

Risk Disclosures

INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the full amount invested.

1. Robeco Credit Income ("the Fund") invests primarily in bonds and debt securities issued by public- or private-sector entities.
2. The Fund may invest in financial derivative instruments and is subject to high leverage risk and risks of implementing active financial derivative instrument and currency positions not correlated with the underlying assets. The Fund may have a net leveraged exposure of more than 100% of its net asset value. This will further magnify any potential negative impact of any change in the value of the underlying asset on the Fund. Other risks associated with derivatives include substantial counterparty, liquidity and hedging risks, as well as higher volatility or even a total loss of the Fund's assets within a short period of time.
3. The Fund invests in debt securities and is therefore subject to credit risk, interest rate risk, risk of investment in non-investment grade or unrated securities and valuation risk. The Fund also invests in debt instruments with loss-absorption features, which are highly complex and are of higher risk, potentially resulting in a significant or total reduction in value.
4. The Fund is also subject to currency risk, liquidity risk and counterparty risk.
5. The Fund may engage in securities lending transactions which may involve the risk that the recipient may fail to return the lent securities on the agreed date or furnish the requested additional collateral if required. This could result in losses and negatively impact the Fund's net asset value.
6. The Fund may, at its discretion, pay dividends out of capital. Distributions out of capital may result in an immediate reduction of the net asset value per share of the relevant class. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
7. Investor should not invest in the Fund solely based on the information provided in this document and should read the offering documents for details (including the risk factors).

Robeco Credit Income

Delivering an attractive yield through the credit cycle

- Globally diversified
- Actively managed
- Quality-tilted
- Consistent income

^Annualized dividend yield

5.9%

(Aims to pay dividend on a monthly basis. Dividend yield is not guaranteed and may be paid out of capital. Refer to Risk Disclosures 6)

ASSET MANAGEMENT SINCE 1929

ROBECO
The Investment Engineers

^ For Robeco Credit Income Bx USD share class, as of end June 2026. Annualized dividend yield is calculated with the following formula: (Dividend payout per share / Net Asset Value (NAV) per share on the last business day of the previous month the dividend was paid in) x number of distributions per year x 100%. Positive dividend yield does not imply positive return. Dividend yield is not guaranteed and is not indicative of the return of the fund. The yield figure is for reference only. Actual dividend payouts are at the discretion of the Directors of the Fund. The fund may pay dividend out of capital. Distributions out of capital may result in the reduction of an investor's original capital invested in the fund or from any capital gains attributable to that original investment of the fund. Also, any distributions involving the capital and/or capital gains may result in an immediate reduction of the net asset value per share of the relevant class. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.

Why invest in Robeco Credit Income?

1 Globally diversified

Seek attractive yield and income opportunities across the US, Europe, and emerging markets, and across different categories. This broadens the investment universe and enhances resilience during periods of policy uncertainty.

A broad opportunity set across developed and emerging credit markets¹

2 Quality-tilted

High yield-like returns with investment grade-like risk. High quality credit (investment grade bonds and high-quality BB-rated bonds) offer an attractive yield and income with relatively lower credit risk. It also performs well relative to equities and other riskier asset classes in an environment of lower economic growth or mild recession.

Focus on higher rated credits¹

High yield-like returns with investment grade-like risk²

Past performance is no guarantee of future results. The value of your investments may fluctuate.

Portfolio: Robeco Credit Income Bx USD, IG: Bloomberg Global Aggregate Index (USD Hedged), HY: Bloomberg US Corporate High Yield + Pan Euro HY ex Financials 2.5% Issuer Cap (USD Hedged), EM: JPM CEMBI Broad Diversified (USD Hedged). All figures in USD. Data 7 years period until end of June 2026. If the currency in which the past performance is displayed differs from the currency of the country in which you reside, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency. Performance since inception is as of the first full month. Periods shorter than one year are not annualized. Returns gross of fees, based on gross asset value. Values and returns indicated here are before cost; the performance data does not take account of the commissions and costs incurred on the issue and redemption of units. These have a negative effect on the returns shown. Robeco Credit Income Bx USD performance information: 1.17% (YTD end June 2026), 9.26% (2025), 5.41% (2024), 8.39% (2023), -10.39% (2022), 0.08% (2021). Fund performance is calculated on NAV to NAV basis in USD with gross dividends re-invested.

3 Actively managed

Dynamically managing portfolio risk: focusing on the “sweet spot” based on credit outlook. The fund prioritizes low (spread) duration, seeking to mitigate the effects of rate and spread volatility, and avoids long-dated investment grade bonds, as relatively flat yield curves do not sufficiently compensate for heightened volatility risks.

Active credit allocation through the credit cycle³

Flexible in managing duration³

4 Consistent income

Flexibility to invest in the most attractive yield opportunities across the global credit market. Seeks to generate attractive income across the credit cycle and to serve as a compelling portfolio diversifier.

Income

^Annualized dividend yield at 5.9% (Aims to pay dividend on a monthly basis. Dividend is not guaranteed and may be paid out of capital. Refer to Risk Disclosures 6.)

Important information

Investment involves risks. Past performance is not indicative of future performance. The value of investments may fluctuate. This document is for information only and does not constitute any investment advice or an offer or solicitation to buy or sell in any securities or to adopt any investment strategy. Investors should not base their investment decisions solely on the information provided in this document and are advised to seek independent advice (including advice on tax implications) before making any investment decisions. Investors should ensure they fully understand the risks associated with the Fund and should also consider their own investment objectives and risk tolerance level. Please refer to the relevant offering documents, including the Prospectus, Hong Kong Offering Document and the Key Facts Statement for the Fund, for further details including the risk factors. The investment returns are denominated in stated currency, which may be a foreign currency other than USD and HKD ("other foreign currency"). US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar / other foreign currency exchange rate. No assurance can be given that the investment objective of any investment products will be achieved. All data, estimates, opinions and other information provided are as of the date shown above and may change as market conditions evolve, and are subject to change without notice. Robeco accepts no liability for any direct, indirect, or consequential loss arising from the use of this material or any comments, opinions, or estimates contained herein.

Where a reference is made to the frequency of dividend distributions, this frequency is an aim and not a guarantee. Dividend yield is not guaranteed and is not indicative of the return of the Fund. The Fund may, at their discretion, pay dividends out of capital or capital gains. Distributions out of capital may result in the reduction of an investor's original capital invested in the Fund or from any capital gains attributable to that original investment of the Fund. Also, any distributions involving the capital and/or capital gains may result in an immediate reduction of the net asset value per share of the relevant class. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Please refer to Composition of the dividend payments document available at www.robeco.com.hk for details, including the explanatory notes.
