPY	168,271	–	168,271	4.12	4.11
KRW	249	–	249	0.01	0.01
SEK	139	–	139	–	0.01
SGD	37	–	37	–	–
USD	3,247,430	(5,388)	3,242,042	79.35	79.84
Total	4,085,844	(10)	4,085,834	100.00	100.00

All outstanding forward currency contracts have a remaining life of less than one year.

Concentration risk

Based on its investment policy, the Fund may invest in financial instruments from issuing institutions that operate mainly within the same sector or region, or in the same market. If this is the case – due to the concentration of the investment portfolio of the Fund – events that have an effect on these issuing institutions may have a greater effect on the Fund assets than in the case of a less concentrated portfolio. Concentration risks can be limited by applying relative or absolute country or sector concentration limits.

As at the balance sheet date, there were no positions in stock market index futures contracts.

Materials	3.49	2.74
Real Estate	1.62	2.12
Other assets and liabilities	2.03	2.03
Total	100.00	100.00

Leverage risk

The Fund may make use of derivative instruments, techniques or structures. They may be used for hedging risks, achieving investment objectives and/or ensuring efficient portfolio management. These instruments may be leveraged, which will increase the Fund's sensitivity to market fluctuations. The risk of derivative instruments, techniques or structures will always be limited within the conditions of the Fund's integral risk management. The degree of leverage in the Fund, measured using the commitment method (where 0% exposure indicates no leverage) over the year, as well as on the balance sheet date, is shown in the table below. The Commitment Method calculates the global exposure by converting the positions in financial derivative instruments into equivalent positions of the underlying assets. The total commitment is quantified as the sum of the absolute values of the individual commitments, after consideration of the possible effects of netting and hedging. The maximum leverage allowed under the UCITS regulation is 110%.

	Lowest exposure during the reporting year	Highest exposure during the reporting year	Average exposure during the reporting year	Exposure at the reporting year end
Robeco Global Stars Equities Fund N.V.	0%	0%	0%	0%

Notes (continued)

Risks relating to financial instruments (continued)

Credit risk

Credit risk occurs when a counterparty of the Fund fails to fulfil its financial obligations arising from financial instruments in the Fund. Credit risk is limited as far as possible by exercising an appropriate degree of caution in the selection of counterparties. In selecting counterparties, the assessments of independent rating bureaus are taken into account, as are other relevant indicators. Wherever it is customary in the market, the Fund will demand and obtain collateral in order to mitigate credit risk. The figure that best represents the maximum credit risk is given in the table below.

	31/12/2025		31/12/2024	
	EUR' 000	% of net assets	EUR' 000	% of net assets
Accounts receivable	7,835	0.19	8,437	0.19
Cash and cash equivalents	87,311	2.14	98,033	2.23
Total	95,146	2.33	106,470	2.42

No account is taken of collateral received in the calculation of the total credit risk. Credit risk is contained by applying limits on the exposure per counterparty as a percentage of the Fund assets. As at the balance sheet date there were no counterparties with an exposure of more than 5% of the Fund's total assets. All counterparties are pre-approved by Robeco. Procedures have been established relating to the selection of counterparties, specified on the basis of external credit ratings and credit spreads.

Risk of lending financial instruments

In the case of securities-lending transactions, collateral is requested and obtained for those financial instruments that are lent. In the case of securities-lending transactions, the Fund incurs a specific type of counterparty risk that the borrower cannot comply with the obligation to return the financial instruments on the agreed date or to furnish the requested collateral. The lending policy of the Fund is designed to control these risks as much as possible. To mitigate specific counterparty risk, the Fund receives collateral prior to lending the financial instruments.

All counterparties used in the securities lending process are pre-approved by Robeco. The approval process takes into account the entities credit rating (if available) and whether the counterparty is subject to prudential regulation. Any relevant incidents involving the entity are also taken into account.

The Fund accepts collateral by selected issuers in the form of:

- bonds issued (or guaranteed) by governments of OECD member states;
- local government bonds with tax raising authority;
- corporate bonds that are FED or ECB eligible collateral;
- bonds of supranational institutions and undertakings with an EU, regional or world-wide scope;
- stocks listed on the main indexes of stock markets as disclosed in the prospectus;
- Cash.

In addition, concentration limits are applied to collateral to restrict concentration risks in the collateral and there are also liquidity criteria for containing the liquidity risks in the collateral. Finally, depending on the type of lending transaction and the type of collateral, collateral with a premium is requested relative to the value of the lending transaction. This limits the negative effects of price risks in the collateral.

J.P. Morgan is the intermediary for all of the Fund's securities-lending transactions. As compensation for its services, J.P. Morgan receives a fee of (A) 25% of the gross income on these securities-lending transactions for loans which generates a return of 0.5% or less and (B) 10% of the gross income from these securities-lending transactions for any loans which generate a return greater than 0.5%. An external agency periodically assesses whether the agreements between the Fund and J.P. Morgan are still in line with the market. The Fund's revenues and J.P. Morgan fee are included in the following table.

Income from securities lending

	2025			2024		
	Gross revenues in EUR' 000	Fee paid to J.P. Morgan in EUR' 000	Net fund revenues in EUR' 000	Gross revenues in EUR' 000	Fee paid to J.P. Morgan in EUR' 000	Net fund revenues in EUR' 000
Shares lent out	–	–	–	2	1	1
Total	–	–	–	2	1	1

Notes (continued)

Risks relating to financial instruments (continued)

Liquidity risk

We distinguish between asset liquidity risk and funding liquidity risk, which are closely connected:

Asset liquidity risk arises when transactions cannot be executed in a timely fashion at quoted market prices and/or at acceptable transaction cost levels due to the size of the trade. Or in more extreme cases, when they cannot be conducted at all. Asset liquidity risk is a function of transaction size, transaction time and transaction cost.

Funding liquidity risk arises when the redemption requirements of clients or other liabilities cannot be met without significantly impacting the value of the portfolio. Funding liquidity risk will only arise if there is also asset liquidity risk. During the reporting period all client redemptions have been met.

Sustainability risk

The manager systematically incorporates sustainability factors, to the extent these present a material risk to a fund, into its investment and portfolio construction processes, alongside traditional financial risk factors. This is done through ESG scoring methodologies using proprietary sustainability research and external resources which are built into the portfolio construction process.

Processes and controls for sustainability risk integration are embedded in a designated Sustainability risk policy which is maintained by the risk management function and governed by the Risk Management Committee (RMC). The Sustainability risk policy is built on three pillars. The environmental or social characteristics promoted by a fund or sustainable investment objective of a fund is used to identify and assess the relevant material sustainability risk topics. Based on these characteristics or investment objectives sustainability risk is monitored. Sensitivity and scenario analyses are conducted on a frequent basis to assess any material impact climate change risk may have on the portfolio of a fund.

Manager

Robeco Institutional Asset Management B.V. ('RIAM') manages the Fund. In this capacity, RIAM handles the asset management, risk management, administration, marketing and distribution of the Fund. RIAM holds an AIFMD license as referred to in Section 2:65 Wft, as well as a license to manage UCITS as referred to in Section 2:69b Wft. RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (the 'AFM'). RIAM has listed the Fund with AFM. RIAM is a 100% subsidiary of ORIX Corporation Europe N.V. via Robeco Holding B.V. ORIX Corporation Europe N.V. is a part of ORIX Corporation.

Depository

The assets of the Fund are held in custody by J.P. Morgan SE, Amsterdam Branch. J.P. Morgan SE, Amsterdam Branch is appointed as the depository of the Fund as referred to in Section 4:62n Wft. The depository is responsible for supervising the Fund insofar as required under and in accordance with the applicable legislation. The manager, the Fund and J.P. Morgan SE, Amsterdam Branch have concluded a depository and custodian agreement.

Liability of the depository

The depository is liable to the Fund and/or the Shareholders for the loss of a financial instrument under the custody of the depository or of a third party to which custody has been transferred. The depository is not liable if it can demonstrate that the loss is a result of an external event over which it in all reasonableness had no control and of which the consequences were unavoidable, despite all efforts to ameliorate them. The depository is also liable to the Fund and/or the shareholders for all other losses they suffer because the depository has not fulfilled its obligations as stated in this depository and custodian agreement either deliberately or through negligence. Shareholders may make an indirect claim upon the liability of the depository through the manager. If the manager refuses to entertain such a request, the shareholders are authorized to submit the claim for losses directly to the depository.

Affiliated parties

The Fund and the manager may utilize the services of and carry out transactions with parties affiliated to the Fund, as defined in the BGfo, such as RIAM, Robeco Nederland B.V. and ORIX Corporation. The services entail the execution of tasks that have been outsourced to these parties such as (1) securities lending, (2) hiring temporary staff and (3) issuance and repurchase of the Fund's shares. Transactions that can be carried out with affiliated parties include the following: treasury management, derivatives transactions, lending of financial instruments, credit extension, purchase and sale of financial instruments on regulated markets or through multilateral trading facilities. All these services and transactions are executed at market rates.

Notes to the balance sheet

1. Equities

Movements in the stock portfolio

	2025	2024
	EUR' 000	EUR' 000
Book value (fair value) at opening date	4,307,467	3,429,652
Purchases	2,211,898	1,748,837
Sales	(2,542,441)	(1,860,361)
Unrealized (losses) / gains	(257,797)	632,069
Realized gains	283,746	357,270
Book value (fair value) at closing date	4,002,873	4,307,467

EUR (296.0) million of the realized and unrealized results on the equity portfolio relates to exchange rate differences.

A breakdown of this portfolio is given under Schedule of Investments. All investments are admitted to a regulated market and have quoted market prices. A sub-division into regions and sectors is provided under the information on concentration risk under the information on Risks relating to financial instruments.

Transaction costs

Brokerage costs and exchange fees relating to investment transactions are discounted in the cost price or the sales value of the investment transactions. These costs and fees are charged to the result ensuing from changes in value. The quantifiable transaction costs are shown below.

	2025	2024
	EUR' 000	EUR' 000
Equities	1,565	1,395

RIAM wants to be certain that the selection of counterparties for equity transactions (brokers) occurs using procedures and criteria that ensure the best results for the Fund (best execution).

No costs for research from external parties were charged to the Fund during the reporting period.

2. Derivatives

Movements in derivatives

	Forward Currency Exchange Contracts	
	2025	2024
	EUR' 000	EUR' 000
Book value (fair value) at opening date	(9)	8,844
Expirations	(773)	(1,976)
Unrealized losses	(1)	(8,853)
Realized gains	773	1,976
Book value (fair value) at closing date	(10)	(9)

The presentation of derivatives on the balance sheet is based on the liabilities and receivables per contract.

Presentation of derivatives in the balance sheet

	Assets		Liabilities		Total	
	31/12/2025	31/12/2024	31/12/2025	31/12/2024	31/12/2025	31/12/2024
	EUR' 000	EUR' 000	EUR' 000	EUR' 000	EUR' 000	EUR' 000
Forward Currency Exchange Contracts	–	–	10	9	(10)	(9)
Book value (fair value) at closing date	–	–	10	9	(10)	(9)

The breakdown of the forward currency exchange contracts according to currency is given under the information on currency risk under the information on Risks relating to financial instruments.

3. Dividends receivable

These are receivables arising from net dividends declared but not yet received.

Notes to the balance sheet (continued)

4. Other receivables, prepayments and accrued income

This concerns the following items with an expected remaining maturity less than a year:

	31/12/2025	31/12/2024
	EUR' 000	EUR' 000
Dividend tax to be reclaimed	4,136	4,281
Sub-total (investment activities)	4,136	4,281
Receivables from issuance of new shares	3,061	3,844
Sub-total (financing activities)	3,061	3,844
Total	7,197	8,125

5. Cash and cash equivalents

This concerns:

	31/12/2025	31/12/2024
	EUR' 000	EUR' 000
Freely available cash	87,311	98,033
Total	87,311	98,033

6. Payable to affiliated parties

This concerns the following payables to RIAM:

	31/12/2025	31/12/2024
	EUR' 000	EUR' 000
Payable for management fee	2,631	2,777
Payable for service fee	557	580
Total	3,188	3,357

7. Other liabilities, accruals and deferred income

This concerns the following items with an expected remaining maturity less than a year:

	31/12/2025	31/12/2024
	EUR' 000	EUR' 000
Dividends payable	–	221
Payable for acquisition of own shares	8,985	13,408
Sub-total (financing activities)	8,985	13,629
Total	8,985	13,629

Notes to the balance sheet (continued)

8. Shareholders' equity

Composition and movements in shareholders' equity

	2025 EUR' 000	2024 EUR' 000

Addition to other reserves	(946,010)	(573,035)
Net result for financial year	34,471	1,003,106
Situation on closing date	34,471	1,003,106
Situation on closing date	4,085,834	4,396,938

¹ In connection with the Dutch Conversion of Bearer Shares Act (Wet omzetting aandelen aan toonder, the 'Act'), effective 07/01/2026, the remaining bearer shares were null and void, resulting in a decrease of the shareholders capital of EUR 192,514.

² The revaluation reserve is formed from the total of the unrealised gains on OTC derivatives existing on the balance sheet date.

The authorized share capital amount of EUR 300 million is divided into 299,999,990 ordinary shares and 10 priority shares with a nominal value of EUR 1 each. The priority shares have already been issued. The ordinary shares are divided into 150,000,000 Robeco Global Stars Equities Fund shares and 149,999,990 Robeco Global Stars Equities Fund - EUR G shares. Fees are not included in the share premium reserve.

Special controlling rights under the Articles of Association

The 10 priority shares in the company's share capital are held by Robeco Holding B.V. According to the company's Articles of Association, the rights and privileges of the priority shares include the appointment of managing directors and the amendment to the Articles of Association. The Management Board of Robeco Holding B.V. determines how the voting rights are exercised:

K. (Karin) van Baardwijk
M.C.W. (Mark) den Hollander

Total	54,110	52,053

* This concerns net dividends received. Factored into this amount is withholding tax reclaimable from the country that withheld the tax plus withholding tax that is subject to a remittance reduction from the Dutch tax authorities. The remittance reduction is offset against the dividend tax payable on dividends distributed by the fund.

Costs

12. Management fee and service fee

The management fee and service fee are charged by the manager. The fees are calculated daily on the basis of the Fund assets.

Management fee and service fee specified in the prospectus

	Robeco Global Stars Equities Fund – EUR E	Robeco Global Stars Equities Fund - EUR G
	%	%
Management fee	1.00	0.50
Service fee ¹	0.16	0.16

¹ For the share classes, the service fee is 0.16% per year on assets up to EUR 1 billion, 0.14% on assets above EUR 1 billion and 0.12% on assets above EUR 5 billion.

The management fee covers all current costs resulting from the management and marketing of the Fund. If the manager outsources operations to third parties, any costs associated with this will also be paid from the management fee. The management fee for the Robeco Global Stars Equities Fund share class also include the costs related to registering participants in this share class.

The service fee paid to RIAM covers the administration costs, custody fees (includes custody fees and bank charges), depositary services fees, Fund agent fees, the costs of the external auditor, other external advisers, regulators, costs relating to reports required by law, such as the annual and semi-annual reports, and the costs relating to the meetings of shareholders. The costs for the external auditor incurred by the Fund are paid by RIAM from the service fee. The Fund's result therefore does not include the costs for the external auditor. Of the costs paid by RIAM for the external auditor, EUR 14 thousand related to the audit of Robeco Global Stars Equities Fund N.V. The other costs paid by RIAM for the external auditor relate exclusively to assurance activities for the regulator that the Fund complies with the UCITS provisions and assurance activities for the examination of the prospectus.

13. Performance fee

Robeco Global Stars Equities Fund N.V. is not subject to a performance fee.

Notes to the profit and loss account (continued)

Costs (continued)

14. Total Expense Ratio (TER)

	Robeco Global Stars Equities Fund – EUR E		Robeco Global Stars Equities Fund - EUR G	
	2025 %	2024 %	2025 %	2024 %
Management fee	1.00	1.00	0.50	0.50
Service fee	0.15	0.15	0.15	0.15
Proportion of income on securities lending payable	0.00	0.00	0.00	0.00
Total	1.15	1.15	0.65	0.65

The percentage of TER is based on the average net assets per share class. The average assets are calculated on a daily basis. The TER include all costs charged to the share classes in the reporting period, excluding the costs of transactions in financial instruments and interest charges. The TER do not include any payment of entry or exit costs charged by distributors.

The proportion of securities-lending income payable as defined in the Information on the Risks of lending Financial Instruments on page 26 is included separately in the ongoing charges.

The total expense ratio (TER) was calculated based on the version currently applicable of the “Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes” of the Asset Management Association Switzerland (AMAS).

15. Maximum costs

For some cost items, the Fund's prospectus specifies a maximum percentage of average net assets. The table below compares these maximum percentages with the costs actually charged.

	2025 EUR' 000	2025 % of net assets	Maximum as specified in the prospectus ¹
Management fee for Robeco Global Stars Equities Fund - EUR E	17,070	1.00	1.00
Service fee for Robeco Global Stars Equities Fund - EUR E	2,590	0.15	0.16
Management fee for Robeco Global Stars Equities Fund - EUR G	11,752	0.50	0.50
Service fee for Robeco Global Stars Equities Fund - EUR G	3,490	0.15	0.16

¹ The prospectus also specifies a maximum percentage of the total cost. This amounts to 1.46% for the Robeco Global Stars Equities Fund - EUR G share class, and 0.96% for the Robeco Global Stars Equities Fund - EUR E share class.

16. Turnover rate

The turnover rate for the reporting period was 93% (for the previous reporting period it was 68%). This rate shows the rate at which the Fund's portfolio is turned over and is a measure of the incurred transaction costs resulting from the portfolio policy pursued and the ensuing investment transactions. The turnover rate is determined by expressing the amount of the turnover as a percentage of the average Fund assets. The average Fund assets are calculated on a daily basis. The amount of the turnover is determined by the sum of the purchases and sales of investments less the sum of issuance and repurchase of own shares. The sum of issues and repurchases of own shares is determined as the balance of all issues and repurchases in the Fund.

17. Transactions with affiliated parties

During the reporting period the Fund paid RIAM the following amounts in management fee and service fees:

	Counterparty	2025 EUR' 000	2024 EUR' 000
Management fee	RIAM	28,822	28,606
Service fee	RIAM	6,080	6,005

Notes to the profit and loss account (continued)

Costs (continued)

18. Fiscal status

The Fund has the status of a fiscal investment institution. A further description of its fiscal status is included in the general information of the management report on page 5.

19. Proposed profit appropriation

For the financial year 2025, dividend distribution will take place on the basis of the fiscal result in order to fulfill the fiscal distribution obligation. Based on the number of shares outstanding on 31 December 2025 it has been proposed to determine the dividend per share for the financial year 2025 at:

- EUR 1.20 per share (previous year: EUR 1.20) for the Robeco Global Stars Equities Fund - EUR E share class.
- EUR 1.40 per share (previous year: EUR 1.20) for the Robeco Global Stars Equities Fund - EUR G share class.

This proposal is based mainly on the taxable profits for the purposes of the distribution requirement under the applicable tax regime. If necessitated by legislation and regulations or changes in the number of shares outstanding, an amended dividend proposal will be submitted to the General Meeting of Shareholders. If this proposal is accepted, the dividend will be payable according to the schedule in the table below.

Shareholders will be offered the opportunity to reinvest the dividend (less dividend tax) in Robeco Global Stars Equities Fund - EUR G and Robeco Global Stars Equities Fund - EUR E shares. Costs charged by distributors to their customers for this will be borne by the shareholder. In some countries and with some distributors, reinvestment will not be possible for technical reasons.

Agenda	Dividend dates (Transfer Agent)	Dividend dates (Euronext)	Explanation
Record date	Monday, 8 June 2026	Thursday, 11 June 2026	Shares/Participating units issued up to Dealing Day 8 June 2026 are entitled for the dividend distribution. Euronext will use the settlement positions as of 11 June 2026.
Ex-dividend date	Tuesday, 9 June 2026	Wednesday, 10 June 2026	The NAV per share/participating unit will be quoted ex-dividend as of the Dealing Day 9 June 2026. The NAV per share/participating unit of the Dealing Day 9 June 2026 will be published on 10 June 2026. Euronext will stamp this NAV with date 10 June 2026.
Application for reinvestment	Monday, 22 June 2026	Monday, 22 June 2026	Deadline for reinvestment application.
Reinvestment date	Wednesday, 24 June 2026	Thursday, 25 June 2026	The Dealing Day of reinvestment will be 24 June 2026. Execution at Euronext will take place on 25 June 2026.
Payment date cash and shares/participating units	Monday, 29 June 2026	Monday, 29 June 2026	

20. Register of Companies

The Fund has its registered office in Rotterdam and is listed in the Trade Register of the Chamber of Commerce in Rotterdam, under number 24041906.

21. Subsequent events

Conversion of bearer shares

In the past, the Fund issued shares in the form of bearer shares (also known as 'K-certificates'). In connection with the coming into effect of the Dutch Conversion of Bearer Shares Act (Wet omzetting aandelen aan toonder, the 'Act'), the holders of bearer shares could exchange their K-certificate for a replacement registered share until 31 December 2025. After 31 December 2025, all K-certificates are null and void. The value of the remaining bearer shares that were void and null amounted to EUR 6.5 million

New share-class launched

Effective per 23 March 2026, the share class Robeco Global Stars Equities Fund - EUR GH has been launched.

Other information

Provisions regarding appropriation of the result

According to article 20 of the fund's Articles of Association, the profit, after payment of dividend on the priority shares and less allocations to the reserves deemed desirable by the management board shall be at the disposal of the General Meeting of Shareholders.

Directors' interests

The daily policymakers of RIAM (the management board and manager of the Fund) had the following personal interests in the investments of the Fund on 1 January 2025.

As at 1 January 2025	Description	Quantity
Alphabet	shares	320
Amazon	shares	200
Apple	shares	27
Eli Lilly	shares	15
Meta Platforms	shares	88
Microsoft	shares	6
NVIDIA	shares	85
Tesla	shares	12

The daily policymakers had no personal interests in the investments of the Fund on 31 December 2025.

Annex IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Robeco Global Stars Equities Fund N.V.

Legal entity identifier: 2138001XI4VRA8YIVQ69

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: __%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.3% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: __%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

1. The fund portfolio complied with Robeco's Exclusion Policy Level 2, that is based on exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society. This means that the fund had 0% exposure to excluded securities, taking into account a grace period. This includes any company that is in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Information with regards to the effects of the exclusions on the Fund's universe can be found at the website.
2. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
3. The fund's weighted carbon footprint (scope level 1, 2 and 3 upstream) was 20% better than the General Markets Index.
4. The fund's weighted average ESG score was at least better than that of the General Market Index.
5. Investments with an elevated sustainability risk are defined by Robeco as companies with an ESG Risk Rating of 40 and higher. The fund was limited to a maximum exposure of 15% to investments with an elevated sustainability risk, based on the market weight in the portfolio taking into account regional differences and benchmark. Each investment with an ESG Risk rating of higher than 40 requires separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosure (unaudited)

● How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on average positions and latest available data as at 31/12/2025.

1. The portfolio contained on average 0.00% investments that are on the Level 2 Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. On behalf of the fund votes, were cast on 842 agenda items at 54 shareholders' meetings.
3. The fund's weighted carbon footprint (scope level 1, 2 and 3 upstream) was 33.40% better than that of the General Markets Index.
4. The fund's weighted average ESG score was 15.99 against 18.42 for the general market index. A lower score means a lower risk.
5. 0.00% of the holdings in portfolio had an elevated sustainability risk profile.

● ...and compared to previous periods?

Sustainability indicator	2025	2024	2023	2022
Number of votes casted	842	760	715	655
Weighted score for: - Carbon footprint (% better than the general market index)	33.40%	41.07%	67.80%	74.12%
Companies in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises	N/A	0.00%	0.00%	0.00%
Holdings with an elevated sustainability risk profile	0.00%	0.00%	0.00%	0.00%
Weighted average ESG Score	15.99	18.27	18.18	17.48
Investments on exclusion list	0.00%	0.00%	0.00%	0.00%

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the UN Sustainable Development Goals ("SDGs"), that have both social and environmental objectives. These are 17 goals that are globally recognised and include environmental goals such as climate action, clean water, life on land and water and social goals such as zero hunger, gender equality, education, etc. Robeco has developed a proprietary framework based on the UN SDGs through which an issuer's contribution to such SDGs is determined through a 3-step process. This process starts with a sector baseline on which a company's products are analysed to examine contribution to the society and environment. Further, the operational processes involved in creating such products is checked along with any controversies/litigation claims and remediation actions taken which are perused before a final SDG score is determined. The final score ranges between high negative (-3) to high positive (+3) and only those issuers which achieve positive SDG scores (+1, +2 and, +3) are regarded as Sustainable Investments.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments did no significant harm to any environmental or social sustainable investment objective by considering a principal adverse impact and aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, sustainable investments score positively on Robeco's SDG Framework, and therefore do not cause significant harm.

→ How were the indicators for adverse impacts on sustainability factors taken into account?

Mandatory principal adverse impact indicators are considered through Robeco's SDG Framework, either directly or indirectly, when identifying sustainable investments for the Fund. In addition, voluntary environmental and social indicators are taken into account, depending on their relevance for measuring impacts on the SDGs and the availability of data. A detailed description of the incorporation of principal adverse impacts is available via Robeco's Principal Adverse Impact Statement published on the Robeco website. In this statement, Robeco sets out its approach to identifying and prioritizing principal adverse impacts, and how principal adverse impacts are considered as part of Robeco's investment due diligence process and procedures relating to research and analysis, exclusions and restrictions and/or voting and engagement. This description also explains how principal adverse impact indicators are considered by the SDG Framework.

The following PAIs were considered in the fund:

PAI 1, table 1 was considered for scope 1, 2 and 3 (upstream) Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosure (unaudited)

artic drilling ($\geq 5\%$ of the revenues)).

PAI 2, table 1 was considered for the carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and artic drilling ($\geq 5\%$ of the revenues)).

PAI 3, table 1 was considered for the Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and artic drilling ($\geq 5\%$ of the revenues)).

PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and artic drilling ($\geq 5\%$ of the revenues)).

PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.

For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.

Robeco's Exclusion policy covers the exclusion of palm oil producers in which a minimum percentage of RSPO certified hectares of land at plantations as detailed in Robeco's exclusion policy.

PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.

PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.

PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.

PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of

Sustainability disclosure (unaudited)

cluster munitions.3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons.5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmissbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaints handling mechanism was considered.

PAI 8, table 3 regarding excessive CEO pay ratio was considered via engagement under the engagement program "Responsible Executive Remuneration".

→ → Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behavior of companies. Robeco continuously screens its investments for breaches of these principles. In case of a breach, the company will be excluded or engaged with, and is not considered a sustainable investment.

Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered principal adverse impacts on sustainability factors as referred to in Annex I of the SFDR Delegated Act.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

o Via the applied normative and activity-based exclusions, the following PAIs were considered:

- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.41% of the net assets, compared to 3.58% of the benchmark.
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.00% of the net assets, compared to 0.48% of the benchmark.
- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.41% of the net assets, compared to 1.83% of the benchmark.
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.00% of the net assets, compared to 0.25% of the benchmark.

o Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:

- The greenhouse gas emissions (PAI 1, table 1) of the portfolio were 8,448,152 tons, compared to 2,555,427 tons for the benchmark.

Sustainability disclosure (unaudited)

- The carbon footprint of the portfolio (PAI 2, table 1) was 2,152 tons per EUR million EVIC, compared to 638 tons per EUR million EVIC for the benchmark.
- The green house gas intensity of the portfolio (PAI 3, table 1) was 1,942 tons per EUR million revenue, compared to 1,513 tons per EUR million revenue for the benchmark.
- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.41% of the net assets, compared to 3.58% of the benchmark.
- The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources was 46.38% of the net assets, compared to 51.95% of the benchmark.
- The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources voor de funds was 43.41% of the net assets, compared to 55.09% of the benchmark.
- The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6, Table 1) was 0.34 GWh, compared to 0.42 GWh for the benchmark.
- The share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (PAI 4, Table 2) was 5.05% of the net assets, compared to 11.22% of the benchmark.
- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.41% of the net assets, compared to 1.83% of the benchmark.
- The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.04 tons of the benchmark.
- The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 26.12 tons, compared to 43.12 tons of the benchmark.
- The average ratio of female to male board members in investee companies expressed as a percentage of all board members (PAI 13, Table 1) was 36.17%, compared to 35.06% for the benchmark.

o Via the environmental footprint performance targets of the fund, the following PAIs were considered:

- The carbon footprint of the portfolio (PAI 2, table 1) was 2,152 tons per EUR million EVIC, compared to 638 tons per EUR million EVIC for the benchmark.
- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.41% of the net assets, compared to 1.83% of the benchmark.
- The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.04 tons of the benchmark.
- The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 26.12 tons, compared to 43.12 tons of the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors are taken into account:

o Via the application of the voting policy, the following PAIs were considered:

- The greenhouse gas emissions (PAI 1, table 1) of the portfolio were 8,448,152 tons, compared to 2,555,427 tons for the benchmark.
- The carbon footprint of the portfolio (PAI 2, table 1) was 2,152 tons per EUR million EVIC, compared to 638 tons per EUR million EVIC for the benchmark.
- The green house gas intensity of the portfolio (PAI 3, table 1) was 1,942 tons per EUR million revenue, compared to 1,513 tons per EUR million revenue for the benchmark.
- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.41% of the net assets, compared to 3.58% of the benchmark.
- The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources was 46.38% of the net assets, compared to 51.95% of the benchmark.
- The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources voor de funds was 43.41% of the net assets, compared to 55.09% of the benchmark.
- The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6, Table 1) was 0.34 GWh, compared to 0.42 GWh for the benchmark.
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.00% of the net assets, compared to 0.48% of the benchmark.
- The share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 0.00%, compared to 0.21% for the benchmark.
- The share of investments in investee companies without grievance / complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 52.48%, compared to 54.79% for the benchmark.
- The average unadjusted gender pay gap of investee companies (PAI 12, Table 1) was 5.61%, compared to 12.55% for the benchmark.
- The average ratio of female to male board members in investee companies expressed as a percentage of all board members (PAI 13, Table 1) was 36.17%, compared to 35.06% for the benchmark.
- Indicators in relation to social and employee matters (PAI 5-7, Table 3).
- The average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest compensated individual) (PAI 8, Table 3) was , compared to for the benchmark.

Sustainability disclosure (unaudited)

o Via Robeco's entity engagement program, the following PAIs were considered:

- The greenhouse gas emissions (PAI 1, table 1) of the portfolio were 8,448,152 tons, compared to 2,555,427 tons for the benchmark.
- The carbon footprint of the portfolio (PAI 2, table 1) was 2,152 tons per EUR million EVIC, compared to 638 tons per EUR million EVIC for the benchmark.
- The green house gas intensity of the portfolio (PAI 3, table 1) was 1,942 tons per EUR million revenue, compared to 1,513 tons per EUR million revenue for the benchmark.
- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.41% of the net assets, compared to 3.58% of the benchmark.
- The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources was 46.38% of the net assets, compared to 51.95% of the benchmark.
- The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources voor de funds was 43.41% of the net assets, compared to 55.09% of the benchmark.
- The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6, Table 1) was 0.34 GWh, compared to 0.42 GWh for the benchmark.
- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 2.41% of the net assets, compared to 1.83% of the benchmark.
- The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.04 tons of the benchmark.
- The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 26.12 tons, compared to 43.12 tons of the benchmark.
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.00% of the net assets, compared to 0.48% of the benchmark.
- The share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 0.00%, compared to 0.21% for the benchmark.
- The share of investments in investee companies without grievance / complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 52.48%, compared to 54.79% for the benchmark.
- The average unadjusted gender pay gap of investee companies (PAI 12, Table 1) was 5.61%, compared to 12.55% for the benchmark.
- The average ratio of female to male board members in investee companies expressed as a percentage of all board members (PAI 13, Table 1) was 36.17%, compared to 35.06% for the benchmark.
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.00% of the net assets, compared to 0.48% of the benchmark.
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of the fund that cause adverse impact might be selected for engagement.

More information is available via Robeco's Principal Adverse Impact Statement, published on Robeco's website.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2025 through 31 December 2025

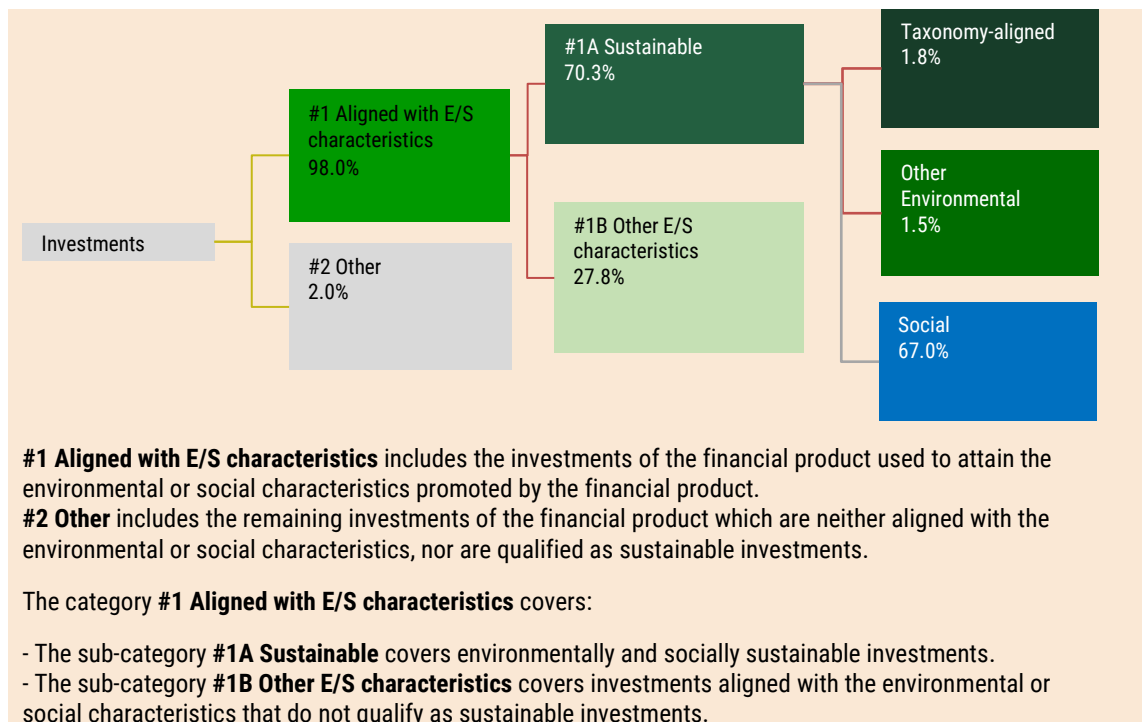

Largest Investments	Sector	% Assets	Country
NVIDIA Corp	Semiconductors & Semiconductor Equipment	5.64%	United States
Microsoft Corp	Software	5.11%	United States
Apple Inc	Technology Hardware, Storage & Peripherals	4.58%	United States
Alphabet Inc (Class A)	Interactive Media & Services	4.22%	United States
Amazon.com Inc	Multiline Retail	3.28%	United States
JPMorgan Chase & Co	Banks	2.99%	United States
Visa Inc	Diversified Financial Services	2.73%	United States
Eli Lilly & Co	Pharmaceuticals	2.52%	United States
Meta Platforms Inc	Interactive Media & Services	2.35%	United States
AbbVie Inc	Biotechnology	2.32%	United States
AstraZeneca PLC	Pharmaceuticals	2.26%	United Kingdom
RELX PLC	Professional Services	2.06%	United Kingdom
Thermo Fisher Scientific Inc	Life Sciences Tools & Services	2.02%	United States
Sony Group Corp	Household Durables	2.02%	Japan
Siemens Energy AG	Electrical Equipment	1.95%	Germany

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Average exposure in % over the reporting period
Sectors deriving revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels -	
Oil, Gas & Consumable Fuels	2.98%
Other sectors	
Semiconductors & Semiconductor Equipment	11.55%
Software	8.36%
Interactive Media & Services	8.14%
Banks	7.20%
Pharmaceuticals	6.51%
Technology Hardware, Storage & Peripherals	4.58%
Multiline Retail	3.97%
Capital Markets	3.46%
Diversified Financial Services	3.35%
Electrical Equipment	3.12%
Specialty Retail	2.69%
Life Sciences Tools & Services	2.65%
Biotechnology	2.32%
Metals & Mining	2.07%
Professional Services	2.06%
Household Durables	2.02%
Communications Equipment	1.83%
Personal Products	1.79%
Hotels, Restaurants & Leisure	1.74%
Diversified Telecommunication Services	1.71%
Real Estate Management & Development	1.66%
Building Products	1.60%
Insurance	1.55%
Road & Rail	1.50%
Electronic Equipment, Instruments & Components	1.19%
Industrial Conglomerates	1.18%
Chemicals	1.17%
Automobiles	0.84%
Health Care Providers & Services	0.72%
Machinery	0.60%
IT Services	0.56%
Entertainment	0.54%
Food & Staples Retailing	0.35%
Trading Companies & Distributors	0.25%
Household Products	0.24%
Cash and other instruments	1.96%

Sustainability disclosure (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.5%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes
 In fossil gas In nuclear energy
 No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100.00% of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage Taxonomy Alignment measured in percentage of CAPEX was 1.79%, measured in percentages of revenues was 1.22%. The percentages taxonomy alignment were 0.00% in previous years.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosure (unaudited)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

1.5%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

67.0%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under "not sustainable". The mandate may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the mandate were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. 32 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. The Carbon profile was more than 30% lower than that of the reference index. 0.00% of the assets was invested in holdings with an elevated risk profile.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
