

Robeco Global DM Conservative Equities Fund (AUD)

As of 30 September 2020

Robeco Global DM Conservative Equity Fund (AUD) invests in low-volatile stocks all over the world in developed countries. The fund's long-term aim is to achieve returns comparable to those on global developed equity stocks, that show lower expected volatility than average global equity. The selection of these low-risk stocks is carried out using a quantitative model, which ranks stocks in a variety of ways, including market sensitivity, volatility, valuation and sentiment.

Daily tradable	Yes
Distribution paid	Yes
Responsible entity	Equity Trustees Limited

Fees

Management fee	0.65%
Buy/Sell spread	0.13% / 0.09%

Investment Objective

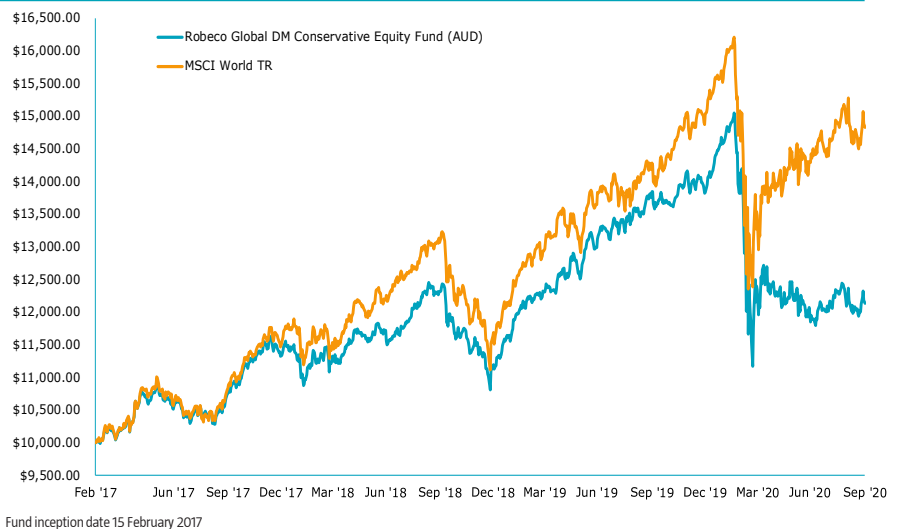

The objective of the Fund is to deliver long-term equity return at a lower downside risk than that of the Reference Index. It aims to achieve the highest long-term Sharpe ratio (the average return earned in excess of the risk-free rate per unit of volatility or total risk), delivering returns equal to or greater than its Reference index over a full market cycle.

Expectation of Fund Manager

The Global Developed Conservative Equities fund (AUD) invests in low volatility stocks with lower expected downside risk and good upside potential. The more stable stocks tend to be overlooked by investors, though they offer relatively high returns given their risk profile. We expect the fund to do particularly well during down markets and volatile market conditions. In a very bullish environment, the fund could lag the overall market, yet still deliver good absolute returns. In the long term, we expect stable equity returns and high income with considerably lower downside risk.

Net Performance

Growth of \$10,000

Manager's Comments

Performance

The strategy outperformed the market index last month, although YTD numbers remain weak. Main positive contributor in September was holding the Japanese telecom company NTT DoCoMo, which will be taken over by the related Nippon Telegraph & Telephone. Moreover, holding Swedish real estate company helped relative performance, as did the underweight in tech-related stocks such as Amazon, Facebook, Apple, and Tesla. Holding several financials such as Munich Re (Germany), ASX (Australia) and CI Financial (Canada) detracted from performance. From a factor perspective, the low-risk factor contributed positively in September, erasing some of the 2020 losses.

ESG integration policy

Environmental, Social and Governance (ESG) factors are systematically integrated in the highly disciplined investment process, by using the ESG scores from the RobecoSAM Corporate Sustainability Assessment. The ESG integration aims for a total ESG score of the portfolio higher than the index. Moreover, the scores on the Environmental, Social and Governance dimensions should also be higher than the index, to ensure that the ESG enhancement is reached across all three dimensions. This ensures that stocks with higher ESG scores are more likely to be included in the portfolio while stocks of companies that have very poor ESG scores are more likely to be divested from the portfolio. With these portfolio construction rules we aim for an ESG profile of the fund that is above average compared to its peers. In addition, stocks with corporate governance issues or stocks that have major litigation or regulatory risk may be excluded from the investable universe. Next to ESG integration, Robeco has an exclusion policy and conducts proxy voting and engagement activities based on International Corporate Governance Network objectives.

Sector allocation

The Global Conservative Developed Equities fund (AUD) is not benchmark driven. It uses a quantitative stock selection model for bottom-up selection of stocks with low expected absolute risk and high expected return characteristics. The current weights in defensive sectors are high compared to regular indices. This is due to the fact that these sectors contain a relatively large number of stable and attractively priced stocks.

Sector allocation		Deviation index
Consumer Staples	17.6%	17.6%
Financials	16.7%	16.7%
Information Technology	12.6%	12.6%
Health Care	12.5%	12.5%
