

Entry- and exit fees Dutch funds

Robeco believes that it is good stewardship to protect shareholders in a mutual fund from performance dilution caused by transaction costs arising from subscriptions and redemptions. For that reason an entry- and exit fee (also called swing pricing) is used to protect existing shareholders in our funds.

The actual factors can be found below. Please note that in the case of large cashflows the entry- or exit fee may be amended to cover for the estimated additional transaction costs.

More information regarding the methodology can be found in the Swing Pricing Flyer on the website robeco.com/riam.

Entry- and exit fee incorporated in the net asset value (swing)

The transaction price for these funds is the net asset value of the fund -- depending on the net cash flow - plus or minus the entry- or exit fee.

Entry- and exit fee incorporated in the net asset value (swing)

| <i>Funds</i> | <i>Threshold</i> | <i>Entry fee</i> | <i>Exit fee</i> |
|---|------------------|------------------|-----------------|
