What is this product?

The Sub-fund is a sub-fund of Robeco Capital Growth Funds, a Luxembourg domiciled open-ended investment company with variable capital and whose home regulator is the Commission de Surveillance du Secteur Financier ("CSSF").

Objectives and Investment Strategy

Objective

To provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

For the avoidance of doubt, the Sub-fund does not constitute a green/ESG fund pursuant to the Circular to management companies of SFC-authorized unit trusts and mutual funds issued by the Securities and Futures Commission on 29 June 2021 (as amended from time to time).

Strategy

The Sub-fund will invest at least two-thirds of its total assets in equities of companies incorporated or exercising a preponderant part of their economic activities in the United States, and will focus on investing in companies that are undervalued and combine attractive valuation with a catalyst for change. These companies can be both large caps as well as mid-caps and small-caps.

The Sub-fund could use a covered-call strategy to generate additional income. Investors should be aware that the use of derivatives may result in increased volatility of the price of the Shares.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be

components of Russell 3000 Value Index (the "**Benchmark**"), but securities outside the Benchmark may be selected too. The investment policy is not constrained by the Benchmark but the Sub-fund uses a Benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavorable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above.

The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Investors should note that the Sub-fund may engage in repurchase agreements (up to 10% of its net asset value), reverse repurchase agreements (up to 15% of its net asset value) and securities-lending transactions (up to 49% of its net asset value). The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in Appendix VIII of the Prospectus.

Use of derivatives / investment in derivatives

The Sub-fund's net derivative exposure may be up to 50% of the Sub-fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **General investment risk** – The Sub-fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-fund may suffer losses. There is no guarantee of the repayment of principal.
- **Equity investment risk** - Equity securities are subject to risks that their market value may go down as well as up. Prices of such equity securities may be volatile. In particular, if the market value of equity securities in which the Sub-fund invests goes down, investors may suffer substantial losses.
- **Market risk** - The value of the Shares is sensitive to market fluctuations in general, and to fluctuations in the price of equity securities and other individual financial instruments in particular. In addition, investors should be aware of the possibility that the value of investments may vary as a result of changes in investment sentiment, political, economic or market circumstances, as well as changes in an individual business situation. It cannot therefore be guaranteed that the value of the Sub-fund will not fall below its value at the time of acquisition.

- **Risk relating to small- and/or mid-capped companies** – The Sub-fund may invest in the securities of small and/or mid-capped companies. Investing in these securities may expose the Sub-fund to risks such as greater market price volatility, less publicly available information, and greater vulnerability to fluctuations in the economic cycle which may adversely affect the net asset value of the Sub-fund.
- **Concentration risk** - Based on its investment policy, the Sub-fund may invest in financial instruments from issuing institutions that (mainly) operate within the United States. Due to the concentration of the investment portfolio of the Sub-fund - events that have an effect on these issuing institutions may have a greater effect on the Sub-fund assets than in the case of a less concentrated investment portfolio. The value of the Sub-fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the United States market.
- **Risks relating to lending of securities** - In the case of securities-lending transactions, the Sub-fund runs the risk that the recipient cannot comply with its obligation to return the lent securities on the agreed date or furnish the requested additional collateral (where the value of the existing collateral falls below the value of the securities lent out) and as such, the Sub-fund may sustain losses and its net asset value adversely affected.
- **Risk of investing in financial derivative instruments ("FDI")** - Investments of the Sub-fund may be composed of FDI used for efficient portfolio management, for investment purposes or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Sub-fund. Exposure to FDI may lead to a high risk of significant loss by the Sub-fund.

In addition, the Sub-fund may invest in covered-call options. The Sub-fund as a seller of a covered-call option gives up the opportunity for gain on the underlying instrument in respect of the option above the exercise price of the option. The value of the Sub-fund may be adversely affected as a result.
