Report by the manager

General information

Legal aspects

Robeco US Conservative High Dividend Equities N.V. (the 'Fund') is an investment company with variable capital established in the Netherlands. The Fund is an Undertaking for Collective Investment in Transferable Securities (UCITS), as referred to in Section 1:1 of the Dutch Financial Supervision Act (hereinafter: 'Wft') and the EU Directive for Undertakings for Collective Investment in Transferable Securities (2014/91/EU, UCITS V). UCITS have to comply with certain restrictions to their investment policy in order to protect investors.

Robeco Institutional Asset Management B.V. ('RIAM') manages the Fund. In this capacity, RIAM handles the asset management, risk management, administration, marketing and distribution of the Fund. RIAM holds an AIFMD license as referred to in Section 2:65 Wft, as well as a license to manage UCITS as referred to in Section 2:69b Wft. RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (the 'AFM').

The assets of the Fund are held in custody by J.P. Morgan SE, Amsterdam Branch. J.P. Morgan SE, Amsterdam Branch is appointed as the depositary of the Fund as referred to in Section 4:62n Wft. The depositary is responsible for supervising the Fund insofar as required under and in accordance with the applicable legislation e.g. monitoring the Fund's cashflows, monitoring investments, checking whether the net asset value of the Fund is determined in the correct manner, checking that the equivalent value of transactions relating to the Fund assets is transferred, checking that the income from the Fund is used as prescribed in applicable law and regulations and the Fund documentation, etc. The manager, the Fund and J.P. Morgan SE, Amsterdam Branch have concluded a depositary and custodian agreement. In this agreement the responsibilities of the depositary are described. Besides the abovementioned supervising tasks, the main responsibilities of the depositary are e.g. holding in custody the assets of the Fund, establishing that the assets have been acquired by the Fund and that this has been recorded in the accounts, establishing that the issuance, repurchase, repayment and withdrawal of the Fund's shares takes place in accordance with the Fund documentation and applicable law and regulations and carrying out the managers instructions.

The Fund is subject to statutory supervision by the AFM. The Fund is entered in the register as stated in Section 1:107 Wft.

Robeco

When 'Robeco' is mentioned it means RIAM as well as the activities of other companies that fall within the scope of Robeco's management.

Supervision by the Supervisory Board of Robeco Institutional Asset Management B.V.

The Supervisory Board of Robeco Institutional Asset Management B.V. supervises the general affairs of Robeco and its businesses as managed by the Management Board and Executive Committee, including the funds under management.

During the meetings of the Supervisory Board, attention was paid, among other things, to developments in the financial markets and the performance of the funds managed by RIAM. The interests of clients are considered to be a key issue and, consequently, an important point of focus.

Based on periodic reports, the Supervisory Board discussed the results of these funds with the Management Board and Executive Committee. These discussions focused on the investment results, the development of assets under management as a result of market movements and the net inflow of new money as well as operational matters.

In the meetings of the Audit & Risk Committee of the Supervisory Board, amongst other things the (interim) financial reports of the funds were shared and the reports of the independent auditor were discussed. In addition, risk management, incident management, tax, legal, compliance issues and quarterly reports from internal audit, compliance, legal affairs and risk management were discussed.

Share classes

The ordinary shares are divided into four series, one of which is open. Each series is referred to as a share class. This concerns the following series:

Share class A: Robeco US Conservative High Dividend Equities - EUR G

There is no distribution fee for this share class. The base currency of the share class is the euro, the base currency of the Fund is the US dollar. Effective 1 January 2026, the base currency of the fund has been changed to euro. No currency hedges are effected in this share class.

Report by the manager (continued)

General information (continued)

Liquidity of ordinary shares

The Fund is an open-end investment company, meaning that, barring exceptional circumstances, it issues and repurchases ordinary shares on a daily basis at prices approximating net asset value, augmented or reduced by a limited surcharge or discount. The only purpose of this surcharge or discount is to cover the costs made by the Fund related to the entry and exit of investors. The actual maximum surcharge or discount is published on www.robeco.com/riam. The surcharges and discounts are recognized in the profit and loss account.

The Robeco US Conservative High Dividend Equities – EUR G 1 share class is listed on Euronext Amsterdam, Euronext Fund Service segment.

¹ This share class is quoted in euros (EUR), while the base currency of the Fund is the US dollar (USD).

Attribution to share classes

The administration of the Fund is such that attribution of the results to the different share classes takes place on a daily basis and pro rata. Issues and repurchases of own shares are registered per share class.

Tax features

On the basis of Section 28 of the Dutch Corporation Tax Act, the Fund has the status of a fiscal investment company. This means that 0% corporate-income tax is due, providing that, after deducting 15% in Dutch dividend tax, the Fund makes its profit available for distribution to shareholders in the form of dividend within eight months of the close of the financial year and satisfies any other relevant regulations.

Key Information Document and Prospectus

A prospectus and a key information document with information on the product and its associated costs and risks are available for Robeco US Conservative High Dividend Equities N.V. Both documents are available free of charge at the Fund's offices and at www.robeco.com.

Audit committee tasks

An audit committee must be set up for investment funds that are classified as public interest entities (PIE). The Robeco funds are exempt from appointing an audit committee on the basis of Article 3 of the 'Besluit instelling auditcommissie'. This means that Robeco's funds with PIE status do not have an audit committee. However, the absence of an audit committee does not mean that the associated tasks will be cancelled, but that they must have been assigned elsewhere in the Robeco organization.. Within Robeco, these tasks will be performed by the Executive Committee of Robeco Institutional Asset Management B.V. (the "ExCo"). The ExCo is supervised by its Audit & Risk Committee where relevant and/or required.

Report by the manager (continued)

Key figures per share class

Overview 2021-2025

Robeco US Conservative High Dividend Equities - EUR G ⁶	2025	2024	2023	2022	2021	Average
Performance in % based on:						
– Market price ^{1,2}	-0.1	26.5	1.1	3.1	34.7	12.2
– Net asset value ^{1,2}	-0.1	26.4	1.3	3.1	34.7	12.2
MSCI North America Index (Gross Return in EUR) ³	4.5	32.9	22.3	-13.8	36.6	14.9
Distributed from share premium in EUR ⁴						
Dividend in EUR ⁴	1.40	1.80	1.80	1.60	1.60	
Total net assets ⁵	50	62	51	68	70	

¹ The differences between the performance based on market price and the performance based on net asset value is caused by the fact that the market price is the NAV of the previous trading day corrected for the surcharge or discount as described under Liquidity of ordinary shares.

² Any dividends distributed in any year are assumed to have been reinvested in the Fund.

³ Currencies have been converted at rates supplied by World Market Reuters.

⁴ The dividend relates to the reporting year mentioned and is distributed in the following year. The figure for 2025 is a proposal. Further information on the proposed dividend can be found in the section Proposed profit appropriation on page 32.

⁵ In millions of euros.

⁶ This share class is quoted in euros (EUR), while the base currency of the Fund is the US dollar (USD). The net assets are therefore stated in millions of euros.

General introduction

Review of the US stock markets

US equity markets moved higher throughout 2025, though the S&P 500 failed to climb more than 20%, as it had in 2023 and 2024. Volatility increased throughout the year as investors have continued to grow weary of concentration in the Magnificent 7, expanded implementation of tariffs by President Trump, and the Federal Reserve rate cut decisions growing more questionable due to recent economic data releases and higher-for-longer inflation expectations. Despite these factors, the risk-on trade dominated for the year, largely driven by mega-cap Magnificent 7 stocks, which returned 24.9%, compared to a gain of 17.9% for the S&P 500. Fortunately, however, these environments do not typically last in perpetuity. This became clear over the course of the year as value stocks performed strongly, ending the year in a much stronger position than they had since the beginning of the zero-interest rate policy (ZIRP) era.

US stock markets outlook

Looking ahead to 2026, the backdrop for equities is expected to remain positive, and following multiple years of high concentration in a small cohort of stocks, it is likely that investors keep investing away from high valuation stocks like the Magnificent 7, to attractively valued businesses with comparable, and improving, earnings growth. With mid-term elections on the horizon in the United States, the Trump Administration is likely to work hard to put downward pressure on interest rates by appointing a new Federal Reserve chair who will (most likely) be favorable towards President Trump's end goals. A Trump-friendly Federal Reserve Chair is likely to be a tailwind for equities markets, however, with inflation remaining at elevated levels, a higher-for-longer environment has certainly arrived. Interest rates and inflation are likely to remain at elevated levels for an extended period of time, despite the downward pressure from the Trump administration. The fund managers believe that value equities are well positioned looking forward. Also importantly, the second year of any Presidential term has been the worst year for stock market performance, historically, dating back to 1928. As the future becomes clearer in regards to the inflationary environment and, interest rate environment, and geopolitical environment, the market may benefit from a more solidified outlook.

Report by the manager (continued)

Investment policy

Introduction

The Fund mainly invests in liquid shares of companies domiciled in North America or which carry out most of their economic activities there. Stock selection targets shares with lower expected downside risk. These shares with lower anticipated volatility are selected using a quantitative stock-selection model. In selecting investments, choices are made with respect to allocation across sectors and subsectors and large, medium-sized and small companies. The risk of the Fund is limited by means of this diversification.

Investment objective

The primary objective of the Fund is to generate equal or greater returns than the North American equity market at significantly lower risk while at the same time aiming for a better sustainability profile compared to the reference index by promoting certain ESG (i.e. Environmental, Social and Governance) characteristics and integrating sustainability risks in the investment process. Conservative Equities here represents a focus on equities with low volatility. The Fund uses the MSCI North America Index (Net Return in EUR) as a reference index.

Robeco US Conservative High Dividend Equities N.V. is classified as Article 8 under the SFDR. More information is available in the precontractual SFDR disclosures of the Fund on the Robeco website. Attached to this annual report the Annex IV disclosure can be found with detailed information on the achievement of the sustainability goals over the reporting period.

Implementation of the investment policy

Empirical research over a very long period (more than 100 years) shows that low-beta (or low-risk) stocks generate a higher return than justified according to their beta. The risk-return relationship is therefore not positive, as is often assumed, but instead flat or even negative. This is also sometimes referred to as the low-risk anomaly, and the investment style used to benefit from this is known as 'low volatility investing'. Besides the empirical evidence, there is also an economic reason why this anomaly exists. Low-risk stocks have a high tracking error and are, therefore, not attractive for a portfolio manager working with a benchmark-linked risk. This is why there are increasing numbers of academic studies into the relationship between risk and return and the underlying economic reasons. Robeco researchers are also participating in this lively debate by publishing items on low-volatility investing in international peer-reviewed journals. The low-risk anomaly, and the low-volatility investment style based thereon, is one of the sources of return.

Robeco's quantitative stock-selection model also uses other variables that reduce total expected risk or increase portfolio returns. The quantitative Conservative Equities model combines the most successful variables expected to generate the highest return per unit of absolute risk.

The stock selection model for Robeco US Conservative High Dividend Equities N.V. assesses stocks on the following two themes:

1. low-risk factors (preference for stocks with low volatility, for instance);
2. return factors (preference for stocks with a high dividend and high price momentum, for instance).

All equities in the United States and Canada with sufficient market value and daily trading volume make up the investment universe of Robeco US Conservative High Dividend Equities N.V. In principle, the investment universe consists of stocks in the MSCI North America Index. To enable investment in suitable stocks not included in this index, the universe was expanded to include stocks in the Broad Market Index as compiled by S&P.

A minimum daily trading volume is applied to achieve a relatively stable and liquid investment universe. The portfolio manager purchases the most attractive stocks based on the results of the stock selection model. Each position is held until the stock's rank drops, and another stock with a much higher rank can be bought instead with an expected positive alpha versus trading cost trade-off. As a result of this trading discipline, the portfolio will typically not hold bottom-ranked stocks. All trading occurs within concentration and position limits. The Fund's sell-driven process leads to a low portfolio turnover, which helps to keep trading costs low. The intention is to construct a well-diversified portfolio with the objective of reducing stock-specific risks.

Currency policy

The Fund mainly invests in stocks issued in USD and CAD. These currencies are not hedged. Further quantitative information on the currency risk can be found in the information on currency risk provided on page 22.

Report by the manager (continued)

Investment result

Investment result per share class

Share class	Price in EUR x 1 31/12/2025	Price in EUR x 1 31/12/2024	Dividend paid June 2025	Investment result in reporting period in % ¹
<i>Robeco US Conservative High Dividend Equities - EUR G</i> ²			1.80 ³	
- Market price	59.65	61.58		26.5
- Net asset value	59.65	61.58		26.4

¹ Any dividends distributed in any year are assumed to have been reinvested in the Fund.

² This share class is quoted in euros (EUR). The prices are therefore stated in euros. The base currency of the Fund is the US dollar (USD).

³ This distribution is treated as a dividend for tax purposes, but is recognized as partly paid from the share premium for accounting purposes.

Net returns per share¹

EUR x 1

Robeco US Conservative High Dividend Equities – EUR G	2025	2024	2023	2022	2021
Direct investment income	1.15	1.61	1.42	1.26	1.19
Indirect investment income	6.57	8.11	0.98	-3.10	9.80
Management fee, service fee and other costs	-0.39	-0.38	-0.33	-0.34	-0.30
Net result	7.33	9.34	2.07	-2.18	10.69

¹ Based on the average number of shares outstanding during the reporting year. The average number of shares is calculated on a daily basis.

Over the reporting period, Robeco US Conservative High Dividend Equities N.V. generated a return of 0.6% (gross of fees in EUR), against a return of 4.5% for its reference index, the MSCI North America Index (Gross Return in EUR).

For the period, the Fund underperformed its reference index. The exposures to the low-risk and sentiment factors had a negative contribution to relative performance. On the other hand, the income factor positively contributed to relative performance. The risk profile of Fund, as measured by volatility, was lower than that of the reference index.

Return and risk

Robeco US Conservative High Dividend Equities N.V. is characterized by generally having lower absolute risk but high relative risk, as the strategy deviates considerably from its reference index.

Since the start of the Fund in December 2013, it showed an annualized return of 11.67%, while the reference index showed an annualized return of 14.71%. The risk profile of the Fund has been lower than that of the reference index, as the annualized volatility of the Fund has been 12.08% against 14.31% for the reference index. The lower return and lower volatility since the start of the Fund resulted in a lower Sharpe ratio of 0.92 for the Fund, against a Sharpe ratio of 0.99 for the reference index.

Report by the manager (continued)

Risk management

The presence of risks is inherent to asset management. It is therefore very important to have a procedure for controlling these risks embedded in the Fund's day-to-day operations. The manager (RIAM) ensures that risks are effectively controlled via the three lines model: RIAM management (first line), the Compliance, Investment Restrictions and Risk Management departments (second line) and the Internal Audit department (third line).

The management of RIAM has primary responsibility for risk management as part of its day-to-day activities. The Compliance and Risk Management departments develop and maintain policies, methods and systems that enable the management to fulfill their responsibilities relating to risk. Furthermore, portfolios are monitored by these departments to ensure that they remain within the investment restrictions under the Terms and Conditions for Management and Custody and/or the prospectus, and to establish whether they comply with the internal guidelines. The Risk Management Committee decides how the risk management policies are applied and monitors whether risks remain within the defined limits. The Internal Audit department carries out audits to assess the effectiveness of internal control.

RIAM uses a risk-management and control framework that helps control all types of risk. Within this framework, risks are periodically identified and assessed as to their significance and materiality. Internal procedures and measures are focused on providing a structure to control both financial and operational risks. Control measures are included in the framework for each risk. Active monitoring is performed to establish the effectiveness of the procedures and measures of this framework.

Operational risk

Operational risk is the risk of loss as a result of inadequate or failing processes, people or systems. Robeco constantly seeks opportunities to simplify processes and reduce complexity in order to mitigate operational risks. Automation is a key resource in this regard and Robeco uses systems that can be seen as the market standard for financial institutions. The use of automation increases the risk associated with IT. This risk can be divided into three categories. The risk of access by unauthorized persons is managed using preventive and detective measures to control access to both the network and systems and data. Processes such as change management and operational management provide for monitoring of an operating system landscape. Finally, business continuity measures are in place to limit the risk of breakdown as far as possible and to recover operational status as quickly as possible in the event of a disaster. The effectiveness of these measures is tested periodically by means of internal and external testing.

Compliance risk

Compliance & Integrity risks embody the risk of corporate and individual behaviour that leads to insufficient compliance with laws and regulations and internal policies to such an extent that in the end this may cause serious damage to the confidence in the Fund, Robeco and in the financial markets. Incompliance with laws, regulations and policies might also result in penalties from regulators. Robeco's activities – collective and individual portfolio management – are subject to European and local rules of financial supervision. Observance of these rules is supervised by the national competent authorities (in the Netherlands the Authority for the Financial Markets, AFM and the Central Bank of the Netherlands, DNB).

Outsourcing risk

The risk of outsourcing the activities is that the third party cannot meet its obligations, despite the existing contracts, and that the Fund may incur a loss that cannot be recovered from the third party. To mitigate this risk, Robeco has implemented a Third Party Management Policy which provides a framework for managing a third-party's lifecycle. The main goal is to provide controlled and sound business management regarding third-parties.

Fraud risk

Maintaining a strong reputation for integrity is essential for Robeco, as it underpins market confidence and public trust. Because fraud can significantly erode this trust, Robeco has established a centralized framework to manage and mitigate fraud risk. This framework combines preventive and detective measures and includes regular evaluations of the effectiveness of internal controls.

To support this framework, Robeco has appointed two Anti-Fraud Officers (AFOs): one from Operational Risk Management, responsible for External Fraud, and one from Compliance, responsible for Internal Fraud. They act as the primary point of contact for potential fraud indicators and ensure that any signals are addressed promptly and effectively. Their responsibilities include:

- Conducting periodic Fraud Risk Assessments and reporting the results to the Enterprise Risk Management Committee (ERMC) and the Audit & Risk Committee (A&RC);
- Performing gap analyses to identify missing controls within the Risk Control Framework (RCF);
- Coordinating with IT Security on existing anti-fraud measures and identifying further opportunities to enhance fraud detection;
- Monitoring appropriate follow-up of both internal and external fraud incidents.

Fraud risk exists throughout the organization. To mitigate this, Robeco has implemented a range of internal controls—such as (but not limited to); segregation of duties, access controls, and the four-eye principle—that significantly reduce the likelihood of internal fraud. Although some inherent risk remains, including the potential for overriding established controls, Robeco considers this risk limited due to its organizational structure and strong asset-segregation practices. Fund assets are safeguarded by independent custodians and can only be transferred through predefined, authorized procedures, making the risk of misappropriation extremely remote. Robeco also maintains a dedicated SOX control framework to prevent fraudulent financial reporting.

A quantification of the risks can be found in the notes to the financial statements on pages 22 through 24.

Report by the manager (continued)

Remuneration policy

The Fund itself does not employ any personnel and is managed by Robeco Institutional Asset Management B.V. (hereafter 'RIAM'). In the Netherlands, persons performing duties for the Fund at management-board level and portfolio managers are employed by Robeco Nederland B.V. The remuneration for these persons comes out of the management fee.

This is a reflection of the Remuneration Policy of RIAM. The remuneration policy of RIAM applies to all employees of RIAM. The policy follows applicable laws, rules, regulations and regulatory guidance including, without limitation, chapter 1.7 of the Wft, article 5 of SFDR, the ESMA Remuneration Guidelines under UCITS, the ESMA Remuneration Guidelines under AIFMD and the ESMA Guidelines under MIFID.

Responsibility for and application of the policy

The RIAM Remuneration Policy is determined and applied by and on behalf of RIAM with the approval, where applicable, of the Supervisory Board of RIAM on the advice of the Nomination & Remuneration Committee (a committee of the Supervisory Board of RIAM) and, where applicable, the shareholders (Robeco Holding B.V. and ORIX Corporation Europe N.V.).

Introduction and scope

Our employees and their knowledge and capabilities represent Robeco's most important asset. In order to attract and retain staff who enable Robeco to help our clients achieve their goals, providing an attractive remuneration and benefits package is vital. It is equally vital to reward our people based on their performance fairly and competitively. To achieve this, we have a remuneration policy in place.

Objectives of the remuneration policy

In line with our reputation as a leader in sustainability, Robeco compensates its employees in a non-discriminatory and gender neutral manner. The key objectives of our remuneration policy are:

- incentivizing employees to act in our clients' best interests and preventing potential poor business conduct or conflicts of interest from adversely affecting our clients;
- supporting our risk management processes and preventing our employees from taking unnecessary risks;
- helping us foster a healthy corporate culture focused on achieving sustainable results in accordance with the long-term objectives of Robeco, its clients and other stakeholders;
- ensuring our remuneration policy takes into account ESG risks and our sustainable investment objectives by incorporating these criteria in the key performance indicators (KPIs) used to determine individual staff members' variable compensation;
- providing competitive remuneration to help us attract and retain talented people

We review the policy every year to ensure it is aligned with regulatory requirements, internal standards and client interests. We also immediately review the remuneration policy in response to any significant changes in our business activities or organizational structure.

The basis of our remuneration policy

In general, Robeco aims to align its remuneration policy and practices with its risk profile, its function and the interests of all its stakeholders. Robeco's remuneration policy and practices aim to reward success and maintain a sustainable balance between short- and long-term value creation and reflect Robeco's long-term responsibility toward its employees, clients, shareholders and other stakeholders.

The regulatory environment

Robeco is active in a strictly regulated sector. This impacts every aspect of our business model, including our remuneration policy and practices. All of the remuneration regulations that Robeco is subject to as an asset manager endeavor to align, at least in general terms, our company's interests with those of our stakeholders. The regulations state that we should achieve this aim through the use of deferral mechanisms, retention periods and restrictions on disproportionate ratios between fixed and variable remuneration. We incorporate these requirements – both in letter and in spirit – in our remuneration policy. Therefore, annual variable remuneration in principle does not exceed 200% of fixed remuneration. In recognition of Robeco's responsibility to address sustainability challenges, we have explicitly integrated sustainability risk factors in the performance indicators of relevant employees.

Monitoring of and changes to our remuneration policy

Robeco constantly seeks and receives input from clients, its shareholder, regulators and other stakeholder groups about its approach to remuneration. We have put in place robust governance and monitoring arrangements to ensure our remuneration policy remains aligned not just with applicable laws, but also with the interests of our stakeholders. Our Management Board is ultimately responsible for approving changes to our remuneration policy (apart from changes to their own remuneration). The remuneration of the Management Board (statutory directors) is determined by our shareholder, based on a proposal from the Supervisory Board, which is advised by the Nomination & Remuneration Committee. The proposal is based on a prior proposal of the CEO, except when it concerns the remuneration of the CEO herself.

Report by the manager (continued)

Remuneration policy (continued)

Components of remuneration

All remuneration our employees receive can be divided into fixed remuneration (payments or benefits that do not take into account any performance criteria) and variable remuneration (additional payments or benefits that depend on performance). When determining employees' total remuneration, we periodically perform a benchmark review.

Fixed remuneration

Each individual employee's monthly fixed pay is determined based on their function and/or level of responsibility and experience according to set salary ranges and with reference to investment management benchmarks in the relevant region. The fixed remuneration we pay is sufficient to remunerate the staff member for the professional services they perform, in line with their level of education, degree of seniority, level of expertise, skills required for their role and work experience, and the part of our business and region they work in. Under certain circumstances, temporary allowances may be awarded. In general, these are solely function- and/or responsibility based and are not linked to the performance of the employee or Robeco. Allowances are granted based on strict guidelines and principles.

Variable remuneration

The variable remuneration pool is determined based on Robeco's financial results and a risk assessment that takes into account both financial and non-financial factors. This is to ensure any variable remuneration grants are warranted given the financial strength of the company and based on effective risk management. The variable remuneration of all staff members is appropriately balanced with the fixed remuneration that they receive.

Key performance Indicators (KPIs)

To the extent that the variable remuneration pool allows, each employee's variable remuneration is determined by taking into account the employee's behavior and personal and team performance based on pre-determined financial and non-financial KPIs. The actual amount of variable remuneration awarded is at the discretion of the employee's manager.

The financial KPIs for our investment professionals are mainly based on risk-adjusted excess returns over one, three and five years. For sales professionals, financial KPIs are mostly related to generated additional revenues (net revenue run rate) and client relationship management. KPIs for support professionals are mainly non-financial and role specific. KPIs for control functions are predominantly (70% or more) function- and/or responsibility-specific and non-financial in nature. KPIs for staff members in control functions are not based on the financial results of the part of the business they oversee in their monitoring role. At least 50% of all employees' KPIs are non-financial.

All employees have a mandatory risk and compliance KPI. Their risk and compliance performance is assessed and used to adjust their overall performance downward if it does not meet the required level. Unethical or non-compliant behavior overrides any good performance generated by a staff member and will result in reduced or no variable remuneration.

All employees also have a sustainability KPI. Our Sustainability and Impact Strategy Committee develops KPIs to measure how successfully we are implementing our sustainable investing strategy. The KPIs are role-specific, and can be qualitative or quantitative. They are used as a starting point to develop KPIs for different employee groups. Where relevant, sustainability risk factors form a part of the annual goals of employees so that their remuneration is linked to sustainability risk management.

For example, portfolio managers have decarbonization and ESGintegration-related KPIs, while risk professionals have sustainability risk and monitoring-related KPIs. Sustainability KPIs for the members of our Management Board depend on the domain they are responsible for; they include KPIs linked to sustainability reporting projects, ensuring we adhere to emission reduction targets for our own operations, and monitoring and ensuring we comply with sustainability regulatory requirements. Management Board members have both individual and team KPIs. Sustainability is integrated in some of the individual KPIs of our Management Board members. The individual goals have a total weight of 50% and are based on both qualitative and quantitative aspects.

Report by the manager (continued)

Remuneration policy (continued)

Conversion into Robeco Cash Appreciation Rights

To stimulate a healthy corporate culture focused on achieving sustainable results in accordance with the long-term objectives of Robeco and its stakeholders, we use deferrals and instruments called 'Robeco Cash Appreciation Rights' (R-CARs), the value of which reflects the financial results of Robeco over a rolling eight-quarter period.

Variable remuneration up to EUR 100,000 is paid in cash immediately after being awarded. If an employee's variable remuneration exceeds EUR 100,000, 40% of the variable remuneration in excess of EUR 75,000 is deferred and converted into R-CARs as shown in the table below, and the remainder is paid in cash.

	<i>Year 1</i>	<i>Year 2</i>	<i>Year 3</i>	<i>Year 4</i>
Cash payment	60%			
R-CARs redemption		13.34%	13.33%	13.33%

Severance payments

We pay no severance if an employee voluntarily resigns or is dismissed for malpractice. Severance payments to daily policymakers as defined in the Wet op het financieel toezicht (Wft; Dutch Financial Supervision Act) are capped at 100% of fixed remuneration. No severance would be paid to daily policymakers if they are dismissed due to a failure of Robeco (for example, in the event of a request for state aid or if substantial sanctions are imposed by the regulator).

Rules for Identified Staff and Control Function Staff

Additional rules apply to Identified Staff and Control Function Staff.

Identified Staff

Identified Staff are employees who can have a material impact on Robeco's risk profile and/or the funds we manage. Identified Staff include the Management Board, ExCo members, senior portfolio management staff, the heads of control functions (such as Compliance, Risk Management and Internal Audit) and other risk-takers as defined in the Alternative Investment Fund Managers Directive (AIFMD) and the Undertakings for Collective Investment in Transferable Securities Directive V (UCITS V) whose total remuneration places them in the same remuneration bracket as the other staff members we refer to.

Additional rules that apply to Identified Staff include part of their variable remuneration being paid in cash and part of it being deferred and converted into R-CARs, as set out in the payment/redemption table below. The threshold of EUR 100,000 does not apply to these staff members. In the occasional event that variable remuneration is more than twice the amount of fixed remuneration, the percentages in brackets in the table below apply.

	<i>Year 1</i>	<i>Year 2</i>	<i>Year 3</i>	<i>Year 4</i>	<i>Year 5</i>
Cash payment	30% (20%)	6.67% (10%)	6.66% (10%)	6.66% (10%)	
R-CARs redemption		30% (20%)	6.67% (10%)	6.66% (10%)	6.66% (10%)

Control Function Staff

Control Function Staff are employees who work in our Compliance, Risk Management and Internal Audit departments. The following rules apply to the fixed and variable remuneration of Control Function Staff.

- The fixed remuneration is sufficient to guarantee that Robeco can attract qualified and experienced staff.
- The KPIs of Control Function Staff are predominantly role-specific and non-financial.
- The financial KPIs are not based on the financial results of the part of the business that the employee covers in their monitoring role.
- The KPIs may not be based on the financial results of the business part they oversee in their monitoring role.
- The rules above apply in addition to the rules that apply to Identified Staff if an employee is part of both the Control Function Staff and Identified Staff.
- The Supervisory Board, as advised by the Nomination & Remuneration approves the remuneration of the Head of Compliance, Head of Internal Audit and Head of Risk.

Report by the manager (continued)

Remuneration policy (continued)

Risk control measures

Robeco has set out clear risk control procedures to prevent and address remuneration-related risks. These include an assessment of possible risks, an annual remuneration policy review process and shareholder approval of our remuneration policy. We elaborate on these aspects below.

Identified risks

Robeco has identified the following risks that must be taken into account in applying its remuneration policy:

- misconduct or a serious error of judgement on the part of employees (such as taking non-permitted risks, violating compliance guidelines or exhibiting behavior that conflicts with our core values) in order to meet business objectives or other objectives;
- a considerable deterioration in Robeco's financial results;
- a serious violation of the risk management system;
- evidence that fraudulent acts have been committed by employees;
- behavior that results in considerable losses. The following risk control measures apply, all of which are monitored by the Supervisory Board of RIAM.

Claw back – for all employees

Robeco may reclaim all or part of the variable remuneration paid to an employee if:

- the payment was made on the basis of incorrect information;
- it becomes clear that the employee committed fraud;
- they have engaged in serious improper behavior or demonstrated serious negligence in the performance of their tasks;
- their behavior has resulted in considerable losses for the organization.

Ex-post malus – for Identified Staff

- Before paying any part of a deferred remuneration payment, Robeco may reduce the amount to be paid on the following grounds. Evidence of fundamental misconduct, errors or integrity issues by the staff member, such as a breach of the Code of Conduct or other internal rules, especially related to risks.
- If there is evidence the staff member caused a considerable deterioration in the financial performance of Robeco or any fund we manage.
- A significant deficiency in Robeco's risk management or the risk management of any fund we manage.
- Significant changes in Robeco's financial situation.

Ex-ante risk assessment – for Identified Staff

Before granting variable remuneration to Identified Staff, Robeco may decide to reduce the variable remuneration proposal, potentially to zero, in the event of collective or individual compliance- or risk-related issues.

Shareholder approval

The remuneration of the Management Board is determined by our shareholder, based on a proposal from the Supervisory Board of RIAM, which is advised by the Nomination & Remuneration Committee of the Supervisory Board of RIAM. The proposal will be based on a prior proposal of the CEO, except when it concerns the remuneration of the CEO itself. With regards to RIAM, the remuneration policy for the Management Board as adopted by the General Meeting will be taken into account. Remuneration for employees who earn more than EUR 750,000 per year or who are granted variable remuneration in excess of 200% of their fixed remuneration requires the approval of the Supervisory Board of RIAM (advised by the Nomination & Remuneration Committee of the Supervisory Board of RIAM) and our shareholder.

Annual review

Our remuneration processes are audited and reviewed each year internally. Any relevant changes made by regulators are incorporated in our remuneration policies and guidelines. Every year, an independent external party reviews our remuneration policy to ensure it is fully compliant with all relevant regulations. There are no differences between the retirement benefit schemes and the contribution rates for the highest governance body members, senior executives and all other employees.

Supervisory Board of RIAM compensation

Members of the Supervisory Board of RIAM receive fees for their service on the Supervisory Board. All fees are paid out fully in cash.

No variable remuneration is provided, ensuring the members of the Supervisory Board of RIAM act impartially. Members of the Supervisory Board of RIAM are not eligible to receive any benefits in relation to their position on the Supervisory Board of RIAM.

Report by the manager (continued)

Remuneration policy (continued)

Remuneration in 2025

Of the total amounts granted in remuneration¹ by RIAM in 2025 to RIAM's Board, Identified Staff and Other Employees, the following amounts are to be assigned to the Fund:

Remuneration in EUR x 1

Staff category	Fixed pay for 2025	Variable pay for 2025
Board (3 members)	534	833
Identified Staff (53) (ex Board)	4,138	2,489
Other employees (747 employees)	19,156	5,829

The total of the fixed and variable remuneration charged to the Fund is EUR 32,979. Imputation occurs according to the following key:

$$\text{Total remuneration (fixed and variable) x } \frac{\text{Total Fund assets}}{\text{Total assets under management (RIAM)}}$$

The Fund itself does not employ any personnel and has therefore not paid any remuneration above EUR 1 million.

¹ The remunerations relate to activities performed for one or more Robeco entities.

Remuneration manager

The manager (RIAM) has paid to 4 employees a total remuneration above EUR 1 million.

Report by the manager (continued)

Sustainable investing

Robeco believes that safeguarding economic, environmental and social assets is a prerequisite for a healthy economy and the generation of attractive returns. Robeco's mission therefore, is to enable its clients to achieve their financial and sustainability goals by providing superior investment returns and solutions. Robeco is an active owner, integrating material ESG issues systematically into investment processes, having a net zero roadmap in place and a broad range of sustainable solutions. Responsibility for implementing sustainable investing lies with the Chief Investment Officer, who also has a seat on Robeco's Executive Committee.

Focus on stewardship

Fulfilling its stewardship responsibilities is an integral part of Robeco's approach to Sustainable Investing. A core aspect of Robeco's mission is fulfilling the fiduciary duties towards its clients and beneficiaries. Robeco manages investments for a variety of clients with different investment needs. Robeco strives in everything it does to serve its clients' interests to the best of its ability. Robeco publishes its approach to stewardship on its website describing how it deals with potential conflicts of interest, how it monitors the companies in which it invests, how it conducts activities in the field of engagement and voting, and how it reports on its stewardship activities. To mark Robeco's strong commitment to stewardship, Robeco is signatory to many different stewardship codes across the globe.

Active ownership

Robeco's active ownership activities encourage investee companies or sovereigns to improve their management of ESG risks and adverse impacts, as well as seize business and economic opportunities associated with sustainability challenges. Robeco aims to improve a company's behavior on ESG issues in order to enhance long-term performance of the company and therefore to enhance the quality of investments for its clients. Robeco's Active Ownership activities includes both voting and engagement.

More information on Robeco's processes and current engagement themes can be found in Robeco's Stewardship Approach and Guidelines and in Robeco's quarterly Active Ownership Reports published on the Robeco website.

Exclusions

Robeco's Exclusion Policy sets minimum standards for company activities and products that are detrimental to society to avoid investments clients would deem unsuitable. Robeco excludes companies involved in the production or trade of controversial weapons such as cluster munition and anti-personnel mines, tobacco production, the most pollutive fossil fuel activities. Robeco also excludes companies in non-RSPO (Roundtable on Sustainable Palm Oil) certified palm oil producers and other forest risk commodities in relation to deforestation risk management. Finally, Robeco excludes companies that severely and structurally violate either the United Nations Global Compact (UNGC) or OECD Guidelines for Multinational Enterprises. Robeco publishes its Exclusion Policy and the list of excluded companies on its website.

Contributing to the Sustainable Development Goals

Robeco is a signatory in the Netherlands to the Sustainable Development Goals Investing Agenda as defined by the United Nations. To help clients contribute to the objectives, Robeco developed a framework to analyze the SDG contribution of companies and SDG investment solutions. Companies with positive SDG scores are deemed to be sustainable investments under SFDR.

ESG integration by Robeco

Sustainability brings about change in markets, countries, and companies in the long term. Since changes affect future performance, Robeco believes the analysis of ESG factors can add value to its investment process. Robeco therefore looks at these factors in the same way as it considers a company's financial position or market momentum. To analyze ESG factors, Robeco has research available from leading sustainability experts, including Robeco's own proprietary research from the Sustainable Alpha research team. This dedicated team works closely together with Robeco's investment teams to provide in-depth sustainability information to the investment process. Investment analysis focuses on the most financially material ESG factors and how these factors may drive the financial performance of a company. The objective of structurally integrating financially material issues is to reach better informed investment decisions.

SFDR classification

Robeco Global Stars Equities Fund N.V. is classified as Article 8 under the SFDR. More information is available in the precontractual SFDR disclosures of the Fund on the Robeco website. Attached to this annual report the Annex IV disclosure can be found with detailed information on the achievement of the sustainability goals over the reporting period.

Actions taken to meet the environmental and/or social characteristics

Sustainability factors are integrated in the investment process as part of the bottom-up approach of ESG integration in the portfolio. Furthermore, the portfolio managers have applied the Robeco exclusion policy to ensure that no investments were made in excluded securities. In addition, the portfolio managers continued to ensure that the overall ESG profile of the portfolio in terms of the Sustainability ESG risk rating is substantially better than the benchmark by focusing on both environmental- and social factors that influence the overall sustainability profile of the portfolio. In terms of active engagement, the portfolio managers continue to work together closely with the active ownership team. During 2025, on behalf of the Fund, votes have been cast at the AGMs of the holdings in portfolio and Robeco has an ongoing engagement with several portfolio holdings.

Report by the manager (continued)

Sustainable investing (continued)

Actions taken to meet the environmental and/or social characteristics (continued)

The Fund is managed to comply with its sustainability-related binding elements at an overall level. Over the reporting period, the strategy applied the Robeco Level 1 exclusion list, and was managed so that it has a better ESG risk rating than the benchmark, higher exposure to positive-scoring stocks based on the proprietary Robeco SDG Framework, as well as having a lower carbon, waste and water footprints versus the benchmark.

In control statement

Robeco Institutional Asset Management B.V. has a description of internal control, which is in line with the requirements of the Dutch Financial Supervision Act (Wet op het financieel toezicht, or 'Wft') and the Dutch Market Conduct Supervision of Financial Enterprises Decree (Besluit Gedragtoezicht financiële ondernemingen, or 'BGfo').

Report of internal control

We noted nothing that would lead us to conclude that operational management does not function as described in this statement. We, as the Management Board of Robeco Institutional Asset Management B.V., therefore declare with reasonable assurance that the design of internal control, as mentioned in article 121 BGfo meets the requirements of the Wft and related regulations and that operational management has been effective and has functioned as described throughout the reporting year.

Rotterdam, 22 April 2026

Notes

General

The annual financial statements have been drawn up in conformity with Part 9, Book 2 of the Dutch Civil Code. The Fund's financial year is the same as the calendar year. The notes referring to Fund shares concern ordinary shares outstanding.

The ordinary shares are divided into four series, one of which is open. Each series is designated as a share class. The Fund includes the following share classes:

Share class A: Robeco US Conservative High Dividend Equities - EUR G.

Accounting principles

General

The financial statements are produced according to the going concern assumption. Unless stated otherwise, items shown in the financial statements are stated at nominal value and expressed in thousands of United States dollar. Assets and liabilities are recognized or derecognized in the balance sheet on the transaction date.

Liquidity of ordinary shares

The Fund is an open-end investment company, meaning that, barring exceptional circumstances, it issues and repurchases ordinary shares on a daily basis at prices approximating net asset value, augmented or reduced by a limited surcharge or discount. The only purpose of this surcharge or discount is to cover the costs incurred by the Fund for the entry and exit of investors. The actual maximum surcharge or discount is published on www.robeco.com/riam. The surcharges and discounts are recognized in the profit and loss account.

Shareholders' equity

The outstanding ordinary shares of the Fund are treated as equity.

Financial investments

Financial investments are classified as trading portfolio and are valued at fair value, unless stated otherwise. The fair value of stocks is determined on the basis of market prices and other market quotations at closing date. For derivatives and futures, the value is based on the market price and other market quotations at closing date. Transaction costs incurred in the purchase and sale of investments are included in the purchase or sale price as appropriate. Transaction costs incurred in the purchase of investments are therefore recognized in the first period of valuation as part of the value changes in the profit and loss account. Transaction costs incurred in the sale of investments are part of the realized results in the profit and loss account. Derivative instruments with a negative fair value are recognized under the derivatives item under investments on the liability side of the balance sheet.

Recognition and derecognition of items in the balance sheet

Investments are recognized or derecognized in the balance sheet on the transaction date. Equities and derivatives are recognized in the balance sheet on the date the purchase transaction is concluded. Equities are derecognized in the balance sheet on the date the sale transaction is concluded. Derivatives are fully or partially derecognized in the balance sheet on the date the sales transaction is concluded or if the contract is settled on the expiry date. Accounts receivable and payable are recognized in the balance sheet on the date that contractual rights or obligations with respect to the receivables or payables arise. Receivables and payables are derecognized in the balance sheet when, as a result of a transaction, the contractual rights or obligations with respect to the receivables or payables no longer exist.

Presentation and valuation of derivatives

Derivatives are recognized in the balance sheet at fair value. The presentation of the fair value is based on the liabilities and receivables per contract. The receivables are reported under assets and obligations are reported under liabilities. The value of the derivatives' underlying instruments is not included on the balance sheet. Where applicable, the underlying value of derivatives is included in the information provided on the currency and concentration risk.

Netting

Financial assets and liabilities with the same party are offset, and the net amount is reported in the statement of financial position, when the Fund has a current, legally enforceable right to set off the recognised amounts and intends to either settle on a net basis, or to realise the asset and settle the liability at the same time.

Notes (continued)

Accounting principles (continued)

Use of estimates

In preparing these financial statements, the manager has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Cash and cash equivalents

Cash and cash equivalents are carried at nominal value. If cash is not freely disposable, this is factored into the valuation.

Cash expressed in foreign currencies is converted into the functional currency as at the balance sheet date at the exchange rate applicable on that day. Please refer to the currency table on page 34.

Accounts receivable

Receivables are initially – and after recognition – valued at amortized cost based on the effective interest method, less impairments. Given the short-term character of the receivables, the value is equal to the nominal value.

Debt

Non-current debts and other financial obligations are initially – and after recognition – valued at the amortized cost price based on the effective interest method. Given the short-term character of the debt, the value is equal to the nominal value.

Foreign currencies

Transactions in currencies other than the US dollar are converted into US dollars at the exchange rates valid at the time. Assets and liabilities expressed in other currencies are converted into US dollars at the exchange rate prevailing at balance-sheet date. The exchange rate differences thus arising or exchange rate differences arising on settlement are recognized in the profit and loss account. Investments in foreign currencies are converted into US dollars at the rate prevailing on the balance sheet date. This valuation is part of the valuation at fair value. Exchange rate differences are recognized in the profit and loss account under changes in value.

Securities lending

Investments for which the legal ownership has been transferred by the Fund for a given period of time as a result of securities-lending transactions, will continue to be included in the Fund's Balance sheet during this period, since their economic advantages and disadvantages, in the form of investment income and changes in value, will be added to or deducted from the Fund's result. The way in which collateral ensuing from securities-lending transactions is reported depends on the nature of this collateral. If the collateral is received in the form of investments these are not recognized in the balance sheet as the economic advantages and disadvantages relating to the collateral will be for the account and risk of the counterparty. If the collateral is received in cash it will be recognized in the balance sheet as in this case the economic advantages and disadvantages will be for the account and risk of the Fund.

Principles for determining the result

General

Investment results are determined by investment income, rises or declines in stock prices, rises or declines in foreign exchange rates and results of transactions in currencies, including forward transactions and other derivatives. Results are allocated to the period to which they relate and are accounted for in the profit and loss account.

Recognition of income

Income items are recognized in the profit and loss account when an increase of the economic potential associated with an increase of an asset or a reduction of a liability has occurred and the amount of this can be reliably established.

Recognition of expenses

Expense items are recognized when a reduction of the economic potential associated with a reduction of an asset or an increase of a liability has occurred and the amount of this can be reliably established.

Investment income

This includes the net cash dividends declared during the year under review, the nominal value of stock dividends declared, interest received and paid and proceeds. Accrued interest at balance sheet date is taken into account.

Notes (continued)

Principles for determining the result (continued)

Changes in value

Realized and unrealized capital gains and losses on securities and currencies are presented under this heading. Realization of capital gains takes place on selling as the difference between the sales value and the average historical cost price. Unrealized capital gains relate to value changes in the portfolio between the beginning of the financial year and the balance sheet date, corrected by the realized gains when positions are sold or settlement takes place.

Principles for cash flow statement

General

This cash flow statement has been prepared using the indirect method. Cash comprises items that may or may not be directly callable. Accounts payable to credit institutions include debit balances in bank accounts.

Attribution to share classes

The administration of the Fund is such that attribution of the results to the different share classes takes place on a daily basis and pro rata. Issues and repurchases of own shares are registered per share class.

Risks relating to financial instruments

General investment risk

The value of investments may fluctuate. Past performance is no guarantee of future results. The net asset value of the Fund depends on developments in the financial markets and may both rise and fall. Shareholders run the risk that their investments may end up being worth less than the amount invested, or even worth nothing. General investment risk can be broken down into different types of risk:

Market risk

The net asset value of the Fund is sensitive to market movements. In addition, investors should be aware of the possibility that value of investments may vary as a result of changes in political, economic or market circumstances. Therefore, no assurance can be given that the sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a share in a sub-fund will not fall below its value at the time of acquisition. More detailed information on the risk profile of the Fund's portfolio can be found in the section on Return and risk on page 8.

Currency risk

All or part of the securities portfolio of the Fund may be invested in currencies, or financial instruments denominated in currencies other than the euro. As a result, fluctuations in exchange rates may have both a negative and a positive effect on the investment result of the Fund. Currency risks may be hedged with currency forward transactions and currency options. Currency risks can be limited by applying relative or absolute currency concentration limits.

As at the balance sheet date, there were no positions in currency derivatives.

The table below shows the gross and net exposure to the various currencies, including cash, receivables and debts. Further information on the currency policy can be found on page 7.

	31/12/2025	31/12/2025	31/12/2025	31/12/2024
Currency exposure	Gross position	Net position	% of	% of
	EUR' 000	EUR' 000	net assets	net assets
CAD	5,551	5,551	9.55	8.21
EUR	81	81	0.14	0.38
USD	52,509	52,509	90.31	91.41
Total	58,141	58,141	100.00	100.00

Concentration risk

Based on its investment policy, the Fund may invest in financial instruments from issuing institutions that operate mainly within the same sector or region, or in the same market. If this is the case – due to the concentration of the investment portfolio of the Fund – events that have an effect on these issuing institutions may have a greater effect on the Fund assets than in the case of a less concentrated portfolio. Concentration risks can be limited by applying relative or absolute country or sector concentration limits.

As at the balance sheet date, there were no positions in stock market index futures contracts.

Notes (continued)

Risks relating to financial instruments (continued)

Market risk (continued)

Concentration risk (continued)

The table below shows the exposure to stock markets through stocks per country in amounts and as a percentage of the Fund's total equity capital.

Total	100.00	100.00

Leverage risk

The Fund may make use of derivative instruments, techniques or structures. They may be used for hedging risks, achieving investment objectives and/or ensuring efficient portfolio management. These instruments may be leveraged, which will increase the Fund's sensitivity to market fluctuations. The risk of derivative instruments, techniques or structures will always be limited within the conditions of the Fund's integral risk management. The degree of leverage in the Fund, measured using the commitment method (where 0% exposure indicates no leverage) over the year, as well as on the balance sheet date, is shown in the table below. The Commitment Method calculates the global exposure by converting the positions in financial derivative instruments into equivalent positions of the underlying assets. The total commitment is quantified as the sum of the absolute values of the individual commitments, after consideration of the possible effects of netting and hedging. The maximum leverage allowed under the UCITS regulation is 110%.

Notes (continued)

Risks relating to financial instruments (continued)

Leverage risk (continued)

	Lowest exposure during the reporting year	Highest exposure during the reporting year	Average exposure during the reporting year	Exposure at the reporting year end
Robeco US Conservative High Dividend Equities N.V.	0%	3%	0%	0%

Credit risk

Credit risk occurs when a counterparty of the Fund fails to fulfil its financial obligations arising from financial instruments in the Fund. Credit risk is limited as far as possible by exercising an appropriate degree of caution in the selection of counterparties. In selecting counterparties, the assessments of independent rating bureaus are taken into account, as are other relevant indicators. Wherever it is customary in the market, the Fund will demand and obtain collateral in order to mitigate credit risk. The figure that best represents the maximum credit risk is given in the table below.

	31/12/2025		31/12/2024	
	USD' 000	% of net assets	USD' 000	% of net assets
Accounts receivable	225	0.39	270	0.42
Cash and cash equivalents	284	0.49	310	0.49
Total	509	0.88	580	0.91

No account is taken of collateral received in the calculation of the total credit risk. Credit risk is contained by applying limits on the exposure per counterparty as a percentage of the Fund assets. As at the balance sheet date there were no counterparties with an exposure of more than 5% of the Fund's total assets. All counterparties are pre-approved by Robeco. Procedures have been established relating to the selection of counterparties, specified on the basis of external credit ratings and credit spreads.

Liquidity risk

We distinguish between asset liquidity risk and funding liquidity risk, which are closely connected:

Asset liquidity risk arises when transactions cannot be executed in a timely fashion at quoted market prices and/or at acceptable transaction cost levels due to the size of the trade. Or in more extreme cases, when they cannot be conducted at all. Asset liquidity risk is a function of transaction size, transaction time and transaction cost.

Funding liquidity risk arises when the redemption requirements of clients or other liabilities cannot be met without significantly impacting the value of the portfolio. Funding liquidity risk will only arise if there is also asset liquidity risk. During the reporting period all client redemptions have been met.

Sustainability risk

The manager systematically incorporates sustainability factors, to the extent these present a material risk to a fund, into its investment and portfolio construction processes, alongside traditional financial risk factors. This is done through ESG scoring methodologies using proprietary sustainability research and external resources which are built into the portfolio construction process.

Processes and controls for sustainability risk integration are embedded in a designated Sustainability risk policy which is maintained by the risk management function and governed by the Risk Management Committee (RMC). The Sustainability risk policy is built on three pillars. The environmental or social characteristics promoted by a fund or sustainable investment objective of a fund is used to identify and assess the relevant material sustainability risk topics. Based on these characteristics or investment objectives sustainability risk is monitored. Sensitivity and scenario analyses are conducted on a frequent basis to assess any material impact climate change risk may have on the portfolio of a fund.

Notes (continued)

Risks relating to financial instruments (continued)

Manager

Robeco Institutional Asset Management B.V. ('RIAM') manages the Fund. In this capacity, RIAM handles the asset management, risk management, administration, marketing and distribution of the Fund. RIAM holds an AIFMD license as referred to in Section 2:65 Wft, as well as a license to manage UCITS as referred to in Section 2:69b Wft. RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (the 'AFM'). RIAM has listed the Fund with AFM. RIAM is a 100% subsidiary of ORIX Corporation Europe N.V. via Robeco Holding B.V. ORIX Corporation Europe N.V. is a part of ORIX Corporation.

Depositary

The assets of the Fund are held in custody by J.P. Morgan SE, Amsterdam Branch. J.P. Morgan SE, Amsterdam Branch is appointed as the depositary of the Fund as referred to in Section 4:62n Wft. The depositary is responsible for supervising the Fund insofar as required under and in accordance with the applicable legislation. The manager, the Fund and J.P. Morgan SE, Amsterdam Branch have concluded a depositary and custodian agreement.

Liability of the depositary

The depositary is liable to the Fund and/or the Shareholders for the loss of a financial instrument under the custody of the depositary or of a third party to which custody has been transferred. The depositary is not liable if it can demonstrate that the loss is a result of an external event over which it in all reasonableness had no control and of which the consequences were unavoidable, despite all efforts to ameliorate them. The depositary is also liable to the Fund and/or the shareholders for all other losses they suffer because the depositary has not fulfilled its obligations as stated in this depositary and custodian agreement either deliberately or through negligence. Shareholders may make an indirect claim upon the liability of the depositary through the manager. If the manager refuses to entertain such a request, the shareholders are authorized to submit the claim for losses directly to the depositary.

Affiliated parties

The Fund and the manager may utilize the services of and carry out transactions with parties affiliated to the Fund, as defined in the BGfo, such as RIAM, Robeco Nederland B.V. and ORIX Corporation. The services entail the execution of tasks that have been outsourced to these parties such as (1) securities lending, (2) hiring temporary staff and (3) issuance and repurchase of the Fund's shares. Transactions that can be carried out with affiliated parties include the following: treasury management, derivatives transactions, lending of financial instruments, credit extension, purchase and sale of financial instruments on regulated markets or through multilateral trading facilities. All these services and transactions are executed at market rates.

Notes to the balance sheet

1. Equities

Movements in the stock portfolio

	2025	2024
	USD' 000	USD' 000
Book value (fair value) at opening date	63,323	56,197
Purchases	15,069	18,480
Sales	(27,524)	(20,054)
Unrealized gains	657	2,021
Realized gains	6,347	6,679
Book value (fair value) at closing date	57,872	63,323

USD 175 thousand of the realized and unrealized results on the equity portfolio relates to exchange rate differences.

A breakdown of this portfolio is given under Schedule of Investments. All investments are admitted to a regulated market and have quoted market prices. A sub-division into regions and sectors is provided under the information on concentration risk under the information on Risks relating to financial instruments.

Transaction costs

Brokerage costs and exchange fees relating to investment transactions are discounted in the cost price or the sales value of the investment transactions. These costs and fees are charged to the result ensuing from changes in value. The quantifiable transaction costs are shown below.

	2025	2024
	USD' 000	USD' 000
Equities	1	2

RIAM wants to be certain that the selection of counterparties for equity transactions (brokers) occurs using procedures and criteria that ensure the best results for the Fund (best execution).

No costs for research from external parties were charged to the Fund during the reporting period.

2. Derivatives

Movements in derivatives

Situation on closing date	58,141	63,857

The authorized share capital of EUR 8.4 million is divided into 8,399,990 ordinary shares and 10 priority shares with a nominal value of EUR 1 each. The priority shares have already been issued. The company's authorized ordinary share capital is divided into four series, of which one is open. Fees are not included in the share premium reserve.

Special controlling rights under the Articles of Association

The 10 priority shares in the company's share capital are held by Robeco Holding B.V. According to the company's Articles of Association, the rights and privileges of the priority shares include the appointment of managing directors and the amendment to the Articles of Association. The Management Board of Robeco Holding B.V. determines how the voting rights are exercised. The Management Board of Robeco Holding B.V. consists of:

K. (Karin) van Baardwijk
M.C.W. (Mark) den Hollander

Assets at closing date	58,141	63,857

10. Assets, shares outstanding and net asset value per share

	31/12/2025	31/12/2024	31/12/2023
Robeco US Conservative High Dividend Equities - EUR G¹			
Fund assets in EUR' 000	49,505	61,668	51,129
Situation of number of shares issued at opening date	1,001,351	1,016,173	1,321,352
Shares issued in financial year	86,098	137,658	60,988
Shares repurchased in financial year	(257,576)	(152,480)	(366,167)
Number of shares outstanding	829,873	1,001,351	1,016,173
Net asset value per share in EUR	59.65	61.58	50.31
Dividend paid per share during the financial year	1.80 ²	1.80 ²	1.60 ²

¹ This share class is quoted in euros (EUR), while the base currency of the Fund is the US dollar (USD). The net assets are therefore stated in thousands of euros.

² This distribution is treated as a dividend for tax purposes, but is recognized as partly paid from the share premium for accounting purposes.

11. Contingent liabilities

As at balance sheet date, the Fund had no contingent liabilities.

Notes to the profit and loss account

Income

12. Investment income

This concerns:

	2025	2024
	USD' 000	USD' 000
Dividends received*	1,212	1,711
Interest	16	18
Total	1,228	1,729

* This concerns net dividends received. Factored into this amount is withholding tax reclaimable from the country that withheld the tax plus withholding tax that is subject to a remittance reduction from the Dutch tax authorities. The remittance reduction is offset against the dividend tax payable on dividends distributed by the fund.

Costs

13. Management fee and service fee

The management fee and service fee are charged by the manager. The fees are calculated daily on the basis of the Fund assets.

Management fee and service fee specified in the prospectus

	%
Management fee	0.50
Service fee ¹	0.16

¹ For the share classes, the service fee is 0.16% per year on assets up to EUR 1 billion, 0.14% on assets above EUR 1 billion, and 0.12% on assets above EUR 5 billion.

The management fee covers all current costs resulting from the management and marketing of the Fund. If the manager outsources operations to third parties, any costs associated with this will also be paid from the management fee.

The service fee paid to RIAM covers the administration costs, custody fees (includes custody fees and bank charges), depositary services fees, Fund agent fees, the costs of the external auditor, other external advisers, regulators, costs relating to reports required by law, such as the annual and semi-annual reports, and the costs relating to the meetings of shareholders. The costs for the external auditor incurred by the Fund are paid by RIAM from the service fee. The Fund's result therefore does not include the costs for the external auditor. Of the costs paid by RIAM for the external auditor, USD 16 thousand related to the audit of Robeco US Conservative High Dividend Equities N.V. The other costs paid by RIAM for the external auditor relate exclusively to assurance activities for the regulator that the Fund complies with the UCITS provisions and assurance activities for the examination of the prospectus.

14. Performance fee

Robeco US Conservative High Dividend Equities N.V. is not subject to a performance fee.

15. Ongoing charges

	Robeco US Conservative High Dividend Equities - EUR G	
	2025	2024
	%	%
Management fee	0.50	0.50
Service fee	0.16	0.16
Total	0.66	0.66

The percentage of ongoing charges is based on the average net assets per share class. The average assets are calculated on a daily basis. The ongoing charges include all costs charged to the share classes in the reporting period, excluding the costs of transactions in financial instruments and interest charges. The ongoing charges do not include any payment of entry or exit costs charged by distributors.

Notes to the profit and loss account (continued)

Costs (continued)

16. Maximum costs

For some cost items, the Fund's prospectus specifies a maximum percentage of average net assets. The table below compares these maximum percentages with the costs actually charged.

	2025 USD' 000	2025 % of net assets	Maximum as specified in the prospectus ¹
Management fee for Robeco US Conservative High Dividend Equities - EUR G	314	0.50	0.50
Service fee for Robeco US Conservative High Dividend Equities - EUR G	100	0.16	0.16

¹The prospectus also specifies a maximum percentage of the total cost. This is 0.76% for the Robeco US Conservative High Dividend Equities - EUR G share class.

17. Turnover rate

The turnover rate for the reporting period was 31% (for the previous reporting period it was 34%.) This rate shows the rate at which the Fund's portfolio is turned over and is a measure of the incurred transaction costs resulting from the portfolio policy pursued and the ensuing investment transactions. The turnover rate is determined by expressing the amount of the turnover as a percentage of the average Fund assets. The average Fund assets are calculated on a daily basis. The amount of the turnover is determined by the sum of the purchases and sales of investments less the sum of issuance and repurchase of own shares. The sum of issues and repurchases of own participating units is determined as the balance of all issues and repurchases in the Fund. Cash and money-market investments with an original life to maturity of less than one month are not taken into account in the calculation.

18. Transactions with affiliated parties

No transactions were effected with affiliated parties during the reporting period other than calculated management costs and the service fee. During the reporting period the Fund paid RIAM the following amounts in management fee and service fee:

	Counterparty	2025 USD' 000	2024 USD' 000
Management fee	RIAM	314	305
Service fee	RIAM	100	97

19. Fiscal status

The Fund has the status of a fiscal investment institution. A further description of its fiscal status is included in the general information of the management report on page 5.

20. Proposed profit appropriation

For the financial year 2025, dividend distribution will take place on the basis of the fiscal result in order to fulfill the fiscal distribution obligation. Based on the number of shares outstanding on 31 December 2025 it has been proposed to determine the dividend per share for the financial year 2025 at: EUR 1.40 per share (previous year: EUR 1.80) for the Robeco US Conservative High Dividend Equities - EUR G share class.

This proposal is based mainly on the taxable profits for the purposes of the distribution requirement under the applicable tax regime. If necessitated by legislation and regulations or changes in the number of shares outstanding, an amended dividend proposal will be submitted to the General Meeting of Shareholders. If this proposal is accepted, the dividend will be payable according to the schedule in the table below.

Shareholders will be offered the opportunity to reinvest the dividend (less dividend tax) in Robeco US Conservative High Dividend Equities - EUR G shares. Costs charged by distributors to their customers for this will be borne by the shareholder. In some countries and with some distributors, reinvestment will not be possible for technical reasons.

Notes to the profit and loss account (continued)

Other information

Provisions regarding appropriation of the result

According to article 20 of the Fund's Articles of Association, the profit, after payment of dividend on the priority shares and less allocations to the reserves deemed desirable by the management board shall be at the disposal of the General Meeting of Shareholders.

Directors' interests

The daily policymakers of RIAM (the management board and manager of the Fund) had the following personal interests in the investments of the Fund on 1 January.

As at 1 January 2025	Description	Quantity
Alphabet	shares	320
Amazon	shares	200
Apple	shares	27
Eli Lilly	shares	15
Meta Platforms	shares	88
Microsoft	shares	6
NVIDIA	shares	85

The daily policymakers had no personal interests in the investments of the Fund on 31 December 2025.

Independent auditor's report

To the General Meeting of Shareholders of Robeco US Conservative High Dividend Equities N.V. and the Management Board of Robeco Institutional Asset Management B.V.

Report on the audit of the financial statements 2025 included in the annual report

Our opinion

We have audited the financial statements 2025 of Robeco US Conservative High Dividend Equities N.V. based in Rotterdam (hereafter also: "the fund").

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Robeco US Conservative High Dividend Equities N.V. as at 31 December 2025 and of its result for 2025 in accordance with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

1. the balance sheet as at 31 December 2025;
2. the profit and loss account for 2025; and
3. the notes comprising a summary of the accounting policies and other explanatory information.

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the 'Our responsibilities for the audit of the financial statements' section of our report.

We are independent of Robeco US Conservative High Dividend Equities N.V. in accordance with the EU Regulation on specific requirements regarding statutory audit of public-interest entities, the Wet toezicht accountantsorganisaties (Wta, Audit firms supervision act), the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics for Professional Accountants).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Forvis Mazars Accountants N.V. with its registered office in Rotterdam (Trade register Rotterdam nr. 24402415)

Information in support of our opinion

We designed our audit procedures in the context of our audit of the financial statements as a whole and in forming our opinion thereon. The following information in support of our opinion was addressed in this context, and we do not provide a separate opinion or conclusion on these matters.

Materiality

Based on our professional judgement we determined the materiality for the financial statements as a whole at € 581 thousand. The materiality is based on 1% of the net asset value (shareholder's equity) of the fund as at 31 December 2025. We consider net asset value as the most appropriate benchmark as this is the most important factor in the sector for investment funds. The percentage used to calculate the materiality level is determined on the basis of the type of investments of the fund.

We have also taken into account misstatements and/or possible misstatements that in our opinion are material for the users of the financial statements for qualitative reasons.

We agreed with the Management Board of Robeco Institutional Asset Management B.V. (hereafter "RIAM" or "the manager") that misstatements in excess of € 17 thousand which are identified during the audit, would be reported to them, as well as smaller misstatements that in our view must be reported on qualitative grounds.

Scope of the audit

The fund has no employees and its portfolio management, risk management are therefore performed by RIAM and service providers engaged by RIAM. We are responsible to obtain sufficient and appropriate audit evidence with regard to services which are provided by RIAM and its service providers. We gained insight into the nature and significance of these services and based on this assessment we identified the risks of material misstatements and designed audit procedures to address these risks.

As part of our audit procedures we rely on the procedures described in the ISAE 3402 type II report of RIAM. We inspected the ISAE 3402 type II report and evaluated the relevance of internal controls tested by the external auditor of RIAM and the conclusions reached on the design, implementation and operating effectiveness of these internal controls. We also performed these procedures on activities outsourced to the service providers engaged by RIAM and as such inspected ISAE type II reports of separate J.P. Morgan entities providing accounting, custody, transfer agent, securities lending and information technology services.

Based on our audit procedures, we determined that the internal controls within RIAM and service providers engaged by RIAM which are relevant for the audit of the financial statements of the fund, are sufficient to rely on in the performance of our audit of the fund's financial statements.

Audit approach fraud risks and non-compliance with laws and regulations

The manager's fraud risk assessment and response to fraud risks

As part of our audit, we have obtained an understanding of the fund and its environment, and the funds risk management in relation to fraud. This includes obtaining an understanding of the manager's processes for identifying and responding to fraud risks. We refer to the Risk Management paragraph of the report by the manager for the fraud risk assessment of the manager of the fund.

Our fraud risk assessment

We assessed fraud risk factors with respect to financial reporting fraud, misappropriation of assets and corruption. We evaluated whether those factors indicate that a risk of material misstatement in the financial statements is present. As in all our audits, we paid specific attention for the risk of management override of controls. We identified this risk in the area where manual journal entries are made in the preparation of the financial statements. We rebutted the presumed fraud risk related to revenue recognition. The fund invests in listed securities on regulated markets and, therefore, revenue recognition is non-complex. In addition, the involvement of third parties like the custodian and depositary limit the possibilities to perpetrate fraud.

Our response to the identified and assessed fraud risks

We have evaluated the design and implementation and, where considered appropriate, tested the operating effectiveness of internal controls that mitigate fraud risks. Based on our risk criteria we tested material manual journal entries made in the preparation of the financial statements. In addition, we also incorporated an element of unpredictability in our audit.

Our response to the identified and assessed risks of non-compliance with law and regulations

We have obtained an understanding of the relevant laws and regulations. We have identified the following laws and regulations that have an indirect effect on the financial statements:

- the requirements by or pursuant to the Act on Financial Supervision (Wet op het financieel toezicht, Wft);
- the anti-money laundering laws and regulations (Wwft).

We held enquiries with the manager of the fund as to whether the fund is in compliance with these laws and regulations. We inspected relevant correspondence with supervisory authorities. We also obtained a written representation from the manager of the fund that all known instances of identified and suspected non-compliance with laws and regulations were disclosed to us.

Our observations

The aforementioned audit procedures have been performed in the context of the audit of the financial statements. Consequently they are not planned and performed as a specific investigation regarding fraud and non-compliance with law and regulations. Based on our audit procedures we have no indications for fraud and non-compliance that are considered material for our audit.

Audit approach to going concern

In preparing the financial statements, the manager of the fund must consider whether the fund is able to continue as a going concern. Management must prepare financial statements on the going concern basis unless the manager of the fund intends to liquidate the fund or cease operations or, when termination is the only realistic alternative.

The manager of the fund has not identified any circumstances that could threaten the continuity of the fund and thus concludes that the going concern assumption is appropriate for the fund.

Our audit of the financial statements requires us to determine whether the going concern assumption used by management is acceptable. In doing so, based on the audit evidence obtained, we must determine whether there are any events or circumstances that might cast reasonable doubt on the fund's ability to continue as a going concern.

Our observations

Most importantly, we have assessed that the structure of the fund limits the going concern risk as the fund only invests in liquid assets and is not leveraged with external debt. Based on the procedures performed, we are of the opinion that the financial statements have been properly prepared on the going concern basis.

Our key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements. We have communicated the key audit matters to the Management Board of RIAM. The key audit matters are not a comprehensive reflection of all matters discussed.

Description	Summary audit procedures and our observations
<p>Existence and valuation of investments</p> <p>The fund's investments are the most important assets on the balance sheet and consist of listed equities. The investments are valued at fair value. We refer to the accounting principles in the notes to the financial statements in which the determination of the fair value of the investments is disclosed.</p> <p>We estimate the risk of a material misstatement in the valuation of the investments to be low as the investment portfolio consists of liquid, listed investments that are traded on an active market.</p> <p>Due to the significance of the investments in relation to the financial statements as a whole, we identify the existence and valuation of investments as a key audit matter.</p>	<p>Our main audit procedures:</p> <ul style="list-style-type: none"> we have assessed the design, implementation and operating effectiveness of the relevant controls at the manager of the fund regarding the existence and valuation of investments; we have assessed the design, implementation and operating effectiveness of the relevant J.P. Morgan service providers regarding the existence and valuation of investments; we verified the existence of investments through directly received confirmations from the custodian; we verified the valuation of investments by comparing the applied valuation with our independent valuation; we evaluated whether the disclosure of the investments in the financial statements is adequate. <p>Our observation:</p> <p>Based on our audit procedures, we conclude that the investments exist and that the investments are adequately valued. The disclosure of the composition and movements in investments is adequate.</p>
<p>Accuracy of operating income</p> <p>Operating income consists of direct and indirect investment results.</p> <p>Direct investment results mainly consists of dividends received.</p> <p>Indirect investment results consists of realized and unrealized gains and losses.</p> <p>We refer to the principles for determining the result in the notes to the financial statements in which the determination of operating income has been disclosed.</p>	<p>Our main audit procedures:</p> <ul style="list-style-type: none"> we have assessed the design, implementation and operating effectiveness of the relevant controls at the manager of the fund regarding operating income; we have assessed the design, implementation and operating effectiveness of the relevant controls at J.P. Morgan regarding operating income; we reconciled the direct investment results (dividend income) and indirect realized gains and losses with directly received confirmations from the custodian;

Description	Summary audit procedures and our observations
<p>Because the development in net asset value which is mainly determined by operating income is expected to be the most relevant parameter for the shareholder's, we considered accuracy of operating income as a key audit matter.</p>	<ul style="list-style-type: none"> • we analysed the reported unrealized gains and losses given the expected unrealised revenues as a function of the year-end position of equities, the opening position of equities and indirect realised gains and losses; • we evaluated whether the disclosure of the operating income in the financial statements is adequate. <p>Our observation: Based on our audit procedures, we conclude that the operating income has been recognized accurately. The disclosure of the operating income is adequate.</p>

Compliance with the Regulatory Technical Standard of the SBR domain, including XBRL tagging, not audited

Our audit includes assessing whether the prepared financial statements comply with the legal requirements of Part 9, Book 2 of the Dutch Civil Code. Our auditor's report has been issued on the prepared financial statements and will be attached to the digitally filed annual report. This means that compliance with all requirements of the Regulatory Technical Standard of the SBR Trade Register domain (including the applied eXtensible Business Reporting Language (XBRL) tags) has not been part of our audit.

Report on the other information included in the annual report

The annual report contains other information, in addition to the financial statements and our auditor's report thereon.

Based on the following procedures performed, we conclude that the other information:

- is consistent with the financial statements and does not contain material misstatements;
- contains all the information regarding the manager's report and the other information as required by Part 9 of Book 2 of the Dutch Civil Code.

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements.

By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is substantially less than the scope of those performed in our audit of the financial statements.

The manager of the fund is responsible for the preparation of the other information, including the management report in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information as required by Part 9 of Book 2 of the Dutch Civil Code.

Report on other legal and regulatory requirements

Engagement

We were appointed by the General Meeting as auditor of the fund as of the audit for the year 2024.

No prohibited non-audit services

We have not provided prohibited non-audit services as referred to in Article 5(1) of the EU Regulation on specific requirements regarding statutory audit of public-interest entities.

Description of responsibilities regarding the financial statements

Responsibilities of the manager of the fund for the financial statements

The manager of the fund is responsible for the preparation and fair presentation of the financial statements in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, the manager of the fund is responsible for such internal control as the manager determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, the manager of the fund is responsible for assessing the fund's ability to continue as a going concern. Based on the financial reporting framework mentioned, the manager of the fund should prepare the financial statements using the going concern basis of accounting, unless the manager of the fund either intends to liquidate the fund or to cease operations, or has no realistic alternative but to do so.

The manager of the fund should disclose events and circumstances that may cast significant doubt on the fund's ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit engagement in a manner that allows us to obtain sufficient appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not detect all material misstatements, whether due to fraud or error, during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgement and have maintained professional scepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit included among others:

- identifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the fund's internal control;
- evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the manager of the fund;
- concluding on the appropriateness of the manager's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a fund to cease to continue as a going concern;
- evaluating the overall presentation, structure and content of the financial statements, including the disclosures; and
- evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Management Board of RIAM regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit. In this respect we also submit an additional report to the audit committee in accordance with Article 11 of the EU Regulation on specific requirements regarding statutory audit of public-interest entities. The information included in this additional report is consistent with our audit opinion in this auditor's report.

We provide the Management Board of RIAM with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Management Board of RIAM, we determine the key audit matters: those matters that were of most significance in the audit of the financial statements. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, not communicating the matter is in the public interest.

Rotterdam, 22 April 2026

Forvis Mazars Accountants N.V.

Annex IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Robeco US Conservative High Dividend Equities N.V.

Legal entity identifier: 213800YSDD2D02YCJT08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: __%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 74.9% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: __%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promotes the following Environmental and Social characteristics:

2. All equity holdings granted the right to vote and Robeco exerted that right by voting according to Robeco's Proxy Voting Policy, unless impediments occurred (e.g. share blocking).
3. The fund avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program. When engagement deemed highly unlikely to succeed, the company was excluded directly.
4. The fund's weighted water and waste footprints were at least better than that of the General Market Index. The Sub-fund's weighted carbon footprint (scope level 1, 2 and 3 upstream) was better than the General Markets Index.
5. The fund's weighted average ESG score was at least better than that of the General Market Index.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability disclosure (unaudited)

● *How did the sustainability indicators perform?*

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on average positions and latest available data as at 31/12/2025.

1. The portfolio contained on average 0.00% investments that are on the Exclusion list as result of the application of the applicable exclusion policy. Unless sanctions stipulate specific timelines, exclusions apply within three months after the announcement. If selling is not possible for liquidity reasons, then buying is not allowed. Once selling is possible at a reasonable price, holdings will be sold.
2. On behalf of the fund votes, were cast on 1361 agenda items at 96 shareholders' meetings.
3. 0.67% of the companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
4. The fund's weighted score for water and waste footprint were respectively 76.52% and 92.03% better than the general market index. The fund's weighted carbon footprint (scope level 1, 2 and 3 upstream) was 16.69% better than that of the General Markets Index.
5. The fund's weighted average ESG score was 18.21 against 18.51 for the general market index. A lower score means a lower risk.

● *...and compared to previous periods?*

Sustainability indicator	2025	2024	2023	2022
Number of votes casted	1361	1374	1546	1437
Weighted score for:				
- Carbon footprint (% better than the general market index)	16.69%	8.97%	4.26%	9.79%
- Water footprint (% better than the general market index)	76.52%	96.85%	87.40%	65.77%
- Waste footprint (% better than the general market index)	92.03%	99.92%	10.53%	34.53%
Companies in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises	0.67%	0.91%	0.00%	0.00%
Weighted average ESG Score	18.21	20.16	20.68	21.06
Investments on exclusion list	0.00%	0.00%	0.00%	0.00%

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The sustainable investments contributed to the UN Sustainable Development Goals ("SDGs"), that have both social and environmental objectives. These are 17 goals that are globally recognised and include environmental goals such as climate action, clean water, life on land and water and social goals such as zero hunger, gender equality, education, etc. Robeco has developed a proprietary framework based on the UN SDGs through which an issuer's contribution to such SDGs is determined through a 3-step process. This process starts with a sector baseline on which a company's products are analysed to examine contribution to the society and environment. Further, the operational processes involved in creating such products is checked along with any controversies/litigation claims and remediation actions taken which are perused before a final SDG score is determined. The final score ranges between high negative (-3) to high positive (+3) and only those issuers which achieve positive SDG scores (+1, +2 and, +3) are regarded as Sustainable Investments.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The sustainable investments did no significant harm to any environmental or social sustainable investment objective by considering a principal adverse impact and aligning with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, sustainable investments score positively on Robeco's SDG Framework, and therefore do not cause significant harm.

→ *How were the indicators for adverse impacts on sustainability factors taken into account?*

Mandatory principal adverse impact indicators are considered through Robeco's SDG Framework, either directly or indirectly, when identifying sustainable investments for the Fund. In addition, voluntary environmental and social indicators are taken into account, depending on their relevance for measuring impacts on the SDGs and the availability of data. A detailed description of the incorporation of principal adverse impacts is available via Robeco's Principal Adverse Impact Statement published on the Robeco website. In this statement, Robeco sets out its approach to identifying and prioritizing principal adverse impacts, and how principal adverse impacts are considered as part of Robeco's investment due diligence process and procedures relating to research and analysis, exclusions and restrictions and/or voting and engagement. This description also explains how principal adverse impact indicators are considered by the SDG Framework.

The following PAIs were considered in the fund:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability disclosure (unaudited)

PAI 1, table 1 was considered for scope 1, 2 and 3 (upstream) Green House Gas emissions via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

PAI 2, table 1 was considered for the carbon footprint via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

PAI 3, table 1 was considered for the Green House Gas intensity of investee companies via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

PAI 4, table 1 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).

PAI 5, table 1 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions. Robeco is committed to contribute to the goals of the Paris Agreement and to achieving net zero carbon emissions by 2050. The portfolio decarbonization targets are derived from the P2 pathway from the IPCC 1.5-degree scenario of 2018. The P2 pathway is composed of the following emission milestones: 49% reduction of GHG emissions in 2030 and -89% reduction of GHG emissions in 2050, both relative to 2010 baseline.

PAI 6, table 1 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. Robeco's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).

PAI 7, table 1 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. Robeco is developing methods to evaluate the materiality of biodiversity for our portfolios, and the impact of our portfolios on biodiversity. Based on such methods Robeco will set quantified targets in order to combat biodiversity loss, latest by 2024.

For relevant sectors, biodiversity impact is considered in fundamental SI research analysis. Robeco is developing a framework to consider this across all investments.

Robeco's Exclusion policy covers the exclusion of palm oil producers in which a minimum percentage of RSPO certified hectares of land at plantations as detailed in Robeco's exclusion policy.

PAI 8, table 1 regarding Water emissions was considered via engagement. Within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to water. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

PAI 9, table 1 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within Robeco's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When Robeco deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.

PAI 10, table 1 regarding violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process is applied where Robeco deems a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, Robeco will exclude a company from its investment universe.

PAI 11, table 1 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. Robeco supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means Robeco will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.

PAI 12, table 1 regarding unadjusted gender pay-gap was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions (e.g. UK, California). Companies are encouraged to improve such disclosures.

PAI 13, table 1 regarding board gender diversity was considered via engagement. In 2022, Robeco launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.

PAI 14, table 1 regarding exposure to controversial weapons was considered via exclusions. For all strategies Robeco deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be

Sustainability disclosure (unaudited)

controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.

PAI 4, table 2 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. Robeco engages with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".

PAI 5, table 3 regarding the share of investments in investee companies without any grievance or complaintshandling mechanism was considered.

PAI 8, table 3 regarding excessive CEO pay ratio was considered via engagement under the engagement program "Responsible Executive Remuneration".

→ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy and Robeco's SDG Framework.

Robeco's Exclusion Policy includes an explanation of how Robeco acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behavior of companies. Robeco continuously screens its investments for breaches of these principles. In case of a breach, the company will be excluded or engaged with, and is not considered a sustainable investment.

Robeco's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, Robeco checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered principal adverse impacts on sustainability factors as referred to in Annex I of the SFDR Delegated Act.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- o Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.77% of the net assets, compared to 3.61% of the benchmark.
 - Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.67% of the net assets, compared to 0.61% of the benchmark.
 - The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 0.00% of the net assets, compared to 0.47% of the benchmark.
 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1) was 0.00% of the net assets, compared to 0.34% of the benchmark.

Sustainability disclosure (unaudited)

o Via the environmental footprint performance targets of the fund, the following PAIs were considered:

- The carbon footprint of the portfolio (PAI 2, table 1) was 260 tons per EUR million EVIC, compared to 357 tons per EUR million EVIC for the benchmark.
- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 0.00% of the net assets, compared to 0.47% of the benchmark.
- The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.05 tons of the benchmark.
- The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 0.08 tons, compared to 34.06 tons of the benchmark.

Post-investment, the following principal adverse impacts on sustainability factors are taken into account:

o Via the application of the voting policy, the following PAIs were considered:

- The greenhouse gas emissions (PAI 1, table 1) of the portfolio were 13,966 tons, compared to 17,586 tons for the benchmark.
- The carbon footprint of the portfolio (PAI 2, table 1) was 260 tons per EUR million EVIC, compared to 357 tons per EUR million EVIC for the benchmark.
- The green house gas intensity of the portfolio (PAI 3, table 1) was 819 tons per EUR million revenue, compared to 1,434 tons per EUR million revenue for the benchmark.
- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.77% of the net assets, compared to 3.61% of the benchmark.
- The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources was 55.85% of the net assets, compared to 50.87% of the benchmark.
- The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources voor de funds was 53.30% of the net assets, compared to 57.79% of the benchmark.
- The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6, Table 1) was 0.16 GWh, compared to 0.37 GWh for the benchmark.
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.67% of the net assets, compared to 0.61% of the benchmark.
- The share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 0.04%, compared to 0.22% for the benchmark.
- The share of investments in investee companies without grievance / complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 71.06%, compared to 64.05% for the benchmark.
- The average unadjusted gender pay gap of investee companies (PAI 12, Table 1) was 11.63%, compared to 9.00% for the benchmark.
- The average ratio of female to male board members in investee companies expressed as a percentage of all board members (PAI 13, Table 1) was 35.26%, compared to 34.31% for the benchmark.
- Indicators in relation to social and employee matters (PAI 5-7, Table 3).
- The average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees (excluding the highest compensated individual) (PAI 8, Table 3) was 342, compared to 309 for the benchmark.

o Via Robeco's entity engagement program, the following PAIs were considered:

- The greenhouse gas emissions (PAI 1, table 1) of the portfolio were 13,966 tons, compared to 17,586 tons for the benchmark.
- The carbon footprint of the portfolio (PAI 2, table 1) was 260 tons per EUR million EVIC, compared to 357 tons per EUR million EVIC for the benchmark.
- The green house gas intensity of the portfolio (PAI 3, table 1) was 819 tons per EUR million revenue, compared to 1,434 tons per EUR million revenue for the benchmark.
- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1) was 2.77% of the net assets, compared to 3.61% of the benchmark.
- The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources was 55.85% of the net assets, compared to 50.87% of the benchmark.
- The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5, Table 1), expressed as a percentage of total energy sources voor de funds was 53.30% of the net assets, compared to 57.79% of the benchmark.
- The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6, Table 1) was 0.16 GWh, compared to 0.37 GWh for the benchmark.
- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7, Table 1) was 0.00% of the net assets, compared to 0.47% of the benchmark.
- The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8, Table 1) were 0.00 tons, compared to 0.05 tons of the benchmark.
- The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average were 0.08 tons, compared to 34.06 tons of the benchmark.

Sustainability disclosure (unaudited)

- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.67% of the net assets, compared to 0.61% of the benchmark.
- The share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 0.04%, compared to 0.22% for the benchmark.
- The share of investments in investee companies without grievance / complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI 11, Table 1) was 71.06%, compared to 64.05% for the benchmark.
- The average unadjusted gender pay gap of investee companies (PAI 12, Table 1) was 11.63%, compared to 9.00% for the benchmark.
- The average ratio of female to male board members in investee companies expressed as a percentage of all board members (PAI 13, Table 1) was 35.26%, compared to 34.31% for the benchmark.
- Exposure to companies in violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1) was 0.67% of the net assets, compared to 0.61% of the benchmark.
- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of the fund that cause adverse impact might be selected for engagement.

More information is available via Robeco's Principal Adverse Impact Statement, published on Robeco's website.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2025 through 31 December 2025

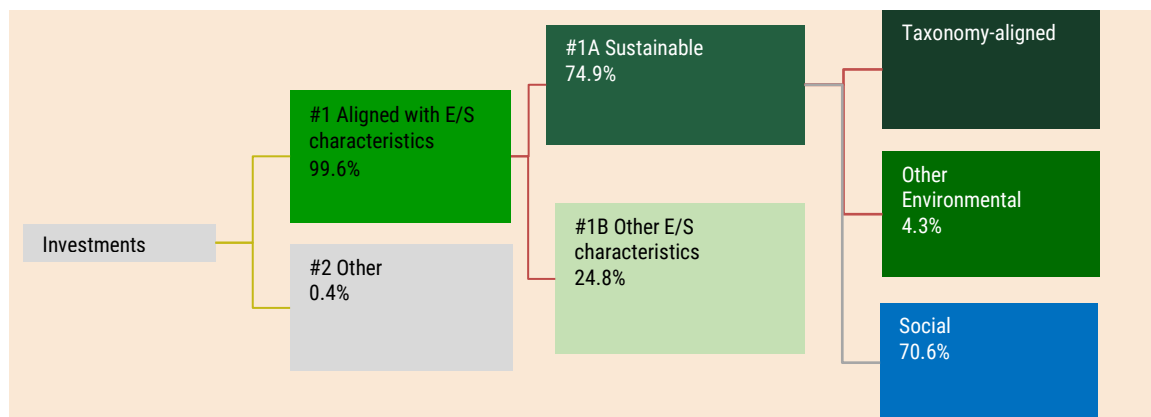

Largest Investments	Sector	% Assets	Country
Microsoft Corp	Software	3.96%	United States
Apple Inc	Technology Hardware, Storage & Peripherals	3.94%	United States
Alphabet Inc (Class A)	Interactive Media & Services	2.97%	United States
Amazon.com Inc	Multiline Retail	2.71%	United States
Visa Inc	Diversified Financial Services	2.59%	United States
Walmart Inc	Food & Staples Retailing	2.45%	United States
Johnson & Johnson	Pharmaceuticals	2.40%	United States
Procter & Gamble Co/The	Household Products	2.27%	United States
AbbVie Inc	Biotechnology	2.20%	United States
Cisco Systems Inc	Communications Equipment	2.20%	United States
International Business Machines Corp	IT Services	2.19%	United States
Royal Bank of Canada	Banks	1.97%	Canada
AT&T Inc	Diversified Telecommunication Services	1.96%	United States
Verizon Communications Inc	Diversified Telecommunication Services	1.93%	United States
Costco Wholesale Corp	Food & Staples Retailing	1.90%	United States

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Trading Companies & Distributors	0.21%
Auto Components	0.06%
Health Care REITs	0.03%
Cash and other instruments	0.38%

Sustainability disclosure (unaudited)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

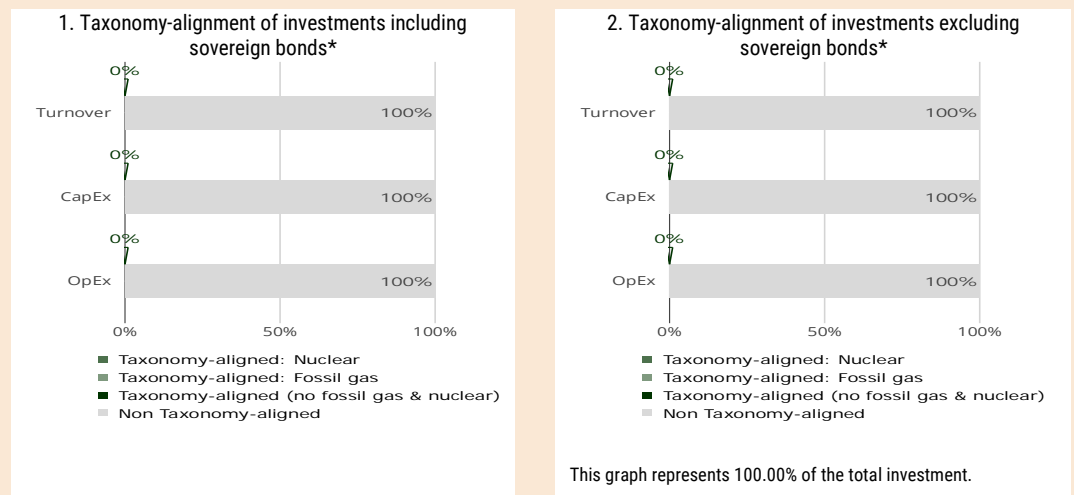

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage Taxonomy Alignment measured in percentage of CAPEX was 0.00%, measured in percentages of revenues was 0.00%. The percentages taxonomy alignment were 0.00% in previous years.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainability disclosure (unaudited)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.3%. This concerns investments with a positive score on one of more of the following SDG's, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

What was the share of socially sustainable investments?

70.6%. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The use of cash, cash equivalents and derivatives is included under "not sustainable". The mandate may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the mandate were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the mandate was improved further by focusing on material information with regards to Environmental, Social and Governance factors. 23 holdings were under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. The Environmental footprint was more than 10% lower than the reference index.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
