INFORMATION FOR HONG KONG INVESTORS

Important - If you are in any doubt about the contents of this document or any of the documents accompanying it, you should consult your stockbroker, bank manager, solicitor, accountant or other independent professional financial adviser.

This Hong Kong covering document (the “**Hong Kong Covering Document**”) is supplemental to, forms part of and should be read in conjunction with the prospectus for Robeco Capital Growth Funds (the “**Company**”) dated 20 August 2026, as amended from time to time (the “**Prospectus**”), and the Product Key Facts Statements (“**KFS**”) of the Sub-funds as amended from time to time. Capitalized terms used in this Hong Kong Covering Document shall, unless otherwise defined or re-defined herein or unless the context otherwise requires, have the meanings ascribed to them in the Prospectus.

The Prospectus (excluding the SFDR Annexes, as defined below), this Hong Kong Covering Document and the KFS of the Sub-funds together form the offering document (the “**Hong Kong Offering Documents**”) of the Company and the Sub-funds. The purpose of this Hong Kong Covering Document is to set out information relating to the Company and the Sub-funds which is particular to the offering of the Shares to investors in Hong Kong.

The Directors of the Company accept full responsibility for the accuracy of the information contained in the Hong Kong Offering Documents and confirm, having made all reasonable enquiries, that to the best of their knowledge and belief that there are no other facts the omission of which would make any statement misleading.

The Company and the Sub-fund(s) set out below under the section entitled “**1. FUNDS AND SHARE CLASSES AVAILABLE IN HONG KONG**” have been authorized by the Securities and Futures Commission (“**SFC**”) in Hong Kong under section 104 of the Securities and Futures Ordinance of Hong Kong (“**SFO**”) and are available for sale to the public in Hong Kong.

The Prospectus, this Hong Kong Covering Document and the KFS of the Sub-funds are published in English and Chinese. Insofar as Hong Kong investors are concerned, the Chinese versions of the Hong Kong Offering Documents are equivalent to the English versions.

1. FUNDS AND SHARE CLASSES AVAILABLE IN HONG KONG

WARNING: In relation to the Sub-funds as set out in the Prospectus, the table below sets out the following Sub-fund(s) (together with the Share Class(es) available to Hong Kong investors) that are authorized by the SFC pursuant to Section 104 of the SFO and hence may be offered to the public in Hong Kong:-

Fund(s)	Available Share Class(es)
1. Robeco Global Consumer Trends	• D USD, D HKD
2. Robeco Global Stars Equities	• DL USD
3. Robeco Emerging Stars Equities	• DL USD, DL HKD
4. Robeco Indian Equities	• D USD
5. Robeco BP US Premium Equities [#]	• D USD, D HKD
6. Robeco BP Global Premium Equities [#]	• D USD, D HKD
7. Robeco QI Dynamic High Yield [^]	• BxH USD
8. Robeco High Yield Bonds	• DH USD, BxH USD, BxH HKD, BxH RMB
9. Robeco Credit Income	• Bx USD, Bx HKD, BxH EUR, BxH HKD, V1 USD, V1H HKD
10. Robeco Asia-Pacific Equities	• D USD, D HKD
11. Robeco QI Emerging Markets 3D Active Equities [^]	• D USD
12. Robeco QI Global Developed Active Equities [^]	• D USD
13. Robeco Smart Energy	• D USD, D HKD

[#] The reference to “BP” in the name of the Sub-fund is to the Portfolio Manager, Boston Partners Global Investors, Inc.

[^] The term “QI” in the name of the Sub-fund means “Quant Investing” and illustrates that it is part of the quantitatively managed fund range of Robeco.

Key Information regarding Deferred Sales Charges (DSC) Share Classes

Classes V1 and V1H are DSC Share Classes offered by the company which apply a deferred sales charge (exit charge) on Shares redeemed during a specific holding period as set out below under the section entitled **"11. FEES AND EXPENSES"**. The initial offer period (the **"IOP"**) for each DSC Share Class will fall within a period of 12 months after the date of this Hong Kong Covering Document or such extended date as the Management Company may determine. These Classes will be closed to subscription after the IOP.

Each Share Class may carry various characteristics as further explained in the section entitled **"2.1 Classes of Shares"** in the Prospectus in respect of the relevant Sub-fund. Investors may confirm with the Hong Kong Representative or the authorized distributor(s) of the Sub-fund(s) in Hong Kong (the **"Authorized Distributor(s)"**) the specifics of the Share Classes that are currently available for subscription.

The SFC reserves the right to withdraw the authorization of any Sub-fund or impose such conditions as it considers appropriate.

Other Share Classes of the SFC-authorized Sub-fund(s) which are not mentioned above are not available to the public in Hong Kong.

Please note that the Prospectus is a global offering document and therefore also contains information of the following Sub-funds which are **not** authorized by the SFC:-

Global Equity Sub-funds:

- Robeco QI Global Conservative Equities
- Robeco Emerging Markets Equities
- Robeco QI Emerging Markets Active Equities
- Robeco QI Global Momentum Equities
- Robeco QI Global Developed 3D Enhanced Index Equities
- Robeco QI Emerging Markets Enhanced Index Equities

- Robeco Step-in Global Equities
- Robeco Step-in Income Allocation

No offer shall be made to the public of Hong Kong in respect of the above unauthorized Sub-funds. The issue of the Hong Kong Offering Documents was authorized by the SFC only in relation to the offer of the above SFC-authorized Sub-funds to the public of Hong Kong.

Intermediaries should take note of this restriction.

The SFC's authorization is not a recommendation or endorsement of a scheme nor does it guarantee the commercial merits of a scheme or its performance. It does not mean the scheme is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors. The Hong Kong Offering Documents should be read and construed as a single document.

2. IMPORTANT INFORMATION

In Hong Kong, distribution of the Prospectus and this Hong Kong Covering Document is not authorized unless accompanied by a copy of the then latest published annual report of the Company and, if published after such annual report, a copy of the latest semi-annual report. Before investing you must have received and read the KFS of the relevant SFC-authorized Sub-funds.

Shares in the Company are offered only on the basis of the information contained in the Prospectus, this Hong Kong Covering Document, the relevant KFS, the most recent annual report and, if subsequently published, the semi-annual report of the Company. Neither the delivery of the Prospectus or this Hong Kong Covering Document nor the issue of Shares shall, under any circumstances, create any implication that the affairs of the Company have not changed since the respective dates of the documents or that the information contained therein is correct as of any time subsequent to the date of the relevant document.

The websites set out in the Prospectus and this Hong Kong Covering Document have not been reviewed by the SFC and may contain information relating to funds which are not authorized in Hong Kong and information which is not targeted to Hong Kong investors.

3. HONG KONG REPRESENTATIVE AND AUTHORIZED DISTRIBUTOR(S)

Robeco Hong Kong Limited has been appointed by the Company and the Management Company as the Hong Kong Representative to represent the Company and the Management Company in Hong Kong generally in relation to the affairs of the Company and the SFC-authorized Sub-funds.

Investors may contact the Hong Kong Representative for any enquiries or complaints in relation to the Company and/or the SFC-authorized Sub-funds.

The office of the Hong Kong Representative is located at 27/F Man Yee Building, 68 Des Voeux Road Central, Central, Hong Kong SAR, China, with phone number +852 3719 7400 and fax number +852 2530 5696 or may be reached by email robecohongkong@robeco.com.

The Company and the Management Company have also entered into agreements with certain Authorized Distributor(s) of the Company vis-a-vis distribution activities relating to the offering and distribution of the Shares in Hong Kong. Details of such Authorized Distributor(s) can be obtained from the Hong Kong Representative. Please refer to the section entitled **"8. Subscriptions, Redemptions and Switches of Shares by Hong Kong investors"** of this Hong Kong Covering Document for further details.

4. INVESTMENT OBJECTIVE, POLICIES AND RESTRICTIONS

In addition to the information on each Sub-fund which is authorized by the SFC as set out in the Prospectus, Hong Kong investors should take note of the additional supplementary information set out in this section.

For so long as the Sub-funds are authorized by the SFC, the Management Company, the Portfolio Manager(s) or any person acting on behalf of the SFC-authorized Sub-funds or the Management Company or Portfolio Manager(s) may not obtain a rebate on any fees or charges levied by an underlying scheme or its management company, or any quantifiable monetary benefits in connection with investments in any underlying scheme.

Robeco Global Consumer Trends

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund invests worldwide in stocks of companies in consumer-related industries. This Sub-fund selects the consumer stocks that have most exposure to long-term trends such as but not limited to the digitization of the consumer, the rise in consumer spending in emerging markets and the increasing awareness about environmental issues.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco Global Stars Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The reference to "Stars" in the name of the Sub-fund refers to an approach whereby only the most attractive companies (in terms of actual and/or potential capital gains and/or generation of income and/or growth) are selected.

The Sub-fund may invest in any economic sector and in any currency, and is unrestricted in its choice of companies by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco Emerging Stars Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The reference to "Stars" in the name of the Sub-fund refers to an approach whereby only the most attractive companies (in terms of actual and/or potential capital gains and/or generation of income and/or growth) are selected.

The Sub-fund may invest in any economic sector and in any currency, and is unrestricted in its choice of companies by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programs) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. Within this limit, the Sub-fund may invest in stocks listed on the ChiNext market and/or the Science and Technology Innovation Board (the "STAR Board").

Robeco Indian Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund may invest in any economic sector and in any currency and is unrestricted in its choice of companies by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco BP US Premium Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco BP Global Premium Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund may invest in any economic sector and in any currency and is unrestricted in its choice of companies by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco QI Dynamic High Yield

The Sub-fund is generally suitable for investors with a medium-term investment horizon.

Through investments in derivatives and bonds (for example, by investing in a portfolio of credit default swap ("CDS") indices and government bonds based on a quantitative model), the Sub-fund gains exposure to high yield fixed income securities (i.e. debt securities with a rating of BB+ or equivalent or lower by at least one of the recognized rating agencies (such as Moody's, Standard & Poor's and Fitch) and those which neither the security itself nor its issuer has a credit rating). The Sub-fund's active investment strategy is based on quantitative research. To anticipate changing market conditions, this strategy actively manages the portfolio's credit market exposure, interest rate sensitivity, and regional allocation.

The buying and selling of exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, options, swaps (including but not limited to CDS indices), currency forwards and/or combinations of the above. The Sub-fund will use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management. The Sub-fund may use financial derivative instruments at its absolute discretion. Long and short active currency and financial derivative instrument positions implemented by the Sub-fund may not be correlated with the underlying securities positions held by the Sub-fund.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

The Sub-fund may not invest more than:

- (i) 5% of its total assets in insurance-linked securities ("ILS") such as catastrophe bonds; and
- (ii) 25% of its total assets in debt instruments with loss-absorption features ("LAP"), such as contingent convertible bonds and bail-in bonds. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Sub-fund will not provide additional financing in case of restructuring to issuers of distressed securities. Distressed securities refer to securities issued by a company, sovereign state, or entity that are either in default or at high risk of default (i.e., securities with an S&P or equivalent rating of CC or lower) ("Distressed Securities").

Robeco High Yield Bonds

The Sub-fund is generally suitable for investors with a medium-term investment horizon.

The Sub-fund invests at least two-thirds of its total assets in bonds, asset-backed securities and similar fixed income securities with a rating of BB+ or equivalent or lower (which include non-investment grade securities) by at least one of the recognized rating agencies (such as Moody's, Standard & Poor's and Fitch), or with no rating (i.e. securities which neither the security itself nor its issuer has a credit rating).

The Sub-fund may invest in any economic sector and in any currency, and is unrestricted in its choice of issuers by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

The Sub-fund may not invest more than:

- (i) 5% of its total assets in insurance-linked securities (“**ILS**”) such as catastrophe bonds; and
- (ii) 30% of its total assets in debt instruments with loss-absorption features (“**LAP**”), such as contingent convertible bonds and bail-in bonds. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Sub-fund will not actively initiate new positions in Distressed Securities; however, if securities within the Sub-fund become distressed, the Sub-fund may, when deemed in the best interest of the Sub-fund, provide additional financing to such issuers in connection with a restructuring (e.g. participation in rescue or short-term bridge liquidity) to facilitate an orderly restructuring and preserve value for investors, and in all cases subject to the Sub-fund’s investment policy, applicable regulatory limits, and internal due diligence and approval processes.

The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management. For example, the Sub-fund may use treasury futures which provide an efficient and liquid means of adjusting the portfolio’s duration (i.e. interest rate sensitivity). The Sub-fund may also invest in credit derivatives such as CDS indices which offer a liquid and effective way to manage the portfolio’s credit exposure relative to the Benchmark (i.e. Bloomberg US Corporate High Yield + Pan Euro HY ex Financials 2.5% Issuer Cap). The Sub-fund may use financial derivative instruments at its absolute discretion.

In market environments where credit spreads are elevated and risk/reward is attractive, the Sub-fund may increase its use of credit derivatives to efficiently raise credit exposure (for example, by selling protection through CDS indices). Conversely, when credit spreads are expected to widen and the risk/reward becomes unattractive, the Sub-fund may reduce credit exposure by buying protection through CDS indices. Long and short active currency and financial derivative instrument positions implemented by the Sub-fund may not be correlated with the underlying securities positions held by the Sub-fund.

Robeco Credit Income

The Sub-fund is generally suitable for investors with a medium-term investment horizon.

The income efficient implementation strategies utilized by the Sub-fund aim to maximize income while managing risk through active selection of higher-yielding bonds (both investment grade and high yield), dynamic sector allocation, and the use of derivatives. For example, the Sub-fund may use treasury futures to adjust the portfolio’s duration (i.e. interest rate sensitivity) to its target level, while credit derivatives help manage credit exposure efficiently.

When bond yields are expected to decline, the portfolio may extend duration to capture price gains from rising bond values. Similarly, by targeting higher-yielding issuers with improving credit fundamentals, the Sub-fund may benefit from narrowing credit spreads, complementing its income objective with potential capital gains.

The Fixed Income Instruments invested by the Sub-fund may be investment grade and non-investment grade, and exposure to non-investment grade securities may exceed 30% of its total assets. Investment grade means, in respect of securities, a rating of BBB- or equivalent or higher by at least one of the recognized rating agencies (such as Moody’s, Standard & Poor’s and Fitch). Securities which are unrated but are determined to be of comparable quality to the foregoing ratings shall also be included within this definition. Non-investment grade means, in respect of securities, a rating of BB+ or equivalent or lower by at least one of the recognized rating agencies (such as Moody’s, Standard & Poor’s and Fitch) and those which neither the security itself nor its issuer has a credit rating.

The Sub-fund may invest in any economic sector and in any currency, and is unrestricted in its choice of issuers by size.

The Sub-fund may use financial derivative instruments at its absolute discretion. Long and short active currency and financial derivative instrument positions implemented by the Sub-fund may not be correlated with the underlying securities positions held by the Sub-fund.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

The Sub-fund may not invest more than:

- (i) 5% of its total assets in insurance-linked securities ("ILS") such as catastrophe bonds;
- (ii) 50% of its total assets in debt instruments with loss-absorption features ("LAP"), such as contingent convertible bonds (also "CoCo" bonds) and bail-in bonds. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s); and
- (iii) 25% of its total assets in convertible bonds (including up to 20% of its total assets in "CoCo" bonds). For the avoidance of doubt, the 20% limit on CoCo bonds forms part of the 50% limit on LAP instruments above.

Robeco Asia-Pacific Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated in Asia, Australia or New Zealand, or exercising a preponderant part of their economic activities in that region. This includes exposure to both developed and emerging Asian-Pacific markets, including but not limited to Japan, China, Korea, Taiwan, Australia and/or New Zealand.

The Sub-fund may also invest in any economic sector and in any currency, and is unrestricted in its choice of companies by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco QI Emerging Markets 3D Active Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries, which generally refer to countries with less developed economies and/or less established financial markets and potential higher economic growth, including most regions / markets in Asia, Latin America, Eastern Europe, the Middle East and Africa (including but not limited to China, Taiwan, South Korea, India, Brazil and South Africa). The list of emerging and less developed markets is determined by the Benchmark, which is subject to change and is reviewed by the Management Company from time to time.

The Sub-fund may invest in any economic sector and in any currency, and is unrestricted in its choice of companies by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco QI Global Developed Active Equities

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund may invest in any economic sector and in any currency, and is unrestricted in its choice of companies by size.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

Robeco Smart Energy

The Sub-fund has as its sustainable investment objective to invest globally in companies that advance clean energy production sources, infrastructure and products.

The Sub-fund is generally suitable for investors with a medium-to-long-term investment horizon.

The Sub-fund is actively managed and invests at least 90% of its total assets in sustainable investments. As a binding element of its sustainable investment strategy, the Sub-fund will invest at least 80% of its total assets in companies all over the world that are related to the Sub-fund's smart energy theme. For this purpose, theme-related companies include companies that provide technologies, products and/or services relating to clean energy production sources, energy distribution, power management infrastructure, energy efficiency products and infrastructure, and technologies supporting the electrification of the industrial, transportation and heating sectors.

In pursuing its sustainable investment objective, the Sub-fund integrates sustainability criteria on a continuous basis as part of the stock selection process and through a theme-specific sustainability assessment. The Portfolio Manager identifies and invests in companies related to the Sub-fund's smart energy theme based on both quantitative and qualitative analysis.

The quantitative analysis includes consideration of whether a company has meaningful revenue exposure to activities related to the smart energy theme. In assessing whether a company has meaningful revenue exposure, the Portfolio Manager generally considers whether at least 20% of the company's current revenues are derived from activities related to the Sub-fund's smart energy theme. On a case-by-case basis, companies with lower current revenue exposure may also be considered where they are assessed to have a significant impact on the relevant industries or otherwise demonstrate meaningful thematic relevance to the Sub-fund's smart energy theme.

The qualitative analysis includes consideration of whether a company's products, services, business model and/or operational practices contribute to the Sub-fund's smart energy theme, which mainly advance the following United Nations Sustainable Development Goals (UN SDGs): Affordable and Clean Energy (SDG 7), Decent Work and Economic Growth (SDG 8), Industry, Innovation and Infrastructure (SDG 9), Sustainable Cities and Communities (SDG 11); and Climate Action (SDG 13).

In assessing a company and selecting investments, the Sub-fund also applies, among other things, Robeco's SDG Framework¹, Robeco's good governance policy where companies that do not pass the good governance test are reflected in the below-mentioned exclusions, norms-based and activity-based exclusions, and consideration of principal adverse impacts on sustainability factors.

Robeco's internally developed SDG Framework systematically evaluates companies based on their contribution to the relevant UN SDGs, resulting in an overall SDG score used in the Sub-fund's stock selection and monitoring. The Sub-fund invests solely in companies with a positive or allowed neutral SDG score. A maximum of 10% of the Sub-fund's net assets relating to the theme may consist of companies with neutral SDG scores, subject to internal approval and consistency with the Sub-fund's smart energy theme and sustainable investment objective.

The Sub-fund complies with Robeco's Exclusion Policy Level 2², which excludes securities based on products and business practices that Robeco believes are detrimental to society (for example, companies involved in controversial weapons, tobacco, controversial behaviour, oil sands and Arctic drilling, or in breach of the International Labour Organization (ILO) standards, the UN Guiding Principles on Business and Human Rights, the UN Global Compact Principles or the OECD Guidelines for Multinational Enterprises), and with the exclusion criteria referred to in Article 12(1)(a) to (g) of the Regulation on EU Climate Benchmarks. Accordingly, the Sub-fund has 0% investments in securities excluded under these criteria.

The Sub-fund will be unrestricted in its choice of companies by size.

The Sub-fund uses the Benchmark for performance comparison purposes.

No specific index is designated as a reference benchmark for the purpose of attaining the Sub-fund's sustainable investment objective.

¹ A copy of Robeco's SDG framework methodology and its governance can be obtained on its website <https://www.robeco.com/files/docm/docu-robeco-sdg-framework.pdf>.

² More information about Robeco's exclusion list containing information regarding the impact of the exclusions of the Sub-fund's universe can be found at <https://www.robeco.com/files/docm/docu-exclusion-list.pdf>.

The Sub-fund is allowed to invest up to 33% of its net assets in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

For the purpose of gaining exposure to shares of companies of the PRC listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programs) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. Within this limit, the Sub-fund may invest in stocks listed on the ChiNext market and/or the STAR Board.

5. NET DERIVATIVE EXPOSURE

The net derivative exposure of each of the following Sub-funds may be up to 50% of its respective Net Asset Value:

- Robeco Global Consumer Trends
- Robeco Global Stars Equities
- Robeco Emerging Stars Equities
- Robeco Indian Equities
- Robeco BP US Premium Equities
- Robeco BP Global Premium Equities
- Robeco Asia-Pacific Equities
- Robeco QI Emerging Markets 3D Active Equities
- Robeco QI Global Developed Active Equities
- Robeco Smart Energy

For Robeco QI Dynamic High Yield, Robeco High Yield Bonds and Robeco Credit Income, the net derivative exposure of each Sub-fund may be more than 100% of its Net Asset Value.

The net derivative exposure is defined in the Code on Unit Trusts and Mutual Funds ("**Code**") issued by the SFC and is calculated in accordance with the requirements and guidance issued by the SFC which may be updated from time to time. The net derivative exposure set out above may be exceeded in such circumstances as permitted under the Code, handbook, code and/or guideline issued by the SFC from time to time or permitted by the SFC from time to time.

Please refer to the Prospectus for the risk management measure used by each of the Sub-funds to monitor and manage its global exposure.

Please refer to the sub-section headed "**Risk of use of financial derivative instruments, techniques or structures**" under the section headed "**RISK CONSIDERATIONS**" below for the risks associated with investments in financial derivative instruments extensively for investment purposes.

6. RISK CONSIDERATIONS

Investors should refer to the section entitled "**4. Risk Considerations**" of the Prospectus and the following additional information in respect of the risks associated with investing in an SFC-authorized Sub-fund.

General investment risk

A Sub-fund's investment portfolio may fall in value due to any of the key risk factors set out in the Hong Kong Offering Documents in respect of the relevant Sub-fund and therefore your investment in the Sub-fund may suffer losses. There is no guarantee of the repayment of principal.

Risks associated with equities

To the extent that a Sub-fund invests in equities, the Sub-fund may be subject to the following additional risks:

Equity investment risk

A Sub-fund may invest in equity securities. These equity securities are subject to risks that their market value may go down as well as up. Prices of such equity securities may be volatile. In particular, if the market value of equity securities in which the relevant Sub-fund invests goes down, investors may suffer substantial losses.

Market risk

The value of the Shares is sensitive to market fluctuations in general, and to fluctuations in the price of individual financial instruments in particular. In addition, investors should be aware of the possibility that the value of investments may vary as a result of changes in investment sentiment, political, economic or market circumstances, as well as changes in an individual business situation. It cannot therefore be guaranteed that the value of the Sub-fund will not fall below its value at the time of acquisition.

Risk relating to small- and/or mid-capped companies

A Sub-fund may invest in the securities of small and/or mid-capped companies. Investing in these securities may expose the relevant Sub-fund to risks such as greater market price volatility, less publicly available information, and greater vulnerability to fluctuations in the economic cycle than those of larger capitalization companies in general which may adversely affect the Net Asset Value of the relevant Sub-fund.

Risk associated with high volatility of the equity market in certain countries / regions

High market volatility and potential settlement difficulties in the markets of certain countries / regions (such as emerging markets) may also result in significant fluctuations in the prices of the securities traded on such markets and may thereby adversely affect the Net Asset Value of the Sub-fund.

Risks associated with regulatory/exchanges requirements/policies of the equity market

Securities exchanges typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Sub-fund.

Concentration risk

In addition to the risk factor headed “*Risk related to specific countries, regions or sectors*” in the Prospectus, for a Sub-fund with geographical or sectoral concentration, the value of the Sub-fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the market in the relevant country or region in which the Sub-fund’s investment is concentrated.

In addition to the risk factor headed “*Concentration risk*” in the Prospectus, where the Sub-fund’s investments are concentrated in a specific market, the value of the Sub-fund may be more volatile than that of a Sub-fund having a more diverse portfolio of investments.

Emerging market risk

In some emerging and less developed markets in which a Sub-fund may invest, the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Investing in these markets may involve additional risks including social, political and economic instability, currency control, accounting and taxation issues, uncertainty in the interpretation and application of decrees and legislative acts, less developed custody and settlement system etc.

Investors should recognize that the potential social, political and economic instability, could impact the volatility, value and liquidity of the investments of these relevant Sub-funds.

In some emerging and less developed markets in which a Sub-fund may invest, conversion into a foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed. Some markets may carry higher risks for investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Currency risk

All or part of the securities portfolio of a Sub-fund may be invested in instruments denominated in currencies other than the base currency of the relevant Sub-fund. A share class may also be designated in a currency other than the base currency of a Sub-fund. As a result, fluctuations in the exchange rates between the currencies in which the assets are held and the base currency of such Sub-fund and/or the relevant class currency may result in the relevant Sub-fund suffering losses.

In respect of a Sub-fund with a Currency Hedged Share Class (e.g. Class BxH, Class V1H), currency hedging may be done using benchmark hedging or NAV hedging.

Benchmark hedging is implemented at the share class level and is separate from any portfolio-level hedging undertaken by the Sub-fund. Currency hedging aims to limit currency risk by reducing the effect of exchange rate fluctuations between the share class currency and the currencies in which the holdings of the benchmark of the relevant Sub-fund are denominated. Although in general the currency composition of the benchmark is expected to be aligned with the currency composition of the portfolio of the relevant Sub-fund, the currency exposures that are contained within the benchmark, including the individual currencies themselves, may from time to time differ from those of the relevant Sub-fund. This may result in certain individual currencies being over or under hedged.

NAV hedging is implemented at the share class level and is separate from any portfolio-level hedging undertaken by the Sub-fund. Currency hedging aims to limit currency risk by reducing the effect of exchange rate fluctuations between the Sub-fund's base currency and the currency of the share class.

Exposure to currencies may be hedged but investors should note that there is no guarantee that the exposure of the currency in which the shares are invested can be fully or effectively hedged against the base currency of the relevant Sub-fund. Currency risks may be hedged with currency forward transactions and currency options. There is a possibility that the relevant Sub-fund may suffer losses from hedging in the event of the potential ineffectiveness of hedging against currency risk.

Investors should also note that the use of currency instruments may, in certain circumstances, substantially reduce the benefit to shareholders in the relevant class of Shares (for instance, if the base currency depreciates against the currency of the instrument in which the relevant Sub-fund is invested) and could thereby result in a decrease in the value of their shareholding.

RMB currency risk

A Sub-fund may offer RMB denominated share class(es). RMB is currently not freely convertible and is subject to exchange controls and restrictions which, under exceptional circumstances, may cause a delay in payment of redemptions and/or dividend payments in RMB. Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.

Risks associated with debt securities

To the extent that a Sub-fund invests in debt securities, the Sub-fund may be subject to the following additional risks:

Credit risk

Investment in fixed income securities is subject to interest rate, default and credit risks. There can be no assurance that the issuers of fixed income securities in which a Sub-fund may invest will not be subject to credit difficulties. In the event of a default or credit rating downgrading of issuers, the relevant Sub-fund's value will be adversely affected, leading to the loss of some or all of the sum invested in or payments due on such securities or instruments.

Credit rating risk

Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Interest rate risk

The fixed income securities in which a Sub-fund may invest are interest rate sensitive, which means that their value will fluctuate as interest rates fluctuate. The value of the fixed income securities rise when interest rates fall, whilst their value fall when interest rates rise. If the fixed income securities held by a Sub-fund fall in value, the Sub-fund's value will also be adversely affected.

Volatility and liquidity risk

The debt securities in emerging markets may be subject to higher volatility and lower liquidity compared to more developed markets. The prices of securities traded in such markets may be subject to fluctuations. The bid and offer spreads of the price of such securities may be large and the Sub-fund may incur significant trading costs.

Downgrading risk

The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the Sub-fund may be adversely affected. The Management Company or the Portfolio Manager may or may not be able to dispose of the debt instruments that are being downgraded.

Risk of investment in non-investment grade or unrated securities

A Sub-fund may invest in securities rated below investment grade (in the case where the credit rating is designated/assigned by an internationally recognized credit agency) or unrated securities which generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which react primarily to fluctuations in the general level of interest rates. Such securities are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than high-rated debt securities. There are fewer investors in lower-rated or unrated securities, and it may be harder to buy and sell securities at an optimum time. There is also a higher risk that the bond issuer will default in the payment of its principal and/or interest obligations due to reduced creditworthiness. If the issuer of securities defaults, or such securities cannot be realized, or perform badly, the relevant Sub-fund may suffer substantial losses.

Sovereign debt risk

A Sub-fund may invest in sovereign debt securities which may subject to political, social and economic risk and risk of loss that the issuers of its investment may not be able or willing to make payments as promised or may request the relevant Sub-fund to participate in restructuring such debts and/or if there is a downgrade of the sovereign credit rating of the issuers. The relevant Sub-fund may suffer significant losses when there is a default of sovereign debt issuers.

Where a Sub-fund may invest more than 10% of its net assets in securities issued or guaranteed by sovereign issuers that are rated below investment grade, such Sub-fund may be subject to increased credit risk and increased risk of default of the relevant sovereign issuer. The Sub-fund may suffer significant losses when there is a default of sovereign and/or quasi sovereign debt issuers. To the extent that a Sub-fund concentrates its investments in a particular single sovereign issuer, its investment will be more susceptible to fluctuations in value resulting from adverse conditions in a particular issuer such as unfavorable or unanticipated poor performance of a particular issuer and political instability facing a particular regime. This may cause such Sub-fund to be more volatile.

Risks associated with collateralized and/or securitized products

A Sub-fund may invest in collateralized and/or securitized products (such as ABS, MBS and CDO) which may be highly illiquid and prone to substantial price volatility. These instruments may be subject to greater credit, liquidity and interest rate risk compared to other debt securities. They are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the returns of the securities.

The value and the quality of Asset-Backed Securities (ABS) depend on the value and the quality of the underlying assets against which such securities are backed by a loan, lease or other receivables. Issuers of asset-backed securities may have limited ability to enforce the security interest in the underlying assets, and credit enhancements provided to support the securities, if any, may be inadequate to protect investors in the event of default and could result in the Sub-fund suffering losses.

Valuation risk

Valuation of a Sub-fund's investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the Net Asset Value calculation of the Sub-fund.

Credit agency rating risk

The Mainland's credit appraisal system and rating methodologies may be different from those employed in other markets. Credit ratings given by Mainland rating agencies may therefore not be directly comparable with those given by other international rating agencies.

Risk of investing in convertible bonds

A Sub-fund may invest in convertible bonds. Convertibles are a hybrid between debt and equity, permitting holders to convert into shares or stocks in the company issuing the bond at a specified future date. Prior to conversion,

convertible bonds have the same general characteristics as non-convertible fixed income securities and the market value of convertible bonds tends to decline as interest rates increase and increase as interest rates decline. Convertible bonds are subject to the same interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable straight bond investments. However, while convertible bonds generally offer lower interest or dividend yields than non-convertible fixed income securities of similar quality, they enable the relevant Sub-fund to benefit from increases in the market price of the underlying stock, and hence the price of a convertible bond will normally vary with changes in the price of the underlying stock. Therefore, investors should be prepared for greater volatility than straight bond investments, with an increased risk of capital loss, which may adversely affect the Net Asset Value of the relevant Sub-fund.

Risks associated with instruments with loss-absorption features

Debt instruments with loss-absorption features are subject to greater risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events (e.g. when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level), which are likely to be outside of the issuer's control. Such trigger events are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.

In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.

Where a Sub-fund may invest in CoCo bonds which are highly complex and are of high risk. Upon the occurrence of the trigger event, CoCo bonds may be converted into shares of the issuer (potentially at a discounted price), or may be subject to the permanent write-down to zero. Coupon payments on CoCo bonds are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.

A Sub-fund may invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.

Risk of investing in other collective investment schemes

Investors should note that the underlying collective investment schemes in which a Sub-fund may invest may not be regulated by the SFC. There is also no guarantee that the underlying collective investment schemes will always have sufficient liquidity to meet the Sub-fund's redemption requests as and when made.

Risks associated with securities financing transactions

Risks relating to securities lending transactions

In the case of securities- lending transactions, a Sub-fund runs the risk that the recipient cannot comply with its obligation to return the lent securities on the agreed date or furnish the requested additional collateral (where the value of the existing collateral falls below the value of the securities lent out) and as such, the relevant Sub-fund may sustain losses and its Net Asset Value adversely affected.

Risks relating to repurchase transactions

In the event of the failure of the counterparty with which collateral has been placed, the Sub-fund may suffer loss as there may be delays in recovering collateral placed out or the cash originally received may be less than the collateral placed with the counterparty due to inaccurate pricing of the collateral or market movements.

Risks relating to reverse repurchase transactions

In relation to (reverse) repurchase agreements, investors must notably be aware that (A) in the event of the failure of the counterparty with which securities (cash) of a Sub-fund has been placed, there is the risk that collateral received may yield less than the securities (cash) placed out, whether because of inaccurate pricing of a traded instrument or, adverse market movements, or the illiquidity of the market in which the securities are traded; and (B) difficulty in realizing collateral may restrict the ability of the relevant Sub-fund to security purchases or, more generally, reinvestment. As such, this may adversely affect the relevant Sub-fund's performance.

Risk of use of financial derivative instruments, techniques or structures

In addition to the risk factor headed “*Risk related to the use of financial derivative instruments*” in the Prospectus, risks associated with FDIs also include counterparty/credit risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by a Sub-fund. Exposure to FDI may lead to a high risk of significant loss by a Sub-fund.

A Sub-fund may invest in financial derivative instruments, techniques or structures including futures, options, swaps (including but not limited to CDS indices) and currency forwards and/or combinations of the above. Given the leverage effect embedded in financial derivative instruments, such investments may result in higher volatility or even a total loss of the relevant Sub-fund’s assets within a short period of time. Investments in financial derivative instruments may also subject the relevant Sub-fund to substantial counterparty, liquidity and hedging risks, which may adversely affect the Net Asset Value of the relevant Sub-fund. There is no guarantee that the desired hedging instruments will be available or hedging techniques will achieve their desired result. In adverse situations, the use of hedging instruments may become ineffective in hedging and the relevant Sub-fund may suffer significant losses.

Risks in using derivatives include the risk of differing valuations of derivatives arising out of different permitted valuation methods and the inability of derivatives to correlate perfectly with underlying securities, rates and indices. Many derivatives, in particular over-the-counter derivatives, are complex and often valued subjectively and the valuation can only be provided by a limited number of market professionals which often are acting as counterparties to the transaction to be valued, which may prejudice the independence of such valuations. Inaccurate valuations can result in increased cash payment requirements to counterparties or a loss of value to a Sub-fund.

In addition, a Sub-fund may invest in covered-call options. The relevant Sub-fund as a seller of a covered-call option gives up the opportunity for gain on the underlying instrument in respect of the option above the exercise price of the option. The value of the relevant Sub-fund may be adversely affected as a result.

For a Sub-fund implementing active financial derivative instrument (FDI) and currency positions not correlated with the underlying asset of the relevant Sub-fund, as the active FDI and currency positions implemented by the relevant Sub-fund may not be correlated with the underlying securities positions held by the relevant Sub-fund, the relevant Sub-fund may suffer a significant or total loss even if there is no loss of the value of the underlying securities positions (e.g. fixed income securities) being held by the relevant Sub-fund.

High leverage risk

A Sub-fund may have a net leveraged exposure of more than 100% of its net asset value. This will further magnify any potential negative impact of any change in the value of the underlying asset on the relevant Sub-fund and also increase the volatility of the relevant Sub-fund’s price and may lead to significant losses.

Liquidity risk

The actual buying and selling prices of financial instruments in which a Sub-fund invests partly depend upon the liquidity of the financial instruments in question. It is possible that a position taken on behalf of the relevant Sub-fund cannot be liquidated in good time at a reasonable price due to a lack of liquidity in the market in the context of supply and demand or any delay in payment of subscription/redemption proceeds of such financial instruments. This could potentially result in the delay, suspension or restriction of subscription or redemption of Shares and/or could result in the relevant Sub-fund suffering losses.

Financial derivative transactions are also subject to liquidity risk. Given the bilateral nature of OTC positions, liquidity of these transactions cannot be guaranteed. The operations of OTC markets may affect the relevant Sub-funds’ investment via OTC markets.

From time to time, the counterparties with which the relevant Sub-fund effects transactions might cease making markets or quoting prices in certain instruments. In such instances, the relevant Sub-fund might be unable to enter into a desired transaction or to enter into an offsetting transaction with respect to an open position, which might adversely affect its performance.

Counterparty risk

A counterparty of a Sub-fund may fail to fulfill its obligations towards the relevant Sub-fund resulting in losses being incurred. The relevant Sub-fund may engage in OTC transactions. In general, there is less governmental regulation and supervision of transactions in the OTC markets (in which cash deposits, currencies, forwards and derivatives generally are traded) than of transactions entered into on organized exchanges. In addition, many of the protections

afforded to participants on some organized exchanges, such as the performance guarantee of an exchange clearing house, may not be available in connection with OTC transactions. Therefore, by entering into OTC transactions, the relevant Sub-fund will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the relevant Sub-fund will sustain losses.

Depository risk

Assets of the Company that are financial instruments/securities are held in custody by the Depository. The duties and extent of liabilities of the Depository are set out in the section entitled “**Depository**” in the Prospectus.

In the event of insolvency of the Depository, Shareholders are exposed to the risk of the Depository not being able to fully meet its obligations to reconstitute in a short time frame all of the assets of the Company. Cash of the Company may be held with third party sub-custodians or banks. No segregation applies to cash which means there is an increase in the risk of non-restitution in the case of insolvency. In the event of insolvency of the third party, in accordance with standard banking practice, the Company will rank as an unsecured creditor. Shareholders may be exposed to the risk of insolvency of third party sub-custodians or banks in certain circumstances and may suffer loss as a result.

Environmental, Social and Governance (ESG) risk

The use of ESG standards and analysis may affect a Sub-fund’s investment performance and, as such, a Sub-fund may perform differently including underperforming compared to similar funds that do not use such standards. ESG-based exclusionary standards used by a Sub-fund may result in the Sub-fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities due to their ESG characteristics when it might be disadvantageous to do so.

In evaluating a security based on ESG standard, the Portfolio Manager may use information and data from third party providers, which may be incomplete, inaccurate or unavailable.

Investment selection of a Sub-fund is based on subjective judgment from the Portfolio Manager. The Portfolio Manager may incorrectly assess the ESG characteristics of a security and may wrongly exclude eligible security.

Due to the lack of standardized taxonomy, the Portfolio Manager may not apply the relevant ESG standards correctly or that the Sub-fund could have indirect exposure to security which do not meet the relevant ESG standards used by the Sub-fund.

ESG standards and expectations are evolving. There is a risk of style drift within the investment limits of the Sub-fund.

Risks associated with investments / exposure to mainland China

Chinese A share risk

A Sub-fund might invest in China A-shares via the QFI and/or Stock Connect programs which may entail additional clearing and settlement, regulatory, operational and counterparty risks.

Investments in China A-shares using QFI carry increased risks. The relevant Sub-fund’s ability to make the relevant investments or to fully implement or pursue its investment objective and strategy is subject to the applicable laws, rules and regulations (including restrictions on investments and repatriation of principal and profits) in the PRC, which are subject to change and such change may have potential retrospective effect. Clearing and settlement risk and counterparty risk arises from transactions taking place free-of-payment and being only done through a single broker per market.

The relevant Sub-fund may suffer substantial losses in case the approval of the QFI Holder (Robeco Institutional Asset Management B.V.) is being revoked/terminated or otherwise invalidated as the relevant Sub-fund may be prohibited from trading the relevant securities and repatriation of the relevant Sub-fund’s monies, or if any of the key operators or parties (including QFI custodian/brokers) is bankrupt/in default and/or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).

The relevant rules and regulations on Stock Connect programs are subject to change which may have potential retrospective effect. Stock Connect programs are subject to quota limitations. Where a suspension in the trading through the programs is effected, the relevant Sub-fund’s ability to invest in China A-shares or access the PRC market

through the programs will be adversely affected. In such event, the relevant Sub-fund's ability to achieve its investment objective could be negatively affected.

Risks relating to Sub-funds investing in companies listed on boards with generally lower listing eligibility criteria than main boards

Companies listed on boards with generally lower listing eligibility criteria than main boards are usually of emerging nature with a smaller operating scale. The rules and regulations regarding companies listed on such boards may be less stringent in terms of matters such as profitability, track record and share capital than those on the main boards. Hence, investments in such boards may be subject to higher fluctuations in stock prices as well as liquidity, over-valuation and delisting risks, and may result in significant losses for the Sub-fund and its investors.

Risks associated with the access channels for investment in the mainland China market

The relevant rules and regulations (including restrictions on investments, repatriation of principal and profits, taxation) in the PRC are subject to change which may have potential retrospective effect. Where a suspension or intervention in the trading through the program is effected, the Sub-fund's ability to achieve its investment objective could be negatively affected.

The Sub-fund may suffer substantial losses if the Sub-fund ceases to be eligible for the relevant program as the Sub-fund may be prohibited from trading of relevant securities and repatriation of the Sub-fund's monies, or if any of the key operators (including the relevant custodian/brokers) is bankrupt/in default and/or is disqualified from performing its obligations.

Where the program is subject to quota limitations, the Sub-fund may not be able to make its intended investments if there is a change in quota or the quota is fully utilized.

PRC tax risk

Under the general taxing provision of the PRC Corporate Income Tax Law, a non-resident enterprise is subject to 10% withholding income tax ("WHT") on PRC sourced interest income, dividends, and capital gains, provided that the non-resident enterprise is not considered to be a tax resident in the PRC by virtue of effective management and control or by having a PRC tax establishment. It is intended that the QFI License Holder will be managed and operated such that it would not be considered a tax resident in the PRC or to have a PRC tax establishment, although this cannot be guaranteed.

Pursuant to Circular Guoshuihan [2009] No.47, dividends income sourced from the PRC derived by QFIs are generally subject to PRC WHT at a rate of 10% and are required to be withheld by the payer. If such WHT is subject to reduction or exemption in accordance with an applicable tax treaty signed with the PRC, QFIs can apply for a tax refund.

Additionally, pursuant to Circular Caishui [2014] No.79 ("Circular 79"), capital gains realized on or after November 17, 2014 by QFIs from the trading of A-Shares are temporarily exempted from PRC Corporate Income Tax (CIT), while gains realized by QFIs prior to 17 November 2014 from disposal of PRC equity investments should be subject to PRC CIT according to the PRC CIT Law. The exemption under Circular 79 is applicable to QFIs which do not have an establishment or place of business or a permanent establishment ("PE") in the PRC, or QFIs which have a PE in the PRC but the gains derived from the disposal of PRC equity investments are not effectively connected to such PE. According to Caishui [2016] No. 36 ("Circular 36") and Caishui [2016] No.70 ("Circular 70"), capital gains realized by QFIs from the trading of PRC securities in the PRC are exempted from VAT.

However, none of Circular 79 or Circular 70 specified an expiry date for these temporary exemptions, and thus both may be subject to termination by the PRC authorities with or without notice. If these temporary exemptions expire or are withdrawn, QFIs would be subject to PRC WHT and VAT in respect of capital gains on PRC A-Shares under current PRC tax regime.

Under the prevailing PRC Stamp Duty ("PRC SD") Law, which became effective on July 1, 2022, QFIs are subject to PRC SD at a rate of 0.1% with respect to the sale of A-Shares. The purchase of A-Shares is currently not subject to PRC SD.

The tax laws, regulations and practice in the PRC are constantly changing, and they may be changed with retrospective effect. Any provision for taxation made by the relevant Sub-funds may be excessive or inadequate to meet final PRC tax liabilities on capital gains derived from indirect and direct China A-shares investments. Any excessive provision or inadequate provision for such taxation may impact the performance and hence the net asset value of the Sub-funds during the period of such excessive or inadequate provision. Consequently, Investors may be

advantaged or disadvantaged depending upon the final outcome of how capital gains from indirect and direct China A-shares investments will be taxed, the level of tax provision and when the Investors subscribed and/or redeemed their Shares in/from the Sub-fund.

Gains derived from the trading of PRC equity investments (including China A-shares) will be temporarily exempt from PRC corporate income tax and value added tax. However, Hong Kong and overseas investors (such as the Sub-funds) are required to pay tax on dividends and/or bonus shares at the rate of 10% which will be withheld and paid to the relevant authority by the listed companies. The Sub-funds which invest in China A-shares may be adversely affected as a result.

Risks associated with Insurance-linked Securities (“ILS”) and Catastrophe Bonds

A Sub-fund may invest in ILS such as catastrophe bonds. These are securities where the return of the principal and payment of interest is dependent on the non-occurrence of a specific trigger event.

For catastrophe bonds, the trigger event will be defined in the terms of the catastrophe bond and may include but is not limited to natural catastrophes (such as hurricanes, earthquakes, pandemics or other physical, extreme mortality or weather-related phenomena), pandemics or cyber-attacks. The extent of the loss to which the bond holder suffers will also be defined in the terms of the catastrophe bond and may be based on losses to a company or industry, modelled losses to a notional portfolio, industry indexes, readings of scientific instruments, or certain other parameters associated with a catastrophe rather than actual losses. There is a risk that the modelling used to calculate the probability of a trigger event may not be accurate and/or underestimate the likelihood of a trigger event. This may result in more frequent and greater than expected loss of principal and/or interest.

If a trigger event occurs, a Sub-fund may lose a portion or all of its principal invested and/or accrued interest from such catastrophe bond. The loss amount is determined by an independent third-party, not the issuer of the catastrophe bond in accordance with terms of the bond. In addition, if there is a dispute regarding a trigger event, there may be delays in the payment of principal and/or interest on the bonds. A Sub-fund is entitled to receive principal and interest payments so long as no trigger event occurs of the description and magnitude specified by the catastrophe bond.

Catastrophe bonds may provide for extensions of maturity that are mandatory or optional at the discretion of the issuer or sponsor, in order to process and audit loss claims in those cases where a trigger event has, or possibly has, occurred. An extension of maturity may increase volatility.

Catastrophe bonds may be rated by credit rating agencies on the basis of how likely it is that the trigger event will occur and are typically rated below investment grade (or considered equivalent if unrated).

Payment of Distributions out of Capital Risk

Distributions out of capital may result in the reduction of an investor’s original capital invested in a Sub-fund or from any capital gains attributable to that original investment of the relevant Sub-fund. Also, any distributions involving the capital and/or capital gains may result in an immediate reduction of the Net Asset Value per Share of the relevant Class. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor’s original investment or from any capital gains attributable to that original investment. If there is a change of distribution policy regarding any payment of dividend out of capital of the relevant Sub-fund, the Management Company will seek the prior approval of the SFC (if required) and provide at least one month’s prior notice to affected Shareholders.

The distribution amount and Net Asset Value of a Currency Hedged Share Class (e.g. Class BxH, Class V1H) may be adversely affected by differences in the interest rates of the reference currency of the Currency Hedged Share Class (e.g. Class BxH, Class V1H) and the relevant Sub-fund’s base currency, which may result in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than for other share classes.

7. DISTRIBUTION POLICY

Investors holding accumulation Shares of a Sub-fund will not receive any distributions. Instead, the income due to them will be automatically reinvested and added to the relevant Sub-fund and will thus contribute to a further increase in the value of the total net assets.

In respect of a distribution class of a Sub-fund, dividends (if any) may be paid out of investment income, capital (including net realized and unrealized investment gains and investors’ initial investment) at the discretion of the Directors in respect of any distributing Share Classes.

Investors should note that payment of dividends out of unrealized capital gains amounts to the payment of dividends out of capital under Hong Kong regulatory disclosure requirements. The payment of dividends out of unrealized capital gains (which mean effectively paying dividends out of capital), payment of dividends effectively out of a Sub-fund's capital and/or payment out of capital amount to a return or withdrawal of part of an investor's initial investment or from any capital gains attributable to that initial investment. Any distributions under such circumstances may result in an immediate reduction of that Sub-fund's Net Asset Value per Share. In such circumstances, distributions made during the lifetime of the relevant Sub-fund must be understood as a type of capital reimbursement.

For any distributing Share Classes of Sub-funds which are authorized by the SFC, such policy may be amended subject to obtaining the SFC's prior approval (if required) and by giving not less than one month's prior notice to affected Hong Kong investors.

In respect of Share Classes offered in Hong Kong which pay dividends out of capital (if any), the composition of the dividends (i.e. the relative amounts paid out of net distributable income and capital) for the last 12 months can be obtained either online at www.robeco.com.hk or from the Hong Kong Representative on request.

8. SUBSCRIPTIONS, REDEMPTIONS AND SWITCHES OF SHARES BY HONG KONG INVESTORS

Full details of subscription, redemption and switching procedures, all charges payable and other important information concerning the subscription, redemption and switching of Shares are set out in the Prospectus under Section 2. The Shares and the relevant forms for application, redemption or switching; and Hong Kong investors should read the relevant sections carefully in conjunction with this Hong Kong Covering Document.

Hong Kong investors will only be able to purchase / redeem / switch any shares in an SFC-authorized Sub-fund through Authorized Distributors appointed by the Management Company and/or the Global Distributor. The list of Authorized Distributors can be obtained from the Hong Kong Representative. Applications sent directly by Hong Kong investors to the Company, the Hong Kong Representative or the Global Distributor may be rejected.

Authorized Distributors may provide a nominee service to investors wishing to purchase Shares in the SFC-authorized Sub-funds. Investors who purchase Shares through such nominee services should note that the Shares will be held by the nominee on their behalf and that it is the nominee who will be recorded on the Company's register as Shareholder.

Hong Kong investors may purchase / redeem / switch any shares in an SFC-authorized Sub-fund through Authorized Distributors on a Valuation Day or such other day or days as those authorized distributors may determine from time to time. Such request will be dealt with based on the Net Asset Value per Share calculated for the day on which it is received by 3 p.m. CET by J.P. Morgan SE, Luxembourg Branch (as Administration Agent).

Investors should note that different distributor(s) may impose different dealing cut-off times before the dealing deadlines for receiving instructions for subscription, redemption and/or switching of Shares and may have different dealing arrangements/procedures. Before placing your subscription, redemption and/or switching orders, please check with your distributor for the distributor's internal dealing deadline (which may be earlier than the Sub-fund's dealing deadline) and the distributor's dealing arrangements/procedures.

If an investor wishes to redeem / switch the whole or any part of their holdings, they should submit such redemption / conversion request to the Authorized Distributor with whom they are invested.

Payment for redeemed Shares will be made in the currency the relevant Class of Shares is denominated within three Settlement Days after the Valuation Day by transfer to an account maintained by the payee. The redemption price of Shares of any Sub-fund may be more or less than the issue price thereof depending on the Net Asset Value per Share at the time of subscription and redemption.

If in exceptional circumstances the liquidity of a Sub-fund or a Class is not sufficient to enable the payment to be made within such a period, the maximum interval between the receipt of a properly documented request for redemption of Shares accepted by the Sub-fund and the payment of the redemption money to the Shareholder will not exceed one calendar month unless the market(s) in which a substantial portion of investments is made for a Sub-fund is subject to legal or regulatory requirements (such as foreign currency controls) thus rendering the payment of the redemption money within one calendar month not practicable. In such case, the extended time frame for the payment of redemption money shall reflect the additional time needed in light of the specific circumstances in the relevant market(s).

No money should be paid to any intermediary in Hong Kong who is not licensed or registered to carry on Type 1 (dealing in securities) regulated activities under Part V of the Securities and Futures Ordinance.

Redemption of Shares

For so long as a Sub-fund is authorized by the SFC, in the case when the Sub-fund may offer investors allocation of securities in lieu of the redemption payments, the prior consent of the relevant Shareholder will be obtained.

Redemption Gate

As provided in the section entitled “**2.5 Redemption of Shares**” in the Prospectus, requests for redemption (or switch out orders) received for any Sub-fund for a specific Valuation Day may, if the net redemption (or switch out) requests received for that day for all Share Classes of that Sub-fund exceed the threshold of 10% of the Net Asset Value of the Sub-fund, be deferred to the next Valuation Day.

For the avoidance of doubt, while the Prospectus provides that unexecuted redemption (or switch-out) requests may, to the extent permitted under applicable laws and regulations, be cancelled, this will not apply in respect of Sub-funds authorized by the SFC.

The redemption (or switch out) requests will be executed on a pro rata basis, and fair treatment of the Shareholders shall be ensured during the process. Any redemption (or switch out) requests deferred to the next Valuation Day will be executed at the redemption price based on the Net Asset Value per Share calculated on that Valuation Day.

For so long as a Sub-fund is authorized by the SFC, the Management Company will consult the Depositary prior to exercising the right to defer redemptions in respect of the relevant Sub-fund.

Subscriptions in kind

The Company will not accept any subscription in kind from Hong Kong investors.

Conversion / switching of Shares

Investors in Hong Kong should note that any conversion / switching can only be made into a Sub-fund which is authorized for sale in Hong Kong. Moreover, Hong Kong investors should note that conversion / switching may only be made into share classes that are offered to the public in Hong Kong.

In respect of the DSC Share Classes (i.e., Classes V1 and V1H), Hong Kong investors may not request any conversion / switching of such Shares during the specific holding period. However, after the third anniversary of the end of the IOP, Shares in the DSC Share Classes will automatically switch for Shares of the corresponding Classes Bx and BxH respectively in the same currency without charge, as further described under the section entitled “**11. FEES AND EXPENSES**”.

9. TEMPORARY SUSPENSION OF DEALINGS

The Company may, at its discretion and in consultation with the Depositary, temporarily suspend calculation of the Net Asset Value and/or suspend the subscription, switch and redemption of Shares in such circumstances as detailed in the section entitled “**2.8 Temporary Suspension of the determination of the Net Asset Value and of subscriptions and redemptions**” in the Prospectus. For so long as a Sub-fund is authorized by the SFC, the Company shall exercise this power having regard to the best interests of the Shareholders.

If the dealing in Shares and calculation of the Net Asset Value of one or more Share Classes of any Sub-fund which is authorized by the SFC ceases or is suspended, immediate notice of such suspension will be given to the SFC and will be published immediately in Hong Kong following such decision to suspend is taken, and at least once a month during the period of suspension, in appropriate manner (including via the Company’s website at www.robeco.com.hk). In the case of a prolonged suspension, prominent messages with a hyperlink to the relevant suspension notice published on the foregoing website may be further posted on the same website in lieu of issuing further notices (in electronic form).

10. VALUATION AND DETERMINATION OF NET ASSET VALUE

For so long as a Sub-fund is authorized by the SFC, the Directors may adjust the value of any assets of the Sub-fund in consultation with the Depositary if they determine that such adjustment is required to reflect its fair value. For

details of the valuation policy of the Company, please refer to the section entitled “2.7 Calculation of the Net Asset Value” in the Prospectus.

11. FEES AND EXPENSES

Details of the fees and expenses relating to the Company are set out in the section entitled “3.1 Fees and Expenses” in the Prospectus. The attention of prospective investors is in particular drawn to the information relating to fees and expenses set out therein.

Key Information regarding DSC Share Classes

Subscription fee may not be applied to DSC Share Classes (i.e., Classes V1 and V1H) of Robeco Credit Income.

For DSC Share Classes (i.e., Classes V1 and V1H) of Robeco Credit Income, the Company applies an exit charge payable by the redeeming Shareholder when redemptions occur during the holding period. The exit charge is payable to the Management Company. The holding period is the period commencing on the expiry of the IOP of the relevant Shares and ending on the third anniversary of the end of the IOP, unless otherwise set out. For partial redemptions during the holding period, the portion of Shares redeemed that falls within the holding period attracts the applicable exit charge. Upon expiry of the holding period, Shares in a DSC Share Class automatically convert into the corresponding retail Share Class without charge. From that moment, no exit charge applies. The maximum holding period is up to three years with a maximum exit charge of 2.7% of the redemption amount, applied to each redemption during the holding period, whereby the exit charge declines over time.

The exit charges specifically applicable to the DSC Share Classes (i.e., Classes V1 and V1H) of Robeco Credit Income are as follows:

Period of redemption (i.e. holding period)	Applicable rate of exit charge (percentage of redemption amount)
Within the 1 st year from the end of the applicable IOP (including the 1 st anniversary date)	2.7%
After the 1 st year and within the 2 nd year from the end of the applicable IOP (including the 2 nd anniversary date)	1.85%
After the 2 nd year and within the 3 rd year from the end of the applicable IOP (including the 3 rd anniversary date)	1%
After the 3 rd anniversary of the end of the applicable IOP	0%

For the avoidance of doubt, no exit charge will be applied in the context of compulsory switches detailed in the section entitled “8. SUBSCRIPTIONS, REDEMPTIONS AND SWITCHES OF SHARES BY HONG KONG INVESTORS” above.

Swing pricing may apply in addition to the applicable exit charge. Early redemption during the holding period may materially reduce investor returns due to the applicable exit charge.

For any other Share Class, the Company itself does not apply any redemption fee or exit charge.

For so long as the Company and the Sub-fund(s) are authorized by the SFC and to the extent required by the SFC, any increase in the rates e.g. the annual management fee, the sales charge, the annual service fee from the current levels to the maximum levels as specified in the Hong Kong Offering Documents will be subject to not less than one month's prior notice to the relevant Shareholders, subject to the applicable requirements of the Code.

Notwithstanding anything to the contrary contained in the Prospectus, for so long as the Company and the Sub-fund(s) are authorized in Hong Kong, no sales commissions, advertising or promotional expenses shall be charged to such Sub-fund(s). For the avoidance of doubt, any fee received by a Distributor in respect of its duties as distributor of any Sub-fund or class of Shares will be paid out of the management fee by the Management Company.

12. TERMINATION AND LIQUIDATION OF SFC-AUTHORIZED SUB-FUNDS AND SHARE CLASSES

The Company may terminate any Sub-fund or Class, and redeem all of the Shares of such Sub-fund or a Class pursuant to the conditions as set out in the sections entitled “**3.8 Liquidation and merger**” and “**3.9 Liquidation and merger of Classes of Shares**” in the Prospectus.

Should the Company be liquidated, then the liquidation will be carried out in accordance with the provisions of the Law. The net assets of each Sub-fund, as determined by the liquidator, will be distributed to the Shareholders of each Sub-fund in proportion to their shareholdings, taking account of the rights attached to the individual Class of Shares. Amounts unclaimed at the close of liquidation will be deposited in escrow at the Caisse de Consignation in Luxembourg for the benefit of the persons entitled thereto. Amounts not claimed within the statutory period of 6 months (or such other period as required by applicable laws and regulations) may be forfeited in accordance with applicable provisions of Luxembourg law.

The Board of Directors may further decide to liquidate a Class of Shares under the same circumstances as provided in the preceding paragraph. A notice of the decision to liquidate will be given by the Company to the Shareholders of the Class of Shares concerned prior to the effective date of the liquidation and the notice will indicate the reasons for, and the procedures of, the liquidation operations. Unless the Board of Directors otherwise decides in the interests of, or to keep equal treatment between, the Shareholders, the Shareholders concerned may continue to request redemption or conversion of their shares free of charge. Assets which could not be distributed to their beneficiaries upon the close of the liquidation of the Class of Shares concerned, will be deposited with the Caisse de Consignation on behalf of their beneficiaries.

13. LIQUIDITY RISK MANAGEMENT

The Company has in place Liquidity Management Tools (“LMTs”) to help mitigate liquidity risk of a Sub-fund under different market conditions. LMTs are applied at the level of the relevant Sub-fund and may, in the relevant circumstances, adversely affect investors’ liquidity and/or the value and timing of the amounts received on dealing. Details of the LMTs are set out in the section “**2.9 Liquidity Management Tools**” of the Prospectus.

The following LMTs may be employed by the Company to manage liquidity risks:

1. **Suspension of subscriptions, switches and redemptions:** Suspension of subscriptions, switches and redemptions means temporarily disallowing the subscription, switch and redemption of Shares of a Sub-fund. This LMT is described in the section “**2.8 Temporary Suspension of the determination of the Net Asset Value and of subscriptions and redemptions**” in the Prospectus. During such period of suspension, Shareholders would not be able to subscribe for, switch or redeem their Shares in the relevant Sub-fund.
2. **Redemption gate:** A redemption gate means a temporary and partial restriction of the right of Shareholders to redeem their Shares, so that they can only redeem a certain portion of their Shares. This LMT is described in the section “**2.5 Redemption of Shares**” in the Prospectus. If a redemption gate is applied, this may restrict the ability of a Shareholder to redeem in full the Shares he intends to redeem on a particular Valuation Day.
3. **Extension of notice period:** The extension of notice period means extending the period of notice that Shareholders must give, beyond a minimum period which is appropriate to the Sub-fund, when redeeming their Shares. This LMT is described in the section “**2.5 Redemption of Shares**” in the Prospectus. If such extension is invoked, Shareholders may be required to provide a longer period of advance notice before redemptions can be processed.
4. **Swing pricing:** Swing pricing means a pre-determined mechanism by which the Net Asset Value per Share is adjusted by the application of a swing factor that reflects the cost of liquidity as provided in the sub-section entitled “**Swing Pricing**” under the section “**2.7 Calculation of the Net Asset Value**” in the Prospectus. As a result of such adjustment, the Net Asset Value per Share, and therefore the issue price or the redemption price, may be higher or lower than it would otherwise have been had no such adjustment been made.
5. **Side pockets:** A side pocket means separating certain assets, whose economic or legal features have changed significantly or become uncertain due to exceptional circumstances, from the other assets of the Sub-fund, with a view to keeping the Sub-fund open. This LMT is described in the section “**2.5 Redemption of Shares**” in the Prospectus. A side pocket may be used, subject to any applicable legal or regulatory approval, only in exceptional circumstances where justified having regard to the interests of Shareholders. If a side pocket is used, due to the uncertainty as to the timing and value of realization of the assets placed

in the side pocket, the amount ultimately realized from such assets may be lower than their estimated value at the time the side pocket is created.

For so long as a Sub-fund is authorized by the SFC, the Management Company will consult the Depositary before the use of any LMT in respect of the relevant Sub-fund. Investors should note that there is a risk that such tools may not be effective in managing liquidity and redemption risks at all times.

14. AVAILABILITY OF THE NET ASSET VALUE PER SHARE

Except where the determination of Net Asset Value per Share of a Sub-fund has been suspended, in the circumstances described in the Prospectus, the Net Asset Value per Share of each Share Class available in Hong Kong may be obtained each Valuation Day from the Hong Kong Representative and online at the Company's website www.robeco.com.hk.

15. REPORTS TO SHAREHOLDERS

Please refer to the section **"3.7 Meetings and reports"** in the Prospectus. The annual report (containing the audited financial statements) for the Company and each Sub-fund and the unaudited semi-annual reports for the Company and each Sub-fund will be available in English only.

Once issued, copies of the latest annual and semi-annual financial statements may also be obtained at the office of the Hong Kong Representative during usual business hours and will also be made available electronically on the Company's website at www.robeco.com.hk.

No separate notification will be provided to the Shareholders upon the publication of any of these financial reports unless the means and/or timeframe of the availability of any of these financial reports differs from that disclosed in this section.

16. TAXATION IN HONG KONG

The following is a summary of certain Hong Kong tax consequences of the purchase, ownership and disposal of Shares. The summary of Hong Kong taxation is of a general nature, is for information purposes only, and is not intended to be an exhaustive list of all of the tax considerations that may be relevant to a decision to purchase, own, redeem or otherwise dispose of the Shares. Potential investors in Shares should consult their own advisors as to the Hong Kong or other tax consequences of the purchase, ownership and disposal of Shares.

During such period as the Company is authorized by the SFC then, under present Hong Kong law and practice:—

- (a) the Company is not expected to be subject to Hong Kong tax in respect of any of its authorized activities;
- (b) no tax will be payable by Shareholders in Hong Kong in respect of any capital gains arising on a sale, redemption or other disposal of Shares in the Company, except that Hong Kong profits tax may arise where such transactions form part of a trade, profession or business carried on in Hong Kong;
- (c) no tax should generally be payable by Shareholders in Hong Kong in respect of dividends or other income distributions of the Company.

17. AUTOMATIC EXCHANGE OF FINANCIAL ACCOUNT INFORMATION

The Inland Revenue (Amendment) (No.3) Ordinance (the **"Ordinance"**) came into force on 30 June 2016. This is the legislative framework for the implementation in Hong Kong of the Standard for Automatic Exchange of Financial Account Information (**"AEOI"**). The AEOI requires financial institutions (**"FI"**) in Hong Kong to collect information relating to non-Hong Kong tax residents holding accounts with FIs, and to file such information with the Hong Kong Inland Revenue Department (**"IRD"**) who in turn will exchange such information with the jurisdiction(s) in which that account holder is resident. Generally, tax information will be exchanged only with jurisdictions with which Hong Kong has a Competent Authority Agreement (**"CAA"**); however, FIs may further collect information relating to residents of other jurisdictions.

By investing in the Company or the relevant Sub-fund and/or continuing to invest in the Company or the relevant Sub-fund through FIs in Hong Kong, investors acknowledge that they may be required to provide additional information to the relevant FI in order for the relevant FI to comply with AEOI. The investor's information (and information on beneficial owners, beneficiaries, direct or indirect shareholders or other persons associated with such Shareholders that are not natural persons), may be communicated by the IRD to authorities in other jurisdictions.

Each Shareholder and prospective investor should consult its own professional advisor(s) on the administrative and substantive implications of AEOI on its current or proposed investment in the Company through FIs in Hong Kong.

18. FOREIGN ACCOUNT TAX COMPLIANCE ACT ("FATCA")

The Company intends to and will endeavor to meet the obligations imposed on it under FATCA as set out in the section entitled "**FATCA**" of the Prospectus.

Any action taken by the Company in relation to a Shareholder's investment in the Company to redress such non-compliance and/or to ensure that such withholding is economically borne by the relevant Shareholder whose failure to provide the necessary information or to become a participating foreign financial institution or other action or inaction gave rise to the withholding or non-compliance, including compulsory redemption of some or all of such Shareholder's holding of Shares in the Company will be to the extent permitted by applicable laws and regulations. The Company in taking such action shall act in good faith and on reasonable grounds.

For so long as the Sub-funds are authorized by the SFC, no indemnification on FATCA shall be imposed on Shareholders of the Sub-funds.

19. SOFT COMMISSIONS AND TRANSACTIONS WITH CONNECTED PERSONS

Subject to the restrictions and requirements applicable from time to time, the Management Company, the Portfolio Manager or any of their respective Connected Persons may deal with any SFC-authorized Sub-fund as principal provided that dealings are effected on best available terms negotiated and executed at arm's length basis and in the best interests of the Shareholders. Any transactions between an SFC-authorized Sub-fund and the Management Company, the Portfolio Manager or any of their Connected Persons as principal may only be made with the prior written consent of the Depositary. All such transactions must be disclosed in the Company's annual report.

No person may be allowed to enter on behalf of a Sub-fund into underwriting or sub-underwriting contracts without the prior consent of the Depositary and unless the Company or the Management Company provides in writing that all commissions and fees payable to the Management Company under such contracts, and all investments acquired pursuant to such contracts, will form part of the Sub-fund's assets.

In transacting with brokers or dealers connected to the Management Company, the Portfolio Manager, the Depositary or any of their respective Connected Persons, the Management Company and the Portfolio Manager must ensure that:

- (a) such transactions are on arm's length terms;
- (b) they use due care in the selection of such brokers or dealers and ensure that they are suitably qualified in the circumstances;
- (c) transaction execution must be consistent with applicable best execution standards;
- (d) the fee or commission paid to any such broker or dealer in respect of a transaction must not be greater than that which is payable at the prevailing market rate for a transaction of that size and nature;
- (e) they monitor such transactions to ensure compliance with their obligations; and
- (f) the nature of such transactions and the total commissions and other quantifiable benefits received by such broker or dealer shall be disclosed in the annual report of the Company and/or the relevant SFC-authorized Sub-fund.

If cash forming part of the assets of the SFC-authorized Sub-fund is deposited with the Depositary, the Management Company, the Portfolio Manager or any of their respective Connected Persons (being an institution licensed to accept deposits), such cash deposit shall be maintained in a manner that is in the best interests of the Shareholders, having regard to the prevailing commercial rate for a deposit of similar type, size and term negotiated at arm's length in accordance with ordinary and normal course of business.

Borrowing may be effected in respect of the SFC-authorized Sub-fund from any person (including, if a banker, the Depositary, the Management Company, the Portfolio Manager or any Connected Person of any of them) provided that the rate of interest on that borrowing and any fee or premium payable to such banker in relation to the arrangement or termination of the borrowing are not higher than such banker would, in accordance with its normal

banking practice, charge on an arm's length transaction for a loan of a similar size, nature and duration in circumstances similar to those then prevailing in relation to the relevant SFC-authorized Sub-fund.

For so long as the Company and the Sub-fund(s) are authorized by the SFC, none of the Management Company, the Portfolio Manager or any of their Connected Persons will retain cash or other rebates from brokers or dealers in consideration of directing transactions for the SFC-authorized Sub-fund(s) to such brokers or dealers, save that goods and services (soft commissions) as described in the paragraph below may be retained. Any such cash commission or rebates received from any such brokers or dealers shall be for the account of the SFC-authorized Sub-fund(s). Details of any such commissions and soft commission policies and practices of the Management Company and/or the Portfolio Manager, including a description of the goods and services received by the Management Company and/or the Portfolio Manager and their Connected Persons will be disclosed in the annual and semi-annual reports of the Company and/or the SFC-authorized Sub-fund(s).

Soft commissions in the form of the provision of goods or services by brokers or dealers are permitted if (a) such goods or services are of demonstrable benefit to the Shareholders, (b) the transaction execution is consistent with best execution standards and brokerage rates are not in excess of customary institutional full-service brokerage rates, (c) periodic disclosure is made in the annual report of the Company or the relevant Sub-fund in the form of a statement describing the soft dollar policies and practices of the Management Company or the Portfolio Manager, including a description of goods and services received by them; and (d) the availability of soft dollar arrangements is not the sole or primary purpose to perform or arrange transaction with such broker or dealer. Such goods and services may include research and advisory services, economic and political analysis, portfolio analysis including valuation and performance measurement, market analysis, data and quotation services, computer hardware and software incidental to the above goods and services, clearing and custodian services and investment-related publications. For the avoidance of doubt, such goods and services do not include travel, accommodation, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employee salaries or direct money payments.

For the purposes of this section, "**Connected Person**" in relation to a company means:-

- (a) any person or company beneficially owning, directly or indirectly, 20% or more of the ordinary share capital of that company or able to exercise directly or indirectly, 20% or more of the total votes in that company; or
- (b) any person or company controlled by a person who or which meets one or both of the descriptions given in (a); or
- (c) any member of the group of which that company forms part; or
- (d) any director or officer of that company or any of its connected persons as defined in (a), (b) or (c) above.

20. NOTICES TO SHAREHOLDERS

Notice required to be given to Shareholders under this Hong Kong Covering Document, the Prospectus, the relevant Supplement or the Articles may be disseminated by post or e-mail at the option of the relevant Shareholder as indicated in the application form. For specific details of the dissemination arrangement, please check with the Hong Kong Representative.

Shareholders receiving notices and documents by e-mail are reminded to save or print a copy of the relevant notice or document for future reference if necessary.

21. KEY INFORMATION DOCUMENT

Notwithstanding the references to the key information document (KID) in the Prospectus, the KID is not intended to be, and shall not in any event be interpreted as, an offering document of the Company in Hong Kong and is not distributed to investors in Hong Kong.

22. DOCUMENTS FOR INSPECTION

Copies of the following documents may be inspected free of charge at the office of the Hong Kong Representative during normal business hours on any Hong Kong Business Day:

- the Articles of Incorporation of the Company
- the Prospectus of the Company
- the Depositary and Custodian Agreement between the Company, the Management Company and J.P. Morgan

- SE, Luxembourg Branch;
- the Management Company Services Agreement between the Company and the Management Company;
- the Fund Administration Specific Service Agreement between the Company, the Management Company and J.P. Morgan SE, Luxembourg Branch;
- Robeco's Risk management process
- the KFS in respect of each SFC-authorized Sub-fund
- the latest available annual report (containing the audited financial statements) and the unaudited semi-annual report of the Company (available in English only)
- the Hong Kong Representative Agreement amongst the Company, the Management Company and the Hong Kong Representative

The Hong Kong Offering Documents, notices to Shareholders of the Company and the SFC-authorized Sub-funds in Hong Kong and the most recent financial reports of the Company and the Sub-funds will also be made available electronically on the Company's website at www.robeco.com.hk.

23. AVAILABILITY OF THE SFDR³ ANNEXES AND ADDITIONAL ESG INFORMATION

Pursuant to the Sustainable Finance Disclosure Regulation ("SFDR"), pre-contractual disclosures have been prepared in respect of Sub-funds that fall within the scope of Article 8 or 9 of the SFDR in the form of an annex appended to the Prospectus under "**APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**" (the "**SFDR Annex**"). Notwithstanding the references to the SFDR Annex(es) or such Appendix in the Prospectus, the SFDR Annexes in relation to Sub-funds that fall within the scope of Article 8 or 9 of the SFDR will be available to Hong Kong investors (in English language only) from the Hong Kong Representative upon request, and are not appended to the Prospectus distributed in Hong Kong. The SFDR Annexes do not form part of the Hong Kong Offering Documents.

In respect of Robeco Smart Energy, which is authorized by the SFC as an ESG fund for the purposes of the Circular to management companies of SFC-authorized unit trusts and mutual funds – ESG funds issued by the SFC on 29 June 2021, as amended from time to time, additional information relating to the Sub-fund's sustainable investment framework, including information on Robeco's SDG Framework and related methodology and governance, is made available to Hong Kong investors (in English language only) at <https://www.robeco.com/files/docm/sfdr-robeco-smart-energy-en.pdf> and <https://www.robeco.com/files/docm/docu-robeco-sdg-framework.pdf>. Such additional information does not form part of the Hong Kong Offering Documents.

24. ELECTRONIC DISSEMINATION

Where indicated by the Shareholder, notice required to be given to Shareholders in Hong Kong under the Hong Kong Offering Documents or under the Articles may be disseminated either in printed copies or by electronic means specified by the Hong Kong Representative (e.g. email, posting on website with email notification at the option of the relevant Shareholder as indicated in its application form (the "**default means**")).

Shareholders may contact the Hong Kong Representative in writing to change the default means and such change will become effective within one month upon receipt of the request by the Hong Kong Representative.

Shareholders who have chosen to receive notices and documents by electronic means are reminded to save or print a copy of the relevant notice or document for future reference if necessary.

³ Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector, as amended

The background of the cover is a photograph of a modern cable-stayed bridge with a tall, white, A-shaped pylon. Several skyscrapers are visible in the background, reflecting the warm light of a sunset. The sky is a mix of orange, pink, and purple. The bridge and buildings are reflected in the water in the foreground.

Robeco Capital Growth Funds

Prospectus

Société d'Investissement à Capital Variable - SICAV
Undertaking for Collective Investment in Transferable Securities incorporated under Luxembourg law

20 August 2026

THE DIRECTORS OF THE FUND, WHOSE NAMES APPEAR ON PAGE 20 ARE THE PERSONS RESPONSIBLE FOR THE INFORMATION CONTAINED IN THIS PROSPECTUS. TO THE BEST OF THE KNOWLEDGE AND BELIEF OF THE DIRECTORS (WHO HAVE TAKEN ALL REASONABLE CARE TO ENSURE THAT SUCH IS THE CASE), THE INFORMATION CONTAINED IN THIS PROSPECTUS IS IN ACCORDANCE WITH THE FACTS AND DOES NOT OMIT ANYTHING LIKELY TO AFFECT THE IMPORT OF SUCH INFORMATION. THE DIRECTORS ACCEPT RESPONSIBILITY ACCORDINGLY.

SUBSCRIPTIONS CAN ONLY BE ACCEPTED IF MADE ON THE BASIS OF THIS PROSPECTUS AND THE RELEVANT KEY INFORMATION DOCUMENT. THE LATEST AVAILABLE ANNUAL REPORT AND SEMI-ANNUAL REPORT, IF PUBLISHED THEREAFTER SHALL BE DEEMED TO FORM PART OF THE PROSPECTUS.

A LIST OF CLASSES OF SHARES IN ISSUE MAY BE OBTAINED AT THE REGISTERED OFFICE OF THE COMPANY ON REQUEST.

THE SHARES REFERRED TO IN THIS PROSPECTUS ARE OFFERED SOLELY ON THE BASIS OF THE INFORMATION CONTAINED HEREIN. IN CONNECTION WITH THE OFFER MADE HEREBY, NO PERSON IS AUTHORISED TO GIVE ANY INFORMATION OR TO MAKE ANY REPRESENTATIONS OTHER THAN THOSE CONTAINED IN THIS PROSPECTUS AND THE DOCUMENTS MENTIONED HEREIN AND ANY PURCHASE MADE BY ANY PERSON ON THE BASIS OF STATEMENTS OR REPRESENTATIONS NOT CONTAINED IN OR INCONSISTENT WITH THE INFORMATION CONTAINED IN THIS PROSPECTUS IS UNAUTHORISED AND SHALL BE SOLELY AT THE RISK OF THE PURCHASER.

THE OFFICIAL LANGUAGE OF THIS PROSPECTUS IS ENGLISH. IT MAY BE TRANSLATED INTO OTHER LANGUAGES. IN THE EVENT OF A DISCREPANCY BETWEEN THE ENGLISH VERSION OF THE PROSPECTUS AND VERSIONS WRITTEN IN OTHER LANGUAGES, THE ENGLISH VERSION WILL TAKE PRECEDENCE.

THIS PROSPECTUS DOES NOT CONSTITUTE AND MAY NOT BE USED FOR THE PURPOSE OF AN OFFER OR SOLICITATION TO ANY PERSON IN ANY JURISDICTION IN WHICH SUCH OFFER OR SOLICITATION IS NOT LAWFUL OR IN WHICH THE PERSON MAKING SUCH OFFER OR SOLICITATION IS NOT QUALIFIED TO DO SO OR TO WHOM IT IS UNLAWFUL TO MAKE SUCH OFFER OR SOLICITATION. ANYONE HAVING IN ANY WAY ACCESS TO THIS PROSPECTUS IS REQUIRED TO INFORM HIMSELF ABOUT AND OBSERVE ANY RESTRICTIONS AS TO THE OFFER OR SALE OF SHARES AND THE DISTRIBUTION OF THIS PROSPECTUS UNDER THE LAWS AND REGULATIONS OF THE JURISDICTION OF THE COUNTRY FROM WHICH THIS ACCESS IS ACQUIRED OR OF THE COUNTRY OF RESIDENCE OF THE POTENTIAL INVESTOR.

US PERSONS ARE NOT ELIGIBLE TO INVEST IN SHARES OF THE COMPANY.

SHAREHOLDERS, AND INTERMEDIARIES ACTING FOR PROSPECTIVE SHAREHOLDERS, SHOULD TAKE PARTICULAR NOTE THAT IT IS THE EXISTING POLICY OF THE COMPANY THAT US PERSONS (AS DEFINED IN THE SECTION *GLOSSARY OF DEFINED TERMS*) MAY NOT INVEST IN THE FUND, AND THAT INVESTORS WHO BECOME US PERSONS MAY BECOME SUBJECT TO COMPULSORY REDEMPTION OF THEIR HOLDINGS.

SHAREHOLDERS, AND INTERMEDIARIES ACTING FOR PROSPECTIVE SHAREHOLDERS, SHOULD ALSO TAKE PARTICULAR NOTE THAT THE COMPANY IS REQUIRED UNDER LUXEMBOURG LAW TO REPORT CERTAIN INFORMATION OF INVESTORS WHO ARE TAX RESIDENTS IN A JURISDICTION THAT JOINED THE OECD INITIATIVE UNDER THE COMMON REPORTING STANDARDS, WHO ARE "SPECIFIED US PERSONS" (AS DEFINED IN THE SECTION *GLOSSARY OF DEFINED TERMS*) UNDER THE FOREIGN ACCOUNT TAX COMPLIANCE ACT OR INVESTORS OR INTERMEDIARIES WHO ARE NOT COMPLYING WITH FATCA.

SHARES IN THE COMPANY MAY NEITHER BE OFFERED NOR SOLD TO ANY US AMERICAN BENEFIT PLAN INVESTOR. FOR THIS PURPOSE, A "BENEFIT PLAN INVESTOR" MEANS ANY (I) "EMPLOYEE BENEFIT PLAN" WITHIN THE MEANING OF SECTION 3(3) OF THE US EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974, AS AMENDED ("ERISA") THAT IS SUBJECT TO THE PROVISIONS OF PART 4 OF TITLE I OF ERISA, (II) INDIVIDUAL RETIREMENT ACCOUNT, KEOGH PLAN OR OTHER PLAN DESCRIBED IN SECTION 4975(E)(1) OF THE US INTERNAL REVENUE CODE OF 1986, AS AMENDED, (III) ENTITY WHOSE UNDERLYING ASSETS INCLUDE "PLAN ASSETS" BY REASON OF 25% OR MORE OF ANY CLASS OF EQUITY INTEREST IN THE ENTITY BEING HELD BY PLANS DESCRIBED IN (I) AND (II) ABOVE, OR (IV) OTHER ENTITY (SUCH AS SEGREGATED OR COMMON ACCOUNTS OF AN INSURANCE COMPANY, A CORPORATE GROUP OR A COMMON TRUST) WHOSE UNDERLYING ASSETS INCLUDE "PLAN ASSETS" BY REASON OF AN INVESTMENT IN THE ENTITY BY PLANS DESCRIBED IN (I) AND (II) ABOVE.

NOTICE TO RESIDENTS OF HONG KONG: THE DISTRIBUTION OF THIS PROSPECTUS, AND THE PLACEMENT OF SHARES IN HONG KONG, IS RESTRICTED. THIS PROSPECTUS HAS NOT BEEN REGISTERED IN HONG KONG AND MAY ONLY BE DISTRIBUTED, CIRCULATED OR ISSUED TO PERSONS WHO ARE PROFESSIONAL INVESTORS UNDER THE SECURITIES AND FUTURES ORDINANCE AND ANY RULES MADE UNDER THAT ORDINANCE OR AS OTHERWISE PERMITTED BY THE SECURITIES AND FUTURES ORDINANCE.

IN CASE OF DOUBT ABOUT THE CONTENTS OF THIS PROSPECTUS OR THE RISKS INVOLVED IN INVESTING IN THE COMPANY, PLEASE CONSULT A STOCKBROKER, BANK MANAGER, SOLICITOR, ACCOUNTANT OR OTHER INDEPENDENT FINANCIAL ADVISER.

APPENDIX VII – OVERVIEW PAYING AGENTS, REPRESENTATIVE OFFICES, FACILITY AGENTS.....424

GLOSSARY OF DEFINED TERMS

The following summary is qualified in its entirety by reference to the more detailed information included elsewhere in this Prospectus.

3D or 3D Investing

While traditional investing focuses on balancing risk and return to optimise financial performance, 3D Investing enhances this approach by incorporating sustainability alongside risk and return as inputs to an investment process, recognising that sustainability can be a key driver of long-term value and resilience. This enhanced approach allows an assessment of investment opportunities based not only on a company's financial prospects and risk profile, but also on its management of sustainability factors. By incorporating sustainability, it is expected that a portfolio will exhibit a meaningful sustainability profile over time. It is important to understand that, over the short to medium term, a portfolio's sustainability profile may fluctuate as the performance of companies in the portfolio changes. For instance, if companies with strong sustainability characteristics become overvalued, exposure to them may be reduced. This could temporarily affect the portfolio's sustainability profile. Also, specific portfolio guidelines and restrictions can affect the portfolio's sustainability profile.

Active Ownership

Voting and engagement apply to the Sub-fund. As a signatory to the United Nations Principles for Responsible Investments, Robeco's dedicated Active Ownership team conducts engagement activities based on clearly stated objectives. Voting is done based on the International Corporate Governance Network (ICGN) principles and local governance codes. More information on RIAM's voting and engagement activities performed in relation to the Sub-fund(s), including the latest Active Ownership report, can be found on <https://www.robeco.com/en-int/sustainable-investing/expertise/most-sustainable-countries-in-the-world>.

Administration Agent

J.P. Morgan SE, Luxembourg Branch, appointed by the Management Company to perform the administration functions.

Affiliated Entity

Any direct or indirect subsidiary of ORIX Corporation Europe N.V.

Alternative Investments

An alternative investment is an investment in one or more of the following asset classes: Commodities, Private Equity, Hedging Strategies or Real Estate. Investments in these asset classes will take place via investments in UCITS/other UCIs.

Articles of Incorporation

The Company's articles of incorporation as may be amended from time to time.

AUD

Australian Dollar

Auditor

KPMG Audit, *S.à r.l.*, appointed by the Company as approved statutory auditor of the Company.

Benchmark

An index that is used to measure the performance of a Sub-fund with the purpose of tracking the return of such index or defining the asset allocation of a portfolio or computing the performance fees.

Benchmark Regulation

Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds, as amended.

BRL

Brazilian Real

CAD

Canadian Dollar

Carbon Credit

A certificate that is issued by a Carbon Crediting Program. A carbon credit represents a greenhouse gas emission reduction to, or removal from, the atmosphere equivalent to one metric tonne of carbon dioxide equivalent, calculated as the difference in

emissions from a baseline scenario to a project scenario. Carbon credits are uniquely serialized, issued, tracked and retired or administratively cancelled by means of an electronic registry operated by an administrative body, such as a Carbon Crediting Program.

Carbon Crediting Program

A standard setting program that registers mitigation activities and issues Carbon Credits, which can be Voluntary Emission Reduction (VERs) certificates and/or Certified Emission Reduction (CERs) certificates.

Carbon footprint

The Sub-fund's Carbon footprint is calculated based on the carbon equivalent emissions of all greenhouse gas emissions per the Enterprise Value Including Cash (EVIC). For Sub-funds covered under Article 8 of SFDR, the carbon emissions include Greenhouse gas emissions (scope 1, 2 and 3 upstream) and for Sub-funds covered under Article 9 of SFDR, the carbon emissions include Greenhouse gas emissions (scope 1, 2 and 3).

CET

Central European Time

CFD

Contract for Difference

CHF

Swiss Franc

China A-Shares

Equity securities of Chinese companies listed and traded in RMB on Chinese stock exchanges such as Shenzhen or Shanghai Stock.

China B-Shares

Equity securities of Chinese companies listed and traded in HKD or USD on Chinese stock exchanges such as Shenzhen or Shanghai Stock Exchange.

Classes of Shares (or Share Classes or Classes)

The Fund offers investors a choice of investment in one or more Classes of Shares within each Sub-fund. The assets of the Classes will be commonly invested, but between Classes of Shares a different sale or redemption charge structure, fee structure, minimum holding amount, currency or dividend policy may be applied.

Climate Risk Analysis

Fundamental impact analysis of material transition and physical climate risks on the financial prospects of companies and countries.

Climate Traffic Light

A forward-looking assessment of a company's alignment with a below 2°C pathway. This is based on a company's emission reduction targets and the credibility of those targets, compared to what is needed from that company to achieve global warming of below 2°C by 2100.

Climate Transition Benchmark (CTB)

An EU Climate Transition Benchmark in accordance with the Benchmark Regulation.

Company

Robeco Capital Growth Funds (also referred to as the "Fund") is a Luxembourg domiciled "*Société d'investissement à capital variable*" pursuant to the amended law of 10 August 1915 on commercial companies and to part I of the amended law of 17 December 2010 on undertakings for collective investment (the "**Law**"). The Company takes the form of an umbrella fund and is made up of several Sub-funds. Each Sub-fund may have one or more Classes of Shares. All references to the Company refer, where applicable, also to any delegates of the Company.

Country Sustainability Ranking

The Country Sustainability Ranking is a proprietary research model to measure the ESG credentials of 150 countries twice a year. More information on the Country Sustainability Ranking methodology can be found on <https://www.robeco.com/en-int/sustainable-investing/expertise/most-sustainable-countries-in-the-world>.

CRS

Common Reporting Standard as set out in Section 2.9 "Taxation".

CSSF

Commission de Surveillance du Secteur Financier, the Luxembourg supervisory authority.

Cut-off time

Unless otherwise stated in Appendix I, requests for subscription, switch or redemption of Shares received not later than 15:00 CET on the Valuation Day will be dealt at the Net Asset Value per Share as of the Valuation Day. Requests received after the Cut-off time shall be processed on the next Valuation Day.

DSC Share Class

A deferred sales charge (DSC) share class applies a redemption fee on Shares redeemed during a specified holding period as set out in Section 3.1 "Fees and Expenses", sub-section 2. b. "Exit Charge".

Depository

The assets of the Fund are held under the safekeeping controls of the Depository, J.P. Morgan SE, Luxembourg Branch.

Directors

The Board of Directors of the Fund (also the "**Board**", the "**Directors**" or the "**Board of Directors**").

Distressed Securities

Securities issued by a company, sovereign state, or entity that are either in default or at high risk of default (i.e., securities with an S&P or equivalent rating of CC or lower).

DKK

Danish Krone

Elevated sustainability risk

Companies that have high exposure and limited management of ESG risks according to Robeco's data provider.

Emerging Countries

Countries with less developed economies and/or less established financial markets and potential higher economic growth. Examples include most countries in Asia, Latin America, Eastern Europe, the Middle East and Africa. The list of emerging and less developed markets is subject to change and is reviewed from time to time by recognised index providers. The Management Company, in its discretion, will determine and review from time to time which countries constitute Emerging Countries.

Engagement

A long-term active dialogue between investors and companies, companies and other relevant stakeholders on environmental, social and governance factors. As per Directive (EU) 2017/828 (EU Shareholder Right Directive), it also encompasses monitoring of investee company on non-financial performance, social and environmental and corporate governance, voting and exercising other shareholder rights and managing of potential conflicts.

Equity Swap (including TRS and CFD)

A derivative contract where payments are linked to the change in value of an underlying equity, basket of equities or index. The equity return payer pays to the equity return receiver any increase in the value of the underlying plus any dividends received. The equity return receiver pays the equity return payer any decrease in the value of the underlying plus funding cost.

ESG Integration

The structural integration of information on Environmental, Social and Governance (ESG) factors into the investment decision making process.

ESMA

European Securities and Markets Authority

EUR/Euro

The official single European currency adopted by a number of EU Member States participating in the Economic and Monetary Union (as defined in European Union legislation). This definition also includes any possible future individual currencies of countries that currently adopt the Euro.

EVIC

The sum, at fiscal year-end, of the market capitalisation of ordinary shares, the market capitalisation of preferred shares, and the book value of total debt and non-controlling interests, without the deduction of cash or cash equivalents.

Exclusions

The Robeco exclusion policy ("Robeco's Exclusion Policy") applies to the Sub-funds. Robeco believes that some products and business practices are detrimental to society. Therefore, a number of exclusion criteria are outlined in this policy. The criteria that apply to a Sub-fund depend on the sustainability profile of the Sub-fund. The most recent version of Robeco's Exclusion Policy can be found on <https://www.robeco.com/files/docm/docu-exclusion-policy.pdf>, including the criteria and to which funds they apply.

Financial Year

The business year of the Fund. The Financial Year of the Fund ends on the last day of December of each year.

Fund

Robeco Capital Growth Funds (also referred to as the "**Company**") is a Luxembourg domiciled "*Société d'investissement à capital variable*" pursuant to the law of 10 August 1915 on commercial companies and to part I of the Law. The Fund takes the form of an umbrella fund and is made up of several Sub-funds. Each Sub-fund may have one or more Classes of Shares. All references to the Fund refer, where applicable, also to any delegates of the Fund.

GBP

United Kingdom Pound Sterling

Green Bonds

Green bonds are debt instruments whose proceeds will be used for partial or full financing or pre-financing of new and/or existing projects that have a beneficial impact on the environment. These bonds are mainly issued by supranational bodies, local authorities, government agencies and enterprises.

Greenhouse gas (GHG) emissions

The emissions in terms of tonnes of CO₂ equivalent of carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), nitrogen trifluoride (NF₃) and sulphur hexafluoride (SF₆) as defined under point (1) of Article 3 of Regulation (EU) 2018/842 of the European Parliament and of the Council.

Gross Exposure

The absolute sum of the long and the short exposure which is expressed as a percentage of the Net Asset Value.

Hard currency

Globally traded major currency, such as but not limited to USD, EUR, GBP, JPY and CHF.

HKD

Hong Kong Dollar.

Institutional Investor

An Institutional Investors as defined from time to time by the Luxembourg supervisory authority and further described in Section 2.1 "**Classes of Shares**" under the heading "Institutional Share Classes".

Investor

A subscriber for Shares.

ILS

Israeli Shekel

JPY

Japanese Yen

Key Information Document(s) or KID(s)

The key information document(s) as defined by the Law and applicable regulations, as may be amended from time to time.

Lending Agent

J.P. Morgan SE, Luxembourg Branch, appointed by the Management Company as Lending Agent.

Listing of Shares

Class 'D' Shares, respectively 'DH' Shares where applicable, are or will be listed on the Luxembourg Stock Exchange.

Local currency

The local currency of the relevant country in which the Sub-fund invests.

Management Company

Robeco Institutional Asset Management B.V. has been appointed by the Board of Directors as Management Company to be responsible on a day-to-day basis for providing (either through its head office in the Netherlands or via a branch) administration, marketing, portfolio management and investment advisory services in respect of all Sub-funds. The Management Company has the possibility to delegate part or all of such functions to third parties.

Minimum investment

The minimum investment levels for initial and subsequent investments are specified in the Prospectus.

MMF Regulation (MMFR)

Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, as amended.

MXN

Mexican Peso

Negative Screening

Negative screening is the process of finding companies that score poorly on environmental, social and governance (ESG) factors relative to their peers. These companies can then be avoided when constructing a portfolio, based on quantitative measures (e.g., lowest 20% performing companies on ESG) or qualitative measures (e.g., by sector).

Net Asset Value per Share

The Net Asset Value (or "NAV") of the Shares of each Class is determined as set out in Section 2.7 "[Calculation of the Net Asset Value](#)".

NOK

Norwegian Krone

OECD

Organisation for Economic Cooperation and Development.

OECD Guidelines for Multinational Enterprises

The Organisation for Economic Co-operation and Development (OECD) has provided recommendations addressed by governments to multinational enterprises operating in or from adhering countries. They provide non-binding principles and standards for responsible business conduct in a global context consistent with applicable laws and internationally recognised standards.

OECD Model Rules for Pillar Two

OECD (2021), Tax Challenges Arising from the Digitalisation of the Economy – Global Anti-Base Erosion Model Rules (Pillar Two): Inclusive Framework on BEPS, OECD Publishing, Paris, <https://doi.org/10.1787/782bac33-en>.

Offsetting

The compensation for an entity's greenhouse gas emissions within its scope by achieving emission reductions or removals outside the boundary or value chain of that entity.

Orix Group

Orix Cooperation, located at SOUTH TOWER, 2-4-1 Hamamatsu-cho, Minato-ku, Tokyo, 105-5135, Japan, together with its wholly-owned subsidiaries and related corporate bodies, including Portfolio Managers.

Paris-Aligned Benchmarks (PAB)

An EU Paris-aligned Benchmark in accordance with the Benchmark Regulation.

Paris Agreement

The Paris Agreement is an international treaty on climate change, which was adopted at the UN Climate Change Conference (COP21) in Paris, France, on 12 December 2015. Its overall objective is to hold the increase in the global average temperature to well below 2°C above pre-industrial levels and to pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels.

Portfolio Manager

Entities appointed by the Management Company to handle the day-to-day management of some of the Sub-funds' assets in accordance with Section 3.3 "**Management Company**", sub-section "Portfolio Managers" (as disclosed, if applicable, on <https://www.robeco.com/files/docm/pros-cgf-delegation-list.pdf>).

Principal Paying Agent

J.P. Morgan SE, Luxembourg Branch, appointed by the Fund to perform the paying agent functions.

PRC

People's Republic of China.

Prospectus

This document, the Prospectus of Robeco Capital Growth Funds.

Proxy Voting

Equity holdings can grant the right to vote and Robeco exerts that right by voting according to Robeco's Proxy Voting Policy, unless impediments occur (e.g. shareblocking). Proxy Voting at Annual General Meetings of shareholders (AGMs) is aimed at influencing a company's governance, strategy or operations, including company's ESG practices, to address material sustainability risks and achieve more sustainable outcomes. More information can be found on <https://www.robeco.com/files/docm/docu-stewardship-approach-and-guidelines.pdf>.

QFI

Qualified Foreign Investor, as defined by the China Securities Regulatory Commission under the QFI Regulations.

QFI Licence Holder

Robeco Institutional Asset Management B.V.

QFI License

The QFI License Holder has obtained a Qualified Foreign Investor license (the "QFI License") from the China Securities Regulatory Commission (the "CSRC"). This QFI License allows foreign investors to invest in, amongst others, China A-shares and in RMB denominated Chinese onshore bonds.

QFI PRC Custodian

Deutsche Bank (China) Co., Ltd.

QFI Regulations

The laws and regulations governing the establishment and operation of the qualified foreign investors regime in the PRC, as may be promulgated and/or amended from time to time.

QI

Quant Investing. QI in the name of a Sub-fund illustrates that it is part of the quantitatively managed fund range of Robeco.

RCGF

Robeco Capital Growth Funds.

Real Estate Investment Trust (or "REIT")

An entity that is dedicated to owning, and in most cases, managing, real estate. This may include, but is not limited to, real estate in the residential (apartments), commercial (shopping centres, offices) and industrial (factories, warehouses) sectors. Certain REITs may also engage in real estate financing transactions and other real estate development activities. The legal structure of a REIT, its investment restrictions and the regulatory and taxation regimes to which it is subject will differ depending on the jurisdiction in which it is established. Investment in REITs will be allowed if they qualify as transferable securities. The units of a closed-ended REIT, the units of which are listed on a Regulated Market may be classified as a transferable security listed on a Regulated Market thereby qualifying as an eligible investment for a UCITS under Luxembourg law.

Redemption of Shares

Shares can at any time be redeemed and the redemption price per Share will be based upon the Net Asset Value per (Class of) Share as of the relevant Valuation Day. Redemptions of Shares are subject to the conditions and restrictions laid down in the Company's articles of incorporation (the "**Articles of Incorporation**") and in any applicable law.

Reference currency (or Base currency)

The currency used by a Sub-fund or Share Class for accounting purposes; note that it may differ from the currency (or currencies) in which the Sub-fund is invested.

Registrar

J.P. Morgan SE, Luxembourg Branch, appointed by the Management Company to maintain the register of Shareholders and to process the issue, switch and Redemption of Shares.

Regulated Market

A market within the meaning of Article 4.1.14 of Directive 2004/39/EC or any Directive updating or replacing Directive 2004/39/EC and any other market which is regulated, operates regularly and is recognized and open to the public in an Eligible State.

Regulation on EU Climate Benchmarks

Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 supplementing Regulation (EU) 2016/1011 of the European Parliament and of the Council as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks.

Regulation S

A regulation of the Securities Act, as defined below, that provides an exclusion from the registration obligations imposed under Section 5 of the Securities Act for securities offerings made outside the United States by both U.S. and foreign issuers. A securities offering, whether private or public, made by an issuer outside of the United States in reliance on this Regulation S need not be registered under the Securities Act.

Retirement

The transfer of a Carbon Credit to a registry account that permanently removes the Carbon Credit from circulation.

RIAM

Robeco Institutional Asset Management B.V.

RMB

Renminbi, the official currency of the People's Republic of China. It should be read as a reference to on-shore Renminbi (CNY) and/or offshore Renminbi (CNH) as the context requires. For clarification purposes, all references to RMB in the name of a Share Class or Base currency of a Sub-fund must be understood as a reference to offshore RMB (CNH).

Robeco Country Sustainability Ranking

A country ranking provided by Robeco based on the countries' environmental, social and governance performance. More information can be obtained via the website of Robeco.

SDG Investing

SDG (i.e. Sustainable Development Goals) investing aims at producing both an attractive return and alignment with the Sustainable Development Goals. The proprietary framework we have developed measures a company's exposure to the SDGs. More information on the SDG framework methodology can be found on <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

Securities Act

Refers to the US Securities Act of 1933, as may be amended from time to time.

SEK

Swedish Krona

Settlement Day

A day on which the relevant settlement system is open for settlement.

SFDR Delegated Act

Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022 supplementing Regulation (EU) 2019/2088 of the European Parliament and of the Council with regard to regulatory technical standards specifying the details of the content and presentation of the information in relation to the principle of 'do no significant harm', specifying the content, methodologies and presentation of information in relation to sustainability indicators and adverse sustainability impacts, and the content and presentation of the information in relation to the promotion of environmental or social characteristics and sustainable investment objectives in pre-contractual documents, on websites and in periodic report.

SFTR Regulation

Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012.

Shares

Shares of each Sub-fund will be offered in registered form. Shares may be issued in fractions.

Shareholder

A holder (person or entity) of Shares.

SGD

Singapore Dollar

Social bonds

Social bonds are "use of proceeds" bonds that raise funds for new and existing projects with positive social outcomes.

Specified US Person

The term "Specified US Person" shall have the same meaning as defined under the Foreign Account Tax Compliance provisions of the U.S. Hiring Incentives to Restore Employment Act enacted in March 2010 (FATCA). It is a US Person that is in scope for FATCA Reporting and can include any US individual (e.g. US citizen, resident, green card holder, etc.) and/or US entity (e.g. US corporation, partnership, etc.)

Strategic Theme Reference

The Strategic Theme Reference (STR) is a representative replication of the universe of stocks in which the theme can invest, to serve as an internal benchmark for portfolio management as well as for risk management purposes. The STR is constructed using an adjusted market capitalization methodology with a rebalancing twice a year. More information is available at <https://www.robeco.com/files/docm/docu-robeco-thematic-strategy-framework.pdf>.

Sub-fund(s)

The Fund offers investors a choice of investment in one or more Sub-funds which are distinguished mainly by their specific investment policy subject to the general restrictions which are applicable to the Fund and its Sub-funds. The specifications of each Sub-fund are described in Appendix I – Information per Sub-fund.

The Directors of the Company may at any time establish new Sub-funds.

Subscription for Shares

Shares will be issued at the offer price per Share of the corresponding Sub-fund, which will be based on the Net Asset Value per (Class of) Share as of the relevant Valuation Day, calculated in accordance with the Articles of Incorporation of the Company, plus any applicable sales charge.

Sustainability bonds

Sustainability bonds are bonds where the proceeds will be exclusively applied to finance or re-finance a combination of green and social projects.

Sustainability Risk

Sustainability risk, as further described in Section 4. "Risk Considerations", means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. More information with regards to the sustainability risk classification can be found on <https://www.robeco.com/files/docm/docu-robeco-sustainability-risk-policy.pdf>.

Sustainable Finance Disclosure Regulation (SFDR)

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector.

Switch of Shares

With the exception of the RMB denominated Share Classes, any Shareholder may request the switch of all or part of his Shares to Shares of another Sub-fund or to Shares of another Class of the same Sub-fund.

Taxonomy

The EU taxonomy is a classification system, establishing a list of environmentally sustainable economic activities. The EU Taxonomy Regulation was published in the Official Journal of the European Union on 22 June 2020 and entered into force on 12 July 2020.

Transition-related Investments contributing to the climate transition

Investments that are identified to be making, enabling and/or financing the transition by contributing to the transitional efforts required to limit global temperature increase to well-below 2°C degrees aligned with the goals of the Paris Agreement.

Transition-related investments contributing to these objectives are defined as:

- **Investments making the transition:** entities identified having credible emission reduction targets, aligning with the goals of the Paris Agreement, and demonstrate the credibility of those targets. The assessment takes into consideration the company's projected emissions alignment with its required sector decarbonization pathway under a well below 2°C scenario (regionally adjusted where needed) and whether the company's targets are verified and contain a credible transition plan for achieving its emission-reduction goals. Eligible investments hold an 'aligned' or 'aligning' assessment based on the internally developed Robeco Climate Traffic Light. The framework is a forward-looking assessment of a company's alignment with the goals of the Paris Agreement, taking into consideration the "common but differentiated responsibilities" of different nations. More information: <https://www.robeco.com/files/docm/docu-robeco-forward-looking-climate-analytics.pdf>
- **Investments enabling the transition:** entities that provide solutions to enable climate change mitigation. The activities of such entities should directly or indirectly lead to long-term and significant reductions in economy-wide emissions. It must be compatible with a well below 2°C world in 2050. It includes direct solutions and enablers but does not include activities which result only in emission reductions in the production phase of a company's value chain. Eligible investments hold a positive SDG Score related to climate transition (i.e., contributing to SDG 7 "Affordable and Clean Energy" and/or SDG 13 "Climate Action") based on the internally developed Robeco SDG framework. The framework aims to identify and reward companies who are at the forefront of developing innovative products, technologies and services which enable economy wide emissions reductions. The SDG framework is operationalized through measurable Key Performance Indicators (KPIs), each with specific targets (thresholds), which are evaluated at least annually and thresholds progressively become stricter over time to reflect industry-wide progress in transition to the goals. More information on the Robeco SDG Framework and relevant KPIs to identify investments enabling the transition: <https://www.robeco.com/files/docm/docu-robeco-explanation-sdg-framework.pdf>.
- **Investments financing the transition:** Green and Sustainability bonds, where the use of proceeds are used to finance, in part or in full, new and/or existing projects with relevant environmental objectives, as adopted from the EU Taxonomy, e.g., climate change mitigation and adaptation and/or pollution prevention and control. Eligible investments are Green and Sustainability bonds based on external vendor data or the internally developed Robeco ESG Bond Frameworks. More information: <https://www.robeco.com/files/docm/docu-robeco-esg-bond-frameworks.pdf>.

Transition-related Investments contributing to the nature or biodiversity transition

Investments that are identified to be making, enabling and/or financing the transition by contributing to the action that is required to halt and reduce biodiversity loss to put nature on a path to recovery for the benefit of people and planet, e.g., halting deforestation and enhancing sustainable use of oceans and marine resources.

Transition-related investments contributing to these objectives are defined as:

- Investments making the transition: entities identified having a credible mitigation approach on nature or biodiversity loss, and as compatible with the global policy goal of halting nature loss by 2030. The assessment takes into consideration the company's current effect on the drivers of nature loss (land use change, pollution, resource utilization) in comparison to sector peers, and whether the company's governance, policies and commitments/targets contain a credible transition plan for achieving its nature or biodiversity related mitigation goals. Eligible investments have an 'Aligned' or 'Aligning' Robeco Biodiversity Traffic Light assessment that indicates a credible transition and mitigation pathway. The framework is a forward-looking assessment of a company's alignment with the global policy goal of the Kunming-Montreal Global Biodiversity Framework 2030 taking into consideration the relevant material Key Performance Indicators (KPIs) across sectors and the company's effect on the biodiversity and natural ecosystems conservation. More information: <https://www.robeco.com/files/docm/docu-robeco-biodiversity-assessment.pdf>.
- Investments enabling the transition: entities that support the halting and reducing biodiversity loss. The activities of such entities should directly or indirectly support relevant targets such as the reduction of food losses along production and supply chain and ensuring the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services. Eligible investments hold a positive SDG Score related to biodiversity transition (i.e., contributing to SDG 12 "Responsible Consumption and Production", SDG 14 "Life on Water" and/or SDG 15 "Life on Land") based on the internally developed Robeco SDG framework. The framework aims to identify and reward companies with activities that provides solutions and/or making a significant change in their operations and business models that contributes to the halting and reversion of biodiversity loss. The SDG framework is operationalized through measurable KPIs, each with specific targets (thresholds), which are evaluated at least annually and thresholds progressively become stricter over time to reflect industry-wide progress in transition to the goals. More information on the Robeco SDG Framework and relevant KPIs to identify investments enabling the transition: <https://www.robeco.com/files/docm/docu-robeco-explanation-sdg-framework.pdf>.
- Investments financing the transition: Green and Sustainability bonds, where the use of proceeds are used to finance, in part or in full, new and/or existing projects with relevant environmental objectives, as adopted from the EU Taxonomy, e.g., the transition to a circular economy and/or protection and restoration of biodiversity and ecosystems. Eligible investments are Green and Sustainability bonds as based on external vendor data or the internally developed Robeco ESG Bond Frameworks. More information: <https://www.robeco.com/files/docm/docu-robeco-esg-bond-frameworks.pdf>.

Transition-related Investments contributing to the social transition

Investments that are identified to be enabling and/or financing the transition by contributing to various relevant targets for social development, e.g., achieve universal and equitable access to basic needs like clean water and opportunities for work and economic growth.

Transition-related investments contributing to these objectives are defined as:

- Investments enabling the transition: entities that support advancements in social development. The activities of such entities should directly or indirectly support relevant targets such as the provision of equitable access to safe and affordable drinking water for all and equal opportunities at all levels of decision-making in political, economic and public life. Eligible investments hold a positive SDG Score related to social transition (i.e., contributing to SDG 1 "No Poverty", SDG 2 "Zero Hunger", SDG 3 "Good Health and Well-Being", SDG 4 "Quality Education", SDG 5 "Gender Equality", SDG 6 "Clean Water and Sanitation", SDG 8 "Decent Work and Economic Growth", SDG 9 "Industry, Innovation and Infrastructure", SDG 10 "Reduced Inequalities", SDG 11 "Sustainable Cities and Communities", SDG 16 "Peace, Justice and Strong Institutions" and/or SDG 17 "Partnership for the Goals") based on the internally developed Robeco SDG framework. The framework aims to identify and reward companies with activities that provides solutions to the relevant targets and/or making a significant change in their operations and business models that contributes to these objectives, including but not limited to

- providing access to finance and public finance for building resilient infrastructure to support sustainable industrialization, promoting sustainable & inclusive economic growth, and
- providing affordable access to safe and clean drinking water;

The SDG framework is operationalized through measurable Key Performance Indicators (KPIs), each with specific targets (thresholds), which are evaluated at least annually and thresholds progressively become stricter over time to reflect society-wide progress in transition to the goals. More information on the Robeco SDG Framework and relevant KPIs to identify investments enabling the transition: <https://www.robeco.com/files/docm/docu-robeco-explanation-sdg-framework.pdf>.

- Investments financing the transition: Social and Sustainability bonds, where the use of proceeds are used to finance, in part or in full, new and/or existing projects with relevant social objectives. Eligible investments are Social and Sustainability bonds as defined by internally developed Robeco ESG Bond Frameworks. More information: <https://www.robeco.com/files/docm/docu-robeco-esg-bond-frameworks.pdf>.

UCI

An Undertaking for Collective Investment.

UCITS

An Undertaking for Collective Investment in Transferable Securities.

United Nations Global Compact (UNGC)

These are the ten Principles of the United Nations Global Compact (UNGC) that are provided for responsible business and are derived from the Universal Declaration of Human Rights, the International Labour Organization's Declaration on Fundamental Principles and Rights at Work, the Rio Declaration on Environment and Development, and the United Nations Convention Against Corruption.

United Nations Guiding Principles (UNGPs)

The UN Guiding Principles (UNGPs) on Business and Human Rights are a set of guidelines for States and companies to prevent, address and remedy human rights abuses committed in business operations.

USD

United States Dollar

US Person

The term "US Person" shall have the same meaning as in Regulation S as defined above which is the following:

- i) any natural person resident in the United States;
- ii) any partnership or corporation organized or incorporated under the laws of the United States;
- iii) any estate of which any executor or administrator is a US Person;
- iv) any agency or branch of a foreign entity located in the United States;
- v) any non-discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary for the benefit or account of a US Person;
- vi) any discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary organized, incorporated, or (if an individual) resident in the United States;
- vii) any partnership or corporation if:
 - A. organized or incorporated under the laws of any foreign jurisdiction; and
 - B. formed by a US Person principally for the purpose of investing in securities not registered under the Act, unless it is organized or incorporated, and owned, by accredited investors who are not natural persons, estates or trusts.

Valuation Day

Valuation Day is a day on which or for which a Sub-fund accepts dealing requests and as of which an NAV per Share for each Share Class is calculated. If dealing requests have to be submitted in advance of the Valuation Day for which the order is made, this will be disclosed in Appendix I.

Subject to any further restrictions specified for a Sub-fund in Appendix I, a Valuation Day is a week day other than a day on which any exchange or market on which a substantial portion of a Sub-fund's investments is traded, is closed. When dealings on any such exchange or market are restricted or suspended, the Company may, in consideration of prevailing market conditions or other relevant factors, decide that a particular day will not be a Valuation Day. In addition, the day immediately preceding such a relevant market condition may be a non-valuation day for Sub-funds, in particular where the Cut-off time occurs at a time when the relevant markets are already closed to trading, so that the Sub-funds will be unable to take appropriate actions in the underlying market(s) to reflect investments in or divestments out of Shares made on that day. These additional non-valuation days are available on <https://www.robeco.com/en/riam>.

By exception to the above, an NAV per Share for each Share Class will be calculated and published for the last weekday of the year for Sub-funds that have a non-valuation day on the last weekday of the year. No dealing requests will however be accepted for these Sub-funds on such day.

For a list of expected non-dealing and non-valuation days, please visit <https://www.robeco.com/en/riam>.

Waste footprint

The Sub-fund's waste footprint is calculated based on the waste generated (tons) per EVIC (mUSD).

Water footprint

The Sub-fund's water footprint is calculated based on the water use (m3) per EVIC (mUSD).

SECTION 1 – THE FUND

1.1 Summary

Robeco Capital Growth Funds is established for an unlimited period of time as an open-ended investment company, *a société d'investissement à capital variable*, based in Luxembourg, issuing and redeeming its Shares on demand at prices based on the respective Net Asset Values.

The Company takes the form of an umbrella fund. It is made up of several Sub-funds each representing a securities portfolio and other assets and liabilities corresponding to a different investment policy. The Board of Directors has authority to issue different Classes of Shares within each of the Sub-funds.

The Directors of the Company may at any time establish new Sub-funds and/or may decide upon the issue of the following Classes of Shares:

Regular Share Classes				
Accumulating Classes		Distribution Classes		
<i>Normal</i>	<i>Variant</i>	<i>Quarterly</i>	<i>Monthly</i>	<i>Annually</i>
D, OD	DCo, DL, D2, D2L, M, ML, OM, M2	B, Ba, By, Bz, BL, ByL, BzL, MB, D3, D3L, OD3, M3	Bx, Bxy, Bxz, BxL, Bxyl, BxzL, MBx, OBx, V1, V2, V3	E, OE, 2E

Privileged Share Classes				
Accumulating Classes		Distribution Classes		
<i>Normal</i>	<i>Variant</i>	<i>Quarterly</i>	<i>Monthly</i>	<i>Annually</i>
F, OF, F2	Fco, FL, F2, S, SL, X, Q1, Q2, Q3, Q4	C, Cy, Cz, CL, CyL, CzL, OC, 2C	Cx, Cxy, Cxz, CxL, Cxyl, CxzL	G, GL, XG, SE, Q1G, Q2G, Q3G, Q4G

Institutional Share Classes				
Accumulating Classes		Distribution Classes		
<i>Normal</i>	<i>Variant</i>	<i>Quarterly</i>	<i>Monthly</i>	<i>Annually</i>
I, OI, 2I, P, O	J, Z, Z2, ICo, IL, IM, IML, K, Y, YL, K1, K2, K3, K4, KS, KP, PL	IB, IBy, IBz, IBL, IByL, IBzL, ZB, ZBy, ZBz, PB, PBy, PBz, PBL, PByL, PBzL	IBx, IBxy, IBxz, IBxL, IBxyl, IBxzL, IEx, PBx, PBxy, PBxz, PBxL, PBxyl, PBxzL	IE, IEL, OIE, ZE, ZEL, KE, YE, YEL, K1E, K2E, K3E, K4E, KSE, KPE, PE, PEL

The aforementioned Share Classes may have a hedged version denoted by the suffix "H". Otherwise, the characteristics of the Share Classes are the same as the unhedged version.

The aforementioned Share Classes in this Prospectus may be denominated in one or more of the following currencies: EUR, USD, GBP, CHF, JPY, CAD, RMB, MXN, HKD, SGD, SEK, NOK, DKK, AUD, ZAR, BRL and ILS. The fees of aforementioned Share Classes will be set per Sub-fund and independently of the denomination of the Share Class. For example, a D EUR share class of Sub-fund A will have the same fee structure as a D USD share class of Sub-fund A. In Appendix I a complete overview of the available Share Classes per Sub-fund as at the date of the Prospectus is provided.

The Directors of the Company may at any time decide to issue within any Sub-fund additional Classes of Shares as above described and denominated in one of these currencies.

A complete list of all available Share classes may be obtained, free of charge and upon request, from the registered office of the Company in Senningerberg, Grand Duchy of Luxembourg.

The Directors of the Company will determine the investment policy of each Sub-fund. The Directors of the Company have delegated to the Management Company the implementation of the policies as further detailed hereinafter.

Shares of each Sub-fund will be issued at a price based on the Net Asset Value per Share of the relevant Sub-fund or Class plus a sales charge as determined in the chapter "Issue of Shares". Shares, upon request, will be redeemed at a price based upon the Net Asset Value per Share of the relevant Sub-fund or Class. Shares will be issued in registered form only. The latest offer and redemption prices are available at the registered office of the Company.

Certain Share Classes are or will be listed on the Luxembourg Stock Exchange.

1.2 Legal entity

The Company as a whole constitutes a single legal entity but the assets of any one Sub-fund will only be available to satisfy the rights of Investors in relation to that Sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of the Sub-fund. For the purpose of the relations as between Shareholders, each Sub-fund is deemed to be a separate entity.

SECTION 2 – THE SHARES

2.1 Classes of Shares

Regular Share Classes

Class 'D' and 'DH' Shares are available for all Investors.

Class 'Dco' and 'DHco' Shares are available for all Investors and are Carbon Offsetting Shares as further described below.

The Distribution Classes of Shares as well as 'ODH', 'OMH', 'ML', 'M', 'A', 'AH', 'D2', 'D2H', 'MH', 'M2', and 'M2H' Shares will be available in certain countries, subject to the relevant regulatory approval, through specific distributors, selected by the Company.

Class 'DL' and 'DHL' Shares are only available for Investors selected by the Company.

Accumulating Classes		Distribution Classes		
<i>Normal</i>	<i>Variant</i>	<i>Quarterly</i>	<i>Monthly</i>	<i>Annually</i>
D, OD	Dco, DL, D2, D2L, M, ML, OM, M2	B, Ba, By, Bz, BL, ByL, BzL, MB, D3, D3L, OD3, M3	Bx, Bxy, Bxz, BxL, BxYL, BxzL, MBx, OBx, V1, V2, V3	E, OE, 2E

The aforementioned Share Classes may have a hedged version denoted by the suffix "H". Otherwise, all characteristics of the Share Classes are the same as the unhedged version.

Class 'V1', 'V2', 'V3', 'V1H', 'V2H' and/or 'V3H' Shares are DSC Share Classes offered by the Company which apply a redemption fee on Shares redeemed during a specific holding period as set out in Section 3.1 "Fees and Expenses", sub-section 2. b. "Exit Charge". These Share Classes will be closed to subscription after the initial subscription period.

Privileged Share Classes

Privileged Share Classes are available for all type of Investors. All Privileged Share Classes will be available, subject to the relevant regulatory approval, through specific distributors in the framework of the services they provide, where the acceptance of retrocession fees is not allowed according to regulatory requirements or based on contractual arrangements with their clients.

Privileged Share Classes will be Share Classes on which the Company will not pay distribution fees.

Accumulating Classes		Distribution Classes		
<i>Normal</i>	<i>Variant</i>	<i>Quarterly</i>	<i>Monthly</i>	<i>Annually</i>
F, OF, F2	Fco, FL, F2, S, SL, X, Q1, Q2, Q3, Q4	C, Cy, Cz, CL, CyL, CzL, OC, 2C	Cx, Cxy, Cxz, CxL, CxYL, CxzL	G, GL, XG, SE, Q1G, Q2G, Q3G, Q4G

The aforementioned Share Classes may have a hedged version denoted by the suffix "H". Otherwise, all characteristics of the Share Classes are the same as the unhedged version.

Class 'FCo' and 'FHCo' are Carbon Offsetting Shares as further described below.

Class 'S', 'SE', 'SEH' and/or 'SH' Shares are only available for Investors selected by the Company and are issued exclusively to Investors which subscribe for shares in a new Sub-fund at its launch date or until the subscription volume of the S-Shares in this Sub-fund totals a, by the Company, pre-defined amount. If this volume is reached on the first Valuation Day of the launch of the new Sub-fund, the subscription of S-shares made on the same banking day shall be permitted also when the pre-defined amount

is exceeded. If the pre-defined volume has not been reached within three (3) months of the launch of the new Sub-fund, the Company may, at its sole discretion, reject further subscriptions of 'S', 'SE', 'SEH' and/or 'SH' Shares and close the Share Class.

Class 'Q1', 'Q1H', 'Q1G' and/or 'Q1GH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 50 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'Q2', 'Q2H', 'Q2G' and/or 'Q2GH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 100 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'Q3', 'Q3H', 'Q3G' and/or 'Q3GH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 200 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'Q4', 'Q4H', 'Q4G' and/or 'Q4GH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 500 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'X' and/or 'XH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 200 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company and holding an amount of EUR 2 billion or equivalent in any UCITS managed by RIAM.

With regards to Class 'Q1', 'Q1H', 'Q1G', 'Q1GH', 'Q2', 'Q2H', 'Q2G', 'Q2GH', 'Q3', 'Q3H', 'Q3G', 'Q3GH', 'Q4', 'Q4H', 'Q4G', 'Q4GH', 'X', 'XH', 'XG' and/or 'XGH', the Company may review from time to time the subscription amount and holding amount required to issue these Classes of Shares. If it appears that an Investor does not meet the criteria aforementioned, the Company will switch the relevant Shares into privileged Class of Shares which is not restricted, provided that there exists such a Class of Shares with similar characteristics within the same Sub-fund but not necessarily in terms of the fees, taxes and expenses payable by such Share Class.

Class 'F2', and 'F2H' Shares are only available to Investors selected by the Company based on criteria such as specific markets or regions or specific arrangement agreements with members of an Affiliated Entity.

Institutional Share Classes

The possession, redemption and transfer of Institutional Classes of Shares is limited to Institutional Investors, as defined from time to time by the Luxembourg supervisory authority. Currently the following Investors are classified as Institutional Investors: pension funds, insurance companies, credit institutions, collective investment undertakings and other professional institutions of the financial sector; credit institutions and other professionals of the financial sector investing in their own name but on behalf of another party on the basis of a discretionary management relationship are also considered as Institutional Investors, even if the third party on behalf of which the investment is undertaken is not itself an Institutional Investor. The Company will not issue Institutional Classes of Shares or contribute to the transfer of Institutional Classes of Shares to non-institutional Investors. If it appears that Institutional Classes of Shares are being held by non-institutional Investors, the Company will switch the relevant Shares into Shares of a Class of Shares which is not restricted to Institutional Investors (provided that there exists such a Class of Shares with similar characteristics within the same Sub-fund but not necessarily in terms of the fees, taxes and expenses payable by such Share Class) or compulsorily redeem the relevant Shares in accordance with the provisions foreseen in the Articles of Incorporation.

Accumulating Classes		Distribution Classes		
<i>Normal</i>	<i>Variant</i>	<i>Quarterly</i>	<i>Monthly</i>	<i>Annually</i>
I, OI, 2I, P, O	J, Z, Z2, ICo, IL, IM, IML, K, Y, YE, YL, K1, K2, K3, K4, KS, KP, PL	IB, IBY, IBZ, IBL, IBYL, IBZL, ZB, ZBY, ZBZ, PB, PBY, PBZ, PBL, PBYL, PBZL	IBx, IBxy, IBxz, IBxL, IBxyl, IBxzL, IEx, PBx, PBxy, PBxz, PBxL, PBxyl, PBxzL	IE, IEL, OIE, ZE, ZEL, KE, YE, YEL, K1E, K2E, K3E, K4E, KSE, KPE, PE, PEL

The aforementioned Share Classes in this Prospectus may have a hedged version denoted by the suffix "H". Otherwise, all characteristics of the Share Classes are the same as the unhedged version.

Class 'ICo' and 'IHC' are Carbon Offsetting Shares as further described below.

Class 'K', 'KH' and 'KE' Shares will only be available for:

- (i) Institutional Investors who have entered into a suitable agreement with an Affiliated Entity in which specific reference is made to Class 'K', 'KH' or 'KE' Shares.

The ultimate decision whether an Institutional Investor qualifies for Class 'K', 'KH' or 'KE' Shares is at the discretion of the Company.

Class 'KP', 'KPH', 'KPE', 'KPEH', 'KS', 'KSH', 'KSE' and 'KSEH' Shares are only available for Investors selected by the Company.

Class 'Z', 'ZH', 'Z2', 'Z2H', 'ZEH', 'ZB' and 'ZBH' Shares will only be available for:

- (i) Institutional Investors who are an Affiliated Entity;
- (ii) Institutional Investors which consist of Investment Fund(s) and/or investment structure(s) which are (co-) managed and/or (sub-)advised by an Affiliated Entity;
- (iii) Institutional Investors who are institutional clients of an Affiliated Entity and are as such subject to separate (management, advisory or other) fees payable to such Affiliated Entity.

The ultimate decision whether an Institutional Investor qualifies for Class 'Z', 'ZH', 'Z2', 'Z2H', 'ZEH', 'ZB' or 'ZBH' Shares is at the discretion of the Company.

Class 'Z', 'ZH', 'Z2', 'Z2H', 'ZEH', 'ZB' and 'ZBH' Shares are designed to accommodate an alternative charging structure whereby a management, performance and/or service fee normally charged to the Sub-fund and then reflected in the Net Asset Value is instead administratively levied and collected by such Affiliated Entity directly from the Shareholder. The fee is therefore listed as nil in the tables mentioned in due to it not being levied on the Sub-fund (or on the Share Class-level).

Class 'J' Share is only available for Investors in Japan, subject to relevant regulatory approval, through specific distributors, selected by the Company. The J USD-shares and J JPY-shares have a minimum initial subscription amount of USD 1,000,000, JPY 100,000,000 respectively.

All Institutional Classes of Shares, except 'J', 'Z', 'ZH', 'Z2', 'Z2H', 'ZB', 'ZEH' and 'ZBH' have a minimum holding amount of (the equivalent of) EUR 500,000. The Company can waive this minimum holding amount at its discretion. When the minimum holding amount is not met, the Company may (1) switch the relevant Shares into Shares of a Class of Shares which do not have any minimum holding amount applicable (provided that there exists such a Class of Shares with similar characteristics within the same Sub-fund but not necessarily in terms of the fees, taxes and expenses payable by such Share Class) or (2) waive/reduce the minimum holding amount at its discretion taking into account the total assets under management the investor holds in Robeco funds and/or the undertaking of the investor to increase its holdings within a specified period of time. Other Classes of Shares (except for Class 'J' Shares) do have a minimum holding amount of one Share.

Class 'IL', 'IHL', 'IM' and 'IMH' Shares are only available to Institutional Investors selected by the Company based on criteria such as specific markets or regions or specific arrangement agreements with members of an Affiliated Entity.

Class 'K1', 'K1H', 'K1E' and/or 'K1EH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 50 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'K2', 'K2H', 'K2E' and/or 'K2EH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 100 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'K3', 'K3H', 'K3E' and/or 'K3EH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 200 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'K4', 'K4H', 'K4E', and/or 'K4EH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 500 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company.

Class 'Y', 'YH', 'YE' and/or 'YEH' Shares are only available for Investors selected by the Company and are issued at the discretion of the Company exclusively to Investors which subscribe or have committed to subscribe for an amount of EUR 200 million or equivalent in any Sub-fund(s) or within specific Sub-fund(s) to be determined at the discretion of the Company and holding an amount of EUR 2 billion or equivalent in any UCITS managed by RIAM.

With regards to Class 'K1', 'K1H', 'K1E', 'K1EH', 'K2', 'K2H', 'K2E', 'K2EH', 'K3', 'K3H', 'K3E', 'K3EH', 'K4', 'K4H', 'K4E', 'K4EH', 'Y', 'YH', 'YE' and/or 'YEH' Shares, the Company may review from time to time the subscription amount and holding amount (if any) required to issue these Classes of Shares. If it appears that an Investor does not meet the criteria aforementioned, the Company will switch the relevant Shares into an institutional Class of Shares which is not restricted, provided that there exists such a Class of Shares with similar characteristics within the same Sub-fund but not necessarily in terms of the fees, taxes and expenses payable by such Share Class.

Class 'P' Shares (irrespective of their distribution policy, hedging policy or other specific features) will only be available for Professional Investors which consist of institutions for occupational retirement pension or similar investment vehicles, set up on one or more employers' initiative for the benefit of their employees and companies of one or more employers investing funds they hold, in order to provide retirement benefits to their employees, as defined in Article 175 c) of the Law. Class 'P' Shares (irrespective of their distribution policy, hedging policy or other specific features) are exempt from the subscription tax ("taxe d'abonnement") in accordance with Article 175 c) of the Law. The ultimate decision whether a Professional Investor qualifies for Class 'P' Shares (irrespective of their distribution policy, hedging policy or other specific features) is at the discretion of the Company.

Class 'O' Shares are reserved for outsourced arrangements with selected partners. Subscription is subject to eligibility and terms are governed by separate agreements. The ultimate decision whether an Institutional Investor qualifies for Class 'O' Shares is at the discretion of the Company.

Additional information can be obtained at the registered office of the Company.

Carbon Offsetting Share Classes

Carbon Offsetting Share Classes provide Investors with the opportunity to compensate greenhouse gas ('GHG') emissions from investments in a specific Share Class of a Sub-fund. The objective of Carbon Offsetting Share Classes is to take a step further towards reducing Carbon footprint of an Investor in an existing Sub-fund that is following a clear decarbonisation strategy.

Carbon Offsetting Share Classes are solely available to existing investment strategies of Sub-funds with a Paris-Aligned Benchmark or a Climate Transition Benchmark.

A Carbon Offset Expense is accrued for Carbon Offsetting Share Classes. With this Carbon Offset Expense, the Management Company will, in its full discretion, select Carbon Crediting Programs and purchase and retire Carbon Credits (the Carbon Offset Expense is further described in section 3.1 "[Fees and Expenses](#)" of this Prospectus).

Calculation of CO₂ emissions

The greenhouse gas emissions of a company, expressed in CO₂-equivalent emissions, can be measured by distinguishing between three sub-categories ("**Scopes**").

- Scope 1 concerns the company's direct emissions;
- Scope 2 concerns indirect emissions resulting from the company's activities; and
- Scope 3 concerns emissions that the company is indirectly responsible for from the use of products (downstream) as well as from procurement (upstream).

Inclusion of Scope 3 can lead to double-counting. The Management Company will therefore not take the Scope 3 emissions into account for Carbon Offsetting Share Classes.

The exposure on money market instruments, derivatives, and/or government related bonds are not taken into account in the calculation, which may result in an underestimation of the actual Carbon footprint of a Carbon Offsetting Share Class.

For each Carbon Offsetting Share Class, the Management Company shall calculate the amount of financed greenhouse gasses in tons of CO₂ equivalents attributable to that Carbon Offsetting Share Class.

For each Carbon Offsetting Share Classes, an additional Carbon Offset Expense (USD or EUR) shall be incurred which shall be applied by the Management Company to purchase and retire Carbon Credits. More details as well as a calculation example are included in section 3.1 "[Fees and Expenses](#)".

Carbon Offsetting

Carbon Offsetting Share Classes are implemented via a separate service provided by the Management Company, whereby the Management Company purchases and immediately retires Carbon Credits.

Given the diverging quality and heterogeneity of the voluntary carbon market, the Management Company has established an approach to assess the quality of a project behind a Carbon Credit. In this approach, the Management Company chooses a project based on the assessment of amongst others the project's emission reduction objectives as well as its social and environmental co-benefits. Additionally, the Management Company employs external independent rating providers to assess the quality on the project available, which may be financed from the Carbon Offset Expense. The projects selected by the Management Company to offset the Carbon footprint for their operational emission footprint and the residual footprint of the Carbon Offsetting Share Classes along with their description are available at: www.robeco.com/en/carbon-compensation.

It is highlighted that Carbon Credit projects are only assessed for quality and risk purposes post the footprint is ascertained for a previous quarter. This is done to ensure there is backward looking known Carbon footprint data and does not entail holding any pre-purchased Carbon Credits.

Towards managing risk associated with Carbon Credit project quality, the Management Company follows a tiered approach. Firstly, the Management Company looks at sourcing of Carbon Credits from projects that pass-through certification by bodies that are accredited by the International Carbon Reduction and Offset Alliance (ICROA) (such as Gold Standard (<https://www.goldstandard.org/>) and VERRA (<https://verra.org/programs/verified-carbon-standard/>)). The Management Company then aims to procure such credits only from partners, who perform due diligence on any project they offer on their platforms. Secondly, the Management Company applies Robeco's own quality framework on the projects and perform due diligence ourselves. Thirdly, the Management Company makes use of a specialised external rating providers, to perform independent quality assessments of the projects that the Management Company has shortlisted.

For the calculation of emissions of the underlying portfolio and the Carbon Offset Expense, the Management Company makes use of external data providers. The Management Company conducts qualification assessments on data vendors, in order to ensure quality and reliability of the data before integration. The principle for data validation is that ownership of data quality assurance is with the data provider and that the extent of manual research is minimised. The Management Company utilises multiple carbon datasets from different vendors while also maintaining high standards of data validation, ensuring the accuracy and suitability of the data for carbon reporting and portfolio steering purposes. The Carbon Offset Expense is set at such a level that it aims to achieve a complete offset of the Carbon footprint (Scope 1 and 2). However, such full offset cannot be guaranteed given timing differences such as lag in disclosing actual Carbon footprint by companies, data providers reporting such footprint to users, potential poor data quality, and the general availability of high quality Carbon Credit projects. Depending on the accrued Carbon Offset Expense and prevailing market prices of Carbon Crediting Programs, the offset in terms of tons of CO₂ may be less or more than the actual financed emissions of the underlying portfolio.

Investors should note that, in no case, the purchase of Carbon Credits is done as part of the investment policy of the relevant Sub-fund. The Carbon Credits will be purchased by the Management Company on its own behalf.

Voluntary Emission Reduction certificates and Certified Emission Reduction certificates

In order to compensate greenhouse gas ('GHG') emissions from investments in Carbon Offsetting Share Class, the Management Company selects projects to purchase Voluntary Emission Reduction (VERs) certificates and Certified Emission Reduction (CERs) certificates from. After selection of such projects, these may be of less quality than initially anticipated and/or not in line with best market practices on quality of VERs and CERs.

* Share classes with suffix "H" refer to Currency Hedged Share Classes as further explained below.

Hedging Transactions for certain Classes

Currency Hedged Share Classes:

In general, Currency Hedged Share Classes engage in currency hedging transactions to minimize undesired performance impact due to exchange rate fluctuations of the currency of the share class.

These hedging transactions will be undertaken at class level and are to be distinguished from active currency hedging positions used in the management of the portfolio.

The Company offers three types of Currency Hedged Share Classes:

1. Portfolio hedged Share Classes

The aim is to limit investors' currency risk by reducing the effect of exchange rate fluctuations between the Share Class currency and the currencies in which the Sub-fund's assets are denominated or to which they are exposed.

2. Benchmark hedged Share Classes

The aim is to limit investors' currency risk by reducing the effect of exchange rate fluctuations between the Share Class currency and the currencies in which the holdings of the Benchmark of the Sub-fund are denominated. Although in general the currency composition of the Benchmark is expected to be aligned with the currency composition of the portfolio of the Sub-fund, the currency exposures that are contained within the Benchmark, including the individual currencies themselves, may from time to time differ from those of the Sub-fund. This may result in certain individual currencies being over or under hedged. Note that Benchmark hedged Share Classes do not hedge the active currency positions within a Sub-fund.

3. NAV hedged Share classes

The aim is to limit investors' currency risk by reducing the effect of exchange rate fluctuations between the Sub-fund's Base currency and the currency of the Share Class.

Information about the type of currency hedging applied is provided expressly in the specifications of the Sub-funds as described in Appendix I. The hedging strategy selected for a Sub-fund among the above three options will apply for all classes of a given Sub-fund.

The Company intends in normal circumstances to hedge not less than 95% and not more than 105% of the targeted currency exposure. Whenever changes in the value of such assets or in the level of subscriptions for, or redemptions of, Shares of the above named Classes may cause the hedging coverage to fall below 95% or exceed 105% of such assets, the Company intends to engage in transactions in order to bring the hedging coverage back within those limits. For fixed income Sub-funds that have a Benchmark the hedge rebalance frequency of the Currency Hedged Share Class will in general be aligned with the hedge rebalance frequency of its hedged Benchmark (e.g. monthly).

The hedging activities for the Currency Hedged Share Classes will incur additional transaction costs. These transaction costs may include a charge for the authorized hedging agent of a maximum of 0.03% per annum over the hedged assets. The cost and resultant profit or loss on the hedging transaction shall be for the account of the Currency Hedged Share Class only and will be reflected in the NAV per Share of any such Class.

If liquid instruments to hedge certain currencies are not available, the relevant Sub-fund may hedge other (correlated) currencies.

The Currency Hedged Share Class will not remove the interest rate differences between the currency pairs as the pricing of the hedging transactions will, at least in part, reflect those interest rate differences. There is no assurance that the hedging strategies employed will be effective in fully eliminating the undesired currency exposure.

Where relevant, these hedging transactions may be entered into whether the Share Class currency is declining or increasing in value relative to the hedged currency and so, where such hedging is undertaken it may substantially protect Investors in the relevant Share Class against a decrease in the value of the hedged currency relative to the Share Class currency, but it may also preclude Investors from benefiting from an increase in the value of hedged currencies.

The Company offers distributing Share Classes denoted by an additional letter "y" and "z" with the dividend level determined by the Company including the ability to pay distribution from capital including realised and unrealised capital gains. Share Classes denoted by an additional letter "z" are only available for Investors selected by the Company. For further details, please refer to the 2.2 Dividend Policy.

2.2 Dividend policy

The general policy regarding the appropriation of net income and capital gains is as follows:

1. For the ***accumulating Classes of Shares*** (collectively or individually "Capital Growth Classes").
Income will be automatically reinvested and added to the relevant Sub-fund and will thus contribute to a further increase in value of the total net assets.
2. For the ***distributing Classes of Shares*** (collectively or individually "Distributing Classes").
After the end of the Financial Year, the Company can recommend what distribution shall be made from the net investment income and net capital gains attributable to the Distributing Classes. The annual general meeting of Shareholders will determine the dividend payment. The Company may decide to distribute interim dividends, in accordance with Luxembourg law.

3. General remarks

The Company may at its discretion pay dividend out of the capital attributable to the Distributing Classes.

Payment of dividends out of capital amounts to a return or withdrawal of part of an Investor's original investment or from any capital gains attributable to that original investment. Any distributions of dividends may result in an immediate reduction of the Net Asset Value per Share of the relevant Distributing Classes.

The distribution amount and NAV of a Currency hedged share class may be adversely affected by differences in the interest rates of the Reference currency of the Currency hedged share class and the Sub-fund's Base currency, which may result in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than for other share classes.

As provided by law, the Company may decide to distribute dividends with no other limit than the obligation that any such dividend distribution does not reduce the Net Asset Value of the Company below the legal minimum amount.

Similarly, the Company may distribute interim dividends and may decide to pay dividends in Shares.

If dividends are distributed, payments of cash dividends to registered Shareholders will be made in the currency of the relevant Share Class to such Shareholders at the addresses they have given to the Registrar.

Dividend announcements (including names of paying agents) and all other financial notices concerning Robeco Capital Growth Funds shall be published on <https://www.robeco.com/en/riam> and published in those newspapers as the Company shall determine from time to time. Dividends not collected within five years will lapse and accrue for the benefit of the Company in accordance with Luxembourg law.

2.3 Issue of Shares

Shares will be issued at the offer price per Share of the corresponding Sub-fund, which will be based on the Net Asset Value per (Class of) Share(s) as of the Valuation Day, calculated in accordance with the Articles of Incorporation of the Company and Section 2.7 "***Calculation of the Net Asset Value***", plus an entry charge as further described in Section 3.1 "***Fees and Expenses***" under 1. "***Charges taken before investing***".

The Board of Directors may authorize the Shares of the Company to be issued in kind by a transfer of securities, if it is on an equitable basis and not conflicting with the interests of the other Shareholders. The subscribing Shareholder will bear the costs associated with such subscription in kind (including the costs for the establishment of a valuation report by the Auditor, as required by Luxembourg law), unless the Board of Directors considers the subscription in kind to be in the interest of the Shareholders.

The Company reserves the right to refuse and/or cancel any subscription request at any time in its sole discretion.

If, in a jurisdiction in which Shares are sold, any issue or sales taxes become payable to the relevant tax administration, the subscription price will increase by that amount.

The issuance of Shares is subject to the condition that the purchase price is received with good value from the Investor. The offer of Shares by means of this Prospectus is specifically subject to the provisions of Article 6 of the Articles of Incorporation of the Company and acceptance of the following conditions: if the Company has not received (or can reasonably expect not to receive) the subscription monies within the period specified below, the Company, acting in its sole discretion, may decide to (A) initiate legal proceedings against the Investor in order to obtain a court payment order on the unpaid subscription amounts, or (B) use its right to cancel the subscription request in which case the Investor shall have no right whatsoever in relation thereto, or (C) redeem the Shares at the costs and expenses of the Investor without prior notice, to receive the redemption proceeds for the same, off-set these proceeds with the subscription monies that are still due and outstanding as well as any costs or expenses incurred by the Company to enforce the Company's rights, and claim any negative balance from the relevant Investor. Any positive balance will be retained by the Company. In all cases, the defaulting Investor shall be liable towards the Company for the costs of financing the unpaid subscription amounts (if any). Without prejudice to the conditional provision set forth above, Shares are pledged to the benefit of the Company pending the payment of the subscription monies by the Investor.

Any confirmation statement and any monies returnable to the Investor will be retained by the Company pending clearance of remittance.

Applications for Classes of Shares received by the Registrar at its registered office no later than the Cut-off time on the Valuation Day will, if accepted, be dealt with at the offer price based on the Net Asset Value per Share as of the Valuation Day, unless otherwise stated in Appendix I.

Unless otherwise stated in Appendix I, settlement must be made within three Settlement Days after the Valuation Day. If the settlement cannot take place due to the closure of payment systems as a result of a general closure of currency settlement system in the country of the currency of settlement, the settlement will then take place on the next following Settlement Day. The payment must be made by bank transfer to the Principal Paying Agent.

Notwithstanding any section in the Prospectus, the settlement currency for subscriptions and redemptions relating to the BRL (Hedged) Share Classes is USD. The Net Asset Value of the BRL (Hedged) Share Classes shall be published in USD. With respect to the BRL (Hedged) Share Classes, the Company intends to limit the Shareholder's currency risk by reducing the effect of exchange rate fluctuations between the BRL and currency exposures of the Fund.

The Sub-funds may, from time to time, reach a size above which they may, in the view of the Company, become difficult to manage in an optimal manner. If this occurs, no new Shares in the Sub-funds will be issued by the Company. Shareholders should contact their local Robeco Distributor or the Company to enquire on opportunities for ongoing subscriptions (if any).

Shares will only be issued in registered form. The ownership of registered Shares will be established by an entry in the Register of Shareholders maintained by the Registrar. The Investor will receive confirmation of the entry in the Register of Shareholders countersigned by the Registrar.

The Shares of each Sub-fund are upon issue entitled to participate equally in the profits and dividends of the relevant Sub-fund and in its assets and liabilities on liquidation. The Shares, which have no nominal value, carry no preferential or pre-emptive rights and each whole Share is entitled to one vote at all meetings of Shareholders. All Shares of the Company must be fully paid up.

Shares may be issued in fractions up to four decimal places. Rights attached to fractions of Shares are exercised in proportion to the fraction of a Share held.

The Shares can be sold through the sales agents, a bank or a stockbroker. Shares in Robeco Capital Growth Funds can be held through several account systems in accordance with the conditions of these systems. A charge could be levied for purchases and a custody fee could also be charged by these account systems.

Investors may also purchase Shares by using nominee services offered by a distributor operating in compliance with applicable laws and regulations on the fight against money laundering and financing of terrorism. The relevant distributor will subscribe and hold the Shares as a nominee in its own name but for the account of the Investor.

The Company draws the Investors' attention to the fact that any Investor will only be able to fully exercise his Shareholder rights directly against the Company, notably the right to participate in general shareholders' meetings if the Investor is registered himself and in his own name in the Shareholders' register of the Company. Where an Investor invests in the Company through an

intermediary investing into the Company in its own name but on behalf of the Investor, it may not always be possible for the Investor to exercise certain Shareholder rights directly against the Company. In that case, Investors should be aware that they cannot fully exercise their rights against the Company without the cooperation of the distributor. Investors who use a nominee service may however issue instructions to the distributor acting as nominee regarding the exercise of votes conferred by their Shares as well as request direct ownership by submitting an appropriate request in writing to the distributor. Investors are advised to take advice on their rights. Furthermore, Investors' rights to indemnification in the event of errors/non-compliance within the meaning of CSSF Circular 24/856 may be affected.

2.4 Switch of Shares

With the exception of the RMB denominated Share Classes, any Shareholder may request the switch of all or part of his Shares to Shares of another Sub-fund or to Shares of another Class of the same Sub-fund available to him through the sales agents, a bank or a stockbroker or directly by advising the Registrar by letter or fax or any other agreed format.

A switch request may not be accepted unless any previous transaction involving the Shares to be switched has been fully settled by the relevant Shareholder.

A Shareholder may not hold less than one Share as a result of a switch request. Unless waived by the Management Company, if, as a result of a switch request, a Shareholder holds less than one Share in a Class of any Sub-fund, his switch request will be treated as an instruction to switch his total holding in the relevant Class.

Barring a suspension of the calculation of the Net Asset Value, the switch will be carried out upon receipt of the request on the Valuation Day in conformity with the conditions as outlined in the Chapters "Issue of Shares" and "Redemption of Shares", at a rate calculated with reference to the Net Asset Value of the Shares of the relevant Sub-funds as of that Valuation Day.

The rate at which all or part of the Shares in a given Class of a Sub-fund (the "original Class") are switched into a Class of Shares of the same or another Sub-fund (the "new Class of Shares") shall be determined according to the following formula:

$$A = \frac{B \times C \times E}{D}$$

A = the number of Shares from the new Class;

B = the number of Shares from the original Class;

C = the Net Asset Value per Share of the original Class on the day in question;

D = the Net Asset Value per Share from the new Class on the day in question; and

E = the exchange rate, used by the Administration Agent, on the day in question between the currency of the Sub-fund to be switched and the currency of the Sub-fund to be assigned.

After the switch, Shareholders will be informed by the Registrar or their sales agents of the number and price of the Shares from the new Class in the (new) Sub-fund which they have obtained from the switch.

2.5 Redemption of Shares

Each Shareholder may at any time request the Company to redeem his Shares subject to the conditions and restrictions laid down in the Articles of Incorporation and in any applicable law. Any Shareholder wishing to redeem part or all of his holding may act through the sales agents, a bank or a stockbroker or should send directly a request to the Registrar by letter or fax or in any other agreed format.

A request for redemption may not be accepted unless any previous transaction involving the Shares to be redeemed has been fully settled by the relevant Shareholder.

A Shareholder may not hold less than one Share as a result of a request for redemption. Unless waived by the Management Company, if, as a result of a redemption a Shareholder holds less than a Share in a Class in any Sub-fund, his request will be treated as an instruction to redeem his total holding in the relevant Class.

With the consent of the Shareholder(s) concerned, the Company may authorize the Shares of the Sub-Fund(s) to be redeemed in kind by a transfer of securities, if it is on an equitable basis and not conflicting with the interests of the other Shareholders. The redeeming Shareholder or a third party will bear the costs associated with such redemption in kind (including the costs for the establishment of a valuation report by the Auditor, as required by Luxembourg law), unless the Company considers the redemption in kind to be in the interest of the Company or to protect the interest of the Company.

In kind redemptions may not always be possible, practicable or cost efficient and may have an adverse impact on existing shareholders.

Requests for redemptions for Classes of Shares received by the Registrar no later than the Cut-off time on the Valuation Day will, if accepted, be dealt with at the redemption price based on the Net Asset Value per Share as of the Valuation Day, unless otherwise stated in Appendix I. Requests received after the Cut-off time shall be processed on the next following Valuation Day. The Company may decide to temporarily invoke a period of advance notice that Shareholders must give to the Company when redeeming their Shares in order to give the Company more time to meet redemption requests during exceptionally deteriorated market conditions. Announcement of such a notice period will be published on the website <https://www.robeco.com/en/riam>.

The redemption price per Share will be based on the Net Asset Value per (Class of) Share(s).

The Shares redeemed are cancelled. Payment for redeemed Shares will be made in the currency the relevant Class of Shares is denominated within three Settlement Days after the Valuation Day by transfer to an account maintained by the payee. The redemption price of Shares of any Sub-fund may be more or less than the issue price thereof depending on the Net Asset Value per Share at the time of subscription and redemption.

If in exceptional circumstances the liquidity of a Sub-fund or a Class is not sufficient to enable the payment to be made within such a period, such payment shall be made as soon as reasonably practicable thereafter.

The Shares can be redeemed through the sales agents, a bank or a stockbroker. Shares in Robeco Capital Growth Funds can be held through several account systems in accordance with the conditions of these systems. A charge could be levied for redemptions by these account systems.

If a redemption order is made for a cash amount to a higher value than that of the Shareholder's account then this order will be automatically treated as an order to redeem all of the Shares on the Shareholder's account.

The Company may extend the period for payment of redemption proceeds in exceptional circumstances to such period, not exceeding thirty bank business days, as shall be necessary to repatriate proceeds of the sale of investments in the event of impediments due to exchange control regulations or similar constraints in the markets in which a substantial part of the assets of the Company shall be invested.

Redemption Gate

The Company may, at its discretion, temporarily implement a redemption gate. There is no fixed maximum duration or limit on the number of times this redemption restriction may be applied, provided that its use remains limited in time and is in the interests of Shareholders.

The requests for redemption or switch-out orders received for any Sub-fund for a specific Valuation Day may, if net redemption or switch-out requests received for that day for all Share Classes of that Sub-fund exceed the threshold of 10% of the Net Asset Value of the Sub-fund, be deferred to the next Valuation Day or, only to the extent permitted by the applicable laws and regulations in the jurisdictions where the relevant Sub-fund is registered, the unexecuted orders may be cancelled.

The received requests for redemption or switch-out orders will be executed pro rata and fair treatment of the Shareholders shall be ensured during the process. The redemption or switch-out orders from the shareholders that are deferred to the next Valuation Day will be executed at the redemption price based on the Net Asset Value per Share calculated on that Valuation Day.

Shareholders who have applied to purchase, redeem or switch Share Classes will be notified in writing of any such applied gate.

Side Pockets

In exceptional circumstances and where justified having regard to the interests of its Shareholders the Company may consider the activation of side-pockets via any means and to the largest extent authorized pursuant to all applicable laws and regulation.

2.6 Prevention of money laundering and financing of terrorism

Pursuant to international rules and Luxembourg laws and regulations (comprising, but not limited to, the amended law of 12 November 2004 on the fight against money laundering and financing of terrorism, the Grand Ducal Regulation dated 1 February 2010, CSSF Regulation 12-02 and various CSSF Circulars concerning the fight against money laundering and terrorist financing, and any respective amendments or replacements) obligations have been imposed on all professionals of the financial sector to prevent the use of UCIs for money laundering and financing of terrorism purposes. As a result of such provisions, the registrar agent of a Luxembourg UCI must ascertain the identity of the subscriber in accordance with Luxembourg laws and regulations. The Company may require subscribers to provide any document it deems necessary to effect such identification. In addition, the Company may request any other information that may be required in order to comply with legal and regulatory obligations, including but not limited to the above mentioned laws and regulations, the CRS Law and the FATCA Law (as defined below).

Shareholders may be requested to provide additional or updated identification documents from time to time pursuant to ongoing client due diligence requirements under relevant laws and regulations. In case of delay or failure by a Shareholder to provide the documents required, the Company, the Management Company and JPM may decide to block the Shareholders' account.

In case of delay or failure by an applicant or Shareholder to provide the documents required, the application for subscription will not be accepted and in case of redemption, payment of redemption proceeds will be delayed. Neither the Company, the Management Company nor JPM have any liability for delays or failure to process deals as a result of the applicant providing no or only incomplete documentation.

The right is reserved by the Company to reject any application for subscription of Shares in whole or in part. If an application is rejected, the application monies or balance thereof will be returned, once sufficient evidence of identification has been produced, at the risk of the applicant and without interest as soon as reasonably practicable, at the cost of the applicant, by bank transfer.

2.7 Calculation of the Net Asset Value

The Net Asset Value per Share of a Class of each Sub-fund of the Company and the issue, switch and redemption price are determined (in the currency the relevant Share Class is denominated), by the Administration Agent as of each Valuation Day. The Net Asset Value per Share of a Class of each Sub-fund shall be calculated by dividing the Sub-fund's assets less liabilities attributed to this Share Class (converted into the Reference currency of the relevant Share Class at exchange rates prevailing on that Valuation Day) by the number of Shares in that Share Class outstanding on the applicable Valuation Day. To the extent feasible, expenses, fees and income will be accrued on a daily basis.

For each Sub-fund, the Company may issue different Classes of Shares, e.g. Capital Growth Classes and Distributing Classes. The latter will entitle Shareholders to a distribution of income. Capital Growth Shares will not entitle Shareholders to a distribution. Income from Capital Growth Shares shall be reflected in their Net Asset Value.

Each time income is distributed on (one of) the Distributing Classes, the Net Asset Value of the Shares in the relevant Class will be reduced by the amount of the distribution (this means the percentage of the Net Asset Value attributable to the relevant Class of Shares will decline), while the Net Asset Value of the Capital Growth Classes will remain unchanged (this means the percentage of the Net Asset Value attributable to the relevant Capital Growth Classes will increase).

The assets of each Sub-fund of the Company will be valued as follows:

- (a) transferable securities, money market instruments and/or financial derivative instruments listed on a Regulated Market, will be valued at the last available price (generally this will be the prices after the specified Cut-off time of the relevant Sub-fund); in the event that there should be several such markets, on the basis of the last available price of the main market for the relevant security or asset. Should the last available market price for a given transferable security, money market instrument and/or financial derivative instrument not truly reflect its fair market value, then that transferable security, money market instrument and/or financial derivative instrument shall be valued on the basis of the probable sales prices which the Company deems is prudent to assume;
- (b) transferable securities and/or money market instruments not listed on a Regulated Market will be valued on the basis of their last available market price. Should the last available market price for a given transferable security and/or money market instrument not truly reflect its fair market value, then that transferable security and/or money market instrument will be valued by the Company on the basis of the probable sales price which the Company deems is prudent to assume;
- (c) the financial derivative instruments which are not listed on a Regulated Market will be valued in a reliable and verifiable manner on a daily basis, in accordance with market practice;

- (d) Shares or units in underlying open-ended investment funds shall be valued at their last available net asset value, reduced by any applicable charges;
- (e) assets or liabilities denominated in other currencies than the currency the relevant Sub-fund of Shares is denominated in will be converted into this currency at the rate of exchange ruling on the relevant Valuation Day;
- (f) in the event that the above mentioned calculation methods are inappropriate or misleading, the Company may adopt any other appropriate valuation principles for the assets of the Company;
- (g) Sub-funds invested in markets which are closed for business at the time the Sub-fund is valued are normally valued using the prices at the previous close of business. Market volatility may result in the latest available prices not accurately reflecting the fair value of the Sub-fund's investments. This situation could be exploited by Investors who are aware of the direction of market movement, and who might deal to exploit the difference between the next published Net Asset Value and the fair value of the Sub-fund's investments. By these Investors paying less than the fair value for Shares on issue, or receiving more than the fair value on redemption, other Shareholders may suffer a dilution in the value of their investment.

To prevent this, the Company may, during periods of market volatility or in case of (relative) very large net cash flows, adjust the Net Asset Value per Share prior to publication to reflect more accurately the fair value of the Sub-fund's investments.

Swing pricing

Shares will be issued and redeemed on the basis of a single price (the "Price" for the purpose of this paragraph). The basis on which the assets of each Sub-fund are valued for the purposes of calculating the Net Asset Value per Share is set out in the paragraph above.

The Company may, at its discretion apply swing pricing to reduce the effect of dilution and potential first mover advantage. Dilution occurs when the actual cost of purchasing or selling financial instruments for a Sub-fund deviate from the latest available price or net asset value used, as appropriate, in calculating the Net Asset Value per Share due to e.g. bid-ask spreads, market impact, broker commissions, fiscal charges, foreign exchange costs and custody transaction charges. Dilution may have an adverse effect on the value of a Sub-fund and therefore impact Shareholders.

Swing pricing is an investor protection tool which seeks to protect shareholders from dilution and potential first mover advantage by ensuring that transacting investors bear the transaction costs caused by their trading activity. It is a pre-determined mechanism by which the net asset value of the units or shares of an investment fund is adjusted by the application of a swing factor.

The swing factor will be set to such figure as the Company deems appropriate to reflect the estimated costs, expenses and potential impact on security prices related to dealing for the Sub-Fund. The Company applies partial swing pricing, which means that swing pricing is normally applied on any Valuation Day, when the total volume of trading in a Sub-fund's Shares (including both subscriptions and redemptions) exceeds one or more predefined thresholds.

The swing factor shall be expressed as a percentage of the Net Asset Value per Share. The direction of the swing pricing adjustment is determined by the net capital activity of the dealing date. Swing pricing will increase the Net Asset Value per Share by the swing factor when the Sub-fund is in a net subscription position and decrease the Net Asset Value per Share by the swing factor when the Sub-fund is in a net redemption position. Where deemed necessary the Company can apply progressively increasing swing factors depending on the amount of net capital activity.

The methodology for the calculation of the swing factors as well as the threshold levels for the application of the swing pricing are determined by the Company. They may be amended from time to time depending on market conditions or any other situation where the Company is of the opinion that the interests of the Shareholders require such amendment(s). The swing factors and activation thresholds are periodically reviewed.

Generally, the swing factor is not expected to exceed 2% of the Net Asset Value. In exceptional circumstances, the Company may, in the best interest of Shareholders, decide to temporarily increase the maximum level. Such exceptional circumstances can be triggered by (but are not limited to) high market volatility, disruption of markets or slowdown of the economy caused by terrorist attack or war (or other hostilities), serious pandemic or a natural disaster (such as a hurricane or a super typhoon). In this case, Shareholders will be notified on the website www.robeco.com/en/riam/ of any such increase of the maximum swing factor.

For the avoidance of doubt, Shareholders placed in the same situation will be treated in an identical manner and the Administration Agent will continue to use the unadjusted Net Asset Value per Share when calculating the expenses based on the Net Asset Value per Share (including any applicable Performance Fee).

Shareholders should note that due to adjustments being made to the Net Asset Value per Share, the volatility of a Sub-fund's Net Asset Value per Share may not fully reflect the true performance of the Sub-fund's underlying assets.

Details on swing pricing and actual swing factors can be found on www.robeco.com/en/riam/.

Protection of Shareholders in case of NAV calculation errors

The Net Asset Value per Share of a Class of each Sub-fund will be calculated in accordance with applicable laws, the Articles of Incorporation and the Prospectus, as further described above. The relevant rules will be applied consistently and in good faith, based on current and reliable information available at the time of calculation. However, errors in the calculation of the NAV cannot be entirely excluded.

In the event of a significant NAV calculation error, as determined by the Management Company, the Management Company will promptly inform the Company, the Administration Agent, and the Depositary. A significant NAV calculation error is defined as one that reaches or exceeds the applicable tolerance threshold specified and referred to in CSSF Circular 24/856.

Compensation is only required for dates on which the errors in calculating the NAV were significant. The Management Company has established plans and procedures which ensure to correct and to remedy without delay, a significant NAV calculation error for the affected Share Class(es) of a Sub-fund.

Compensation will generally accrue to the benefit of the Shareholders concerned. It is noted that final beneficiaries who subscribed for Shares of the relevant Share Class of a Sub-fund through financial intermediaries may not appear in the Shareholders' register maintained by the Administration Agent.

The NAV calculation error and the respective remedial action plan (including to a potential compensation of affected Shareholders) will be shared with the Administration Agent to ensure that the Administration Agent may inform any financial intermediary known to it which subscribed/redeemed Shares on behalf of a final beneficiary about such indemnification event. The payment of compensation to such final beneficiaries may depend on the cooperation of the relevant intermediaries.

Reference is made to the fact that the payment of compensation may depend on the involvement of these financial intermediaries. As a result, the rights of final beneficiaries who have subscribed to or redeemed Shares of a Sub-fund's Share Class through a financial intermediary may be affected in the event of a compensation payment.

2.8 Temporary Suspension of the determination of the Net Asset Value and of subscriptions and redemptions

The Company may, at its discretion and in the best interests of the Shareholders temporarily suspend the calculation of the Net Asset Value and/or suspend the subscription, switch, and redemption of Shares for any or all Sub-funds whenever it considers that exceptional circumstances provide compelling reasons to do so.

The Company may decide to activate these measures in exceptional circumstances, including but not limited to:

- (a) if any exchange or Regulated Market on which a substantial portion of any Sub-fund's investments is quoted or dealt in, is closed other than for ordinary holidays, or if dealings on any such exchange or market are restricted or suspended;
- (b) if the disposal of investment by any Sub-fund cannot be effected normally or without seriously prejudicing the interests of the Shareholders or the Company;
- (c) during any breakdown in the communications normally employed in valuing any of the Company's assets or when for any reason the price or value of any of the Company's assets cannot promptly and accurately be ascertained;
- (d) during any period when the Company is unable to repatriate funds for the purpose of making payments on redemption of Shares or during which any transfer of funds involved in the realization or acquisition of investments or payments due on redemption of Shares cannot in the opinion of the Company be effected at normal rates of exchange;
- (e) in case of a decision to liquidate the Company, a Sub-fund or a Class of Shares hereof on or after the day of publication of the related notice to Shareholders;

- (f) during any period when the determination of the net asset value per share of investment funds representing a material part of the assets of the relevant Class of Shares is suspended;
- (g) in the case of a merger with another Sub-fund of the Company or of another UCITS (or a Sub-fund thereof), if the Company deems this to be justified for the protection of the Shareholders;
- (h) in case of a feeder Sub-fund of the Company, if the net asset value calculation of the master Sub-fund or the Master UCITS is suspended; and
- (i) during any period when in the opinion of the Company there exist extreme circumstances outside of the control of the Company, where it would be impracticable or unfair towards the Shareholders to continue dealing in a Sub-fund or a Class of Shares of the Company;

Notice of the suspension and lifting it will be published on the website www.robeco.com/en/riam/ and - if appropriate – be published in such newspapers of the countries where the Company's Shares are offered for sale, as decided by the Company.

Shareholders who have applied to purchase, redeem or switch Share Classes will be notified in writing of any such suspension and promptly informed when it has ceased.

During such a period, Shareholders may withdraw, free of charge, their request to purchase, redeem or switch. Such withdrawal notice will only be effective if received before the transactions are executed. Requests that have not been withdrawn will, in principle, be processed on the first Valuation Day after termination of the suspension. Such suspension of Share Classes of any Sub-fund shall have no effect on the calculation of the Net Asset Value, issue, redemption or switch of the Share Classes of any other Sub-fund.

In accordance with the Law, the issue and redemption of Shares shall be prohibited:

- (a) during any period where the Company has no depositary;
- (b) where the Depositary is put into liquidation or declared bankrupt or seeks an arrangement with creditors, a suspension of payment or a controlled management or is the subject of similar proceedings.

2.9 Liquidity Management Tools

The Company's primary responsibility for the Sub-fund's liquidity risk management includes the selection, calibration, activation and deactivation of Liquidity Management Tools (LMTs). These tools are designed to ensure that a Sub-fund can deal with redemption requests under both normal and stressed market conditions without compromising the interests of the Sub-fund's shareholders.

The Company has selected a comprehensive range of LMTs to appropriately manage the Sub-funds' liquidity risk under different market conditions, taking into consideration, but not limited to: the investment strategy, investor base, dealing terms, results of liquidity stress testing of the Sub-funds.

The Company has put in place appropriate governance and policies for the use of the LMTs. The Company may decide on the calibration and activation of the selected LMTs in the best interest of the Shareholders and as appropriate in light of market conditions and the relevant characteristics of the Sub-fund. The Company shall assess whether to activate LMTs individually or in combination with additional LMTs or other liquidity measures.

The LMTs will be applied at the level of the Sub-fund and will, therefore be applicable for all Share Classes of the relevant Sub-fund.

The following LMTs are available for selection by the Company as referred to Annex III of the Law:

1. Suspension of subscriptions, switches and redemptions

Suspension of subscriptions, switches and redemptions means temporarily disallowing the subscription, switch and redemption of a Sub-fund's shares. This LMT is described in paragraph 2.8 *Temporary Suspension of the determination of the Net Asset Value*.

2. Redemption gate

A redemption gate means a temporary and partial restriction of the right of Shareholders to redeem their Shares, so that they can only redeem a certain portion of their Shares. This LMT is described in paragraph 2.5 *Redemptions of shares*.

3. Extension of notice period

The extension of notice period means extending the period of notice that Shareholders must give, beyond a minimum period which is appropriate to the Sub-fund, when redeeming their Shares. This LMT is described in 2.5 *Redemptions of shares*.

4. Swing pricing

Swing pricing means a pre-determined mechanism by which the Net Asset Value per Shares is adjusted by the application of a factor ("swing factor") that reflects the cost of liquidity. This LMT is described in 2.7 *Calculation of the Net Asset Value*.

5. Side pockets:

A side pocket means separating certain assets, whose economic or legal features have changed significantly or become uncertain due to exceptional circumstances, with the view to keep the Sub-fund open. from the other assets of the Sub-fund. This LMT is described in 2.5 *Redemptions of shares*.

2.10 Taxation

Investors should consult their professional advisors on the possible tax and other consequences prior to the investment in a Sub-fund of the Company.

A. Taxation of the Company

There are no Luxembourg income, withholding or capital gains taxes payable by the Company.

The Company is not subject to net wealth tax in Luxembourg.

No stamp duty, capital duty or other tax will be payable in Luxembourg upon the issue of the Shares of the Company.

The Company is, in principle, liable in Luxembourg to a subscription tax ("*taxe d'abonnement*") at the rate of 0.05% per annum (0.01% in case of Institutional Classes of Shares) of its net assets calculated and payable at the end of each quarter. The value of assets represented by units held in other UCIs benefit from an exemption from the *taxe d'abonnement*, provided such units have already been subject to this tax. Additionally as from 1 January 2021, a graduated rate reduction has been introduced for UCIs invested in sustainable economic activities as defined in Article 3 of Regulation (EU) 2020/852 of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, except for the proportion of net assets invested in fossil gas and/or nuclear energy related activities ("**Qualifying Activities**"). Subject to certain conditions and depending on the percentage of Qualifying Activities in the portfolio, a reduced rate of respectively 0.04%, 0.03%, 0.02% and 0.01% can be applied. The reduced rate applies only to the portion of the Sub-fund's net assets invested in Qualifying Activities as disclosed in accordance with Regulation (EU) 2020/852. The practical requirements for benefitting from the reduced rates are currently being clarified.

Income received by the Company on its investments may be subject to non-recoverable withholding taxes in the countries of origin.

The Company may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin. The Company may benefit from double tax treaties entered into by Luxembourg, which may provide for exemption from withholding tax or reduction of withholding tax rate. In addition the Company may be subject to transfer taxes on the sale and/or purchase of securities and may also be subject to subscription taxes in countries where shares of the Company are distributed.

Distributions made by the Company are not subject to withholding tax in Luxembourg.

This information is based on the current Luxembourg law, regulations and practice and is subject to changes therein.

As the Company is only eligible to benefit from a limited number of Luxembourg tax treaties, dividends and interest received by the Company as a result of its investments may be subject to withholding taxes in the countries of their origin which are generally irrecoverable as the Company itself is exempt from income tax. Recent European Union case law may, however, reduce the amount of such irrecoverable tax.

B. Taxation of the Shareholders

Luxembourg resident individuals

Capital gains realised on the sale of the Shares by Luxembourg resident individuals Investors who hold the Shares in their personal portfolios (and not as business assets) are generally not subject to Luxembourg income tax except if:

- (i) the Shares are sold within 6 months from their subscription or purchase; or
- (ii) if the Shares held in the private portfolio constitute a substantial shareholding. A shareholding is considered as substantial when the seller holds or has held, alone or with his/her spouse and underage children, either directly or indirectly at any time during the five years preceding the date of the disposal, more than 10% of the share capital of the company.

Distributions made by the Company will be subject to Luxembourg income tax. Luxembourg personal income tax is levied following a progressive income tax scale, and increased by the solidarity surcharge (*contribution au fonds pour l'emploi*).

Luxembourg resident corporate

Luxembourg resident corporate Investors will be subject to corporate taxation at the rate of 24.94% (in 2020) for entities having the registered office in Luxembourg-City) on capital gains realised upon disposal of Shares and on the distributions received from the Company.

Luxembourg corporate resident Investors who benefit from a special tax regime, such as, for example, (i) an UCI subject to the Law, (ii) specialised investment funds subject to the amended law of 13 February 2007 on specialised investment funds, (iii) reserved alternative investment funds subject to the amended law of 23 July 2016 on reserved alternative investment funds (to the extent that they have not opted to be subject to general corporation taxes) or (iv) family wealth management companies subject to the amended law of 11 May 2007 related to family wealth management companies, are exempt from income tax in Luxembourg, but instead subject to an annual subscription tax (*taxe d'abonnement*) and thus income derived from the Shares, as well as gains realised thereon, are not subject to Luxembourg income taxes.

The Shares shall be part of the taxable net wealth of the Luxembourg resident corporate Investors except if the holder of the Shares is (i) an UCI subject to the Law, (ii) a vehicle governed by the amended law of 22 March 2004 on securitisation, (iii) an investment company governed by the amended law of 15 June 2004 on the investment company in risk capital, (iv) a specialised investment fund subject to the amended law of 13 February 2007 on specialised investment funds, (v) a reserved alternative investment fund subject to the amended law of 23 July 2016 on reserved alternative investment funds or (vi) a family wealth management company subject to the amended law of 11 May 2007 related to family wealth management companies. The taxable net wealth is subject to tax on a yearly basis at the rate of 0.5%. A reduced tax rate of 0.05% is due for the portion of the net wealth exceeding EUR 500 million.

Non-Luxembourg residents

Non-resident individuals or collective entities who do not have a permanent establishment in Luxembourg to which the Shares are attributable are not subject to Luxembourg taxation on capital gains realised upon disposal of the Shares nor on the distribution received from the Company and the Shares will not be subject to net wealth tax.

Tax Information for German Investors

Generally, each Sub-fund should qualify as an investment fund pursuant to sec. 1(2) and (4) of the German Investment Tax Act as applicable from 1 January 2018 ("**GInvTA**"), and not as a special investment fund pursuant to sec. 26 GInvTA. German Investors are thus taxable with the following income from the Sub-funds (so-called "Investment Income"):

- distributions, including dividends and repayments of contributed capital from the Sub-funds,
- the so-called "lump-sum taxation amount", and
- capital gains from the disposal (i.e. redemption or sale) of shares in the Sub-funds.

The lump-sum taxation amount is attributed to German Investors as deemed taxable income on an annual basis on 2 January of each calendar year with respect to the preceding calendar year. The lump-sum taxation amount is calculated as follows: redemption price (or alternatively stock exchange price or market price) per Sub-fund share at the beginning of the calendar year multiplied by 70% of the so-called "basic interest rate" (*Basiszins*) as published by the German Federal Ministry of Finance (for the lump-sum taxation amount with respect to the calendar year 2019 that is attributed on 2 January 2020: 0.52% p.a.). The lump sum taxation amount is reduced by the actual distributions of the respective calendar year. The lump-sum taxation amount is further capped by reference to the sum of (i) the actual increase of the redemption price (or stock exchange price or market price, as applicable) of the Sub-fund share during the calendar year plus (ii) the actual annual distributions.

The Investment Income is as a rule subject to:

- (i) German income tax at a flat tax rate of 25% (plus solidarity surcharge and church tax, if applicable) in the case of German Investors holding the Sub-fund's shares as private assets ("**Private Investors**"),
- (ii) German income tax at the personal progressive income tax rate (up to 45% plus solidarity surcharge and church tax, if applicable) and German trade tax at the respective local trade tax rate in the case of German Investors holding the Sub-fund shares as business assets ("**Business Investors**"), and
- (iii) German corporate income tax at a rate of 15% (plus solidarity surcharge) and trade tax at the respective local trade tax rate in the case of German Investors qualifying as corporate tax subjects ("**Corporate Investors**").

However, the Sub-funds mentioned in Appendix II in the section "Additional information for German tax purposes" intend to qualify as "Equity Funds" for German tax purposes. In case of a qualification as "Equity Fund", the following tax exemptions apply to German Investors of the respective Sub-funds:

- (i) Private Investors benefit from a 30% tax exemption on any Investment Income for German income tax purposes,
- (ii) business Investors benefit from a 60% tax exemption on any Investment Income for German income tax purposes and a 30% tax exemption on any Investment Income for German trade tax purposes, and
- (iii) corporate Investors benefit from a 80% tax exemption on any Investment Income for German corporate income tax purposes and a 40% tax exemption on any Investment Income for German trade tax purposes.

The partial tax exemptions under (ii) and (iii) with regard to Business Investors and Corporate Investors do not apply (i) to life and health insurance companies if the Sub-fund shares are attributable to their capital investments (*Kapitalanlagen*), (ii) to credit or financial services institutions if the Sub-fund shares are attributable to their trading assets (*Handelsbestand*) and (iii) to finance companies owned directly or indirectly to more than 50% by credit or financial services institutions if the Sub-fund shares are at the time of the acquisition attributable to the short-term assets (*Umlaufvermögen*). In these cases, the partial tax exemption for Private Investors (i.e. 30%) applies.

Please note that this information is not exhaustive. No comment is made on the specific matters that must be taken into account in individual cases, and no specific statements can be made on the taxation of individual investors of the Sub-funds. Given the complexity of German tax law and especially the GlnvTA, (potential) investors of the Sub-funds are strongly advised to consult their own tax advisors.

C. Automatic Exchange of Information

Common Reporting Standard

The Organisation for Economic Co-operation and Development ("OECD") has developed a common reporting standard ("CRS") to achieve a comprehensive and multilateral automatic exchange of information ("AEOI") on a global basis. On 9 December 2014, Council Directive 2014/107/EU amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (the "Euro-CRS Directive") was adopted in order to implement the CRS among the Member States.

The Euro-CRS Directive was implemented into Luxembourg law by the law of 18 December 2015 on the automatic exchange of financial account information in the field of taxation ("CRS Law"). The CRS Law requires Luxembourg financial institutions to identify financial assets holders and establish if they are fiscally resident in countries with which Luxembourg has a tax information sharing agreement. Luxembourg financial institutions will then report financial account information of the

financial account holder (including certain entities and their controlling persons) to the Luxembourg tax authorities, which will thereafter automatically transfer this information to the competent foreign tax authorities on a yearly basis.

Accordingly, the Company may require the Investors to provide information in relation to the identity and fiscal residence of financial account holders (including certain entities and their controlling persons) in order to ascertain their CRS status and report information regarding a shareholder and his/her/its account to the Luxembourg tax authorities (*Administration des Contributions Directes*), if such account is deemed a CRS reportable account under the CRS Law. Please note that (i) the Company is responsible for the treatment of the personal data provided for in the CRS Law; (ii) the personal data will only be used for the purposes of the CRS Law; (iii) the personal data may be communicated to the Luxembourg tax authorities (*Administration des Contributions Directes*); (iv) responding to CRS-related questions is mandatory and accordingly the potential consequences in case of no response whereby the Company is required to report information to the Luxembourg tax authorities (*Administration des Contributions Directes*) based on the indications of tax residency in another CRS country; and (v) the Investor has a right of access to and rectification of the data communicated to the Luxembourg tax authorities (*Administration des Contributions Directes*).

Under the CRS Law, the exchange of information will be applied by 30 September of each year for information related to the preceding calendar year. Under the Euro-CRS Directive, the AEOI must be applied by 30 September of each year to the local tax authorities of the Member States for the data relating to the preceding calendar year.

In addition, Luxembourg signed the OECD's multilateral competent authority agreement ("Multilateral Agreement") to automatically exchange information under the CRS. The Multilateral Agreement aims to implement the CRS among non-Member States; it requires agreements on a country-by-country basis.

The Company reserves the right to refuse any application for Shares if the information provided or not provided does not satisfy the requirements under the CRS Law.

By investing (or continuing to invest) in the Company, Investors shall be deemed to acknowledge that:

- (i) the Company (or its agent) may be required to disclose to the Luxembourg tax authorities (*Administration des Contributions Directes*) certain confidential information in relation to the Investor, including, but not limited to, the Investor's name, address, tax identification number (if any), social security number (if any) and certain information relating to the Investor's investment;
- (ii) the Luxembourg tax authorities (*Administration des Contributions Directes*) may be required to automatically exchange information as outlined above with the competent tax authorities of other states in or outside the EU that also have implemented CRS;
- (iii) the Company (or its agent) was and in the future may be required to disclose to Luxembourg tax authorities (*Administration des Contributions Directes*), to the extent permitted by applicable laws certain confidential information when registering with such authorities and if such authorities contact the Company (or its agent) with further enquiries;
- (iv) the Company may require the Investor to provide additional information and/or documentation which the Company may be required to disclose to the Luxembourg tax authorities (*Administration des Contributions Directes*);
- (v) in the event an Investor does not provide the requested information and/or documentation, whether or not that actually leads to compliance failures by the Company, or a risk of the Company or its Investors being subject to withholding tax under the relevant legislative or inter-governmental regime, the Company reserves the right to take any action and/or pursue all remedies at its disposal including, without limitation, compulsory redemption or withdrawal of the Investor concerned, to the extent permitted by applicable laws, regulations and the Articles of Incorporation and the Company shall observe relevant legal requirements and shall act in good faith and on reasonable grounds; and
- (vi) no Investor affected by any such action or remedy shall have any claim against the Company (or its agent) for any form of damages or liability as a result of actions taken or remedies pursued by or on behalf of the Company in order to comply with any of the CRS or any of the relevant underlying legislation.

Investors should consult their professional advisors on the possible tax and other consequences with respect to the implementation of the CRS.

Foreign Account Tax Compliance Act ("FATCA")

The Hiring Incentives to Restore Employment Act (the "Hire Act") was signed into US law in March 2010. It includes provisions generally known as FATCA. The intention of FATCA is that details of Investors subject to US income tax holding assets outside the US will be reported by financial institutions outside the US ("FFIs") to the U.S. Internal Revenue Services (the "IRS") on an annual basis, as a safeguard against US tax evasion. A 30% withholding tax is imposed on certain US source income of any FFIs that fail to comply with this requirement. This regime became effective in phases starting as from 1 July 2014.

In order to enable Luxembourg Financial Institutions to comply, on 28 March 2014 Luxembourg concluded a Model 1 Intergovernmental Agreement ("IGA") with the U.S. and a memorandum of understanding in respect thereof, to improve international tax compliance and provide for the implementation of FATCA based on domestic reporting and reciprocal automatic exchange pursuant to the convention between the Luxembourg and the U.S. for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income and Capital as amended by the Protocol of 20 May 2009. This IGA was approved by, and therefore transposed into, the Luxembourg law of 24 July 2014 relating to FATCA.

As a result of this IGA, Luxembourg has issued Luxembourg regulation to implement the terms and conditions set forth under the IGA. Under these Luxembourg regulations Reporting Luxembourg Financial Institutions need to comply with certain registration requirements, need to register with the IRS, need to identify U.S. reportable accounts and accounts held by Nonparticipating Financial Institutions and report certain information regarding these accounts to the Luxembourg competent authorities. The Luxembourg competent tax authorities will automatically exchange this information to the IRS.

Under the Luxembourg law of 24 July 2015 relating to FATCA (the "FATCA Law") and the Luxembourg IGA, the Company is required to collect information aiming to identify its direct and indirect shareholders that are Specified US Persons for FATCA purposes ("FATCA reportable accounts"). Any such information on FATCA reportable accounts provided to the Company will be shared with the Luxembourg tax authorities which will exchange that information on an automatic basis with the Government of the United States of America pursuant to Article 28 of the convention between the Government of the United States of America and the Government of the Grand Duchy of Luxembourg for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income and Capital, entered into in Luxembourg on 3 April 1996. The Company is required to comply with the provisions of the FATCA Law and the Luxembourg IGA to be compliant with FATCA and will thus not be subject to the 30% withholding tax with respect to its share of any such payments attributable to actual and deemed U.S. investments of the Company. The Company will continually assess the extent of the requirements that FATCA and notably the FATCA Law place upon it.

The Company is a Reporting Luxembourg Financial Institution and is registered as such before 5 May 2014. Subsequently, in order to comply, the Company will require shareholders to provide mandatory documentary evidence of their tax residence or their compliance with FATCA as a financial institution.

Shareholders, and intermediaries acting for prospective shareholders, should therefore take particular note that the Company will be required to report to the Luxembourg competent tax authorities certain information of Investors who become Specified US Persons or Investors who are non-U.S. entities with one or more Controlling Persons that are a Specified US Person or payments to entities that are Nonparticipating Financial Institutions within the meaning of the IGA.

By investing (or continuing to invest) in the Fund, Investors shall be deemed to acknowledge that:

- (i) the Company (or its agent) may be required to disclose to the Luxembourg competent tax authorities certain confidential information in relation to the Investor, including, but not limited to, the Investor's name, address, tax identification number (if any), social security number (if any) and certain information relating to the Investor's investment;
- (ii) the Luxembourg competent tax authorities may be required to automatically exchange information as outlined above with the IRS;
- (iii) the Company (or its agent) was and in the future may be required to disclose to the IRS to the extent permitted by applicable laws or to the Luxembourg competent tax authorities certain confidential information when registering with such authorities and if such authorities contact the Company (or its agent) with further enquiries;

- (iv) the Company may require the Investor to provide additional information and/or documentation which the Company may be required to disclose to the Luxembourg competent tax authorities;
- (v) in the event an Investor does not provide the requested information and/or documentation, whether or not that actually leads to compliance failures by the Company, or a risk of the Company or its Investors being subject to withholding tax under the relevant legislative or inter-governmental regime, the Company reserves the right to take any action and/or pursue all remedies at its disposal including, without limitation, compulsory redemption or withdrawal of the Investor concerned, to the extent permitted by applicable laws, regulations and the Articles of Incorporation and the Company shall observe relevant legal requirements and shall act in good faith and on reasonable grounds; and
- (vi) no Investor affected by any such action or remedy shall have any claim against the Company (or its agent) for any form of damages or liability as a result of actions taken or remedies pursued by or on behalf of the Company in order to comply with any of the IGA or any of the relevant underlying legislation.

In cases where Investors invest in the Company through an intermediary, Investors are reminded to check whether such intermediary is FATCA compliant. In case of doubt, please consult a tax adviser, stockbroker, bank manager, solicitor, accountant or other financial adviser regarding the possible implications of FATCA on an investment in the Company and/or any Sub-fund(s).

2.11 Tax Reporting

Several jurisdictions including Austria, Belgium, Denmark, Germany, Italy, Switzerland and the United Kingdom have adopted specific investment fund tax reporting regimes. The overall aim of these regimes is to ensure an appropriate taxation for the end investor for income tax purposes. The provisions differ per jurisdiction. Below an overview of the tax reporting regimes that may apply to one or more of the Sub-funds or specific Share Classes.

Austria

The Austrian fund reporting requirements distinguish between "reporting funds" ("Meldefonds") and "non-reporting funds". Austrian investors of non-reporting funds are subject to lump sum taxation, whereas investors of reporting funds are just subject to taxation on their actual tax base. Registration of share classes with Oesterreichische Kontrollbank ("OeKB") is necessary to obtain the Austrian Meldefonds status.

The Austrian tax representative calculates the tax figures on the deemed distributed income ("DDI") for the Company's Austrian reporting funds and reports these figures to OeKB. The DDI reporting has to be carried out on an annual basis (within seven months after the financial year-end of the fund). The OeKB publishes the Austrian tax figures and forwards the tax figures to the Austrian depository banks who are responsible for charging the taxes to the Austrian investors.

The tax data as well as the list of reporting funds can be found on <https://my.oekb.at/kapitalmarkt-services/kms-output/fonds-info/sd/af/f>.

Belgium

According to Article 19bis of the Belgian Income Tax Code, a 30% withholding tax is applicable to the component derived from interest income and net capital gains/losses on debt instruments (the Belgium Taxable Income per Share or "BTIS") embedded in the capital gain realized by a Belgian individual investor upon sale, redemption of shares or upon the liquidation of undertakings for collective investment (irrespective of where such funds have been established and whether such funds are transparent or not for Belgian tax purposes) that indirectly/directly invest a certain portion of their assets in qualifying debt claims (the "Reynders Tax").

In order to determine whether the Sub-funds are in scope of the Reynders Tax, an annual asset test determines the percentage of the Sub-fund's assets invested in qualifying debt instruments (the "Asset Test"). For new subscriptions as from 1 January 2018, Sub-funds with more than 10% invested in qualifying debts are considered as in scope. The result of such Asset Test can be viewed and are published on the website of SIX Financial Information via www.six-financial-information.com. The current list of the Sub-funds in scope for the Reynders Tax can be found on the Belgian Robeco website via [docu-reynders-tax.pdf \(robeco.com\)](https://www.robeco.com/nl-be/producten/fondsen/docu-reynders-tax.pdf). The BTIS values can be found via: <https://www.robeco.com/nl-be/producten/fondsen>.

In scope Sub-funds of the Company calculate the BTIS, in which case the basis for the 30% withholding tax will be the positive delta between the BTIS at subscription date and the BTIS at redemption date. The BTIS calculates the taxable amount of income on a daily basis. The BTIS values can be found on www.six-financial-information.com.

Denmark

As from 1 January 2020, the "equity based investment companies regime" came into force which makes it possible for investment fund managers to elect such tax status for their foreign investments funds. The purpose of the regime is to make it more attractive for Danish individuals to invest in foreign equity-based investment funds.

In order to elect the tax status as an equity-based investment company at least 50% of the assets in the Sub-fund must consist of shares covered by the Danish Act on Capital Gains Taxation (in Danish: "Aktieavancebeskatningsloven"). The remainder of the assets must be invested in securities.

For Sub-funds with the status as equity-based investment company, the income received will be taxed in the equity income instead of capital income for Danish individual investors. Accordingly, capital gains, losses and distributions, if any, are taxed in the equity income as if the investments were made directly in the underlying shares. Capital gains and losses are taxed according to a mark-to-market principle, i.e. the investors are taxed annually on both realised and unrealised gains and losses accrued in the relevant year.

For Sub-funds for which the equity-based investment company regime has not been elected, Danish individual investors will be taxed in the same way, except from the fact that capital gains, losses and distributions, if any, are taxed in the capital income.

Taxation as equity income is in general more favourable than taxation as capital income.

Several Sub-funds, including all their Share Classes, have elected the tax status as equity-based investment company for Danish tax purposes as per 1 January 2021.

The list of all equity-based investment companies are annually published on www.skat.dk (<https://skat.dk/skat.aspx?oid=2244641>).

Germany

As mentioned in Section 2.9 of the Prospectus ("Tax Information for German Investors"), German investors in the Sub-funds are taxed on distributions from the Sub-funds, on the annual lump sum taxation amount and on capital gains upon disposal of the shares in the Sub-funds.

Depending on the Sub-funds' tax qualification as Equity Funds and the respective disclosure in the investment policy of this Prospectus (see insofar Appendix II – Investment Restrictions under "Additional investment restrictions for German tax purposes"), the German Investors may benefit under certain conditions from partial tax exemptions. As mentioned in Appendix II – Investment Restrictions, the partial tax exemptions depend on the proportionate investments of the Sub-funds in "Equity Participations" (i.e. certain qualifying equity investments). This "equity ratio" of the Sub-funds has to be calculated on a daily basis. Further, the Sub-funds (on Share Class level) have to register with WM Datenservice as opaque investment funds indicating also their status as Equity Funds.

WM Datenservice is a financial service firm in Germany which provides German banks with the relevant tax figures to properly withhold the tax. We refer to the website of WM Datenservice (<https://www.wmdaten.de/index.php?mid=2>) for the list of Company's registered Sub-funds (and Share Classes) and daily equity ratio publication. Distribution details are also reported on WM Datenservice before the pay-date of the distribution, as well as the annual tax exempt reporting for tax exempt investors to reclaim German withholding tax.

Italy

Italian Tax Reporting (IRRP)

Italian unitholders are subject to a withholding tax ("WHT") on (i) proceeds distributed by a fund and on (ii) any capital gains arising from the redemption, switch or transfer of units. The WHT applies at a dual rate: a 12.5% rate applies to the portion of the Sub-fund's income earned from government bonds issued by Italy and other eligible government or quasi-government bond which are commonly referred to as "White List" securities (i.e. securities equivalent to Italian government bonds, government bonds of foreign countries, bonds from supra-national bodies). The 26% applies to the balance.

Italian paying agents are required to obtain the percentage of "White List" securities within a fund to facilitate the accurate calculation of withholding tax on redemptions and distributions between 12.5% and 26%. This percentage is required by the paying agent in a particular report format to include details such as Sub-funds and share classes.

All Sub-funds are in scope of the IRRP. The qualifying bond rate in the portfolios of the Sub-funds is calculated and published twice a year on [Robeco Institutional Asset Management \(RIAM\)](#) under "Announcements".

Inheritance Tax Reporting

Inheritance tax applies to transfers of property and rights (worldwide) upon the Italian resident's death. As for direct investments, "indirect" investments in bonds and other eligible securities issued by EU and EEA Member States are excluded from the inheritance estate and, therefore, not subject to inheritance tax.

A percentage of qualifying bonds in the fund portfolio is to be calculated at the date of the death and is therefore calculated on a daily basis.

Switzerland

Foreign collective investment funds distributed to Swiss private investors are required to report the net taxable income on an annual basis for the investors to benefit from an advantageous tax regime in Switzerland. Otherwise, private investors will not be able to distinguish the tax-exempt portion (e.g. capital gains) from the taxable portion (i.e. interest and dividends, distributed or accumulated).

All Sub-funds and Share Classes which are registered in Switzerland are in scope for the annual Swiss tax calculations. Reporting of the taxable income of the Sub-funds is published on the Kursliste of the Swiss Federal Tax Administration and can be found on:

<https://www.ictax.admin.ch/extern/en.html#/ratelist>.

United Kingdom

A foreign fund that has UK reporting fund status is treated as if it were a UK fund for investor taxation purposes. Sub-funds with UK reporting fund status have to meet certain annual conditions by reporting their 'income' returns to UK investors and HM Revenue & Customs ("HMRC"). Investors suffer tax on the income returns of the Sub-fund annually (whether distributed or not) but benefit from capital gains treatment on any gains realised on exit from the Sub-fund up to 20% taxation. This is only the case as long as UK reporting fund status is held by the Sub-fund throughout the time the investor holds the investment in the Sub-fund. The applicable rate in force at the date of issue of this Prospectus is 20%. The first £12,300 of capital gains are exempt under the UK's annual exemption provisions and this exemption amount is fixed until the 2025/26 tax year.

Any gains realised by an investor when exiting a non-reporting foreign fund are treated as 'income' and are taxable at income tax rates up to 45% (as at the date of issue). An upfront application to HMRC to enter the regime as well as distribution and financial year-end reporting is mandatory.

The Company has applied for the UK Reporting Status with HMRC for various Sub-funds and Share Classes. A UK investor may refer to the published list on the HMRC website (<https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>) to determine which Sub-funds and Share Classes have reporting fund status.

Fund income tax calculation is reported and published on an annual basis within 6 months after the end of the Financial Year. This is published on Robeco UK's website [Reportable Income Calculation \(robeco.com\)](#) and via [KPMGreportingfunds.co.uk](#).

SECTION 3 – GENERAL INFORMATION

3.1 Fees and Expenses

1. Charges taken before investing

These are deducted from a Shareholder's investment amount.

a. Entry charges

Entry charges include the aggregate of the following charges:

- Sales agents may decide to apply an entry charge. This is deducted by the Registrar from the Shareholder's investment before Shares are purchased. The maximum entry charge which may be applied by sales agents is 5% for equity Sub-funds, 3% for bond Sub-funds and 4% for other Sub-funds, except for Shares that are only available to Institutional Investors for which the maximum entry charge will be 0.50%. Entry charges may not be applied to Privileged Classes of Shares and Class 'M2', 'M2H', 'M3', 'M3H', 'V1', 'V2', 'V3', 'V1H', 'V2H', 'V3H', 'Z', 'ZH', 'Z2H', 'ZEH', 'ZB' or 'ZBH' Shares. The percentages represent a percentage of the total subscription amount. Shareholders may consult their sales agent for more details on the current entry charge. In certain jurisdictions, lower subscription fees may apply to reflect prevailing market practices and competitive conditions. These variations are intended to align with local market norms and ensure competitiveness, without affecting the global investment strategy or investor rights.
- The Company itself does currently not apply any entry charges. For all Sub-funds, the Company can however decide, in the best interest of current Shareholders, that an additional charge of up to 3% of the subscription amount may be levied for any particular (or all) Class(es) of Share(s) of these Sub-funds for any particular period of time. Any such charge will be for the direct benefit of these Sub-funds and thereby indirectly for the benefit of its current Shareholders. Investors should refer to the current KID and to www.robeco.com for up-to-date information on whether the Company actually levies such additional charge.

b. Additional third party charges

Shareholders should note that, for all Share Classes, including Privileged and Institutional Share Classes, additional charges for any individual order, as well as for additional services may be charged to the Investor by the sales agents, banks, stockbrokers, distributors or account systems. The Company cannot control and therefore cannot limit in any way direct payments from Shareholders to sales agents, banks, stockbrokers, distributors or account systems. Investors should therefore check with their relevant correspondent the level of such additional charges.

2. Charges taken after investing

These are deducted from a Shareholder's switch amount or redemption proceeds.

a. Switch charge

The Company itself does not apply any switch charge.

However, a maximum switch charge of 1% of the total conversion amount deducted by the Registrar for the benefit of the sales agents may be charged. Investors should therefore check with their relevant correspondent the level of such additional charges.

b. Exit charge

For DSC Share Classes ('V1', 'V2', 'V3', 'V1H', 'V2H', and/or 'V3H'), the Company applies a redemption fee payable by the redeeming Shareholder when redemptions occur during the holding period. The redemption fee is payable to the Management Company. The holding period is the period commencing on the Settlement Date of the relevant Shares and ending no later than the fifth anniversary thereof, unless otherwise set out. For partial redemptions during the holding period, the portion of Shares redeemed that falls within the holding period attracts the applicable

redemption fee. Upon expiry of the holding period, Shares in a DSC Share Class automatically convert into the corresponding Share Class without charge. From that moment, no redemption fee applies. The maximum holding period is up to five years with a maximum redemption fee of 3% per year, whereby the redemption fee declines over time. Swing pricing/anti-dilution levies (if any) may apply in addition to redemption fees. Early redemption during the holding period may materially reduce investor returns due to the redemption fee. Switching between DSC Shares and any other Class shall be subject to the prior consent of the Company.

For any other Share Class, the Company itself does not apply any exit charge.

c. Additional third party charges

Shareholders should note that, for all Share Classes, including Privileged and Institutional Share Classes, additional charges for any individual order, as well as for additional services may be charged to the Shareholder by the sales agents, banks, stockbrokers, distributors or account systems. The Company cannot control and therefore cannot limit in any way direct payments from Shareholders to sales agents, banks, stockbrokers, distributors or account systems. Shareholders should therefore check with their relevant correspondent the level of such additional charges.

3. Fees and expenses taken from the Share Class over a year

These fees and expenses are deducted from the NAV of the Share Class and are the same for Shareholders of a given share-class. These are paid to the Management Company with the exception of the Fund Expenses described below or otherwise stated. The amount paid varies depending on the value of the NAV and does not include portfolio transaction costs. Fees and expenses borne by the Share Classes may be subject to VAT and other applicable taxes.

a. Fund Expenses

The Company, its different Sub-funds and Classes pay directly the expenses described below. They include but are not limited to:

- a) the normal commissions on transactions and banking, brokerage relating to the assets of the Company (including interest, taxes, governmental duties, charges and levies) or expenses incurred in respect thereof, such as costs related to debt restructuring such as legal advice. These expenses may also be related to the hedging of the share-classes and any other transaction-related cost;
- b) the "*taxe d'abonnement*" as described in chapter "Taxation" and taxes in relation to the investments (such as withholding taxes) and transactions (such as stamp duties).

b. Management fee

The different Sub-funds and Classes will incur an annual management fee which reflects all expenses related to the management of the Company which is payable to the Management Company. The Management Company will be responsible for the fees of the Portfolio Managers.

The maximum rate of the management fee that may be payable in respect of each Sub-fund and Class is set out in Appendix I.

When a Sub-fund invests in any UCITS or other UCI managed by an affiliate of RIAM, double-charging of management fees will either be avoided or rebated. When a Sub-fund invests in a UCITS or other UCI not affiliated with RIAM, the fee shown in Appendix I may be charged regardless of any fees reflected in the price of the shares or units of the underlying UCITS or other UCI.

The Management Company may pay rebates directly to Investors upon request. Rebates serve to reduce the fees or costs attributable to the Investors concerned. Such discounts in the form of rebates are permissible provided that they:

- are paid from fees of the Management Company and thus do not place an additional burden on the assets of the Company; and
- are granted on the basis of objective criteria set by the Management Company (such as the size, nature, timing or commitment of their investment).

The Management Company may make use of intermediary or proprietary platforms for the distribution of the Company. Intermediary or proprietary platforms do not distribute the Shares of the Company themselves, but connect the Management Company with distributors. Also, these intermediary or proprietary platforms receive and transmit orders on behalf of such distributors and calculate distribution fees payable to such distributors. The Management Company may pay a fee to such intermediary or proprietary platforms for these services. These fees are borne by the Management Company and do not place an additional burden on the assets of the Company.

c. Service fee

Furthermore, the Company or the different Sub-funds or Classes will incur a fixed annual service fee payable to the Management Company, which aims at reflecting all remaining expenses incurred by the Management Company when managing the Company, such as the fees of the Domiciliary and Listing Agent, the Administration Agent, the Registrar, auditors, legal and tax advisers, Directors' fees and reasonable out-of-pocket expenses (for those Directors who are not employees of the Management Company or one of its affiliates), the costs of preparing, printing and distributing all Prospectuses, memoranda, reports and other necessary documents concerning the Company, any fees and expenses involved in the registration of the Company with any governmental agency and stock exchange, the costs of publishing prices, the operational expenses made by the Management Company related to the Sub-funds, and the cost of holding Shareholders meetings. The costs of establishing future Sub-funds, Proxy Voting costs, Depositary and custodian fees are included in the service fee.

The Management Company will bear the excess of any such expenses above the rate specified for each Class of Shares in the Appendix of the relevant Sub-fund. Conversely, the Management Company will be entitled to retain any amount by which the rate of these fees to be borne by the Classes of Shares, as set out in the Appendix, exceeds the actual expenses incurred by the relevant Class of the relevant Sub-fund.

The annual service fee will be payable at a maximum rate of 0.26% per annum of the monthly average Net Asset Values (based on closing prices) of the relevant Share Class of a Sub-fund. The relevant service fee applicable per Share Class of a Sub-fund is specified in Appendix I. If the assets under management of a Sub-fund exceed EUR 3.5 billion, a 0.02% discount on the service fee of the Sub-fund applies to the assets above this limit and a further 0.02% discount applies to each additional EUR 2 billion of assets of the Sub-fund over EUR 3.5 billion. However, the annual service rate cannot be less than 0.01% for a specific Share Class. Where a Class refers to payment of 0.00% annual service fee, the costs covered by the annual service fee incurred by the relevant Class are borne by Robeco.

Any increase in the current rates of the service fee up to the aforementioned maximum rate will only be implemented upon giving not less than one month's notice to the affected Shareholders.

d. Performance fee

In addition, for certain Classes of Shares of certain Sub-funds, the Management Company is entitled to a performance fee (the "**Performance Fee**"), payable annually after the end of the Financial Year.

The Performance Fee is charged to the applicable Class of Shares of the Sub-fund and cannot be reimbursed.

For the Performance Fee calculation, a methodology (as described in Appendix V) is in place. The methodology uses the Net Asset Value (NAV) to calculate the performance of the relevant Class of Shares. In Appendix I is listed which Class of Shares are subject to a Performance Fee. Furthermore in Appendix I are listed the relevant index (hereafter "Index") or index and the defined percentage (hereafter the "Hurdle Rate") for the Performance Fee calculation and the relevant Performance Fee portion (hereafter "Portion"). If a Class of Shares is denominated in another currency or applies special hedging techniques the Index will be adjusted accordingly.

Note that an outperformance of the relevant Class of Shares of the Sub-fund does not imply a positive return of the relevant Class of Shares of the Sub-fund, a Performance Fee is also due when the relevant Class of Shares of the Sub-fund has a negative return but outperforms the relevant Index or Hurdle Rate as indicated in [APPENDIX I](#).

The Performance Fee is calculated on each Valuation Day but is accrued within the Net Asset Value per Share one day in arrears (that is, on the Valuation Day after the relevant Valuation Day). Consequently, during periods of market volatility, unusual fluctuations may occur in the Net Asset Value per Share of each Share Class for which a Performance Fee is charged. These fluctuations may happen where the impact of a Performance Fee causes the Net

Asset Value per Share to be reduced whilst the returns from underlying assets have increased. Conversely, the impact of a negative Performance Fee can cause the Net Asset Value per Share to be increased whilst the underlying assets have decreased.

A more detailed description of the calculation methodology is set out in Appendix V.

e. Carbon Offset Expense

The Carbon Offsetting Share Classes incur a Carbon Offset Expense with which the Management Company purchases Carbon Credits to offset the emissions of a Carbon Offsetting Share Class ("**Carbon Offset Expense**"). This Carbon Offset Expense is in addition to the Management fee, the Service fee, Fund Expenses or any other fees and expenses that are taken from the Share Class over a year (and thus do not form part of any of these fees and expenses). The Carbon Offset Expense will be accrued over a quarter and will be reserved for an ex-post purchase of Carbon Credits towards effecting an offset of the Carbon footprint of the respective Sub-fund ("**Reserved Portion**").

The level of the Carbon Offset Expense is reviewed periodically and at least once per quarter. The review evaluates whether the collected income provides enough resources to achieve the goal of offsetting emissions incurred for the Carbon Offsetting Share Class. Depending on i) the level of the Sub-fund's emissions; and/or ii) the purchase or allocation price of the VER, there is the possible risk that offsetting financed emissions can become more expensive over time. Increasing costs throughout the Offsetting process impedes the Company's ability to completely offset financed emissions at the current ongoing expense level. Consequently, the Carbon Offset Expense may be increased (or decreased) over time. The current rate of the Carbon Offset Expense in respect of each Sub-fund and Class is set out in Appendix I.

Calculation of Carbon Offset Expense

The Company shall aggregate information concerning Scope 1 and Scope 2 emissions pertaining to each distinct entity present within the relevant Sub-fund's portfolio, given such information is ascertainable. If greenhouse gas emission data is not available, data of the parent company and/or sector defaults/averages shall be applied.

Subsequently, for the purpose of ascertaining the quantum of emissions financed with respect to an entity, the annual greenhouse gas emissions figure shall be multiplied by the proportion of the relevant Sub-fund's portfolio holding amount to the Enterprise Value (EVIC) of an individual security. The cumulative emissions financed for each security shall then be aggregated to derive the total emissions financed within the Sub-fund.

The allocation of financed emissions in the Carbon Offsetting Share Class is calculated by dividing the latest available annual portfolio Carbon footprint by 365 calendar days. Subsequently multiplying this quotient by the daily assets under management (AuM) yields the daily financed emissions to the Carbon Offsetting Share Class in tonnes CO₂. The daily financed emissions of the Carbon Offsetting Share Class are thereafter aggregated over each quarter of a Financial Year and shall represent the target offset amount.

The above can be represented in an example, as provided here.

Assumptions:

- The total financed emissions for a quarter are 2,500 metric tons of CO₂ emissions, calculated based on the portfolio holdings and their Carbon footprints.
- The market price of carbon offset is USD 20 per metric ton of CO₂ emissions
- The size of the share class is USD 100 million.

Step 1: Calculation of carbon offset cost: Total financed emissions * Cost of carbon offset = 2,500 metric tons * USD 20/metric ton = USD 50,000

Step 2: Calculation of additional fee: (Total cost of carbon offset/Net Asset Value (NAV)) * 10,000 = (USD 50,000/USD 100,000,000) * 10,000 = 5 basis points (bps)

Therefore, to offset financed emissions for a quarter, an additional 5 bps charge would be applied to the NAV of the Carbon Offsetting Share Class. The Carbon Offset Expense is periodically reassessed to align with market

fluctuations in carbon offset prices, ensuring that the Carbon Offsetting Share Class effectively offsets its emissions.

The Management Company aims to compensate the remaining Carbon footprint (Scope 1 and 2) on a quarterly basis. The Carbon Credits will be acquired by the Management Company with the Reserved Portion from an identified climate partner. At the time of purchase or post purchasing and acquiring the Carbon Credits, the Management Company shall instruct Retirement of the Carbon Credits in the register, which means that the listing of such Carbon Credits will be cancelled from the central register (and cannot be traded anymore). The Management Company will subsequently report on the projects from which Carbon Credits have been procured and the extent to which Carbon footprints of Carbon Offsetting Share Classes have been compensated by doing so.

The Management Company shall not make any profit out of the Carbon Offset Expense and Carbon Credits shall be purchased (including any tax, levies as applicable) from the collected Carbon Offset Expense.

f. Brokers services

Brokers may charge an execution-only fee (excluding a fee for research) or a transaction fee consisting of two elements: a fee for the execution of an order and a fee for research. A fee for research is only in place if such research is directly relevant for improving the investment decision-making process within the Management Company. This fee can be charged through full-service arrangements or through commission sharing arrangements (CSAs).

In full-service arrangements, the execution charges and the investment research are provided by the same broker, and payment takes place without a split.

In a CSA, the execution fee and the fee for research are administered separately as part of the total transaction fee. The fee for research will be collected by the execution broker and kept separately in a commission sharing account with the broker. The Company may transfer research fees from the commission sharing account to the relevant research providers. The use of CSAs allows the Company to select the best execution brokers and the best research providers.

The use of these arrangements will be explained in the audited statements.

The Company may adapt its approach in line with regulatory developments.

g. Other information

All expenses of a periodical nature are charged first to the investment income of the Company, then to the capital gains and finally to the assets of the Company.

The annual charges, both management fee and service fee, which are expressed as a percentage of the Net Asset Value, are mentioned in Appendix I "Information per Sub-fund". The charges are paid monthly on basis of the average Net Asset Value of the period and are reflected in the Share price. Expenses exceeding the relevant percentages and expenses not covered by these fees will be borne by the Management Company.

3.2 Late Trading or Market Timing

Late trading ("**Late Trading**") is to be understood as the acceptance of a subscription, switch or redemption order after the Cut-off time on the relevant Valuation Day and the execution of such order at the price based on the Net Asset Value applicable to such Valuation Day.

Market timing ("**Market Timing**") is to be understood as an arbitrage method through which an Investor systematically subscribes and redeems or converts Shares of the Company within a short time period, by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the Net Asset Value of the undertaking for collective investment.

In order to protect the Company and its Investors against Late Trading and Market Timing practices the following prevention measures are adopted:

1. No subscriptions, switches or redemptions after the Cut-off time in Luxembourg are accepted.

2. The Net Asset Value is calculated after the Cut-off time ("forward pricing").

Subscriptions, switches or redemptions received from a distributor after the Cut-off time in Luxembourg in respect of orders received prior to this Cut-off time in Luxembourg will be accepted if transmitted to the Registrar within a reasonable timeframe as agreed from time to time with the Management Company.

On an annual basis the Auditor of the Company reviews the compliance rules with respect to the Cut-off time. In order to protect the interests of the Company and its Investors, the Company will monitor transactions in and out of the Sub-funds on Market Timing activities. The Company does not permit practices related to Market Timing and the Company does reserve the right to reject subscription and switch orders from an Investor in this context.

3.3 Management Company

The Directors of the Company have appointed Robeco Institutional Asset Management B.V. ("**RIAM**") as the management company of the Company to be responsible on a day-to-day basis, under supervision of the Directors of the Company, for providing administration, marketing, portfolio management and investment advisory services in respect of all Sub-funds. The Management Company may, from time to time, carry out its portfolio management activities through one or more of its European branches, which will in such case not be fully in charge of the day-to-day management of the relevant Sub-fund.

The Management Company has delegated the administration, registrar and transfer functions to J.P. Morgan SE, Luxembourg Branch.

The Management Company was incorporated as a private company with limited liability under the laws of the Netherlands on 21 May 1974 under the name of Rotrusco B.V. authorised in the Netherlands by the *Autoriteit Financiële Markten* (the "**AFM**") as a manager of alternative investment funds and as a management company of UCITS according to the UCITS Directive. In addition, RIAM is authorized by the AFM to perform discretionary portfolio management, to provide investment advice and to receive and transmit orders in financial instruments. RIAM acts as the management company of the Company on a cross-border basis under the freedom to provide services of the Law and the UCITS Directive. The Management Company is an Affiliated Entity and also acts as a management company for Robeco (LU) Funds III and Robeco All Strategies Funds.

The board of directors of the Management Company is composed of:

- K. van Baardwijk;
- M.C.W. den Hollander.

The executive committee of the Management Company consists of:

- K. van Baardwijk;
- M.C.W. den Hollander;
- I.R.M. Frielink;
- A.N.K. Eser;
- S.M.C.L. van den Akker -Martens;
- J. Gottmers;
- A.H.V. Ligtoet;
- R.C. Vonk.

The supervisory board of the Management Company consist of:

- S. Barendregt-Rooiers;
- S.H. Koyanagi;
- M.F. Slendebroek;
- M.A.A.C. Talbot;
- I.J.M. Lurvink.

The subscribed capital of the Management Company is EUR 40,950.00 at the date of this Prospectus.

The Management Company shall ensure compliance of the Company with the investment restrictions and oversee the implementation of the Company's strategies and investment policy.

The Management Company shall send reports to the Directors on a periodical basis and inform each board member without delay of any active breach by the Company of the investment restrictions.

The Management Company will receive periodic reports from the service providers.

Additional information on the Management Company such as but not limited to shareholder complaints handling procedures, conflicts of interest rules, voting rights policy of the Management Company etc., shall be available at the registered office of the Management Company and published on the website <https://www.robeco.com/en/riam>.

Remuneration policy

The Management Company has a remuneration policy in compliance with the applicable requirements set out in the Dutch Financial Supervision Act (*Wet op het financieel toezicht, Wft*). The objectives of the policy are amongst others to stimulate employees to act in the best interest of the Fund and its clients, to avoid conflicts of interest and avoid taking undesirable risks and to attract and retain good employees. The remuneration policy is consistent with and promotes a sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profile of the Company or with its Articles of Incorporation.

The remuneration policy appropriately balances fixed and variable components of total remuneration. Each individual employee's fixed salary is determined on the basis of function and experience according to Robeco's salary ranges and in reference to the Benchmarks of the portfolio management industry in the relevant region. The fixed salary is deemed adequate remuneration for the employee to properly execute his or her responsibilities, regardless of whether or not variable remuneration is received. The total available variable remuneration pool is established annually by and on behalf of RIAM and approved by its supervisory board. The pool is, in principle, determined as a certain percentage of the operational profit. To ensure that the total variable remuneration is an accurate representation of performance, the total amount of variable remuneration is determined taking inter alia the following factors into account:

1. The financial result compared to the budgeted result and long-term objectives;
2. The required risk-minimization measures and the measurable risks.

Variable remuneration can be paid in cash and/or in instruments. Deferral schemes might be applicable, depending on the amount of the variable remuneration and categories of staff benefiting thereof. Additional requirements apply to employees who qualify as risk takers, are part of senior management or of control functions or other persons identified in accordance with UCITS guidelines. In order to mitigate identified risks, control measures, such as malus and clawback provisions, are in place.

Further details relating to the current remuneration policy of the Management Company are available on <https://www.robeco.com/en/riam>. This includes a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration. A paper copy will be made available upon request and free of charge by the Management Company.

QFI License

RIAM has obtained a QFI License from the CSRC. This QFI License allows foreign investors to invest in, amongst others, China A-shares and in RMB denominated Chinese onshore bonds.

RIAM sees sustainability as a long-term driver for structural change in countries, companies and markets. And RIAM believes companies with sustainable business practices are more successful.

RIAM acts in accordance with the United Nations Global Compact and the OECD Guidelines for Multinational Enterprises to assess the companies, where principles about human rights, labor standards, the environment and anti-corruption are taken into consideration and may lead to an exclusion of the companies from the investment universe if breached. Furthermore companies involved in the production or distribution of controversial weapons and companies involved in the production of tobacco are excluded from the investment universe of the Fund. In addition to this financially material Environmental, Social and Governance issues are integrated into the investment decision making process of the Fund. Lastly RIAM exercises its voting rights and engages with companies with the goal of improving sustainability practices and creating long term value. RIAM strongly believe taking these matters into account makes for better informed investment decisions.

More information on this topic and policies can be found on www.robeco.com/si.

Portfolio Managers

In compliance with the legislation and regulations currently in force and with the approval of the Board of Directors of the Company, RIAM is authorized to delegate all or part of the portfolio management, administration, and marketing activities concerning the Fund or Sub-fund(s) to one or more other qualified entities that it deems appropriate, on condition that RIAM remains responsible for the acts and omissions of these delegates as regards the tasks entrusted to them, as if these acts and omissions had been carried out by RIAM itself.

Where a qualified entity or entities have been appointed for portfolio management activities in relation to a Sub-fund, the term "Portfolio Manager" shall be understood as delegated portfolio manager. Each of the Portfolio Managers appointed in respect of the Sub-funds is listed in the "Directors and Administration" section of the Prospectus and on <https://www.robeco.com/files/docm/pros-cgf-delegation-list.pdf>, which lists, where relevant, the Portfolio Manager(s) responsible for managing each Sub-fund.

If there is a change to the Portfolio Manager(s), the Management Company will comply with applicable regulatory requirements, including obtaining regulatory approval, where required. Shareholders may not receive prior notice, except where such change is deemed material, in which case affected Shareholders will receive at least one month's prior written notification. Please note that, to the extent required by applicable regulations in other jurisdictions where the Company is registered for distribution, one month's prior written notification may be required even for changes that are not deemed material.

RIAM may terminate any of these delegation agreements immediately if it determines it is in the best interests of shareholders.

The Company's investment policy will be determined by the Board of Directors of the Company.

3.4 Structure and purpose

The Company, incorporated to exist for an undetermined period, was created on 2 May 1997. Its Articles of Incorporation were published in the *Mémorial C, Recueil des Sociétés et Associations* of the Grand Duchy of Luxembourg on 6 June 1997. The Articles of Incorporation were last amended on 20 December 2021 with effect from 1 January 2022.

The Company is a "*société anonyme*" and "*société d'investissement à capital variable*" pursuant to the amended law of 10 August 1915, on commercial companies and to part I of the Law. It is registered under number B 58 959 in the Register of Commerce and Companies of Luxembourg where its Articles of Incorporation have been deposited and are available for inspection and where copies thereof may be obtained upon request.

The minimum capital is EUR 1,250,000. For the purpose of determining the capital of the Company, the net assets attributable to each Sub-fund, if not expressed in Euro, will be converted into Euro, and the capital of the Company shall be the sum of the assets of all the Sub-funds. The capital of the Company will automatically be adjusted in case additional Shares are issued or outstanding Shares are redeemed without special announcements or measure of publicity being necessary in relation thereto.

The Company's assets are subject to normal market fluctuations as well as to the risks inherent to investments in securities and no assurance can therefore be given that the Company's investment objectives will be achieved.

3.5 Depositary

The Company has appointed J.P. Morgan SE, Luxembourg Branch ("**JPM**"), as depositary bank (the "**Depositary**") of the Company with responsibility for the

- (a) safekeeping of the assets;
- (b) oversight duties; and
- (c) cash flow monitoring,

in accordance with the Law, the CSSF Circular 16/644 and the Depositary and Custodian Agreement between the Company and JPM (the "**Depositary and Custodian Agreement**").

J.P. Morgan SE is a European Company (Societas Europaea) organized under the laws of Germany, with registered office at Taunustor 1 (TaunusTurm), 60310 Frankfurt am Main, Germany and registered with the commercial register of the local court

of Frankfurt. It is a credit institution subject to direct prudential supervision by the European Central Bank (ECB), the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*, BaFin) and the German Central Bank (Deutsche Bundesbank). J.P. Morgan SE, Luxembourg Branch is authorized by the CSSF to act as depositary and fund administrator. J.P. Morgan SE, Luxembourg Branch is registered in the Luxembourg Trade and Companies' Register (RCS) under number B255938 and is subject to the supervision of the aforementioned home State supervisory authorities as well as local supervision by the CSSF.

JPM is licensed to carry out banking activities under the terms of the amended Luxembourg law of 5 April 1993 on the financial services sector and specialises in depositary, custody, fund administration and related services. The Depositary has been authorized by the Company to delegate, in accordance with applicable laws and regulations and the provisions of the Depositary and Custodian Agreement, its safekeeping duties (i) to delegates in relation to other Assets (as defined in the Depositary and Custodian Agreement) and (ii) to sub-custodians in relation to Financial Instruments (as defined in the Depositary and Custodian Agreement) and to open accounts with such sub-custodians.

The Depositary and Custodian Agreement is concluded for an undetermined duration but it may be terminated subject to a prior notice in writing by either party provided that this agreement shall not terminate until a replacement depositary is appointed. An up-to-date description of any safekeeping functions delegated by the Depositary and an up-to-date list of the delegates and sub-custodians may be obtained, upon request, from the Depositary or via the following website link: <https://www.robeco.com/en/riam>.

The Depositary shall act honestly, fairly, professionally, independently and solely in the interests of the Company and the Shareholders in the execution of its duties under the Law and the Depositary and Custodian Agreement.

Under its oversight duties, the Depositary will:

- ensure that the sale, issue, repurchase, redemption and cancellation of Shares effected on behalf of the Company are carried out in accordance with the Law and with the Articles of Incorporation,
- ensure that the value of Shares is calculated in accordance with the Law and the Articles of Incorporation,
- carry out the instructions of the Company or the Management Company acting on behalf of the Company, unless they conflict with the Law, as amended, or the Articles of Incorporation,
- ensure that in transactions involving the Company's assets, the consideration is remitted to the Company within the usual time limits,
- ensure that the income of the Company is applied in accordance with Luxembourg laws and regulations and the Articles of Incorporation.

The Depositary will also ensure that cash flows are properly monitored in accordance with the Law and the Depositary and Custodian Agreement.

Depositary conflicts of interests

From time to time conflicts of interests may arise between the Depositary and the delegates, for example where an appointed delegate is an affiliated group company which receives remuneration for another custodial service it provides to Company. On an ongoing basis, the Depositary analyzes, based on applicable laws and regulations any potential conflicts of interests that may arise while carrying out its functions under this agreement. Any identified potential conflict of interest is managed in accordance with JPM's conflicts of interests' policy which is subject to applicable laws and regulation for a credit institution according to and under the terms of the amended Luxembourg law of 5 April 1993 on the financial services sector.

Further, potential conflicts of interest may arise from the provision by the Depositary and/or its affiliates of other services to the Company, the Management Company and/or other parties. For example, the Depositary and/or its affiliates may act as the Depositary, custodian and/or administrator of other funds. It is therefore possible that the Depositary (or any of its affiliates) may in the course of its business have conflicts or potential conflicts of interest with those of the Company, the Management Company and/or other funds for which the Depositary (or any of its affiliates) provide services.

JPM has implemented and maintains a management of conflicts of interests' policy, aiming namely at:

- Identifying and analysing potential situations of conflicts of interests;
- Recording, managing and monitoring the conflicts of interests situations in:
 - o Implementing a functional and hierarchical segregation making sure that operations are carried out at arm's length from the Depositary business;
 - o Implementing preventive measures to decline any activity giving rise to the conflict of interest such as:
 - JPM and any third party to whom the custodian functions have been delegated do not accept any portfolio management mandates;

- JPM does not accept any delegation of the compliance and risk management functions;
- JPM has a strong escalation process in place to ensure that regulatory breaches are notified to compliance which reports material breaches to senior management and the board of directors of JPM; and
- A dedicated permanent internal audit department provides independent, objective risk assessment and evaluation of the adequacy and effectiveness of internal controls and governance processes.

JPM confirms that based on the above management of conflicts of interests' policy, the potential conflicts of interest have been mitigated sufficiently to ensure the fair treatment of clients.

Up to date information on the conflicts of interest policy referred to above may be obtained, upon request, from the Depositary or via the following website link: www.jpmorganchase.com.

3.6 Administration Agent and Registrar

JPM has been appointed by the Management Company, as Administration Agent. As such, JPM is responsible for the general administrative functions required by Luxembourg laws and regulations, including calculating the Net Asset Value and maintaining the accounting records of the Company.

By Fund Administration Specific Services Agreement between the Company, the Management Company and J.P. Morgan SE, Luxembourg Branch, certain services such as the Accounting and NAV Calculation Services (including Tax Reporting Services), Corporate Secretary and Domiciliary Services, AEOI Reporting Services, Listing Agency Services, Fund Settlement Agency Services and Securities Lending Services, have been delegated to J.P. Morgan SE, Luxembourg Branch.

J.P. Morgan SE, Luxembourg Branch has also been appointed by the Management Company as Registrar and Principal Paying Agent to the Company.

In its capacity as Registrar, J.P. Morgan SE, Luxembourg Branch is responsible for processing the issue, switching and redemption of Shares and maintaining the register of Shareholders.

J.P. Morgan SE, Luxembourg Branch is also in charge of the client communication function.

J.P. Morgan SE is a European Company (*Societas Europaea*) organized under the laws of Germany, with registered office at Taunustor 1 (*TaunusTurm*), 60310 Frankfurt am Main, Germany and registered with the commercial register of the local court of Frankfurt. It is a credit institution subject to direct prudential supervision by the European Central Bank (ECB), the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*, BaFin) and the German Central Bank (Deutsche Bundesbank). J.P. Morgan SE, Luxembourg Branch is authorized by the CSSF to act as depositary and is specialized in depositary, fund administration, and related services. J.P. Morgan SE, Luxembourg Branch is registered in the Luxembourg Trade and Companies' Register (RCS) under number B255938 and is subject to the supervision of the aforementioned home State supervisory authorities as well as local supervision by the CSSF.

3.7 Meetings and reports

The Company's Financial Year ends on the last day of December of each year. Audited reports will be published and made available to Shareholders within 4 months of the end of each Financial Year and unaudited semi-annual reports will be published and made available to Shareholders within 2 months of the end of the period they cover. The annual general meeting of Shareholders will be held in Luxembourg, in accordance with Luxembourg laws, at any date and time decided by the Board of Directors but no later than within 6 months from the end of the Company's previous Financial Year. The annual meeting will represent all the Shareholders of the Company, and its resolutions shall be binding upon all Shareholders of the Company regardless of the Sub-fund of which they are Shareholders.

However, if the decisions are only concerning the particular rights of the Shareholders of one Sub-fund or if the possibility exists of a conflict of interest between Shareholders of different Sub-funds, such decisions are to be taken by a general meeting representing the Shareholders of such Sub-funds. Notices of general meetings, including the agenda, time and place as well as the applicable quorum and majority requirements, will be sent to Shareholders to their address reflected in the register of Shareholders of the Company, published on <https://www.robeco.com/en/riam> and published in those newspapers as the Company shall determine from time to time. Annual reports including the audited accounts of the Company, as well as semi-annual reports will be available at the registered office of the Company in Senningerberg, municipality of Niederanven, Grand Duchy of Luxembourg.

3.8 Liquidation and merger

Liquidation of the Company

The Company may be liquidated:

- by resolution of the general meeting of Shareholders of the Company adopted in the manner required for amendments of the Articles of Incorporation;
- if its capital falls below two thirds of the minimum capital, which is EUR 1,250,000. The Directors must submit the question of dissolution of the Company to a general meeting for which no quorum shall be prescribed and which shall decide by simple majority of the Shares represented at the meeting;
- if its capital falls below one fourth of the minimum capital, the Directors must submit the question of the dissolution to a general meeting for which no quorum shall be prescribed. Dissolution may be resolved by Shareholders holding one fourth of the Shares at the meeting.

Should the Company be liquidated, then the liquidation will be carried out in accordance with the provisions of the Law. The net assets of each Sub-fund, as determined by the liquidator, will be distributed to the Shareholders of each Sub-fund in proportion to their shareholdings, taking account of the rights attached to the individual Class of Shares. Amounts unclaimed at the close of liquidation will be deposited in escrow at the *Caisse de Consignation* in Luxembourg for the benefit of the persons entitled thereto. Amounts not claimed within the prescription period may be forfeited in accordance with applicable provisions of Luxembourg law.

Liquidation and merger of Sub-funds

Under the conditions set out in the Law and applicable regulations, any merger of a Sub-fund with another Sub-fund or with another UCITS (whether subject to Luxembourg law or not) shall be decided by the Board of Directors unless the Board of Directors decides to submit the decision for the merger to the meeting of Shareholders of the Sub-fund concerned. In the latter case, no quorum is required for this meeting and the decision for the merger is taken by a simple majority of the votes cast. In the case of a merger of a Sub-fund where, as a result, the Company ceases to exist, the merger shall, notwithstanding the foregoing, be decided by a meeting of Shareholders resolving at simple majority of the votes cast.

In addition, if at any time the Board of Directors determines upon reasonable grounds that:

- (i) the continued existence of any Sub-fund would contravene the securities or investment or similar laws or requirements of any governmental or regulatory authority in Luxembourg or any other country in or from which the Company is established and managed or the Shares are marketed; or
- (ii) the continued existence of any Sub-fund would result in the Company incurring any liability to taxation or suffering any other pecuniary disadvantage which it might not otherwise have incurred or suffered; or
- (iii) the continued existence of any Sub-fund would prevent or restrict the sale of the Shares in any such country as aforesaid; or
- (iv) in the event that a change in the economical or political situation relating to a Sub-fund so justifies; or
- (v) in the event that the total Net Asset Value of any Sub-fund is less than the amount which the Board of Directors considers as being the minimum amount required for the existence or in the event the liquidation is part of an economic rationalisation; or
- (vi) the liquidation of a Sub-fund in the interest of the Shareholders.

then, the Board of Directors may decide the liquidation of a Sub-fund. A notice of the decision to liquidate will be published by the Company prior to the effective date of the liquidation and the notice will indicate the reasons for, and the procedures of, the liquidation operations. Unless the Board of Directors otherwise decides in the interests of, or to keep equal treatment between, the Shareholders, the Shareholders of the Sub-fund concerned may continue to request redemption or conversion of their shares free of charge. Assets which could not be distributed to their beneficiaries upon the close of the liquidation of the Sub-fund concerned, for example, when the beneficiaries cannot be located, will be deposited with the *Caisse de Consignation* on behalf of their beneficiaries.

3.9 Liquidation and merger of Classes of Shares

The Board of Directors may further decide to liquidate a Class of Shares under the same circumstances as provided in the preceding paragraph. A notice of the decision to liquidate will be given by the Company to the Shareholders of the Class of Shares concerned prior to the effective date of the liquidation and the notice will indicate the reasons for, and the procedures of, the liquidation operations. Unless the Board of Directors otherwise decides in the interests of, or to keep equal treatment between, the Shareholders, the Shareholders concerned may continue to request redemption or conversion of their shares free of charge. Assets which could not be distributed to their beneficiaries upon the close of the liquidation of the Class of Shares concerned, will be deposited with the *Caisse de Consignation* on behalf of their beneficiaries.

The Board of Directors can also decide to cancel the Shares of one Class of a Sub-fund by consolidating it with another Class of the same Sub-fund. This decision shall be taken and a prior notice shall be published and/or notified in accordance with the Law and the applicable regulations.

The Board of Directors may also submit the question of the consolidation of Shares of a Class to a meeting of Shareholders of such Class. Such meeting will resolve on the consolidation with a simple majority of the votes cast.

3.10 Transactions with connected persons

Cash forming part of the property of the Company may be placed as deposits with the Depositary, Management Company, Portfolio Managers or with any connected persons of these companies (being an institution licensed to accept deposits) as long as that institution pays interest thereon at no lower rate than is, in accordance with normal banking practice, the commercial rate for deposits of the size of the deposit in question negotiated at arm's length.

Money can be borrowed from the Depositary, Management Company, the Portfolio Managers or any of their connected persons (being a bank) so long as that bank charges interest at no higher rate, and any fee for arranging or terminating the loan is of no greater amount than is in accordance with normal banking practice, the commercial rate for a loan of the size and nature of the loan in question negotiated at arm's length.

Any transactions between the Company and the Management Company, the Portfolio Managers or any of their connected persons as principal may only be made with the prior written consent of the Depositary.

All transactions carried out or on behalf of the Company must be at arm's length and executed on the best available terms. Transactions with persons connected to the Management Company or Portfolio Managers may not account for more than 50% of the Company's transactions in value in any one Financial Year of the Company.

The Management Company, the Portfolio Managers or any of their connected persons will not receive cash or other rebates from brokers or dealers in respect of transactions for the Company. In addition, neither the Management Company nor the Portfolio Managers currently receive any soft dollars arising out of the management of the Company.

3.11 Data protection and voice recording

The Company, the Management Company and the Administration Agent may collect and store personal data of an Investor (such as the name, gender, email address, postal address, account number) in connection with the management of the commercial relationship processing of orders, the keeping of shareholders' register of the Company and the provision of financial and other information to the shareholders and compliance with applicable law and regulations, including anti-money laundering and tax reporting obligations.

The processing of personal data by the above-mentioned entities can imply the transfer to and processing of personal data by affiliated persons or entities that are established in countries outside of the European Union. In this case, a level of protection comparable to that offered by EU laws will be aimed for. Participants should be aware that personal data can be disclosed to service providers, only on a need to know basis and after the closure of a data processor agreement, or, if obliged by law, to foreign regulators and/or tax authorities.

The Company, the Management Company and/or the Administration Agent may disclose personal data to their agents, service providers located in the EU or outside the EU, only based on an EU Model Contract or Corporate Binding Rules. If required by force of law personal data can be disclosed to the regulatory authority indicated in the relevant laws and regulations, such as, but not limited to, Luxembourg or foreign (ultimately) tax authorities (including for the exchange of this information on an automatic basis with the competent authorities in the United States or other permitted jurisdictions as agreed in FATCA, the CRS, at OECD and EU levels or equivalent Luxembourg legislation), Luxembourg financial intelligence units.

Pursuant to the European General Data Protection Regulation (GDPR), Participants have a right of access to their personal data kept by the Management Company or the Administration Agent and ask for a copy of the data. Besides that the participants have the right to rectify any inaccuracies in their personal data held by the Management Company by making a request to the Management Company in writing and to have it removed (as long as this is possible due to legal obligations).

The Company, the Management Company and the Administration Agent will hold any personal information provided by Investors in confidence and in accordance with Data Protection Legislation. Personal data shall not be held for longer than necessary with regard to the purpose of the data processing, subject always to applicable legal minimum retention periods.

Investors are informed that telephone conversations with the Company and the Administration Agent or other service provider(s) may be recorded as a proof of a transaction or related communication or as otherwise required pursuant to applicable sectorial laws. Recordings will be conducted in compliance with and will benefit from protection under Luxembourg applicable laws and regulations and shall not be released to third parties, except in cases where the Company and the Administration Agent or other relevant service provider(s) are compelled or entitled by law or regulation to do so. Recordings may be produced in court or other legal proceedings with the same value in evidence as a written document.

Reasonable measures have been taken to ensure confidentiality of the personal data transmitted between the parties mentioned above.

The Company will accept no liability to the fullest extent permitted by applicable laws with respect to any unauthorized third party receiving knowledge and/or having access to the Investors' personal data, except in the event of willful negligence or gross misconduct of the Company.

Should you require additional details regarding the collection, utilization, disclosure, transfer, or processing of your personal data, or if you wish to exercise any rights in relation to personal data, please address questions and requests to: Robeco's Data Protection Officer, Weena 850, NL-3014 DA Rotterdam, The Netherlands or via DPO@robeco.com.

Detailed and up-to-date information regarding the processing of the personal data related to an Investor (including any natural person in connection thereof) can be found in the privacy notice, a current version of which is available and can be accessed or obtained online at: <https://www.robeco.com/en/riam/privacy-and-cookie-statement>.

3.12 Documents available for inspection

The following documents are available for inspection at the registered office of the Company and at the registered office of the Depositary:

1. the Articles of Incorporation of the Company, the Prospectus of the Company and the Key Information Documents of the Sub-funds;
2. the Depositary and Custodian Agreement between the Company, the Management Company and J.P. Morgan SE, Luxembourg Branch;
3. the Management Company Services Agreement between the Company and the Management Company;
4. the Fund Administration Specific Service Agreement between the Company, the Management Company and J.P. Morgan SE, Luxembourg Branch;
5. Robeco's Risk management process.

Copies of the Articles of Incorporation, the Prospectus, the annual and semi-annual reports of the Company and the Key Information Document(s) of each Sub-fund may be obtained from the registered office of the Company. Such reports shall be deemed to form part of this Prospectus.

3.13 Benchmark Regulation

The Benchmark Regulation came into full effect on 1 January 2018. The Benchmark Regulation obliges benchmark administrators providing certain types of indices which are used or intended to be used as benchmarks in the EU to be authorized or registered by

the competent authority. Where a Sub-fund uses a critical benchmark, a significant benchmark, a commodity benchmark subject to Annex II of the Benchmark Regulation, a Climate Transition Benchmark or a Paris-Aligned Benchmark, such benchmark is provided by an administrator included in the register of benchmark administrators and benchmarks kept by ESMA in accordance with the Benchmark Regulation. The Management Company maintains a robust written plan setting out the actions that will be taken in the event of a Benchmark materially changing or ceasing to be provided, available for inspection on request and free of charges at its registered office in Rotterdam, the Netherlands. An overview for all Sub-funds is disclosed in **APPENDIX VI – BENCHMARKS**.

3.14 Complaints

Pursuant to CSSF Regulation n°16-07 relating to out-of-court complaints resolution, the Management Company has a complaints management policy that is defined, endorsed and implemented by the Management Company. This procedure aims at facilitating the resolution of complaints against professionals without judicial proceedings. In this respect, the CSSF acts as an out-of-court complaint resolution body. The details of the Management Company's complaints resolution procedure will be made available, free of charge, to each Shareholder via a web portal, email or at the registered office of the Management Company.

3.15 Shareholder notifications

Any relevant notifications or other communications to Shareholders concerning their investments in the Company may be communicated to a Shareholder via electronic means of communication in accordance with applicable Luxembourg laws and regulations, in case the Shareholder has consented and provided an e-mail address to the Management Company or its delegate. Relevant notifications or other communications to Shareholders concerning their investment in the Company may also be posted on the website <https://www.robeco.com/en/riam>. In addition and where required by Luxembourg law or the CSSF, Shareholders will also be notified in writing or in such other manner as prescribed under Luxembourg law.

3.16 Applicable law and jurisdiction

The Company is incorporated under the laws of the Grand Duchy of Luxembourg. Any legal disputes between the Company, the Shareholders, the Management Company, the Depositary, the Registrar and Principal Paying Agent and Portfolio Managers will be subject exclusively to the jurisdiction of the Grand Duchy of Luxembourg. The applicable law is Luxembourg law.

3.17 Registration in other jurisdiction(s)

Where the Company is registered in a jurisdiction other than Luxembourg, investors should be aware that local regulations may impose additional requirements and/or investment restrictions on the Sub-fund(s) offered and sold in such jurisdiction(s). An overview of Sub-fund(s) registered and any such additional restrictions is provided in the relevant local offering documents which can be accessed via the applicable local website. Please also refer to **APPENDIX II – INVESTMENT RESTRICTIONS** for details.

SECTION 4 – RISK CONSIDERATIONS

Potential Investors in Shares should be aware that considerable financial risks are involved in an investment in any of the Sub-funds. The value of the Shares may increase or decrease depending on the development of the value of the Sub-fund's investments. For this reason, potential Investors must carefully consider all information in the Prospectus before deciding to buy Shares. In particular, they should in any case consider the following significant and relevant risks as well as the investment policy of Sub-funds.

A Sub-fund may own securities of different types, or from different asset classes – equities, bonds, money market instruments, derivatives – depending on the Sub-fund's investment objectives. Different investments have different types of investment risk. The Sub-funds also have different kinds of risk, depending on the securities they own.

Below is a summary of the various types of investment risk that may be applicable to the Sub-funds. Depending on their investment policy, the Sub-funds may be exposed to specific risks including those mentioned below. Sub-funds may not necessarily be exposed to all the risks listed below. Specific risks of the Sub-funds may be disclosed in [APPENDIX I – INFORMATION PER SUB-FUND](#). Measures taken to manage and mitigate the financial risks are not mentioned in this paragraph but are discussed in [APPENDIX III – RISK MANAGEMENT PROCESS](#).

Prospective Investors should read the entire Prospectus and consult with their legal, tax and financial advisers before making any decision to invest in any Sub-fund.

a) General investment risk

The value of the investments may fluctuate. Past performance is no guarantee of future results. The value of a Share depends upon developments on the financial markets and may both rise and fall. Shareholders run the risk that their investments may end up being worth less than the amount invested or even worth nothing. Within the general investment risk a distinction can be made between several risk types:

Market risk

The value of the Shares is sensitive to market fluctuations in general, and to fluctuations in the price of individual financial instruments in particular. In addition, Investors should be aware of the possibility that the value of investments may vary as a result of changes in political, economic or market circumstances, as well as changes in an individual business situation. No assurance can, therefore, be given that a Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in a Sub-fund will not fall below its value at the time of acquisition.

Concentration risk

Based on its investment policy, a Sub-fund may invest in financial instruments from issuing institutions that (mainly) operate within the same sector or region, or on the same market. If this is the case – due to the concentration of the investment portfolio of the Sub-fund – events that have an effect on these issuing institutions may have a greater effect on the Sub-fund's assets than in the case of a less concentrated investment portfolio.

Currency risk

All or part of the securities portfolio of the Sub-funds may be invested in transferable securities, money market instruments, UCITS or other UCIs and other eligible financial instruments denominated in currencies other than the Base currency of the Sub-fund. As a result, fluctuations in the exchange rate may have both a negative and a positive effect on the investment result of the Sub-funds.

As part of an active currency policy, exposure to currencies may be hedged but Investors should note that there is no guarantee that the exposure of the currency in which the Shares are invested can be fully or effectively hedged against the Base currency of the relevant Sub-fund. Investors should also note that the implementation of an active currency policy may, in certain circumstances, substantially reduce the benefit to Shareholders in the relevant class of Shares (for instance, if the Base currency depreciates against the currency of the instrument in which the relevant Sub-fund is invested) and could thereby result in a decrease in the value of their shareholding.

Inflation risk

As a result of inflation (reduction in value of money), the actual investment income of each Sub-fund may be eroded.

*Risk related to fixed income securities****Interest rate risk***

Investments in fixed income securities are subject to interest rate risk. In general, prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise.

Credit risk

Investments in fixed income securities are subject to credit risks. Lower-rated or unrated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated or unrated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which react primarily to fluctuations in the general level of interest rates. There are fewer investors in lower-rated or unrated securities, and it may be harder to buy and sell securities at an optimum time. There is also a risk that the bond issuer will default in the payment of its principal and/or interest obligations.

"Investment grade" debt securities and instruments may be subject to the risk of being downgraded to securities/instruments which are rated below "Investment grade" and/or have a lower credit rating. The value of these debt securities may be adversely affected in case of such a downgrade.

Credit rating risk

Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

Early termination risk

In the event of the early termination of a Sub-fund, the Sub-fund would have to distribute to the Shareholders their pro rata interest in the assets of the Sub-fund. It is possible that at the time of such sale or distribution, certain investments held by the Sub-fund may be worth less than the initial cost of such investments, resulting in a substantial loss to the Shareholders. Moreover, any organizational expenses with regard to the Sub-fund that had not yet become fully amortized would be debited against the Sub-fund's capital at that time.

The circumstances under which a Sub-fund may be liquidated are set out in Section 3.8.

Commodities risk

The value of securities in which the Sub-fund invests may be influenced by movements in commodity prices which can be very volatile. Commodities and other materials are often disproportionately affected by political, economic, weather and terrorist related events, and by changes in energy and transportation costs. To the extent that the financial health of any company, industry, country or region is linked to commodity or materials prices, the value of its securities can be affected by trends in those prices.

REITs risk

Securities of REITs may be affected by any changes in the value of the properties owned and other factors, and their prices tend to go up and down. A REIT's performance depends on the types and locations of the properties it owns and on how well it manages those properties. A decline in rental income may occur because of extended vacancies, increased competition from other properties, tenants' failure to pay a rent or poor management. A REIT's performance also depends on the company's ability to finance property purchases and renovations and manage its cash flows. Since REITs typically are invested in a limited number of projects or in a particular market segment, they are more susceptible to adverse developments affecting a single project or market segment than more broadly diversified investments.

b) Counterparty risk

A counterparty of the Sub-fund may fail to fulfil its obligations towards the Sub-fund.

Over The Counter (OTC) transactions

In general, there is less regulation and supervision of transactions in the OTC markets compared to transactions entered into on organized exchanges. Examples of such OTC transactions include cash deposits, currency forward and spots, options, credit default swaps, Equity Swaps. In addition, many of the protections afforded to participants on some organized exchanges, such as the performance guarantee of an exchange clearinghouse, may not be available in connection with OTC transactions. Therefore, a Sub-fund entering into OTC transactions will be subject to the risk that its direct counterparty may not fulfil its obligations under the transactions and that a Sub-fund will sustain losses.

OTC derivatives may expose the Company to the risk that the counterparty will not settle a transaction in accordance with its terms, or will delay the settlement of the transaction, because of a dispute over the terms of the contract (whether or not bona fide) or because of the insolvency, bankruptcy or other credit or liquidity problems of the counterparty. Counterparty risk is generally mitigated by the transfer or pledge of collateral. The value of the collateral may fluctuate, however, there are no assurances that the value of collateral held will be sufficient to cover the amount owed to the Sub-fund.

A Sub-fund may enter into OTC derivatives cleared through a clearinghouse that serves as a central counterparty. Central clearing is designed to reduce counterparty risk and increase liquidity compared to bilaterally-cleared OTC derivatives, but it does not eliminate those risks completely. For OTC derivatives that are cleared by a central counterparty clearing house (CCP), the Sub-fund is required to post margin with the clearing broker of the CCP. This margin is subsequently transferred by the clearing broker to the CCP. As a result thereof, the Sub-fund is temporarily subjected to counterparty risk on the clearing member of the CCP. During the return of margin by the CCP to the clearing member, the Sub-fund is again temporarily subject to counterparty risk on the clearing member until the clearing member has posted the margin back to the Sub-fund.

There is a risk of loss by a Sub-fund of its initial and variation margin deposits in the event of default of the clearing broker with which the Sub-fund has an open position or if margin is not identified and correctly reported to the particular Sub-fund, in particular where margin is held in an omnibus account maintained by the clearing broker with the central counterparty. In the event that the clearing broker becomes insolvent, the Sub-fund may not be able to transfer or "port" its positions to another clearing broker.

Exchange Traded Derivatives (ETD)

For listed derivatives, such as futures and options, where a Sub-fund is not a direct member of various exchanges, clearing services are required from a third party that is a clearing member. This clearing member is required by the clearing house to post margin, which in turn requires a Sub-fund to post margin. Because of risk premiums and netting margins across a multitude of clients, the actual margin posted by the clearing member at the clearing house can be significantly lower than the margin posted by the Sub-fund, implying the Sub-fund runs residual counterparty credit risk on the clearing member.

Settlement risk

For the Sub-fund, incorrect or non-(timely) payment or delivery of financial instruments by a counterparty may mean that the settlement via a trading system cannot take place (on time) or in line with expectations.

Depository risk

The financial instruments in the portfolio of the Sub-fund are placed in custody with a reputable bank (the "Depository") or its duly appointed sub-custodians. Each Sub-fund runs the risk that its assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the Depository or the sub-custodian appointed by it.

c) Liquidity risk

Asset liquidity risk

The actual buying and selling prices of financial instruments in which the Sub-fund invests partly depend upon the liquidity of the financial instruments in question. It is possible that a position taken on behalf of the Sub-fund cannot be liquidated in good time at a reasonable price due to a lack of liquidity in the market in the context of supply and demand and potentially result in the suspension or restriction of purchase and issue of Shares.

Financial derivative transactions are also subject to liquidity risk. Given the bilateral nature of OTC positions, liquidity of these transactions cannot be guaranteed. The operations of OTC markets may affect the Sub-funds' investment via OTC markets.

From time to time, the counterparties with which the Company effects transactions might cease making markets or quoting prices in certain instruments. In such instances, the Company might be unable to enter into a desired transaction or to enter into an offsetting transaction with respect to an open position, which might adversely affect its performance.

The Company has access to an overdraft facility, established with the Depository, intended to provide for short-term/temporary financing if necessary and within the permitted limits under Luxembourg laws and regulations. Borrowings pursuant to the overdraft facility are subject to interest at a rate mutually agreed upon between the Company and the Depository and pledged underlying assets of each Sub-fund portfolio. The Company has a number of liquidity management tools available to help mitigate liquidity risk in the best interests of Shareholders as defined in Section 2.9 *Liquidity Management Tools*.

Large redemption risk

As the Company is an open-ended Fund, each Sub-fund can in theory be confronted on each Valuation Day with a large redemption. In such a case, investments must be sold in the short term in order to comply with the repayment obligation towards the redeeming Shareholders. This may be detrimental to the results of the Sub-fund and potentially result in the suspension or restriction of purchase and issue of Shares.

Risk of suspension or restriction of purchase and issue

Under specific circumstances, for example if a risk occurs as referred to in this chapter, the issue and purchase of Shares may be restricted or suspended. Shareholders run the risk that they cannot always buy or sell Shares during such a period.

d) Sustainability risk

The Management Company systematically incorporates sustainability factors, to the extent these present a material risk to a Sub-fund, into its investment and portfolio construction processes, alongside traditional financial risk factors. This is done through ESG scoring methodologies using proprietary sustainability research and external resources which are built into the portfolio construction process.

Processes and controls for sustainability risk integration are embedded in a designated Sustainability Risk Policy which is maintained by the risk management function and governed by the Risk Management Committee (RMC). The Sustainability Risk Policy is built on three pillars. The environmental or social characteristics promoted by a Sub-fund or sustainable investment objective of a Sub-fund is used to identify and assess the relevant material sustainability risk topics. Based on these characteristics or investment objectives sustainability risk is monitored. Sensitivity and scenario analyses are conducted on a frequent basis to assess any material impact climate change risk may have on the portfolio of a Sub-fund.

Impact of sustainability risk on returns

The financial position of investments in the portfolios managed by the Management Company may deteriorate due to material sustainability related risks, depending on the investment universe. Sustainability risks can be described using Environmental, Social and Governance ("ESG") factors.

- Environmental risks reflect how a company or government performs as a steward of nature. Examples of underlying factors to this category are air and water pollution, biodiversity, deforestation, energy efficiency, waste management and water scarcity.
- Social risks reflect how a company or government manages relationships with civilians, employees, suppliers, and the communities where they operate. A few examples are customer satisfaction, data protection and privacy, gender and diversity, employee engagement, community relations, human rights, and labor standards.
- Governance risk deals with a company or governments leadership. This relates to elements such as board composition, audit committee structure, bribery and corruption, executive compensation, lobbying, political contributions, conflicts of interest, and whistleblowers schemes.

In case any of these dimensions are not managed well, a sustainability risk occurs that may affect the value of the investment. The sustainability risk classification for each element is described per Sub-fund.

Climate risk refers to the potential impact on return due to climate change. The distinction is made between climate transition risk and climate physical risk.

Climate transition risk refers to the inherent risk from changing strategies, policies, or investment as society and industry work to reduce its reliance on greenhouse gasses and the impact on climate. The costs that a company could incur to reduce emissions can be either the costs of transitioning towards greener activities or direct costs of carbon taxes. There are also gains from technological opportunities in the transition towards a carbon-neutral economy. This is due to the potential revenue increases that may occur based on market demand. The net result of risks and opportunities reflects the total climate transition risk. Per Sub-fund a risk classification of the transition risk is provided.

Climate physical risk represents the potential impact on returns due to extreme weather events. These weather events can be classified as acute risk or chronic risk. Chronic refer to longer-term shifts in climate patterns (e.g., sustained higher temperatures) that may cause sea level rise or chronic heat waves. They manifest primarily via reduction in labor productivity/availability or changes in the efficiency of production processes. Acute physical risks occur from rare natural catastrophes such as tropical cyclones in distinct time intervals. Within Robeco the distinction is made between a total of 10 physical risk scenarios. The three most vulnerable weather scenarios are described per Sub-fund. The extreme weather scenarios are described in the table below.

Type	Climate Hazards	Description
Acute	Tropical cyclone	Tropical cyclones typically cause severe wind and flood damage.
	Coastal flooding	Sea level rise is the dominating climatic driver of coastal flooding impacts. The impacts can manifest in severe asset damage and prolonged business interruption.
	Fluvial flooding	The core of the fluvial flooding model is very similar to the coastal flooding model. Local flood protection measures are considered, and the same depth damage functions are used to estimate asset damage and business interruption from inundation.
	River low flow	Water scarcity on the power production sector, specifically on thermal and hydro power plants, which rely on large amounts of water.
	Wildfire	Wildfires are driven by weather conditions such as drought, high temperatures and evaporation and strong wind, with humans being the dominant force of wildfire ignition.
Chronic	Extreme heat	Extreme heat temperatures reflect the rising mean temperatures overtime, which can impact both productivity and damage costs for companies.
	Extreme cold	Extreme cold has an opposite effect in some assets: as large areas of the northern hemisphere are projected to experience a significant temperature increase, cold extremes become less frequent and the corresponding costs are reduced.
	Heavy precipitation	This is the impact caused on companies' cash flows by the stronger precipitation levels.
	Strong snowfall	This is a factor influenced by impacts on productivity changes caused by strong snowfall levels.
	Severe wind	Severe wind is the impact on companies' cash flows caused by extreme wind levels.

e) Risk related to the use of specific instruments

Mortgage-backed and asset-backed securities

The value and the quality of mortgage-backed securities and asset-backed securities depend on the value and the quality of the underlying assets against which such securities are backed by a loan, lease or other receivables. These securities may be subject to greater credit, liquidity and interest rate risk compared to other debt securities. Mortgage-backed securities and asset-backed securities may be exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met. Issuers of mortgage-backed and asset-backed securities may have limited ability to enforce the security interest in the underlying assets, and credit enhancements provided to support the securities, if any, may be inadequate to protect Investors in the event of default.

Convertible bonds and contingent convertible bonds

A Sub-fund may invest in bonds that are subject to the risk of conversion, such as convertible bonds, hybrid bonds and contingent convertible bonds. Depending on the specific structure, the instruments have both debt and equity capital characteristics. Equity-like features can include loss participations (including full write-off of the bond) and interest payments linked to the operational performance and/ or certain capital ratios. Debt-like features can include a fixed maturity date or call dates fixed on issue.

Convertible bonds permit the holder to convert into shares or stocks in the company issuing the bond at a specified future date. Prior to conversion, convertible bonds have the same general characteristics as non-convertible fixed income securities and the market value of convertible bonds tends to decline as interest rates increase and increase as interest rates decline. However, while convertible bonds generally offer lower interest or dividend yields than non-convertible fixed income securities of similar quality, they enable the relevant Sub-fund to benefit from increases in the market price of the underlying stock, and hence the price of a convertible bond will normally vary with changes in the price of the underlying stock. Therefore, Investors should be prepared for greater volatility than straight bond investments.

Contingent convertible bonds (CoCo) are usually issued by financial institutions and can be counted towards the issuers regulatory capital requirement. Conversion of a CoCo occurs based on pre-defined triggers, described in the documentation of

the instrument. Triggers are usually linked to specific regulatory capital levels of the issuer, but can also be triggered by pre-defined events or by the competent authority. After a trigger event, the value of a CoCo is depending on the loss absorption mechanism as defined in the terms and conditions of the instrument. Loss absorption methods could allow a full or partial equity conversion or write down of the principal value. A principal write down can be partial or for the full amount, and can be either temporary or permanent.

Contingent convertible bonds are accompanied with specific risks that are more difficult to assess in advance. It is therefore difficult for the Management Company or the Portfolio Managers of the Sub-fund to assess how the CoCo will behave before and after conversion. These specific risks include but are not limited to:

Trigger risk: the probability of a conversion or write-down is depending on the trigger level and on the current capital ratio of the issuer. Capital levels are usually published on a quarterly or semi-annual basis with a few months lag. Triggers differ between specific contingent convertible securities and conversion can also be triggered by the regulatory authority. In the event of a trigger, a Sub-fund may lose the amount invested in the instrument or may be required to accept cash, equities or other securities with a value that is considerably less than its original investment.

Coupon cancellation risk: the issuer of certain contingent convertible bonds may decide at any time, for any reason, and for any length of time to cancel coupon payments. Coupon payments that have been cancelled will not be distributed.

Capital structure inversion risk: In the event of a full or partial write-down or a conversion into equity, the holder of a contingent convertible bond may suffer loss of principle before or simultaneously with equity holders.

Call extension risk: the contingent convertible bond is usually issued as a perpetual instrument and therefore the bond holder may never be redeemed. Calling the instrument is subject to specific conditions and requires the pre-approval of the competent supervisory authority. The bonds are issued taking into account specific prudential and fiscal laws that apply to the issuer. Any legislative changes could have an adverse impact on the value and may give the issuer the option to redeem the instrument.

Unknown risk: the structure of contingent convertible bonds is innovative and untested. This may result in risks that are not known yet.

Valuation and Write-down risks: The specific features of a CoCo such as coupon cancellation, principal (full or partial) write-down and the perpetual character, are difficult to accurately capture in risk models compared to regular bonds. At every call date there is the possibility that the maturity of the bond will be extended which can result in a yield change. The risk of a write down includes a full or partial write down of the principal amount. After a partial write down, distributions will be based on the reduced principal amount. After a conversion, the common stock of the issuer might be suspended from trading, making it difficult to value the position.

Industry concentration risk: investment in contingent convertible bonds may lead to an increased industry concentration risk as such securities are issued by financial institutions.

Liquidity risk: In case of conversion into equity, the value of the common stock will be depressed and it is likely that trading of the issuers common equity will be suspended. After conversion, the Management Company or the Portfolio Managers of the relevant Sub-fund might be forced to sell these new equity shares since the investment policy of the relevant Sub-fund might not allow equity holding. This event is likely to have a contagious effect on contingent convertible bonds issued by other issuers, negatively affecting the liquidity of these instruments.

Hybrid bonds are deeply subordinated bonds that are often issued by corporates, but can also be issued by financials as part of their regulatory capital structure (e.g. tier 2 capital). The features of a hybrid bond are defined in the terms and conditions of the instrument, and can differ per issue. The risks associated with hybrid bonds are difficult to assess in advance. Conversion risk of hybrid bonds is driven by the following risks:

Coupon deferral risk: Depending on the terms and conditions of the instrument, the issuer of hybrid bonds may decide at any time, to defer coupon payments. An alternative coupon satisfaction mechanism may apply which could allow the issuer to distribute equity to satisfy the coupon obligation.

Call extension risk: the hybrid bond is issued as a long term bond, with specific call dates that give the issuer the option to redeem the issue. If issued by a financial institution as part of their regulatory capital requirement, the instrument cannot have any incentive to redeem and calling the instrument is subject to specific conditions and requires the pre-approval of the

competent supervisory authority. Any legislative changes could have an adverse impact on the value and may give the issuer the option to redeem the instrument.

Unknown risk: Hybrid bonds are issues taking into account specific laws that apply to the issuer. This includes both fiscal and, if the issuer is a financial institution, prudential regulatory requirements.

Valuation risks: Due to the callable nature of hybrids, it is not certain what calculation date to use in yield calculations. At every call date there is the possibility that the maturity of the bond will be extended, which can result in a yield change.

Industry concentration risk: investments in hybrid bonds may lead to an increased industry concentration risk as such securities are often issued by issuers in specific sectors (e.g. financials, utility, energy, telecommunication).

Liquidity risk: issue specific events, such as the announcement that distributions on the instrument are passed, are likely to affect the liquidity of the hybrid bond. If an alternative coupon satisfaction mechanism is applied, whereby equity is distributed to the hybrid bond holders, the value of the common stock will likely be depressed. The Management Company or the Portfolio Managers of the relevant Sub-fund might be forced to sell these equity positions since the investment policy of the relevant Sub-fund might not allow equity holdings.

Voluntary Emission Reduction certificates and Certified Emission Reduction certificates

In order to compensate greenhouse gas ('GHG') emissions from investments in Carbon Offsetting Share class, the Management Company selects projects to purchase Voluntary Emission Reduction (VERs) certificates and Certified Emission Reduction (CERs) certificates from. After selection of such projects, these may be of less quality than initially anticipated and/or not in line with best market practices on quality of VERs and CERs.

Investors' attention is furthermore drawn to the fact that in some circumstances, projects may be withdrawn at a later date in case of exceptional events (such as natural disasters, fraud, political risk etc.) affecting the projects at the origin of the issue, which could thus have an impact on the Carbon Offsetting mechanism. For such unforeseen events, the Management Company bears no responsibility and shall ensure sufficient risk mitigation and due diligence is undertaken at the time of project selection.

Distressed Securities

Certain Sub-funds may invest in Distressed Securities which may cause additional risks for those Sub-funds as such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and principal or maintain other terms of the offer documents over any long period of time. Whilst such issues are likely to have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposure to adverse economic conditions.

Distressed Securities are likely to be particularly risky investments although they also may offer the potential for correspondingly high returns. Among the risks inherent in investments in troubled entities is the fact that it frequently may be difficult to obtain information as to the true condition of such issuers. Accordingly, a Sub-fund may lose its entire investment, may be required to accept cash or securities with a value less than its original investment and/or may be required to accept payment over an extended period of time. Under such circumstances, the returns generated from the Sub-fund's investments may not compensate the shareholders adequately for the risks assumed.

f) Risk related to the use of financial derivative instruments

The value (or price) of a financial derivative instrument is dependant on one or more underlying assets as defined in the instruments standardised or tailored contract. Financial derivatives are subject to a variety of risks mentioned in this section.

Basis Risk

Financial derivative instruments can be subject to basis risk. The ability of the company to utilise futures or options for hedging or investment purposes will depend on the degree of correlation between the value of the instrument or market being hedged, or to which exposure is sought and the value of the futures or option contract. Because the instrument underlying a futures contract or option will often be different from the instrument or market being hedged or to which exposure is sought, the correlation risk could be significant. The use of futures and options involves the risk that changes in the value of the underlying instrument will not be fully reflected in the value of the futures contract or option.

Leverage risk

Financial derivative instruments may present a leverage effect, which will increase the Sub-fund's sensitivity to market fluctuations. Given the leverage effect embedded in financial derivative instruments, such investments may result in higher volatility or even a total loss of the Sub-fund's assets within a short period of time.

Risk introduced by short synthetic positions

The Sub-fund may use financial derivatives to take synthetic short positions in the underlying value of the derivative. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. Depending on the market movement of the underlying value, short positions may expose the Sub-fund to theoretically unlimited losses.

Hedging Transactions Risks for certain classes

The Sub-funds of the Company have several Classes of Shares which distinguish themselves by, inter alia, their Reference currency as well as currency hedging at Class level. Investors are therefore exposed to the risk that the Net Asset Value of a Class can move unfavorably *vis-à-vis* another Class as a result of hedging transactions performed at the level of the hedged Class.

Counterparty and collateral risks

In relation to financial derivatives, Investors must notably be aware that, in the event of the failure of the counterparty, there is the risk that collateral received may yield less than the exposure on the counterparty, whether because of inaccurate pricing of the collateral, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded. Potential delays in recovering cash collateral placed out, or difficulty in realizing collateral may restrict the ability of the Company to meet redemption requests, security purchases or, more generally, reinvestment.

Total Return Swap risk

For Total Return Swaps that do not involve physical holding of securities, synthetic replication through fully funded (or unfunded) Total Return Swaps may provide a means of obtaining exposure to strategies that are difficult to implement and which would otherwise be very expensive and difficult to access with physical replication. However, synthetic replication involves a counterparty risk. If a Sub-fund engages in OTC financial derivative transactions, there is a risk - over and above the general counterparty risk - that the counterparty may default or be unable to fully fulfil its commitments. When the Company and any of its Sub-funds enter into Total Return Swaps on a net basis, the two cash flows are offset and the Company or the Sub-fund will receive or pay, as the case may be, only the net amount of the two payments.

Total Return Swaps concluded on a net basis do not imply physical delivery of investments, other underlying assets or principal. As a result, it is anticipated that the risk of loss on Total Return Swaps will be limited to the net amount of the difference between the total return rate of a reference investment, an index or a basket of investments and fixed or variable payments. If the other party to a Total Return Swaps is in default, under normal circumstances, the risk of loss of the Company or the concerned Sub-fund is the net amount of the total return of payments that the Company or the Sub-fund is contractually entitled to receive.

g) Risk related to the use of efficient portfolio management techniques***Securities lending***

In case of financial-instrument lending transactions, the Sub-fund runs the risk that the recipient cannot comply with its obligation to return the lent financial instruments on the agreed date or furnish the additional requested collateral.

In relation to securities lending transactions, Investors must notably be aware that if the borrower of securities lent by a Sub-fund fails to return these there is a risk that the collateral received may realize less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded. In case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Sub-fund, or (iii) yield a sum less than the amount of collateral to be returned. Any delays in the return of securities on loans may restrict the ability of a Sub-fund to meet delivery obligations under security sales.

Next to this risk there is a legal risk of the interpretation or inconsistency of the legal documentation, insecurity with respect to the law and general difficulty in getting laws recognised and/or passed.

The financial instruments lent by the Sub-fund, are placed in custody with a reputable bank or its duly appointed sub-custodians. There is always the risk that the assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the bank or the sub-custodian appointed by it.

Repurchase and reverse repurchase agreements

In relation to repurchase and reverse repurchase agreements, Investors must notably be aware that, in the event of the failure of the counterparty with which securities (or cash in case of a reverse repurchase transaction) of a Sub-fund has been placed, there is the risk that collateral received may yield less than the securities or cash placed out, whether because of inaccurate

pricing of a traded instrument or, adverse market movements, or the illiquidity of the market in which the securities are traded. Any difficulty in realizing and/or liquidating collateral may restrict the ability of a Sub-fund to meet its obligations or investment objectives.

Next to this risk there is a legal risk of the interpretation or inconsistency of the legal documentation, insecurity with respect to the law and general difficulty in getting laws recognised and/or passed.

The securities (cash) placed by a counterparty in custody with a reputable bank or its duly appointed sub-custodians. There is always the risk that these assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the bank or the sub-custodian appointed by it.

h) Risk related to specific countries, regions or sectors

The Sub-funds may invest in equities, bonds and other marketable debt securities and instruments of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other having regard to: gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. The reporting, accounting and auditing standards of issuers may differ, in some cases significantly, from country to country in important respects and less information from country to country may be available to Investors in securities or other assets. Nationalization, expropriation or confiscatory taxation, currency blockage, political changes, government regulation, political or social instability or diplomatic developments could affect adversely the economy of a country or the Sub-fund's investments in such country. In the event of expropriation, nationalization or other confiscation, the Sub-fund could lose its entire investment in the country involved. In addition, laws in countries governing business organizations, bankruptcy and insolvency may provide limited protection to security holders such as a Sub-fund. In this context special attention is given to the following regions/countries: (1) Emerging and less developed markets, (2) Chinese markets, and (3) Indian Markets.

Risk relating to small- and mid-cap companies

A Sub-fund may invest in securities of small- and/or mid-cap companies. Small- and mid-cap companies have a smaller operating scale and can be emerging in nature. Investing in these securities may expose a Sub-fund to risks such as higher volatility in share prices, less publicly available information, a lower degree of liquidity in the markets of these securities and greater vulnerability to fluctuations in the economic cycle. Also, it may be more common and faster for these small- and mid-cap companies to delist. It may have an adverse impact on the Sub-fund if the company that it invests in is delisted.

Emerging and less developed markets risk

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Investors should recognize that the potential social, political and economic instability of some of the African, frontier, emerging and Eastern European countries certain Sub-funds intend to invest in, could impact the value and liquidity of the investments of these Sub-funds. Furthermore, investments in some countries may be subject to currency risk as currencies have often experienced periods of weakness or repeated devaluations. Also, investments in emerging markets may be subject to a higher volatility.

More specifically, Investors should consider the following risk warnings if they invest in Sub-funds investing in African, frontier, emerging markets or newly industrialized countries:

- economic and/or political instability could lead to legal, fiscal and regulatory changes or the reversal of legal/fiscal/regulatory/market reforms. Assets could be compulsorily acquired without adequate compensation;
 - the interpretation and application of decrees and legislative acts can be often contradictory and uncertain, particularly in respect of matters relating to taxation;
 - the accounting and audit systems may not accord with international standards;
- less developed custody and settlement system in safekeeping of securities as well as in the registration of assets, where registrars are not always subject to effective government supervision;

- conversion into a foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed. The value of the currency in some markets, in relation to other currencies, may decline as such the value of the investment is adversely affected;
- the securities markets of some countries lack the liquidity, efficiency, regulatory and supervisory controls of more developed markets and lack of liquidity may adversely affect the value or ease of disposal of assets;
- in some markets, there may be no secure method of delivery against payment which would avoid exposure to counterparty risk. It may be necessary to make payment on a purchase or delivery on a sale before receipt of the securities or, as the case may be, sale proceeds.

Currently certain markets in Russia, Africa, frontier, emerging and other Eastern European countries do not qualify as Regulated Markets under the investment restrictions and therefore, investments in securities dealt on such markets are subject to the 10% limit set forth under restriction I. (2) of **APPENDIX II – INVESTMENT RESTRICTIONS**.

The Moscow Exchange MICEX – RTS can be considered as a Regulated Market. Accordingly, the 10% limit generally applicable to securities which are listed or traded on markets in Russia will not apply to investments in securities listed or traded on the Moscow Exchange MICEX – RTS. However, the risk warnings regarding investments in emerging and less developed markets will continue to apply to all investments in Russia.

Given the political and market environment as of the date of this Prospectus, no investments in Russia are contemplated. If and as soon as conditions for investment in Russia return to acceptable (and if considered in the interest of Investors), the Management Company or the Portfolio Manager may seek exposure to Russia and Russian issuers.

Risks relates to the Chinese domestic securities markets

Some Sub-funds may invest directly or indirectly in the Chinese domestic securities market. These securities include China A-shares. China A-shares are shares issued by companies incorporated in the People's Republic of China ("PRC") and listed on the PRC stock exchanges, traded in the lawful currency of PRC and available for investment by domestic (Chinese) investors, QFI License Holders and via stock connect programmes (for a limited set of China A-shares) ("**Stock Connect**"). Other than the risks mentioned under section "**Emerging and less developed markets risk**" above, investments in China A shares are subject to additional risks:

RMB Currency and Exchange risk

The Chinese Renminbi ("RMB") is traded in two different markets i.e. onshore RMB ("CNY") and offshore RMB ("CNH"). CNY has moved to a managed floating exchange rate with reference to a basket of foreign currencies. While CNY is not freely convertible, CNH is freely convertible outside of China and thus both currencies trade at different rates. Investor should note that RMB convertibility between CNH and CNY is a managed process subject to exchange controls and certain restrictions by the PRC government.

The RMB Hedged Share Classes participate in the CNH market, which allows investors to freely transact CNH outside of mainland China. The RMB Hedged Share Classes will have no requirement to remit CNH to CNY. However, non-RMB based investors are exposed to foreign exchange risk and there is no assurance that RMB against investors' base currencies will not depreciate. Any depreciation of RMB and/or RMB currency conversion incurred could adversely affect the value of an Investor's investment in a Sub-fund. Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

Taxation risk

Under the general taxing provision of the PRC Corporate Income Tax Law, a non-resident enterprise is subject to 10% withholding income tax ("WHT") on PRC sourced interest income, dividends, and capital gains, provided that the non-resident enterprise is not considered to be a tax resident in the PRC by virtue of effective management and control or by having a PRC tax establishment. It is intended that the QFI License Holder will be managed and operated such that it would not be considered a tax resident in the PRC or to have a PRC tax establishment, although this cannot be guaranteed.

Pursuant to Circular Guoshuihan [2009] No.47, dividends income sourced from the PRC derived by QFIs are generally subject to PRC WHT at a rate of 10% and are required to be withheld by the payer. If such WHT is subject to reduction or exemption in accordance with an applicable tax treaty signed with the PRC, QFIs can apply for a tax refund.

Additionally, pursuant to Circular Caishui [2014] No.79 ("Circular 79"), capital gains realized on or after November 17, 2014 by QFIs from the trading of A-Shares are temporarily exempted from PRC Corporate Income Tax (CIT), while gains realized by QFIs prior to 17 November 2014 from disposal of PRC equity investments should be subject to PRC CIT according to the PRC CIT Law. The exemption under Circular 79 is applicable to QFIs which do not have an establishment or place of business or a permanent establishment ("PE") in the PRC, or QFIs which have a PE in the PRC but the gains derived from the disposal of PRC equity investments are not effectively connected to such PE. According to Caishui [2016] No. 36 ("Circular 36") and Caishui [2016] No.70 ("Circular 70"), capital gains realized by QFIs from the trading of PRC securities in the PRC are exempted from VAT.

However, none of Circular 79 or Circular 70 specified an expiry date for these temporary exemptions, and thus both may be subject to termination by the PRC authorities with or without notice. If these temporary exemptions expire or are withdrawn, QFIs would be subject to PRC WHT and VAT in respect of capital gains on PRC A-Shares under current PRC tax regime.

Under the prevailing PRC Stamp Duty ("PRC SD") Law, which became effective on July 1, 2022, QFIs are subject to PRC SD at a rate of 0.1% with respect to the sale of A-Shares. The purchase of A-Shares is currently not subject to PRC SD.

The tax laws, regulations and practice in the PRC are constantly changing, and they may be changed with retrospective effect. Any provision for taxation made by the relevant Sub-funds may be excessive or inadequate to meet final PRC tax liabilities on capital gains derived from indirect and direct China A-shares investments. Any excessive provision or inadequate provision for such taxation may impact the performance and hence the net asset value of the Sub-funds during the period of such excessive or inadequate provision. Consequently, Investors may be advantaged or disadvantaged depending upon the final outcome of how capital gains from indirect and direct China A-shares investments will be taxed, the level of tax provision and when the Investors subscribed and/or redeemed their Shares in/from the Sub-fund.

Gains derived from the trading of PRC equity investments (including China A-shares) will be temporarily exempt from PRC corporate income tax and value added tax. However, Hong Kong and overseas investors (such as the Sub-funds) are required to pay tax on dividends and/or bonus shares at the rate of 10% which will be withheld and paid to the relevant authority by the listed companies. The Sub-funds which invest in China A-shares may be adversely affected as a result.

Investments via the QFI program

Sub-funds may invest directly in the PRC via the QFI status and are subject to the following risks:

Liquidity risk

Investments via the QFI program are subject to restrictions imposed by the Chinese governments that may negatively affect the liquidity and performance of relevant Sub-funds. Under prevailing regulations, QFI holders are no longer subject to any lock-up periods, prior approval or other repatriation restrictions although a review on authenticity and compliance will be conducted on each remittance and repatriation by the PRC Custodian. There is no assurance that relevant rules and regulations will not change or that lock-up periods or other repatriation restrictions will not be imposed in the future. Any restrictions on repatriation or rejection by the PRC Custodian in case of non-compliance with respective rules and regulations will delay the repatriation process. As a consequence, a Sub-fund's ability to meet redemption requests may be affected.

Regulatory risks

The current QFI Regulations which regulate investments in the PRC are relatively new and their application may depend on the interpretation given by the relevant Chinese authorities. A Sub-fund's ability to make relevant investments or to fully implement or pursue its investment objectives and strategy is subject to the applicable laws, rules and regulations (including investment restrictions, minimum investment holding periods and requirements on repatriation of principal and profits) in the PRC, which may be subject to change with potential retrospective effect. The relevant Sub-fund may be adversely affected as a result of such changes.

A Sub-fund may suffer substantial losses in case the approval of the QFI status is being revoked/terminated or otherwise invalidated as the Sub-fund may be required to dispose of its securities holdings and/or may be prohibited from trading the relevant securities and repatriation of the Sub-fund's assets.

Quota risk

Despite QFI holders are not subject to quota restrictions under QFI regimes, it is uncertain that relevant rules or regulations will change or quota restrictions will be imposed in the future. Any quota restrictions will adversely affect the Sub-fund's ability to achieve its investment objective. It is possible that a Sub-fund may not be able to accept additional subscriptions due to this limitation.

Custody risks and PRC broker risks

Investors should note that cash deposited in the cash account of a Sub-fund concerned with the PRC Custodians will not be segregated but will be a debt owing from the PRC Custodian to a Sub-fund as a depositor.

Such cash will be co-mingled with cash belonging to other clients of the PRC Custodians. In the event of bankruptcy or liquidation of the PRC Custodians, the Sub-fund concerned will not have any proprietary rights to the cash deposited in such cash account, and a Sub-fund will become an unsecured creditor of the defaulted PRC Custodian. The Sub-fund concerned may face difficulty and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the Sub-funds will suffer losses.

A Sub-fund may incur losses due to the acts or omissions of either the relevant brokers or the PRC Custodians in the execution or settlement of any transaction or in the transfer of any funds or securities. Subject to the applicable laws and regulations in the PRC, the Depositary will make arrangements to ensure that the PRC Custodians has appropriate procedures to properly safe-keep a Sub-fund's assets.

In the event of any default or disqualification from performing its obligations of either the relevant broker or the PRC Custodians in the execution or settlement of any transaction or in the transfer of monies or securities, a Sub-fund may encounter delays in recovering their assets and may suffer substantial losses which may in turn adversely impact the net asset value of such Sub-fund.

Investments via Stock Connect

Sub-funds may invest via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect ("Stock Connect") with the aim to give investors direct access to eligible China A-shares. Investments via Stock Connect may expose to change the following risks:

Regulatory setup

A leading principal of trading securities through Stock Connect is that the laws, rules and regulations of the home market of the applicable securities shall apply to Investors in such securities. Therefore, for the relevant Sub-funds that invest in Chinese A-shares via Stock Connect, the PRC is the home market. As such, the laws, rules and regulations of the PRC regarding Stock Connect must be observed by the relevant Sub-funds. If such laws, rules and regulations are breached, the SSE and the SZSE have the power to carry out an investigation and may require SEHK participants to provide information about a Sub-fund and to assist in investigations. In addition to the above, certain Hong Kong legal and regulatory requirements will continue to apply when trading via Stock Connect.

Quota limitations

Stock Connect is subject to quota limitations which may restrict the relevant Sub-fund's ability to invest in China A-shares on a timely basis and as a result, the Sub-fund's ability to access the China A-shares market (and hence to pursue its investment strategy) will be adversely affected.

Legal/Beneficial Ownership risks

The safekeeping of the China A-shares involves a three tier structure in which the (sub-)custodian of the relevant Sub-fund holds the Stock Connect shares in accounts in the Hong Kong Central Clearing and Settlement System ("CCASS") maintained by the Hong Kong Central Clearing ("HKSCC") as central securities depositary in Hong Kong. HKSCC in turn holds Stock Connect shares via a nominee account with ChinaClear in its name. The HKSCC, as a nominee and not the beneficial owner of Stock Connect shares, is under no obligation to take any legal action or court proceedings to enforce the rights of the relevant Sub-fund(s). Investors should note that Stock Connect shares will not be regarded as part of the general assets of HKSCC available for distribution to its creditors.

Restrictions on trading days

Due to the differences in trading days, the Stock Connect operates only on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding Settlement Days. The relevant Sub-fund may be subject to a risk of price fluctuations in China A-shares on a day that the PRC market is open for trading but the Hong Kong market is closed.

Suspension risk

The SEHK, SZSE and SSE reserve the rights to suspend trading if necessary for ensuring an orderly and fair market and managing risks prudently which would adversely affect the relevant Sub-fund's ability to access the PRC market.

Trading restrictions

PRC regulations require that before an investor sells any share, there should be sufficient shares in the account; otherwise the SSE and SZSE will reject the sell order concerned. Because of this requirement, Sub-funds may not be able to dispose shares in a timely manner. In addition, stocks may be recalled from the scope of eligible stocks for trading via the Stock Connect. This may adversely affect the investment portfolio or strategies of the relevant Sub-funds.

Clearing and settlement risk

The Sub-fund's ability to invest through Stock Connect is subject to the performance by HKSCC of its obligations and any failure or delay by HKSCC may result in the failure of settlement, or loss of China A-shares. Should the remote event of a ChinaClear default, HKSCC's liabilities will be limited to assisting clearing participants in pursuing their claims against ChinaClear. HKSCC will in good faith, seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or through ChinaClear's liquidation. In the above events, the Sub-fund may suffer delay in the recovery process or may not be able to fully recover its losses from ChinaClear.

Operational risk

It should also be noted that any investment through Stock Connect is premised on the functioning of the operational systems of the relevant market participants and is therefore subject to the operational risk in terms of meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchange and/or clearing house.

Investors should be aware that it cannot be ensured that such systems will function properly or will continue to be adapted to changes and developments in both markets. In the event that relevant systems fail to function properly, trading through the program could be disrupted. A Sub-fund's ability to access the China A-share market (and hence to pursue their investment strategy) could be adversely affected by such an operational failure.

Taxation risk

Capital gains realized on the trading of A-Shares, including PRC 'land-rich' companies, by foreign investors through the Shanghai-Hong Kong Stock Connect program are temporarily exempted from PRC WHT and VAT as according to Circular Caishui [2014] 81 ("Circular 81") and Circular 36.

With the approval from the PRC State Council, the State Taxation Administration ("STA"), Ministry of Finance ("MOF") and China Securities Regulatory Commission ("CSRC") jointly issued Caishui [2016] 127 ("Circular 127") on 5 November 2016 to clarify the PRC tax treatment of Shenzhen-Hong Kong Stock Connect. According to Circular 127, investors in the Hong Kong market (including enterprises and individuals) are temporarily exempted from WHT and VAT with respect to capital gains derived from the trading of A-Shares through Shenzhen-Hong Kong Stock Connect.

However, none of Circular 81 or Circular 127 specified an expiry date for these temporary exemptions, and thus both may be subject to termination by the PRC authorities with or without notice. If these temporary exemptions expire or are withdrawn, the Sub-funds would be subject to PRC WHT and VAT in respect of capital gains on PRC A-Shares under current PRC tax regime.

Investors in the Hong Kong market (including enterprises and individuals) are subject to WHT at a rate of 10% with respect to dividends received from A-Shares under the Stock Connect. If the recipient of the dividend is entitled to a lower treaty rate, it can apply to the tax bureau in-charge of the payer for a tax refund. Dividends derived from the investments in China A-Shares are not within the scope of China VAT.

Investors in the Hong Kong market should be subject to PRC SD at 0.1% with respect to the sale of A-Shares under the Stock Connect. The purchase of A-Shares is currently not subject to PRC SD.

It cannot be excluded that the Sub-funds investing in China A-shares through Stock Connect may be subject to new portfolio fees and tax concerned with income arising from stock transfers which are yet to be determined by the relevant authorities in addition to paying trading fees and stamp duties in connection with China A-share trading.

Risk associated with small- and mid-cap A-shares

Mainly via the SZSE, the relevant Sub-funds are able to invest in shares of small- and mid-cap companies. These investments may result in significant losses for a Sub-fund as these small- and mid-cap companies are usually of emerging nature with a smaller operating scale. Hence they may be subject to higher volatility in share prices and fluctuations in liquidity and may have higher risks and turnover ratios. Also, it may be more common and faster for these small- and mid-cap companies to delist. It may have an adverse impact on the Sub-fund if the company that it invests in is delisted.

China Interbank Bond Market Risks

The China bond market is made up of the interbank bond market and the exchange listed bond market. The China Interbank Bond Market ("CIBM") is an OTC market which foreign investors can invest via Foreign Access Regime and/or the Bond Connect programme.

To the extent that a Sub-fund transacts in the CIBM, the Sub-fund may also be exposed to risks associated with settlement procedures and default of counterparties. The counterparty which has entered into a transaction with the Sub-fund may default in its obligation to settle the transaction by delivery of the relevant security or by payment for value.

The CIBM is also subject to regulatory risks.

Investments via Bond Connect

Some Sub-funds may invest in the CIBM via Bond Connect. "Bond Connect" refers to a bond trading link between the PRC and Hong Kong which allows foreign institutional investors to invest in onshore Chinese bonds and other debt instruments traded on the CIBM. Bond Connect provides foreign institutional investors a more streamlined access to the CIBM. Under the prevailing regulations in mainland China, eligible foreign investors will be allowed to invest in the bonds circulated in the CIBM through the northbound trading of the Bond Connect ("Northbound Trading Link"). There will be no investment quota for the Northbound Trading Link.

In addition to the risks mentioned under section "Emerging and less developed markets risk", investments carried out via Bond Connect can also be subject to the following risks:

Legal/Beneficial Owner risk

Pursuant to the prevailing regulations in mainland China an offshore custody agent recognized by the Hong Kong Monetary Authority (currently, the Central Money Markets Unit ("CMU")) shall open omnibus nominee accounts with the onshore custody agent recognized by the People's Bank of China (China Central Depository & Clearing Co., Ltd and Shanghai Clearing House). All bonds purchased via the Bond Connect route will be held onshore by custody agents and will be registered in the name of CMU, which will hold such bonds as a nominee owner, not a beneficial owner. This structure may impose a legal risk for the Sub-fund(s) as CMU is not obliged to take any legal action or enter into court proceedings to enforce any rights on behalf of investors in Bond Connect securities in PRC. Investors should note that Bond Connect securities will not be regarded as part of the general assets of CMU available for distribution to its creditors.

For investments via Bond Connect, the relevant filings, registration with the People's Bank of China and account opening have to be carried out via an onshore settlement agent, offshore custody agent, registration agent or other third parties (as the case may be). As such, the Sub-funds are subject to the risks of default or errors or omissions on the part of such third parties.

As the legal structure of these Chinese counterparties are untested, it is unclear how the default of a counterparty will be settled. In the absence of legal ownership, a default of one of these counterparties, in any form, may impact the Sub-fund(s) adversely.

Market and Liquidity risk

Market volatility and potential lack of liquidity due to low trading volume may result in prices of debt securities traded on such market fluctuating significantly. Sub-funds investing in such market are therefore subject to liquidity and volatility risks and may suffer losses in trading PRC bonds. The bid and offer spreads of the prices of the PRC bonds may be large, and the relevant Sub-funds may therefore incur significant trading and realization costs and may even suffer losses when selling such investments.

Restrictions on trading days

By investing in CIBM via Bond Connect, the Sub-fund(s) may be subject to the risk of delays inherent to order placing and/or settlement systems. Trading through Bond Connect can only be undertaken on days when markets (and banks) in both the PRC and Hong Kong are open on the corresponding execution and settlements dates. Accordingly, the Sub-fund(s) may not be able to buy or sell at the desired time and price.

Operational risks

Investing in the CIBM via Bond Connect entails making use of recently developed trading platforms and operational systems. Due to the novelty of these platforms and systems, operational issues may occur. No assurance can be given that these systems and platforms will not be subject to changes which may adversely impact the Sub-funds.

Regulatory risks

The current regulation which applies to investments via Bond Connect is relatively new in nature and may be subject to change which potentially take retrospective effect. Currently, investments via Bond Connect are not subject to any quota. There is no assurance that quota will not be imposed in the future.

Investors should also be aware that when relevant mainland Chinese authorities suspend account opening or trading on the CIBM, the Sub-funds' ability to invest in the CIBM will be adversely affected. In such event, the Sub-fund's ability to achieve its investment objective will be negatively affected.

Not protected by Investor Compensation Fund

The investments via Bond Connect will not be covered by the Hong Kong's Investor Compensation Fund nor the China Securities Investor Protection Fund in the PRC. Therefore, Sub-funds are exposed the risks of default of the broker(s) they engage in their trading through the Bond Connect.

Risk relating to Urban Investment Bonds

Urban investment bonds are issued by Local Government Financing Vehicles ("LGFVs"), such bonds are typically not guaranteed by local governments or the PRC government. In the event that the LGFVs default on payment of principal or interest of the urban investment bonds, the relevant Sub-funds could suffer substantial loss and the Net Asset Value of the relevant Sub-funds could be adversely affected.

Taxation risk

There is no specific written guidance by the mainland China tax authorities on the treatment of income tax on capital gain derived from trading of PRC debt securities in the CIBM by eligible foreign institutional investors via the Bond Connect. Based on verbal comments from the PRC tax authorities, gains realized by foreign investors from investment in PRC debt securities are non-PRC sourced income and thus should not be subject to PRC WHT. However, there are no written tax regulations issued by the PRC tax authorities to confirm that interpretation. As a matter of practice, the collection of 10% WHT on capital gains realized by non-PRC tax resident enterprises from the trading of debt securities via Bond Connect has not been strictly enforced by the PRC tax authorities.

Pursuant to Circular 36, capital gains derived from the trading securities in China would be subject to 6% VAT, unless specifically exempted under the prevailing laws and regulations. Under Circular 36 and Circular 70, VAT exemption is available for the capital gains derived by foreign institutional investors from the trading of Chinese bonds in the CIBM.

Interest received from government bonds issued by the in-charge Finance Bureau of the State Council and/or local governments bonds approved by the State Council would be exempted from PRC Corporate Income Tax ("CIT") and VAT under the prevailing PRC CIT and VAT Law/regulations.

Interest received from non-government bonds (including corporate bonds) issued by PRC tax resident enterprise should be subject to 10% WHT, 6% VAT and other local surtaxes that could amount to as high as 12% of the VAT payable. Effective from 1 September 2021, foreign entities could be exempt from the above local surtaxes for sale of services in China pursuant to STA Public Notice [2021] No. 26 and Public Notice [2021] No. 28 jointly issued by MOF and STA. On 7 November 2018, the MOF and STA jointly issued Caishui [2018] No.108 ("Circular 108"), which stipulates that foreign institutional investors (without a place or establishment in China) are temporarily exempt from WHT and VAT in respect of the bond interest income received from 7 November 2018 to 6 November 2021 derived from bond market of Mainland China. This WHT and VAT exemption treatment on bond interest income received by foreign institutional investors was further extended to 31 December 2025 according to Caishui [2021] No.34 ("Circular 34"). There is no guarantee that such temporary tax exemption will continue to apply, will not be repealed or re-imposed retrospectively, or that no new tax regulations and practice relating to Bond Connect will not be promulgated in future.

i) Operational risk

The operational infrastructure which is used by the Company carries the inherent risk of potential losses due to, among other things processes, systems, staff and external events.

j) Other risks*Valuation risk*

The assets in the Sub-funds are subject to valuation risk. This entails the financial risk that an asset is mispriced. Valuation risk can stem from incorrect data or financial modelling.

For derivatives valuation risk can arise out of different permitted valuation methods and the inability of derivatives to correlate perfectly with underlying securities, rates and indices. Many derivatives, in particular over-the-counter derivatives, are complex and often valued subjectively and the valuation can only be provided by a limited number of market professionals which often are acting as counterparties to the transaction to be valued, which may prejudice the independence of such valuations. Inaccurate valuations can result in increased cash payment requirements to counterparties or a loss of value of a Sub-fund.

Fiscal risk

During the existence of the Sub-funds, the applicable tax regime may change such that the tax treatment at the time of subscription could change, whether or not with retroactive effect.

Some of the Sub-funds may be subject to withholding and other taxes, including but not limited to capital gains and transaction taxes. Tax laws and regulations are subject to change, and changes may have retroactive effect. The interpretation and applicability of tax law and regulations by tax authorities is not as consistent and transparent in some jurisdictions as in others. Sub-funds may in practice not be able to obtain relief of tax formally entitled to.

A number of important fiscal aspects of the Sub-funds are described in the chapter on "Taxation". The Company expressly advises (potential) Shareholders to consult their own tax adviser in order to obtain advice about the fiscal implications associated with any investment in any of the Sub-funds before investing.

Pillar 2 risk

The Fund may become subject to Pillar 2 top-up tax under the Luxembourg legislation implementing these rules (Luxembourg Law of 22 December 2023) in case the Fund or a Sub-fund is held by a single Investor or two or more related Investors, an Investor is part of a Pillar 2 group and the ultimate parent entity line-by-line consolidates the Fund or Sub-fund (or does not consolidate due to size, materiality or because the entity is held for sale) or applies the equity method for accounting purposes on the Fund or Sub-fund and certain other conditions are met.

The Investor commits that the relevant GloBE Information Return (as defined in article 8.1 of the OECD Model Rules for Pillar Two and as implemented in the legislation of the jurisdiction(s) applicable to the Investor) will be filed in a manner designed to prevent penalties or triggering Pillar 2 top-up tax due by the Fund. Such Investor will provide appropriate evidence and the necessary information to the Management Company in order to enable the Management Company to fulfil the Fund's Pillar 2 obligations related to the Investor's participation in the Fund.

An Investor that brings the Fund in scope of Pillar 2 top-up tax further commits to compensate any related Pillar 2 top-up tax, interest and penalties and compliance expenses due by the Fund. The Management Company cannot be held liable for any Pillar 2 top-up tax, related interest and penalties and compliance expenses due by the Fund. The Fund may deduct any Pillar 2 top-up tax (including related interest and penalties and compliance expenses) compensation due in case an Investor has its participation (partially) redeemed.

Where an Investor brings the Fund in scope of Pillar 2, the Management Company, in its discretion, may require that Investor to transfer its participation (fully or partially) or to have that Investor (fully or partially) redeem its participation.

For the situation where an Investor is part of a Pillar 2 group and needs to make calculations for the Pillar 2 group's own Pillar 2 position, the Investor accepts that the Fund is not in a position to provide any additional information than the information provided through the financial statements and any other general periodic reports.

Outsourcing risk

The risk of outsourcing activities is that a third party may not comply with its obligations, notwithstanding existing agreements.

Model risk

Some Sub-funds apply models to make investment decisions. Model risk occurs when a model does not perform in accordance with its design. Model risk can materialise due to inaccurate data, model programming errors, technical errors or misinterpretation of the model results. Sub-funds that make use of models in their investment process or other processes, are subject to model risk.

FATCA related risks

Although the Company will be required to comply with obligations set forth under Luxembourg regulations and will attempt to satisfy any obligations until such regulations are in force and to avoid the imposition of any FATCA penalty withholding, no assurance can be given that the Company will be able to achieve this and/or satisfy such FATCA obligations. If the Company

becomes subject to a FATCA penalty withholding as a result of the FATCA regime, the value of the Shares held by Shareholders may suffer material losses.

Prospective Investors should read the entire Prospectus and consult with their legal, tax and financial advisers before making any decision to invest in any Sub-fund. Moreover, the attention of the Investors is drawn to the fact that the Sub-funds may use derivative instruments. These instruments may present a leverage effect, which will increase the Sub-fund's sensitivity to market fluctuations. Refer to APPENDIX III – RISK MANAGEMENT PROCESS for information about the global exposure per Sub-fund.

APPENDICES

APPENDIX I – INFORMATION PER SUB-FUND

1. Global Equity Sub-funds

a) Robeco BP Global Premium Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. This Sub-fund is an all cap fund, which may invest in large cap companies, as well as, small-/mid-cap companies. The reference to "Premium" in the name of the Sub-fund refers primarily to the fact that the Sub-fund aims to capture a higher performance by also investing in small-/mid-cap companies next to large cap companies and also refers to the Sub-fund's aim for a higher performance by focusing on companies with attractive value characteristics, strong business fundamentals and improving momentum.

The Sub-fund will focus on investing in companies with attractive value characteristics (undervalued), strong business fundamentals (high returns on invested capital) and improving momentum (improving trends/rising earnings). The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies that mainly operate in mature economies (developed markets).

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark index in its marketing materials for comparison purposes. Part of the stocks selected will be components of the benchmark, but stocks outside the benchmark may be selected too. The Portfolio Manager may use its discretion to invest in companies or sectors not included in the benchmark based upon opportunities found through fundamental research.

The investment strategy aims to outperform the benchmark over the long run. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade or higher, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use

derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns.

This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway

	of 3°C. This Sub-fund's primary physical risks are (1) Extreme heat, (2) River Low Flow, and (3) Coastal Flooding. Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.		
Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could , in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

b) Robeco QI Global Conservative Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. The Sub-fund will focus on investing in equities that show lower expected volatility than average global equity. Conservative stands for the focus on equity with lower expected volatility.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to achieve returns equal to, or greater than, those on the Benchmark with lower expected downside risk, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective

Investor e.g. Carbon, Water and Waste footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure are still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway

of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Precipitation.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

c) Robeco Global Stars Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Carbon footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies that mainly operate in mature economies (developed markets). The Sub-fund's portfolio has a focused, concentrated portfolio with a limited number of high-conviction positions.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon footprint reduction, in addition to creating returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

d) Robeco Emerging Stars Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries. The Robeco Emerging Stars Equities portfolio has a focused, concentrated portfolio with a limited number of high-conviction positions.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under "Section 4 – [Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. e) Robeco Emerging Markets Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of the total assets of the Sub-fund to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

*Financial Instruments
and Investment
Restrictions*

With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade or higher, non-government bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 20% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 20% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) River Low Flow, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

f) Robeco QI Emerging Markets Active Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using three factors: a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

Company Risk ← Lowest		Highest →	
Climate		X	
Transition Risk			
Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding. Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.			
Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

g) Robeco QI Global Momentum Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies that mainly operate in economies all over the world). Momentum stands for the focus on medium term trends for equities. In selecting stocks, a systematic and disciplined approach is used in which the attractiveness of stocks is assessed on both fundamental and technical variables, which are then interpreted by quantitative models.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment

objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. h) Robeco QI Global Developed 3D Enhanced Index Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Carbon, Water and Waste footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies that mainly operate in mature economies (developed markets).

The Sub-fund is actively managed and will apply Robeco's 3D Investing approach (as outlined in the Glossary of Defined Terms section of this Prospectus), which seeks to consider risk, return and sustainability in the Sub-fund's portfolio. The Sub-fund's portfolio will be optimised using a quantitative process to target returns in excess of the Benchmark, to target better sustainability characteristics than the Benchmark, while managing risk compared to the Benchmark.

The Sub-fund seeks to outperform the Benchmark in the long run by reflecting the expression of Robeco's positive and negative views on eligible listed equity and equity-related securities. This is achieved by correspondingly overweighting and underweighting securities in the Sub-fund's portfolio relative to the weighting of these securities in the Benchmark, including by investing in securities that are not included in the Benchmark. The relative attractiveness of stocks is determined using the Robeco's proprietary quantitative stock-ranking model, which considers proven return factors such as value, quality and momentum. Robeco overweights stocks with an attractive valuation, a profitable operating business, strong price momentum, and positive recent revisions from analysts. As a result of these overweight exposures, the Sub-fund will have a corresponding underweight exposure to other stocks in the Benchmark. All decision making at portfolio level is based on the identification of under-valued and over-valued stocks which is the result of the stock's scoring on Robeco's proprietary quantitative stock-ranking model and the settings of the portfolio construction algorithm that considers risk, return and sustainability.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon, Water and Waste footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

i) Robeco QI Emerging Markets Enhanced Index Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using three factors: a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund can deviate from the weightings of the Benchmark to a limited extent. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio with a low tracking error relative to the Benchmark of the Sub-fund. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use

derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is

estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate		X
Transition Risk		

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Coastal Flooding, and (3) Extreme Heat.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

j) Robeco QI Emerging Conservative Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of the total assets of the Sub-fund to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries. The Sub-fund will focus on investing in equities that show lower expected volatility than average emerging equity. Conservative stands for the focus on equity with lower expected volatility.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to achieve returns equal to, or greater than, those on the Benchmark with lower expected downside risk, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with all the environmental, social and governance characteristics promoted by the Sub-fund

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

k) Robeco QI Global Value Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. Value stands for selecting companies with an attractive valuation in a disciplined way.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

In selecting stocks, a systematic and disciplined approach is used in which the attractiveness of stocks is assessed on both fundamental and technical variables, which are then interpreted by quantitative models.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for

Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>

I) Robeco QI Emerging Markets 3D Active Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Carbon, Water and Waste footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries.

The Sub-fund is actively managed and will apply Robeco's 3D Investing approach (as outlined in the Glossary of Defined Terms section of this Prospectus), which seeks to consider risk, return and sustainability in the Sub-fund's portfolio. The Sub-fund's portfolio will be optimised using a quantitative process to target returns in excess of the Benchmark, to target better sustainability characteristics than the Benchmark, while managing risk compared to the Benchmark. All decision making at portfolio level is based on the settings of the portfolio construction algorithm that considers risk, return and sustainability and the identification of under-valued and over-valued stocks which is the result of the stock's scoring on Robeco's proprietary quantitative stock-ranking model.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio. The Sub-fund selects the most attractive stocks out of approximately 700 liquid emerging markets stocks, based on market capitalization and trading volume, with lower trading costs. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest

more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon, Water and Waste footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X

m) Robeco QI Global Developed Conservative Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies that mainly operate in mature economies (developed markets) all over the world. The Sub-fund will focus on investing in equities that show lower expected volatility than average global equity. Conservative stands for the focus on equity with lower expected volatility.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to achieve returns equal to, or greater than, those on the Benchmark with lower expected downside risk, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance,

investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Precipitation.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result

of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

n) Robeco QI Global Developed Active Equities

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The aim of the Sub-fund is to provide long term capital growth by taking exposure of at least two thirds of the total assets of the Sub-fund to equities of companies that mainly operate in mature economies (developed markets).

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using three factors: a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, money market instruments, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-

fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. o) Robeco QI Customized Emerging Markets Enhanced Index Equities I

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using three factors: a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark to a limited extent. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio with a low tracking error relative to the Benchmark of the Sub-fund. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. p) Robeco QI Global Quality Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. Investments may be made in emerging or less developed markets as well as in mature economies (developed markets). "Quality" stands for the focus on high quality equities, e.g. equity of companies with strong balance sheets and high profitability. In selecting stocks, a systematic and disciplined approach is used in which the attractiveness of stocks is assessed on both fundamental and technical variables, which are then interpreted by quantitative models.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is

also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Precipitation.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

q) Robeco QI Global SDG & Climate Conservative Equities

Investment policy

Objective The Sub-fund has as its sustainable investment objectives to advance the United Nations Sustainable Development Goals (UN SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs, and aims to reduce the Carbon footprint of the portfolio (and thereby contribute towards the goals of the Paris Agreement to keep the maximum global temperature rise well-below 2°C) in line with the MSCI All Country World EU PAB Overlay Index. In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. The Sub-fund will focus on investing in equities that show lower expected volatility than average global equity. Conservative stands for the focus on equity with lower expected volatility.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund takes explicitly into account the contribution of a company to the UN SDGs. The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to achieve returns equal to, or greater than, those on the Benchmark with lower expected downside risk, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the sustainable investment objectives pursued by the Sub-fund.

The Sub-fund will use the MSCI All Country World EU PAB Overlay Index to monitor the carbon profile of the Sub-fund in line with the Paris Agreement requirements on greenhouse gas emission reduction. The MSCI All Country World EU PAB Overlay Index is consistent with the low carbon sustainable investment objective of the Sub-fund. It differs from a broad market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions. The methodology used for the calculation of the index can be found on the website of the index administrator (MSCI).

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends

to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Whilst the Sub-fund may use derivatives for hedging and liquidity management (including the usage to manage currency and market exposures in a cost-effective manner), it does not intend to utilize derivatives extensively for such purposes. The Sub-fund will use derivatives non-extensively in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to an environmental or social objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure are still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. r) Robeco QI Global Developed Enhanced Index Equities

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The aim of the Sub-fund is to provide long term capital growth by taking exposure of at least two thirds of its total assets to equities of companies that mainly operate in mature economies (developed markets) all over the world.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using three factors: a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark to a limited extent. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio with a low tracking error relative to the Benchmark of the Sub-fund. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is

also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

s) Robeco Sustainable Emerging Stars Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Carbon footprint compared to the Benchmark.

Strategy The aim of the Sub-fund is to provide long term capital growth by taking exposure of at least two-thirds of the total assets of the Sub-fund to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries. The Sub-fund's portfolio has a focused, concentrated portfolio with a limited number of high-conviction positions.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade or higher, non-government bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon footprint reduction, in addition to creating returns. It is also suitable for more informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It is designed to accommodate the investment objective of building up capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X

^oMaximum management fee which applies to all variations of this Share Class.

See Section 2.1 for a more detailed description of all Share Class variations and their characteristics.

In addition, the Management Company is entitled to charge a Performance Fee to the applicable Share Classes of this Sub-fund. The Index is the MSCI Emerging Markets Standard Index-net.

For further details, please consult Section 3.1 "[Fees and Expenses](#)" and [APPENDIX V – PERFORMANCE FEE](#). Please see above the Performance Fee portion.

t) Robeco QI Emerging Markets 3D Enhanced Index Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Carbon, Water and Waste footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries.

The Sub-fund is actively managed and will apply Robeco's 3D Investing approach (as outlined in the Glossary of Defined Terms section of this Prospectus), which seeks to consider risk, return and sustainability in the Sub-fund's portfolio. The Sub-fund's portfolio will be optimised using a quantitative process to target returns in excess of the Benchmark, to target better sustainability characteristics than the Benchmark, while managing risk compared to the Benchmark.

The Sub-fund seeks to outperform the Benchmark in the long run by reflecting the expression of Robeco's positive and negative views on eligible listed equity and equity-related securities. This is achieved by correspondingly overweighting and underweighting securities in the Sub-fund's portfolio relative to the weighting of these securities in the Benchmark, including by investing in securities that are not included in the Benchmark. The relative attractiveness of stocks is determined using the Robeco's proprietary quantitative stock-ranking model, which considers proven return factors such as value, quality and momentum. Robeco overweights stocks with an attractive valuation, a profitable operating business, strong price momentum, and positive recent revisions from analysts. As a result of these overweight exposures, the Sub-fund will have a corresponding underweight exposure to other stocks in the Benchmark. All decision making at portfolio level is based on the identification of under-valued and over-valued stocks which is the result of the stock's scoring on Robeco's proprietary quantitative stock-ranking model and the settings of the portfolio construction algorithm that considers risk, return and sustainability.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon, Water and Waste footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which

the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

u) Robeco Global SDG Equities

Investment policy

Objective The Sub-fund has as its sustainable investment objective to advance the United Nations Sustainable Development Goals (UN SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs. In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world, which includes companies incorporated or having the major part of their business activities in mature economies (developed markets) as well as in developing economies (emerging markets) and exhibiting a high level of sustainability and which present a positive influence on the United Nations Sustainable Development Goals.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment. The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country, currency and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the sustainable objective of the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 10% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 10% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives for hedging and liquidity management (including the usage to manage currency and market exposures in a cost-

effective manner), it does not intend to utilize derivatives extensively for such purposes. The Sub-fund will use derivatives non-extensively in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable investment objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. v) Robeco Global Engagement Equities

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. A primary objective of the Sub-fund is to drive a clear and measurable improvement in a company's contribution to the United Nations Sustainable Development Goals (UN SDGs) over three to five years. The Sub-fund aims to motivate invested companies to improve their fulfilment of the UN SDGs by actively engaging and having an active dialogue with these companies.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world that mainly operate in mature economies (developed markets). The Sub-fund has a focused, concentrated portfolio with a limited number of high-conviction positions.

The Sub-fund takes explicitly into account how a company contributes to the UN SDGs. Contribution on the UN SDGs means how the respective company offers products and services and /or promotes trade customs that contribute to achieving the 17 UN SDGs. The Sub-fund will actively engage with the invested companies and have an active dialogue to motivate these companies to improve their fulfilment of the UN SDGs. It does however not intend to acquire a large percentage of outstanding shares with the purpose of enabling the Sub-fund to significantly influence the management of the invested companies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment. The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

The Sub-fund is actively managed. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of

3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Tropical Cyclone, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

w) Robeco QI Emerging Markets 3D Enhanced Index Equities II

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics in a multi-dimensional way. Amongst others, the Sub-fund integrates sustainability risks, incorporates Robeco's UN SDG (UN Sustainability Development Goals) scores in the investment process and targets an improved Carbon, Water and Waste footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries.

The Sub-fund is actively managed and will apply Robeco's 3D Investing approach (as outlined in the Glossary of Defined Terms section of this Prospectus), which seeks to consider risk, return and sustainability in the Sub-fund's portfolio. The Sub-fund's portfolio will be optimised using a quantitative process to target returns in excess of the Benchmark, to target better sustainability characteristics than the Benchmark, while managing risk compared to the Benchmark.

The Sub-fund seeks to outperform the Benchmark in the long run by reflecting the expression of Robeco's positive and negative views on eligible listed equity and equity-related securities. This is achieved by correspondingly overweighting and underweighting securities in the Sub-fund's portfolio relative to the weighting of these securities in the Benchmark, including by investing in securities that are not included in the Benchmark. The relative attractiveness of stocks is determined using the Robeco's proprietary quantitative stock-ranking model, which considers proven return factors such as value, quality and momentum. Robeco overweights stocks with an attractive valuation, a profitable operating business, strong price momentum, and positive recent revisions from analysts. As a result of these overweight exposures, the Sub-fund will have a corresponding underweight exposure to other stocks in the Benchmark. All decision making at portfolio level is based on the identification of under-valued and over-valued stocks which is the result of the stock's scoring on Robeco's proprietary quantitative stock-ranking model and the settings of the portfolio construction algorithm that considers risk, return and sustainability.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest

more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon, Water and Waste footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is

estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

x) Robeco Emerging Markets Ex China Equities

Investment policy	
<i>Objective</i>	The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.
<i>Strategy</i>	The Sub-fund will take exposure of at least two-thirds of the total assets of the Sub-fund to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries with the exception of China. The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND. The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.
<i>Financial Instruments and Investment Restrictions</i>	With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade or higher, non-government bonds and derivatives to achieve the investment goals of the Sub-fund. The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments. Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in APPENDIX II – INVESTMENT RESTRICTIONS), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b). The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company. Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.
<i>Currency</i>	The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.
Profile of the typical Investor	The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who

see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

y) Robeco Quantum Market Neutral Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while seeking a return that has a low correlation with the returns of the equity markets.

Strategy The Sub-fund enables investors to benefit from opportunities in the worldwide equity market and from active management strategies. The Sub-fund follows a market-neutral equity strategy for quant investing with basic sustainability integration. Long positions (both traditional long and synthetic) are combined with short positions, which will be achieved through the use of financial derivative instruments (such as Equity Swaps (including TRS and CFD)).

In actively managing the Sub-fund, the Management Company uses quantitative models to select securities that it believes offer favourable growth prospects at a reasonable price (long position) while selling securities of companies that seem to be overvalued (short position). The Management Company may invest in issuers with any environmental, social, and governance (ESG) profile. In selecting stocks, a systematic and disciplined approach is used in which the attractiveness of stocks is assessed on fundamental, technical and sentiment variables, which are then interpreted by quantitative models. 'Quantum' stands for the investment management approach of the Sub-fund which includes quantitative models that incorporate novel datasets, machine learning techniques and smart algorithms but under which trades are ultimately implemented by the Management Company. The Sub-fund will take long and short exposure to companies that mainly operate in mature economies (developed markets) all over the world. Such exposure may be obtained entirely through the use of derivatives and as a result the Sub-fund may invest the liquid assets in deposits with credit institutions, money market instruments and money market funds.

The Sub-fund is classified as falling under Article 6 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The investments underlying the Sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. While the Management Company considers principal adverse impacts of investment decisions on sustainability factors for its investments, including the Sub-fund's investments, the Sub-fund does not consider principal adverse impacts of investment decisions on sustainability factors, due to the extended use of derivative instruments, such as Equity Swaps, within the investment strategy of the Sub-fund and the short positions taken.

The Management Company considers principal adverse impacts of investment decisions on sustainability factors for any of its investments by identifying and prioritising adverse impacts and indicators on sustainability factors relevant to the Management Company's organisation's overall investment strategy. These adverse impacts are considered through various methods ranging from exclusions, reduction (emission) thresholds and voting and engagement. For more information on how the Management Company takes the principal adverse impacts on sustainability factors into account when making investment decisions, please refer to the Principal Adverse Impact Statement as published on the Management Company's website (<https://www.robeco.com/files/docm/docu-robeco-principal-adverse-impact-statement.pdf>).

The Sub-fund is actively managed. The investment policy is not constrained by the Benchmark but the Sub-fund uses the Benchmark for performance comparison purposes in its marketing materials and for performance fee calculation.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives (such as Equity Swaps (including TRS and CFD)) to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if

justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 10% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 10% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, Equity Swaps (including TRS and CFD), options, currency forwards and/or combinations of the above. The Sub-fund will use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

This Sub-fund is suitable for informed and/or experienced Investors who are highly interested in specialized capital markets, and are aware of the risks. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification. The Sub-fund is suitable for Investors who are capable of assessing and understanding the risks associated with funds with extensive use of financial derivatives.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity and derivatives may involve risks (for example linked to transferable securities and stock markets and to the default of the issuers, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any Benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk	X	
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate		X
Transition Risk		

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Cold, and (3) Extreme Heat.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional equity long only funds. The Sub-fund uses cash, cash equivalents and derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund is exposed to additional risks (e.g. counterparty risk and risks subject to the use of derivatives) and costs should the market move against it. The Sub-fund will also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

In addition, the Management Company is entitled to charge a Performance Fee to the applicable Share Classes of this Sub-fund.

The Hurdle Rate for the calculation Index of this Sub-fund is ICE BofA ESTR Overnight Rate Index +3%. As of 1 January 2027, the Hurdle Rate will be adjusted by removing the additional 3% margin, such that it will be based solely on the ICE BofA €STR Overnight Rate Index. On 1 January 2027, any performance fee accrual in the Net Asset Value per Share of the relevant Class of Shares of the Sub-fund will be reset to 0.

For further details, please consult Section 3.1 "[Fees and Expenses](#)" and [APPENDIX V – PERFORMANCE FEE](#). Please see above the Performance Fee portion.

z) Robeco Emerging Markets Climate Transition Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries. The stock selection is based on fundamental analysis.

The Sub-fund aims to make investments in assets that contribute to the climate transition. Climate transition pertains to the transitional efforts required to limit global temperature increase to well-below 2°C degrees, aligned with the goals of the Paris Agreement. This is achieved by investing in companies that are making the transition and companies that are enabling the transition, as outlined in the Glossary of Defined Terms section of this Prospectus.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. Securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark. The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk		X
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) River Low Flow, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

aa) Robeco Sustainable Global Stars Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Water and Waste footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies that mainly operate in mature economies (developed markets). The Sub-fund's portfolio has a focused, concentrated portfolio with a limited number of high-conviction positions.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Water and Waste footprint reduction, in addition to creating returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can

accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

bb) Robeco QI Global Enhanced Index Equities

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The aim of the Sub-fund is to provide long term capital growth by taking exposure of at least two thirds of its total assets to equities of companies globally.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes.

The Sub-fund seeks to outperform the Benchmark in the long run by reflecting the expression of Robeco's positive and negative views on eligible listed equity and equity-related securities. The relative attractiveness of stocks is determined using Robeco's proprietary quantitative stock-ranking model, which considers proven return factors such as value, quality and momentum. Robeco overweights stocks with an attractive valuation, a profitable operating business, strong price momentum, and positive recent revisions from analysts. As a result of these overweight exposures, the Sub-fund will have a corresponding underweight exposure to other stocks in the Benchmark.

The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark to a limited extent. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio with a low tracking error relative to the Benchmark of the Sub-fund. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the application of limits (on currencies, countries and sectors) to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 10% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the

Sub-fund intends to invest more than 10% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. cc) Robeco QI Emerging Markets Enhanced Index Equities Plus

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Emerging Countries. The Sub-fund aims to invest in companies distinguished by a robust liquidity profile, referred to as "Plus".

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund seeks to outperform the Benchmark in the long run by reflecting the expression of Robeco's positive and negative views on eligible listed equity and equity-related securities. The relative attractiveness of stocks is determined using Robeco's proprietary quantitative stock-ranking model, which considers proven return factors such as value, quality and momentum. Robeco overweights stocks with an attractive valuation, a profitable operating business, strong price momentum, and positive recent revisions from analysts. As a result of these overweight exposures, the Sub-fund will have a corresponding underweight exposure to other stocks in the Benchmark. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too.

The Sub-fund can deviate from the weightings of the Benchmark to a limited extent. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio with a low tracking error relative to the Benchmark of the Sub-fund. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the application of limits (on countries and sectors) to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily i in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X

Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate	X	
Transition Risk		

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate risk model assesses the potential costs for decarbonizing for companies. Active policies and ambitions of companies are not taken into account contrary to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

dd) Robeco All Country Global Stars Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world. The Sub-fund's portfolio has a focused, concentrated portfolio with a limited number of high-conviction positions.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the PRC listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon footprint reduction, in addition to creating returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Tropical Cyclone, and (3) Extreme Precipitation.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

2. Regional & Country Equity Sub-funds

a) Robeco Asia-Pacific Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies incorporated in Asia, Australia or New Zealand, or exercising a preponderant part of their economic activities in that region.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 20% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 20% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. The Sub-fund may take active currency positions including through the use of derivatives. The active currency positions will cause the Sub-fund to deviate from the weights of the respective currencies in the relevant Benchmark.

Profile of the typical Investor The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors

who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

b) Robeco European Stars Equities

Investment policy	<i>Objective</i> The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. <i>Strategy</i> The Sub-fund will invest at least three-quarters of its total assets in equities of companies which incorporated in the European Union, the UK or certain countries of the European Economic Area (please consult APPENDIX II – INVESTMENT RESTRICTIONS for more detailed information). The Sub-fund will take exposure of at least three-quarters of its total assets in equities of companies that mainly operate in mature economies (developed markets). The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND. The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The investment strategy aims to outperform the Benchmark over the long run whilst applying market risk limits that limit the extent of deviation from the Benchmark (see APPENDIX III – RISK MANAGEMENT PROCESS). The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.
<i>Financial Instruments and Investment Restrictions</i>	With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund. The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments. c) Robeco QI European Conservative Equities

**Investment
policy**

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Europe. The Sub-fund will focus on investing in equities that show lower expected volatility than average European equity. Conservative stands for the focus on equity with lower expected volatility.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to achieve returns equal to, or greater than, those on the Benchmark with lower expected downside risk, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk

classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

See Section 3.1 for a more detailed description of all Fees and Expenses.

d) Robeco BP US Premium Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will invest at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in the United States. The Sub-fund will focus on investing in companies that are undervalued and combine attractive valuation with a catalyst for change. These companies can be both large caps as well as mid-caps and small-caps.

The Sub-fund could use a covered-call strategy to generate additional income. Investors should be aware that the use of derivatives may result in increased volatility of the price of the Shares. The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund has exposure to a single country market, which increases potential volatility. The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

e) Robeco Chinese Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in China.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest 30% or more of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5- 7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund has exposure to a single country market, which increases potential volatility. In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>

f) Robeco Indian Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in India.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets like India, the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. These markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X

Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) River Low Flow, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

Risk considerations for the Sub-fund structure Due to the Sub-fund structure and the regulatory requirements of India, there is a risk that subscriptions and redemptions into the Sub-fund during a period of rising markets may negatively affect the Sub-fund's performance as the subscriptions and redemptions will result in a temporary increase in the Sub-fund's cash position.

g) Robeco Asian Stars Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies incorporated in Asia or exercising a preponderant part of their economic activities in that region.

The portfolio of the Sub-fund is constructed via bottom-up and valuation oriented stock selection. The Sub-fund has a focused, regionally concentrated, portfolio however it is well diversified in terms of the number of holdings (typically containing 30-60 names). The reference to "Stars" in the name of the Sub-fund refers to an approach whereby only the most attractive companies (in terms of actual and/or potential capital gains and/or generation of income and/or growth) are selected.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "**Risk Considerations**" above.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Fluvial Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

h) Robeco Sustainable Asian Stars Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Carbon footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies incorporated in Asia or exercising a preponderant part of their economic activities in that region.

The portfolio of the Sub-fund is constructed via bottom-up and valuation oriented stock selection. The Sub-fund has a focused, regionally concentrated, portfolio however it is well diversified in terms of the number of holdings (typically containing 30-60 names). The reference to "Stars" in the name of the Sub-fund refers to an approach whereby only the most attractive companies (in terms of actual and/or potential capital gains and/or generation of income and/or growth) are selected.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

i) Robeco BP US Large Cap Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will invest at least two-thirds of its total assets in equities of large cap companies incorporated or exercising a preponderant part of their economic activities in the United States. The Sub-fund will focus on investing in large cap companies that are undervalued and combine attractive valuation with a catalyst for change. The Sub-fund defines large cap companies as companies with a market capitalization of USD 2 billion or more.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial

circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund has exposure to a single country market, which increases potential volatility. The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

j) Robeco BP US Select Opportunities Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take at least two-thirds of its total assets in equities of mid-cap companies incorporated or exercising a preponderant part of their economic activities in the United States. The Sub-fund will focus on investing in mid-cap companies that are undervalued and combine attractive valuation with a catalyst for change. The Sub-fund defines mid-cap companies as companies with a market capitalization of USD 750 million or more.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund could use a covered-call strategy to generate additional income. Investors should be aware that the use of derivatives may result in increased volatility of the price of the Shares.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-

7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against

it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

k) Robeco Chinese A-share Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equity of companies whose securities are listed on PRC stock exchanges, via China A-shares and China B-shares. These companies can be both large caps as well as mid-caps and small-caps. Robeco Chinese A-share Equities has a focused, concentrated portfolio with a limited number of high-conviction positions. The portfolio of the Sub-fund is constructed via a bottom-up and valuation oriented stock selection.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest all of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed

and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund has exposure to a single country market, which increases potential volatility. The Sub-fund invests in Emerging markets and in emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund invests in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity, valuation and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk		X
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

I) Robeco QI Chinese A-share Active Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equity of companies whose securities are listed on PRC stock exchanges, via China A-shares and China B-shares.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using three factors: a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest all of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund has exposure to a single country market, which increases potential volatility. The Sub-fund invests in Emerging markets and in emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund invests in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity, valuation and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X

m) Robeco QI Chinese A-share Conservative Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equity of companies whose securities are listed on PRC stock exchanges, via China A-shares and China B-shares. The Sub-fund will focus on investing in equities that show lower expected volatility than average emerging equity. Conservative stands for the focus on equity with lower expected volatility.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to achieve returns equal to, or greater than, those on the Benchmark with lower expected downside risk, whilst still controlling relative risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in [APPENDIX II – INVESTMENT RESTRICTIONS](#)), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest all of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who

see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund has exposure to a single country market, which increases potential volatility. The Sub-fund invests in Emerging markets and in emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund invests in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity, valuation and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the

physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

n) Robeco QI European Value Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in Europe. Value stands for selecting companies with an attractive valuation in a disciplined way.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

In selecting stocks, a systematic and disciplined approach is used in which the attractiveness of stocks is assessed on both fundamental and technical variables, which are then interpreted by quantitative models.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-

7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk	X	
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) River Low Flow.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

o) Robeco QI US Beta Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporated or exercising a preponderant part of their economic activities in the United States of America.

Beta stands for the investment management approach of the Sub-fund that follows the performance of MSCI USA Index, allowing for the expression of both positive and negative views on companies by overweighting and underweighting stocks in the MSCI USA Index with the sole purpose of pursuing the sustainable investment objective of the Sub-fund.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund has a well-diversified portfolio with a relative large number of relative small over- and under weights. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark to a limited extent. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to perform in line with the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the sustainable investment objectives pursued by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund invests in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes. The Sub-fund does not however use a specific derivatives strategy but will use derivatives non-extensively for investment purposes in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. environmental footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund has exposure to a single country market, which increases potential volatility. The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

p) Robeco QI European Active Equities

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The aim of the Sub-fund is to provide long term capital growth by taking exposure of at least two thirds of the total assets of the Sub-fund to equities of companies incorporated or exercising a preponderant part of their economic activities in Europe.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The Sub-fund uses a quantitative stock selection strategy which ranks stocks on their expected future relative performance using three factors a strategy focusing on stocks with an attractive valuation (Value); a strategy focusing on stocks of companies with a medium term attractive performance trend (Momentum); and a strategy focusing on high quality equities, e.g. equity of companies with strong balance sheets and high profitability (Quality). The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. Highly ranked stocks are overweighted against the Benchmark, whereas low-ranked stocks are underweighted, resulting in a well-diversified portfolio. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund invests in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. q) Robeco Transition Asian Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies incorporated in Asia or exercising a preponderant part of their economic activities in that region. The stock selection is based on fundamental analysis.

The Sub-fund aims to make investments in assets that contribute to the transition on various frontiers of changing the global economy to become environmentally and socially responsible. Transition pertains to:

- limiting global temperature increase to well-below 2°C degrees aligned with the goals of the Paris Agreement (*climate transition*);
- halting and reversing biodiversity loss to put nature on a path to recovery for the benefit of people and planet, e.g., reducing waste on eco-systems and enhancing sustainable use of oceans and marine resources (*nature or biodiversity transition*);
- seeking relevant targets for social development, e.g., access to safe and affordable drinking water, access to finance for building resilient infrastructure or support sustainable industrialisation (*social transition*).

Transition is achieved by investing in companies and/or entities that are identified to be making, and/or enabling the transition towards such objectives, as also outlined in the Glossary of Defined Terms section in this Prospectus.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. Securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

*Financial Instruments
and Investment
Restrictions*

With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, securities issued and/or guaranteed by government, public or local authority with a minimum rating of investment grade, non-government bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest

more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →

3. Theme Equity Sub-funds

a) Robeco New World Financials

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of the total assets to equities of companies all over the world which operate within the financial services sector. The Sub-fund may hold the major part of its investments in companies domiciled in emerging markets or in companies that derive the majority of their revenues from Emerging Countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Hong Kong Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i> ← <i>Lowest</i>		<i>Highest</i> →
Climate	X	
Transition Risk		
Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Precipitation. Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.		
Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

b) Robeco Sustainable Property Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time aiming for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process. The Sub-fund also aims for an improved Carbon footprint compared to the Benchmark.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities (including Real Estate Investment Trusts) which are issued by real estate investment institutions. The Sub-fund will take exposure of at least two-thirds of its total assets to equities (including Real Estate Investment Trusts) of companies that mainly operate in mature economies (developed markets).

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want ESG considerations to be integrated as binding element in the investment process, but also to make a contribution to an environmental objective e.g. Carbon footprint reduction, in addition to creating returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial

circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing, there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. c) Robeco Global Consumer Trends

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world which benefit from the expected increase in consumer spending. The Sub-fund may hold the major part of its investments in companies domiciled in emerging markets or in companies that derive the majority of their revenues from Emerging Countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 20% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 20% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. d) Robeco Global Multi-Thematic

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies incorporating or exercising a major part of their economic activities in identified themes. These include transforming technologies, changing sociodemographic, and preserving earth. This is achieved by investing in firms that are well positioned to benefit from structural changes in the economy as well as companies contributing to solving nature-based problems, fulfilling basic societal needs and addressing inefficiencies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i> ← <i>Lowest</i>		<i>Highest</i> →	
Climate	X		
Transition Risk			
Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone. Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.			
Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

e) Robeco Digital Innovations

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world which benefit from the structural growth trends within the production side of the economy, for example robotics, smart manufacturing and cybersecurity. The Sub-fund may hold the major part of its investments in companies domiciled in emerging markets or in companies that derive the majority of their revenues from Emerging Countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>

f) Robeco FinTech

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world which benefit from the move to digital financial services. The Sub-fund may hold part of its investments in companies domiciled in emerging markets or in companies that derive the majority of their revenues from Emerging Countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Shanghai-Hong Kong Stock Connect channel) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment

objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese market risks" under Section 4 "[Risk Considerations](#)" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. g) Robeco Circular Economy

Investment policy

Objective The Sub-fund has as its sustainable investment objective to finance solutions supporting the paradigm shift to a circular economy where resources are kept in use for as long as possible, the maximum value is extracted from them whilst in use, and products and materials are then recovered and regenerated at the end of each service. The foregoing is implemented by mainly investing in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): Zero Hunger (SDG 2), Good health and well-being (SDG 3), Decent work and economic growth (SDG 8), Industry, innovation and infrastructure (SDG 9), Sustainable cities and communities (SDG 11) and Responsible consumption and production (SDG 12). In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies all over the world. The Sub-fund will invest in companies that foster resource-efficient business models with regard to the production and consumption of consumer goods aligned with circular economy principles, that actively contribute to the reduction of waste, develop material that can be reused or recycled, manage efficient logistics and waste management systems or promote an eco-friendly nutrition and lifestyle. Investment companies operate in mature economies (developed markets) as well as companies that operate in developing economies (emerging markets) and which show an elevated degree of sustainability.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment. The thematic portfolio is built on the basis of the eligible investment universe of the underlying investment theme and an internally developed framework about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the sustainable objective of the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in Appendix II), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives for hedging and liquidity management (including the usage to manage currency and market exposures in a cost-effective manner), it does not intend to utilize derivatives extensively for such purposes. The Sub-fund will use derivatives non-extensively in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable investment objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk	X	
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

h) Robeco Smart Energy

Investment policy

Objective The Sub-fund has as its sustainable investment objective to further the transformation of the global energy sector through investments in clean energy production sources, energy efficient products and infrastructure as well as technologies supporting the electrification of the industrial, transportation and heating sectors. The foregoing is implemented by mainly investing in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): Affordable and clean energy goal (SDG 7), Decent work and economic growth (SDG 8), Industry, innovation and infrastructure (SDG 9), Sustainable cities and communities (SDG 11) and Climate action (SDG 13). In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies all over the world with high growth potential providing technologies for clean energy production, distribution, power management infrastructure and energy efficiency, which are at the very core of the Smart Energy investment case. This includes companies incorporated or having the major part of their business activities in mature economies (developed markets) as well as in developing economies (emerging markets) and which show an elevated degree of sustainability.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment. The thematic portfolio is built on the basis of the eligible investment universe of the underlying investment theme and an internally developed framework about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

Smart refers to actively-managed Sub-funds investing in a selection of high-quality, attractively-priced securities of companies contributing to the transformation of their sector or which provide efficient or innovative alternatives. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the sustainable objective of the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest

more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in Appendix II), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives for hedging and liquidity management (including the usage to manage currency and market exposures in a cost-effective manner), it does not intend to utilize derivatives extensively for such purposes. The Sub-fund will use derivatives non-extensively in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable investment objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under "Section 4 – Risk Considerations" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability

risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk	X	
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

i) Robeco Smart Materials

Investment policy

Objective The Sub-fund has as its sustainable investment objective to mitigate the resource scarcity challenge by investing in innovative materials and process technologies that use less or substitute resources, are more scalable, deliver efficiency gains and enable more circular systems including recycling and reuse of materials. The foregoing is implemented by mainly investing in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): Affordable and clean energy goal (SDG 7), Decent work and economic growth (SDG 8), Industry, innovation and infrastructure (SDG 9), Sustainable cities and communities (SDG 11), and Responsible consumption and production (SDG 12) as well as Climate Action (SDG 13). In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies all over the world which operate or benefit from developments in technologies, products or services relating to the extraction, transformation or efficient processing of innovative materials, technologies enabling more automation and efficiency in industrial manufacturing as well as the recycling and reuse of materials. This includes companies incorporated or having the major part of their business activities in mature economies (developed markets) as well as in developing economies (emerging markets) and which show an elevated degree of sustainability.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment. The thematic portfolio is built on the basis of the eligible investment universe of the underlying investment theme and an internally developed framework about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

Smart refers to actively-managed Sub-funds investing in a selection of high-quality, attractively-priced securities of companies contributing to the transformation of their sector or which provide efficient or innovative alternatives. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the sustainable objective of the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest

more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in Appendix II), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives for hedging and liquidity management (including the usage to manage currency and market exposures in a cost-effective manner), it does not intend to utilize derivatives extensively for such purposes. The Sub-fund will use derivatives non-extensively in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable investment objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. j) Robeco Smart Mobility

Investment policy

Objective The Sub-fund has as its sustainable investment objective to support the transformation of the global transportation sector by investing in technologies enabling its electrification as well as in developments in the fields of connectivity and autonomous driving helping to reduce pollution, decongest cities and improve traffic safety. The foregoing is implemented by mainly investing in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): Affordable and Clean Energy goal (SDG 7), Decent work and economic growth (SDG 8), Industry, innovation and infrastructure (SDG 9), Sustainable cities and communities (SDG 11), as well as Climate action (SDG 13). In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies all over the world which operate or benefit from developments in technologies, infrastructure, products or services in the field of future-oriented mobility systems (e.g. electric vehicles, autonomous driving, shared mobility). This includes companies incorporated or having the major part of their business activities in mature economies (developed markets) as well as in developing economies (emerging markets) and which show an elevated degree of sustainability.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). k) Robeco Healthy Living

Investment policy

Objective The Sub-fund has as its sustainable investment objective to promote good health and well-being. The Sub-fund invests in companies that contribute to an efficient healthcare system (e.g. treatments or services), promote health preservation (e.g. healthier nutrition, physical activity and recreation, hygiene and safe environment) and provide opportunities for people to live fulfilling lives (e.g. Lifelong learning and evolving work models). The foregoing is implemented by mainly investing in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): Zero hunger (SDG 2), Good health and well-being (SDG 3), and Clean water and sanitation (SDG 6). In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies all over the world which operate or benefit from developments in technologies, products or services in the areas of healthy nutrition, health treatment, diagnosis and system efficiency, or physical activities, and good hygiene. This includes companies incorporated or having the major part of their business activities in mature economies (developed markets) as well as in developing economies (emerging markets) and which show an elevated degree of sustainability.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**. The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment. The thematic portfolio is built on the basis of the eligible investment universe of the underlying investment theme and an internally developed framework about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the sustainable objective of the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in Appendix

II), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives for hedging and liquidity management (including the usage to manage currency and market exposures in a cost-effective manner), it does not intend to utilize derivatives extensively for such purposes. The Sub-fund will use derivatives non-extensively in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable investment objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under "Section 4 – Risk Considerations" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate risk model assesses the potential costs for decarbonizing for companies. Active policies and ambitions of companies are not taken into account contrary to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

I) Robeco Sustainable Water

Investment policy

Objective The Sub-fund has as its sustainable investment objective to mitigate the water scarcity challenge and contribute to clean, safe and sustainable water supply by investing in companies active in the fields of distribution, treatment and quality monitoring of water that enable efficiency gains for more economical water use, more and better wastewater treatment and improved water infrastructure and quality. The foregoing is implemented by mainly investing in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): Good health and well-being (SDG 3), Clean water and sanitation (SDG 6), Industry, innovation and infrastructure (SDG 9), Sustainable cities and communities (SDG 11), Responsible consumption and production (SDG 12), and as well as Life below water (SDG 14). In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets to equities of companies all over the world which operate or benefit from developments across the water value chain, i.e. utilities, equipment and products for effective water sourcing, collection and distribution, materials for water infrastructure as well as technologies for water quality and analytics. This includes companies incorporated or having the major part of their business activities in mature economies (developed markets) as well as in developing economies (emerging markets and which show an elevated degree of sustainability).

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment. The thematic portfolio is built on the basis of the eligible investment universe of the underlying investment theme and an internally developed framework about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the sustainable objective of the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest

more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in Appendix II), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives for hedging and liquidity management (including the usage to manage currency and market exposures in a cost-effective manner), it does not intend to utilize derivatives extensively for such purposes. The Sub-fund will use derivatives non-extensively in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable investment objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

This Sub-fund might invest in China A-shares. Investments in China A-shares carry increased risks, most notably liquidity and credit risks. For further information on these risks, Investors should refer to the heading "Chinese markets risks" under "Section 4 – Risk Considerations" above.

Also, the investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability

risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X

m) Robeco Biodiversity Equities

Investment policy

Objective The Sub-fund has as its sustainable investment objective to support the sustainable use of natural resources and ecosystem services, as well as technologies, products and services that help to reduce biodiversity threats or restore natural habitats. The foregoing is implemented by mainly investing in companies that advance the following United Nations Sustainable Development Goals (UN SDGs): Clean Water and Sanitation (SDG 6), Sustainable cities and Communities (SDG 11), Responsible consumption and production (SDG 12), Life below water (SDG 14) and Life on land (SDG 15). This includes investments in companies that contribute to the transition on halting and reversing biodiversity loss to put nature on a path to recovery for the benefit of people and planet, e.g., reducing waste on ecosystems and enhancing sustainable use of oceans and marine resources (Transition-related Investments contributing to the nature or biodiversity, transition as outlined in the Glossary of Defined terms section in this Prospectus). In addition to pursuing the sustainable investment objective, the Sub-fund at the same time aims to provide long term capital growth.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies all over the world that mainly operate in mature economies (developed markets). The Sub-fund has a focused and high conviction concentrated portfolio.

The Sub-fund takes explicitly into account how a company contributes to the aforementioned UN SDGs (SDGs 6, 11, 12, 14 and 15). Contribution on the UN SDGs means how the respective company offers products and services and /or promotes trade customs that contribute to achieving the UN SDGs. The Sub-fund will actively engage with selected invested companies and have an active dialogue to motivate these companies to improve their biodiversity footprint. It does however not intend to acquire a large percentage of outstanding shares with the purpose of enabling the Sub-fund to significantly influence the management of the invested companies.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). The strategy integrates sustainability criteria as part of the stock picking process and through a theme specific sustainability assessment related to biodiversity and through the application of Robeco's Biodiversity Traffic Light framework and more information can be obtained via the website <https://www.robeco.com/files/docm/docu-robeco-biodiversity-assessment.pdf>. The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the sustainable objective of the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in

the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 30% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 30% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes. The Sub-fund does not however use a specific derivatives strategy but will use derivatives non-extensively for investment purposes in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable investment objective. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

n) Robeco Global Climate Transition Equities

Investment policy

Objective The aim of the Sub-fund is to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund is actively managed and invests in stocks across developed and Emerging Countries across the world. The Sub-fund will take exposure of at least two-thirds of its total assets to equities of companies that mainly operate in mature economies (developed markets). The Sub-fund's portfolio has a focused, concentrated portfolio with a limited number of high-conviction positions.

The Sub-fund aims to make investments in assets that contribute to the climate transition. Climate transition pertains to the transitional efforts required to limit global temperature increase to well-below 2°C degrees, aligned with the goals of the Paris Agreement. This is achieved by investing in companies that are making the transition and companies that are enabling the transition, as outlined in the Glossary of Defined Terms section of this Prospectus.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. Securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The investment policy is not constrained by a Benchmark but the Sub-fund uses a Benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities, convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps and currency forwards. Whilst the Sub-fund may use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes. The Sub-fund does not however use a specific derivatives strategy but will use derivatives non-extensively for investment purposes in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund will not invest directly in:

- options, and
- swaptions.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk		X
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for

companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

o) Robeco Gravis Digital Infrastructure Income

Investment policy

Objective The aim of the Sub-fund is to generate regular income, whilst aiming to achieve long term capital growth. At the same time the Sub-fund is promoting certain ESG (i.e. Environmental, Social and Corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two-thirds of its total assets to REITs and other listed equities that own, operate or finance tangible assets that provide the infrastructure which enables the modern digital economy to operate successfully. This is likely to include, but not exclusively, assets such as communication towers, data centers, distribution centers that enable the fulfilment of e-commerce, fiber optic networks, smart grids, battery storage, and warehouses. The Sub-fund may have exposure of more than 50% of its total assets to multipurpose warehouses or any other single type of assets. The Sub-fund will take exposure of at least two-thirds of its total assets to equities listed in developed markets.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. Although securities may be components of the benchmark, securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions With due consideration given to the investment restrictions and to the extent permitted by the applicable legislation, the Sub-fund may invest in equities convertible bonds, bonds, units of UCITS and/or other UCIs and derivatives to achieve the investment goals of the Sub-fund.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. Whilst the Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations/stock selection decisions.

Profile of the typical investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance,

investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity of companies may involve risks (for example linked to transferable securities and stock markets), such as exchange rates and volatility risks. The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing, there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. 4. Global Bond Sub-funds

a) Robeco High Yield Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds, asset-backed securities and similar fixed income securities with a rating of BB+ or equivalent or lower by at least one of the recognized rating agencies, or with no rating.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. The securities selected for the Sub-fund's investment universe may be components of the Benchmark, but securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund invests world-wide in high yield corporate bonds and will have no direct exposure to sovereign emerging debt.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company;
- 10% of its total assets in issue that have no rating by at least one of the recognized rating agencies;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also known as "CoCo" bonds);
- one third of its total assets in money market instruments; and
- 10% of its total assets in Distressed Securities.

Investments in Distressed Securities may involve elevated levels of risk, including heightened volatility and potential liquidity constraints. The Sub-fund's investments in Distressed Securities may include issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved in bankruptcy or reorganisation proceedings. The Sub-fund may be required to sell its investment at a loss or hold its investment pending bankruptcy proceedings. To mitigate these risks, the Sub-fund applies rigorous due diligence and risk management practices to safeguard investor interests and ensure these investments align with the Sub-fund's objectives.

The Sub-fund will not actively initiate new positions in Distressed Securities; however, if securities within the Sub-fund become distressed, the Sub-fund may, when deemed in the best interest of the Sub-fund, provide additional financing in case of restructuring to issuers of such securities.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time.

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is

estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Tropical Cyclone, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

High yield corporate bonds are by nature relatively less liquid, which may negatively affect the value of the Sub-fund.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

b) Robeco Global Credits

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in non-government bonds (which may include contingent convertible bonds (also "CoCo" bonds)) and similar non-government fixed income securities and asset backed securities from all around the world. The Sub-fund will not invest into assets with a rating lower than "B-" by at least one of the recognized rating agencies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund may invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or

experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

c) Robeco QI Dynamic High Yield

Investment policy

Objective The Sub-fund aims to provide long term capital growth.

Strategy The Sub-fund offers exposure to world-wide high yield corporates. This is done by investing at least two-thirds of its total assets in derivatives, bonds, money market investments and similar fixed income securities, cash deposits and cash equivalents.

The Sub-fund is classified as falling under Article 6 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The investments underlying the Sub-fund do not take into account the EU criteria for environmentally sustainable economic activities. While the Management Company considers principal adverse impacts of investment decisions on sustainability factors for its investments, including the Sub-fund's investments, the Sub-fund does not consider principal adverse impacts of investment decisions on sustainability factors, due to the strategy following a timing sensitive approach using credit default swap index instruments, which allow no individual issuer selection and related sustainability checks.

The Management Company considers principal adverse impacts of investment decisions on sustainability factors for any of its investments by identifying and prioritising adverse impacts and indicators on sustainability factors relevant to the Management Company's organisation's overall investment strategy. These adverse impacts are considered through various methods ranging from exclusions, reduction (emission) thresholds and voting and engagement. For more information on how the Management Company takes the principal adverse impacts on sustainability factors into account when making investment decisions, please refer to the Principal Adverse Impact Statement as published on the Management Company's website (<https://www.robeco.com/files/docm/docu-robeco-principal-adverse-impact-statement.pdf>).

The Sub-fund will not invest in sovereign emerging debt.

The Sub-fund is actively managed. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling the risk of the Sub-fund in comparison to the Benchmark.

Financial Instruments and Investment Restrictions The Sub-fund will invest in financial derivative instruments to actively take positions in the global bond, money market and currency markets, but also for hedging and optimal portfolio management purposes. The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 10% of its total assets in issue that have no rating by at least one of the recognized rating agencies;
- 25% of its total assets in convertible bonds;
- one third of its total assets in money market instruments; and
- 10% of its total assets in Distressed Securities.

Investments in Distressed Securities may involve elevated levels of risk, including heightened volatility and potential liquidity constraints. The Sub-fund's investments in Distressed Securities may include issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved in bankruptcy or reorganisation proceedings. The Sub-fund may be required to sell its investment at a loss or hold its investment pending bankruptcy proceedings. To mitigate these risks, the Sub-fund applies

rigorous due diligence and risk management practices to safeguard investor interests and ensure these investments align with the Sub-fund's objectives.

The Sub-fund will not actively initiate new positions in Distressed Securities; however, if securities within the Sub-fund become distressed, the Sub-fund may, when deemed in the best interest of the Sub-fund, provide additional financing in case of restructuring to issuers of such securities.

The buying or selling of exchange traded and over-the-counter derivatives is permitted, including but not limited to futures, options, swaps currency forwards, and/or combinations of the above. The Sub-fund will use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management. The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor This Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification. Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time.

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk	X	
Governance Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Cold, and (3) Extreme Heat.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

d) Robeco QI Global Multi-Factor Credits

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests systematically in predominantly investment grade credits and focuses on offering exposure to a number of quantitative strategies in a diversified way, such as, but not limited to, a strategy focusing on bonds with a low level of expected risk (Low volatility); a strategy focusing on bonds with an attractive valuation (Value) and a strategy focusing on bonds of companies with a medium term attractive performance trend (Momentum).

The Sub-fund invests at least two-thirds of its total assets in non-government bonds and similar non-government fixed income securities from all around the world with a minimal rating of "BBB-" or equivalent by at least one of the recognized rating agencies. The Sub-fund may not invest in bonds and similar fixed income securities with a rating below "BB-".

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Whilst the Sub-fund may use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes. The Sub-fund does not however use a specific derivatives strategy but will use derivatives non-extensively for investment purposes in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The buying or selling of exchange traded and over-the-counter derivatives are permitted, including but not limited to futures (including but not limited to interest rate futures, bond futures), swaps (including but not limited to interest rate swaps, credit default swaps ("CDS"), index swaps, CDS basket swaps and cross currency swaps) and currency forwards.

The Sub-fund may not invest more than:

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 10% of its total assets in convertible bonds; and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) River Low Flow, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

e) Robeco QI Global Multi-Factor Bonds

Investment policy

Objective The Sub-fund aims to provide a well-diversified global government and corporate bonds portfolio and long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests systematically at least two-thirds of its total assets directly or indirectly in worldwide government and corporate bonds and other marketable debt securities and instruments (which may include short dated fixed or floating rate securities) issued or guaranteed by OECD member states and by companies based in OECD countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund may invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 15% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund);
- 25% of its total assets in convertible bonds; and
- one third of its total assets in money market instruments.

The Sub-fund may acquire units of UCITS and/or other UCIs up to 30% of its net assets but may not invest more than 20% of its assets in the same UCITS and/or other UCI.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk	X	
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

f) Robeco Global Short Duration Credits

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in non-government bonds (which may include contingent convertible bonds (also "CoCo" bonds)) and similar non-government fixed income securities and asset backed securities from all around the world. The Sub-fund invest mainly in bonds with a short maturity.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond, money market, interest rates and currency markets.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) River Low Flow.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

g) Robeco Corporate Hybrid Bonds

**Investment
policy**

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in non-government bonds (which may include subordinated bonds) and similar non-government fixed income securities and asset backed securities. At least 50% of the Sub-fund's assets shall be invested in corporate hybrid bonds. Corporate hybrids are bonds, which due to their structure have both debt- and equity capital characteristics. Corporate hybrids are subordinated bonds, which rank between debt and equity in a company's capital structure. They are mainly issued by investment grade issuers to support their credit ratings, as rating agencies partially treat hybrids as equity capital.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

*Financial
Instruments and
Investment
Restrictions*

The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond, money market, interest rates and currency markets.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in high yield bonds;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X

h) Robeco QI Global Multi-Factor High Yield

**Investment
policy**

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests systematically at least two-thirds of its total assets in high yield credits (fixed income securities with a rating of "BB+" or equivalent or lower by at least one of the recognized rating agencies, or with no rating).

The Sub-fund offers balanced exposure to a number of quantitative factors by focusing on bonds with a low level of expected risk (Low Risk and Quality factors), an attractive valuation (Value), a strong performance trend (Momentum) and a small market value of debt (Size). ESG analysis and liquidity management are systematically incorporated in the investment process.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

*Financial
Instruments and
Investment
Restrictions*

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Whilst the Sub-fund may use derivatives extensively for investment purposes as well as for hedging and efficient portfolio management, it does not intend to utilize derivatives extensively for such purposes. The Sub-fund does not however use a specific derivatives strategy but will use derivatives non extensively for investment purposes in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds);
- 10% of its total assets in bonds that have no rating by at least one of the recognized rating agencies;
- one third of its total assets in money market instruments; and
- 10% of its total assets in Distressed Securities.

Investments in Distressed Securities may involve elevated levels of risk, including heightened volatility and potential liquidity constraints. The Sub-fund's investments in Distressed Securities may include issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved

in bankruptcy or reorganisation proceedings. The Sub-fund may be required to sell its investment at a loss or hold its investment pending bankruptcy proceedings. To mitigate these risks, the Sub-fund applies rigorous due diligence and risk management practices to safeguard investor interests and ensure these investments align with the Sub-fund's objectives.

The Sub-fund will not actively initiate new positions in Distressed Securities; however, if securities within the Sub-fund become distressed, the Sub-fund may, when deemed in the best interest of the Sub-fund, provide additional financing in case of restructuring to issuers of such securities.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management. The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. i) Robeco Credit Income

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will seek to maintain a high and consistent level of income by investing in a broad array of fixed income sectors from all around the world and utilizing income efficient implementation strategies. The capital appreciation sought by the Sub-fund generally arises from decreases in interest rates or improving credit fundamentals for a particular sector or security.

The Sub-fund invests at least two-thirds of its total assets in a multi-sector portfolio of Fixed Income Instruments of varying maturities, which may be represented by forwards or derivatives such as options, futures contracts or swap agreements. "Fixed Income Instruments" include bonds, debt securities and other similar instruments issued by various public- or private-sector entities.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>. The Sub-fund also has the ability to have an active dialogue with the invested companies to motivate these companies to improve their contribution to the United Nations Sustainable Development Goals (SDG). It does however not intend to acquire a large percentage of outstanding securities with the purpose of enabling the Sub-fund to significantly influence the management of the invested companies. Next to advancing the SDGs the Sub-fund also takes into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund is actively managed. The investment policy of the Sub-fund is not constrained by a benchmark.

Financial Instruments and Investment restrictions The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond, money market, interest rates and currency markets.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities (such as, but not limited to, Collateralized Loan Obligations (CLOs) and Mortgage-Backed Securities (MBS);
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;

- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency Non-USD denominated assets will typically be hedged back into USD.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point

is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate		X
Transition Risk		

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

j) Robeco Global SDG Credits

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in non-government bonds (which may include contingent convertible bonds (also "CoCo" bonds)) and similar non-government fixed income securities and asset backed securities from all around the world.

The Sub-fund will not invest into assets with a rating lower than "B-" by at least one of the recognized rating agencies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>. The Sub-fund also has the ability to have an active dialogue with the invested companies to motivate these companies to improve their contribution to the United Nations Sustainable Development Goals (SDG). It does however not intend to acquire a large percentage of outstanding securities with the purpose of enabling the Sub-fund to significantly influence the management of the invested companies. Next to advancing the SDGs the Sub-fund also takes into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment restrictions The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond, money market, interest rates and currency markets.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;

- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i> ← <i>Lowest</i> <i>Highest</i> →			
Climate Transition Risk	X		
Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Coastal Flooding, and (3) Extreme Heat. Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.			
Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

k) Robeco SDG High Yield Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds, asset backed securities and similar fixed income securities with a rating of BB+ or equivalent or lower by at least one of the recognized rating agencies, or with no rating. Such minimum rating is known as "high yield".

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#). The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>. The Sub-fund also has the ability to have an active dialogue with the invested companies to motivate these companies to improve their contribution to the United Nations Sustainable Development Goals (SDG). It does however not intend to acquire a large percentage of outstanding securities with the purpose of enabling the Sub-fund to significantly influence the management of the invested companies. Next to advancing the SDGs the Sub-fund also takes into account environmental, social and governance characteristics, which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund invests world-wide (including in emerging markets) in high yield corporate bonds and will have no direct exposure to sovereign emerging debt.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not hold more than:

- 20% of its total assets in asset-backed securities and mortgage-backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company;
- 10% of its total assets in issue that have no rating by at least one of the recognized rating agencies;
- 25% of its total assets in convertible bonds (including up to 5% in contingent convertible bonds);

- one third of its total assets in money market instruments; and
- 10% of its total assets in Distressed Securities.

Investments in Distressed Securities may involve elevated levels of risk, including heightened volatility and potential liquidity constraints. The Sub-fund's investments in Distressed Securities may include issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved in bankruptcy or reorganisation proceedings. The Sub-fund may be required to sell its investment at a loss or hold its investment pending bankruptcy proceedings. To mitigate these risks, the Sub-fund applies rigorous due diligence and risk management practices to safeguard investor interests and ensure these investments align with the Sub-fund's objectives.

The Sub-fund will not actively initiate new positions in Distressed Securities; however, if securities within the Sub-fund become distressed, the Sub-fund may, when deemed in the best interest of the Sub-fund, provide additional financing in case of restructuring to issuers of such securities.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in

the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Tropical Cyclone, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

High yield corporate bonds are by nature relatively less liquid, which may negatively affect the value of the Sub-fund.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

I) Robeco Global Green Bonds

Investment policy

Objective The Sub-fund has as its sustainable investment objective to finance or re-finance in part or in full new and/or existing environmentally-friendly projects by investing in Green Bonds, while at the same time aiming to provide long term capital growth. The portfolio is managed against the Bloomberg MSCI Global Green Bond Index.

Strategy The Sub-fund invests at least two-thirds of its total assets in global Green Bonds with a minimal rating of "BBB-" or equivalent by at least one of the recognized rating agencies. Green Bonds are bonds that are recognized as such by external sources and which proceeds are used to finance or re-finance in part or in full new and/or existing environmentally-friendly projects. RIAM's Green Bonds selection is based on the internally developed framework, about which more information can be obtained via the website <https://www.robeco.com/si>.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is aligned with the sustainable investment objective of the Sub-fund by applying clearly defined rules for classifying Green Bonds.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund will invest in financial derivative instruments for hedging, liquidity management (including the usage to manage currency and duration exposures in a cost-effective manner) and optimal portfolio management purposes, but also to actively take positions in the global bond, money market, interest rates and currency markets.

In case the Sub-fund uses derivatives for other purposes than duration and/or currency adjustments and/or inflation adjustments, the underlying of such investments respects the investment policy.

The buying or selling of the following exchange traded and over-the-counter derivatives are permitted: bond and FX futures, interest rate swaps and currency forwards.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds; and
- one third of its total assets in money market instruments.

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or
- options, or
- swaptions.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)	X	
Environmental Risk	X	

Social Risk	X
-------------	---

Governance Risk	X
-----------------	---

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) River Low Flow.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

m) Robeco Climate Global Credits

**Investment
policy**

Objective The Sub-fund, as its sustainable investment objective, aims to reduce the Carbon footprint of the portfolio (and thereby contribute towards the goals of the Paris Agreement to keep the maximum global temperature rise well-below 2°C), while at the same time aiming to provide long term capital growth. The reduction objective of the Carbon footprint will be aligned with the Solactive Paris Aligned Global Corporate Index.

Strategy The Sub-fund invests at least two-thirds of its total assets in non-government bonds (which may include contingent convertible bonds (also "CoCo" bonds) and similar non-government fixed income securities and asset backed securities from all around the world.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed against a Benchmark that is consistent with the sustainable investment objectives pursued by the Sub-fund. It aims to align with the Paris Agreement requirements on greenhouse gas emission reduction. For corporate bonds the Benchmark aims to represent the performance of an investment strategy that is aligned with the technical standards for Paris-Aligned Benchmarks in areas such as exclusions and carbon reduction objectives. The Benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund will invest in financial derivative instruments for hedging, liquidity management (including the usage to manage currency and duration exposures in a cost-effective manner) and optimal portfolio management purposes, but also to actively take positions in the global bond, money market, interest rates and currency markets.

In case the Sub-fund uses derivatives for other purposes than duration and/or currency adjustments and/or inflation adjustments, the underlying of such investments shall comply with the investment policy.

The buying or selling of the following exchange traded and over-the-counter derivatives are permitted: bond and FX futures, interest rate swaps and currency forwards. The Sub-fund will not invest into assets with a rating lower than "B-" by at least one of the recognised rating agencies. The Sub-fund will invest in financial derivative instruments for hedging but also to actively take positions in the global bond, money market, interest rates and currency markets.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds)); and
- one third of its total assets in money market instruments.

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or
- options, or
- swaptions.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

n) Robeco Transition Emerging Credits

**Investment
policy**

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds (which may include contingent convertible bonds (also "CoCo" bonds)), asset backed securities and similar fixed income securities issued by entities incorporated or exercising a preponderant part of their economic activities in Emerging Countries. The investment universe of the Sub-fund comprises both Local currency as well as Hard currency debt.

The Sub-fund aims to make investments in assets that contribute to the transition on various frontiers of changing the global economy to become environmentally and socially responsible. Transition pertains to:

- limiting global temperature increase to well-below 2°C degrees aligned with the goals of the Paris Agreement (*climate transition*);
- halting and reversing biodiversity loss to put nature on a path to recovery for the benefit of people and planet, e.g., reducing waste on eco-systems and enhancing sustainable use of oceans and marine resources (*nature or biodiversity transition*);
- seeking relevant targets for social development, e.g., access to safe and affordable drinking water, access to finance for building resilient infrastructure or support sustainable industrialisation (*social transition*).

Transition is achieved by investing in companies and/or entities that are identified to be either making, enabling and/or financing the transition towards such objectives, as also outlined in the Glossary of Defined Terms section in this Prospectus.

The Sub-fund promotes environmental and/or social characteristics, within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions Except for a maximum of 10% of its net assets (as permitted by investment restriction I (2) in Appendix II), the Sub-fund will (without limiting the possibility to invest in compliance with its investment policy in assets referred to under investment restrictions I (1) c), d), e) and f)) only invest in transferable securities and money market instruments traded or listed on markets falling under investment restrictions I (1) a) and b).

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time.

In emerging and less developed markets the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. Some markets may carry higher risks for Investors who should therefore ensure that, before investing, they understand the risks involved and are satisfied that despite the substantial risk of loss of investment, their investment is suitable as part of their portfolio.

Also, the investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only; there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) River Low Flow, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

Emerging debt securities are by nature relatively less liquid, which may negatively affect the value of the Sub-fund.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The Sub-fund aims to be eligible for the Singapore offshore fund tax exemption regime. As with tax law and regulations in general, the offshore fund exemption regime is subject to interpretation and application by the tax authorities may deviate, which could lead to additional tax costs for the Sub-fund.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

o) Robeco Climate Global High Yield Bonds

Investment policy

Objective The Sub-fund has as its sustainable investment objective to aim at reducing the Carbon footprint of the portfolio (and thereby contribute towards the goals of the Paris Agreement to keep the maximum global temperature rise well-below 2°C), while at the same time aiming to provide long term capital growth. The reduction objective of the Carbon footprint will be aligned with the Solactive Global High Yield Corporate PAB Select Index.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds, asset-backed securities and similar fixed income securities with a rating of BB+ or equivalent or lower by at least one of the recognized rating agencies, or with no rating.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is managed against a Benchmark that is consistent with the sustainable investment objectives pursued by the Sub-fund. It aims to align with the Paris Agreement requirements on greenhouse gas emission reduction. For corporate bonds the Benchmark aims to represent the performance of an investment strategy that is aligned with the technical standards for Paris-Aligned Benchmarks in areas such as exclusions and carbon reduction objectives. The Benchmark differs from a broad market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Sub-fund will use the Solactive Global High Yield Corporate PAB Select Index to monitor the carbon profile of the Sub-fund in line with the Paris Agreement requirements on greenhouse gas emission reduction. The Paris-Aligned Benchmark is consistent with the low carbon sustainable investment objective pursued by the Sub-fund. It differs from a broad market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on greenhouse gas emission reduction and related exclusions. The methodology used for the calculation of the index can be found on the website of the index administrator (Solactive).

Financial Instruments and Investment Restrictions

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds);
- one third of its total assets in money market instruments; and
- 10% of its total assets in Distressed Securities.

Investments in Distressed Securities may involve elevated levels of risk, including heightened volatility and potential liquidity constraints. The Sub-fund's investments in Distressed Securities may include issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved in bankruptcy or reorganisation proceedings. The Sub-fund may be required to sell its investment at a loss or hold its investment pending bankruptcy proceedings. To mitigate these risks, the Sub-fund applies rigorous due diligence and risk management practices to safeguard investor interests and ensure these investments align with the Sub-fund's objectives.

The Sub-fund will not actively initiate new positions in Distressed Securities; however, if securities within the Sub-fund become distressed, the Sub-fund may, when deemed in the best interest of the Sub-fund, provide additional financing in case of restructuring to issuers of such securities.

The buying or selling of the following exchange traded and over-the-counter derivatives are permitted: bond and FX futures, interest rate swaps and currency forwards. The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes.

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or,
- options, or
- swaps

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. See Section 3.1 for a more detailed description of all Fees and Expenses.

p) Robeco High Income Green Bonds

Investment policy

Objective The Sub-fund has as its sustainable investment objective to finance or re-finance in part or in full new and/or existing environmentally-friendly projects by investing in Green Bonds, Social bonds and Sustainability bonds while at the same time aiming to provide long term capital growth.

Strategy The Sub-fund invests at least two-thirds of its total assets in global Green Bonds from all around the world. Green Bonds are bonds that are recognized as such by external sources and which proceeds are used to finance or re-finance in part or in full new and/or existing environmentally-friendly projects. RIAM's Green Bonds selection is based on the internally developed framework, about which more information can be obtained via the website www.robeco.com/si.

The Sub-fund will seek to maintain a high and consistent level of income by investing in a broad array of sectors within Green Bonds.

The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time pursuing sustainable investment objectives which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and the investment policy of the Sub-fund is not constrained by a benchmark.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund will invest in financial derivative instruments for hedging, liquidity management (including the usage to manage currency and duration exposures in a cost-effective manner) and optimal portfolio management purposes, but also to actively take positions in the global bond, money market, interest rates and currency markets.

In case the Sub-fund uses derivatives for other purposes than duration and/or currency adjustments and/or inflation adjustments, the underlying of such investments respects the investment policy.

The buying or selling of the following exchange traded and over-the-counter derivatives are permitted: bond and FX futures, interest rate swaps and currency forwards.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds; and
- one third of its total assets in money market instruments.

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or
- options, or
- swaptions.

Currency Non-EUR denominated assets will typically be hedged back into EUR.

Profile of the typical Investor

The Sub-fund is suitable for Investors who want their investment to fully contribute to a sustainable objective. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>←Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>←Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Extreme Wind.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

q) Robeco QI Global Dynamic Duration

Investment policy

Objective The Sub-fund aims to provide long-term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund will take exposure of at least two thirds of its total assets in bonds and other marketable debt securities and instruments (which may include short dated fixed or floating rate securities) of issuers from any member State of the OECD or (supranational) issuers guaranteed by one or more member States of the OECD and with a minimal rating of "A", as measured by Standard & Poor's or other recognised credit rating agencies.

The Sub-fund may not invest in equity securities provided however that the Sub-fund may invest up to 10 % of its net assets in shares or units of UCITS/other UCI.

The Sub-fund may invest up to 25 % of its total assets in convertible bonds, including up to 5% of its total assets in contingent convertible bonds, and up to one third of its total assets in money market instruments. The portfolio's duration will be actively managed to realise the highest possible investment return.

The Sub-fund's investment strategy is based on quantitative research. The main part of this strategy is active duration management. Active country allocation and yield curve positions can also be taken.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses – to a certain extent – the JPM GBI Global Index IG in defining the asset allocation of the portfolio, still allowing the Management Company to have discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate from the weightings of the Benchmark. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund. The methodology used for the calculation of the Benchmark can be found via www.jpmmorgan.com.

Financial Instruments and The Sub-fund may hold ancillary liquid assets comprising cash and cash equivalents (including money market instruments).

Investment Restrictions Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, options, swaps, currency forwards and/or combinations of the above.

The Sub-fund will invest in derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Currency The Sub-fund aims to align its currency exposure with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. The Sub-fund is suitable for Investors who see funds as a convenient way of participating in capital market developments. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, exchange rates, interest rates, liquidity and inflation).

The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

r) Robeco Global Bonds

Investment policy	
<i>Objective</i>	The Sub-fund aims to provide long term capital growth, while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.
<i>Strategy</i>	The Sub-fund will invest at least two thirds of its total assets, directly or indirectly in worldwide bonds and other marketable debt securities and instruments (which may include short dated fixed or floating rate securities) issued or guaranteed by OECD member states and by companies based in OECD countries. The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND. The Sub-fund is actively managed and uses – to a certain extent – the Bloomberg Global-Aggregate Total Return Index, in defining the asset allocation of the portfolio, still allowing the Management Company to have discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund. The methodology used for the calculation of the Benchmarks can be found on the website of the relevant benchmark administrators.
<i>Financial Instruments and Investment Restrictions</i>	The Sub-fund may invest up to 25% of its total assets in convertible bonds, including up to 20% of its total assets in contingent convertible bonds, up to one third of its total assets in money market instruments, up to 10% of its total assets in shares or units of other UCITS and/or UCIs that may be managed by an Affiliated Entity, and up to 20% in asset backed securities to achieve the investment goals of the Sub-fund. The Sub-fund may invest up to 15% of its net assets in onshore debt securities issued within the PRC through Bond Connect. The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments. Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, options, swaps, currency forwards and/or combinations of the above. The Sub-fund will invest in derivatives for investment purposes as well as for hedging and efficient portfolio management.
<i>Currency</i>	The Sub-fund may take active currency positions including through the use of derivatives. The active currency positions may cause the Sub-fund to deviate from the weights of the respective currencies in the relevant Benchmark.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Risk profile of the Sub-fund

Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. s) Robeco Emerging Markets Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in government bonds, asset backed securities and other fixed income securities of Emerging Countries mainly denominated in Hard currencies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although bonds may be components of the Benchmark, bonds outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. No minimum for bonds that are components of the Benchmark shall apply. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a diversified market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond and money markets.

In case the Sub-fund uses derivatives for other purposes than duration and/or currency adjustments and/or inflation adjustments, the underlying of such investments respects the investment policy. The Sub-fund does not however use a specific derivatives strategy

The buying or selling of exchange traded and over-the-counter derivatives are permitted, including but not limited to futures (including but not limited to interest rate futures, bond futures), options, swaps (including but not limited to interest rate swaps, credit default swaps ("CDS"), index swaps and CDS basket swaps).

The Sub-fund may invest up to 15% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds)).

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or
- swaptions.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. Climate Transition Risk

X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) Extreme Heat.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

Investors' attention is drawn to the fact that this Sub-fund is particularly exposed to Emerging Countries risk. There is therefore a higher risk for investors than the risk arising from investment in a bond Sub-fund of a developed country. Furthermore, in view of its investments, this Sub-fund could see the calculation of its net asset value temporarily suspended (as stated in the section entitled Temporary Suspension of the determination of the Net Asset Value and the issue, redemption and conversion of shares in this Prospectus). If certain market prices (bonds, currencies etc.) are deemed to be unrepresentative, investors should be aware that the realisable value of these assets may be estimated prudently and in good faith by the Board of Directors (based for example on valuation models).

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III –RISK MANAGEMENT PROCESS](#).

t) Robeco Emerging Markets Bonds Local Currency

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in government bonds, asset backed securities and other fixed income securities of Emerging Countries mainly denominated in Local currencies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although bonds may be components of the Benchmark, bonds outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. No minimum for bonds that are components of the Benchmark shall apply. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a diversified market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond and money markets.

In case the Sub-fund uses derivatives for other purposes than duration and/or currency adjustments and/or inflation adjustments, the underlying of such investments respects the investment policy. The Sub-fund does not however use a specific derivatives strategy

The buying or selling of exchange traded and over-the-counter derivatives are permitted, including but not limited to futures (including but not limited to interest rate futures, bond futures), options, swaps (including but not limited to interest rate swaps, credit default swaps ("CDS"), index swaps and CDS basket swaps).

The Sub-fund may invest up to 15% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds)).

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or
- swaptions.

Currency The Sub-fund is exposed to the exchange rate movements of the currencies in which the assets of the Sub-fund are denominated. For the management of the Sub-fund, expectations of currency returns will be taken into consideration when making country allocations and bond selection decisions.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The Sub-fund invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts. The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X

Environmental Risk	X
Social Risk	X
Governance Risk	X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Cold, and (3) Extreme Heat.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. Investors' attention is drawn to the fact that this Sub-fund is particularly exposed to Emerging Countries risk. There is therefore a higher risk for investors than the risk arising from investment in a bond Sub-fund of a developed country. Furthermore, in view of its investments, this Sub-fund could see the calculation of its net asset value temporarily suspended (as stated in the section entitled Temporary Suspension of the determination of the Net Asset Value and the issue, redemption and conversion of shares in this Prospectus). If certain market prices (bonds, currencies etc.) are deemed to be unrepresentative, investors should be aware that the realisable value of these assets may be estimated prudently and in good faith by the Board of Directors (based for example on valuation models). The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III –RISK MANAGEMENT PROCESS.

u) Robeco Global Investment Grade Credits

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in non-governmental global bonds (which may include contingent convertible bonds (also "CoCo" bonds)), asset backed securities and other non-governmental fixed income securities, with a minimal rating of "BBB-" or equivalent. The Sub-fund will not actively initiate any new positions in bonds rated lower than BBB- or equivalent. In the event of credit rating downgrades to below BBB-, the Sub-fund may retain positions.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or
- swaptions.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 2-3 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

5. Regional Bond Sub-funds

a) Robeco Euro Government Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds and similar fixed income securities denominated in the EURO currency, with a minimal rating of "BBB-" or equivalent by at least one of the recognized rating agencies, and issued by EMU member countries.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not invest more than:

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds; and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for

Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk	X	
Governance Risk	X	

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

The Sub-fund may not invest more than: - 20% of its total assets in asset backed securities; - 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company; - 25% of its total assets in convertible bonds, including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and - one third of its total assets in money market instruments. Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management. The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).
Currency	The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.
Profile of the typical Investor	The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for

Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) River Low Flow.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market

move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

c) Robeco All Strategy Euro Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds, asset backed securities and similar fixed income securities denominated in the EURO currency. The Sub-fund invests internationally, which means that a substantial part of the portfolio can at any time be invested outside the Euro-area.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company;
- 25% of its total assets in convertible bonds; and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund (excluding active currency positions) with the Benchmark including through the use of derivatives. The Sub-fund may take active currency positions including through the use of derivatives. The active currency positions may cause the Sub-fund to deviate from the weights of the respective currencies in the relevant Benchmark.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification. Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time.

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk	X	
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is

estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme heat, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund	Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult APPENDIX III – RISK MANAGEMENT PROCESS.

d) Robeco European High Yield Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds, asset backed securities and similar fixed income securities, denominated in European currencies (like Euro and Pound Sterling) with a rating of BB+ or equivalent or lower by at least one of the recognized rating agencies or with no rating. The Sub-fund uses the Bloomberg Pan-European HY Corporate ex Financials 2.5% Issuer Constraint index as Benchmark.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments The Sub-fund may invest the remaining one third of its total assets in the full spectrum of available securities (e.g. (i) fixed income securities which do not fall within the two-thirds of the Sub-fund's net assets category, as described above, (ii) equities and (iii) derivatives).

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Investment restrictions Notwithstanding the above, the Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% of its total assets in issue that have no rating by at least one of the recognized rating agencies;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also known as "CoCo" bonds);

- one third of its total assets in money market instruments;
- 10% of its total assets in securities issued by or guaranteed by a single country (including its government, a public or local authority of that country) whose credit rating is below investment grade; and
- 10% of its total assets in Distressed Securities.

Investments in Distressed Securities may involve elevated levels of risk, including heightened volatility and potential liquidity constraints. The Sub-fund's investments in Distressed Securities may include issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved in bankruptcy or reorganisation proceedings. The Sub-fund may be required to sell its investment at a loss or hold its investment pending bankruptcy proceedings. To mitigate these risks, the Sub-fund applies rigorous due diligence and risk management practices to safeguard investor interests and ensure these investments align with the Sub-fund's objectives.

The Sub-fund will not actively initiate new positions in Distressed Securities; however, if securities within the Sub-fund become distressed, the Sub-fund may, when deemed in the best interest of the Sub-fund, provide additional financing in case of restructuring to issuers of such securities.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

Investors should consider that for investments in bonds and other marketable debt securities and debt instruments which are rated "BB+" or lower or equivalent by at least one of the recognized rating agencies, the factors giving security to principal and interest can be considered less than adequate over a great length of time.

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X

Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Tropical Cyclone, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. Such market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

High yield corporate bonds are by nature relatively less liquid, which may negatively affect the value of the Sub-fund.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

** as from 1 August 2026

e) Robeco Transition Asian Bonds

**Investment
policy**

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds (which may include contingent convertible bonds (also "CoCo" bonds)) and similar fixed income securities and asset backed securities issued by entities incorporated or exercising a preponderant part of their economic activities in Asia or issued by entities that are part of the Sub-fund's Benchmark.

The Sub-fund aims to make investments in assets that contribute to the transition on various frontiers of changing the global economy to become environmentally and socially responsible. Transition pertains to:

- limiting global temperature increase to well-below 2°C degrees aligned with the goals of the Paris Agreement (*climate transition*);
- halting and reversing biodiversity loss to put nature on a path to recovery for the benefit of people and planet, e.g., reducing waste on eco-systems and enhancing sustainable use of oceans and marine resources (*nature or biodiversity transition*);
- seeking relevant targets for social development, e.g., access to safe and affordable drinking water, access to finance for building resilient infrastructure or support sustainable industrialisation (*social transition*).

Transition is achieved by investing in companies and/or entities that are identified to be either making, enabling and/or financing the transition towards such objectives, as also outlined in the Glossary of Defined Terms section in this Prospectus

The Sub-fund promotes environmental and/or social characteristics, within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Portfolio Manager has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

*Financial
Instruments and
Investment
Restrictions*

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 20% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>

on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk		X
Social Risk		X
Governance Risk	X	

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) River Low Flow, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The Sub-fund may invest in mainland China in the CIBM through Bond Connect. Please refer to Section 4 – Risk Considerations for more information of the risks regarding the CIBM and Bond Connect.

The Sub-fund aims to be eligible for the Singapore offshore fund tax exemption regime. As with tax law and regulations in general, the offshore fund exemption regime is subject to interpretation and application by the tax authorities may deviate, which could lead to additional tax costs for the Sub-fund.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

f) Robeco Euro SDG Credits

**Investment
policy**

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in non-government bonds and similar non-government fixed income securities, denominated in the EURO currency, with a minimal rating of "BBB-" or equivalent by at least one of the recognized rating agencies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website <https://www.robeco.com/en-int/sustainable-investing/sdgs>. The Sub-fund also has the ability to have an active dialogue with the invested companies to motivate these companies to improve their contribution to the United Nations Sustainable Development Goals (SDG). It does however not intend to acquire a large percentage of outstanding securities with the purpose of enabling the Sub-fund to significantly influence the management of the invested companies. Next to advancing the SDGs the Sub-fund also takes into account environmental, social and governance characteristics which are further explained in **APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND**.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund may invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not invest more than:

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds)); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>

g) Robeco Financial Institutions Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests primarily (at least 70% of its total assets) in subordinated non-government bonds and similar non-government fixed income securities (contingent convertible bonds (also "CoCo" bonds) included) with a minimal rating of "BBB-" or equivalent by at least one of the recognized rating agencies, and which are issued by financial institutions, denominated in the EURO currency. The Sub-fund may continue to hold such non-government bonds and similar non-government fixed income securities even if they are subsequently downgraded.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions. The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may not invest more than:

- 10% of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund) or in other UCIs and/or UCITS that may be managed by an Affiliated Entity;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds)); and
- one third of its total assets in money market instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring).

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors

who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) Extreme Wind.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market

move against it. The Sub-fund may also use derivatives to take short positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments. The portfolio may have significant exposure to less creditworthy and less liquid instrument types, such as high yield bonds and subordinated bonds: High yield bonds are by nature relatively less liquid. Subordinated bonds have a lower priority than other bonds of the issuer in case of liquidation during bankruptcy in the hierarchy of creditors.

The Sub-fund may invest in contingent convertible bonds. If the financial strength of a bond's issuer falls by a predetermined threshold, the bond may suffer substantial or total losses of capital.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

h) Robeco Euro Short Duration Bonds

Investment policy

Objective The Sub-fund aims to provide long term capital growth while at the same time promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund invests at least two-thirds of its total assets in bonds, asset backed securities and other fixed income securities, denominated in the EURO currency, with a minimal rating of "BBB-" or equivalent by at least one of the recognized rating agencies.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although bonds may be components of the Benchmark, bonds outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. No minimum for bonds that are components of the Benchmark shall apply. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling risk through the applications of limits to the extent of deviation from the Benchmark.

The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund will invest in financial derivative instruments for hedging and optimal portfolio management purposes but also to actively take positions in the global bond and money markets.

In case the Sub-fund uses derivatives for other purposes than duration and/or inflation adjustments, the underlying of such investments respects the investment policy.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company; and
- 25% of its total assets in convertible bonds.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring), or
- swaptions.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept moderate volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		X

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3° C. This Sub-fund's primary physical risks are (1) Coastal Flooding, (2) Extreme Heat, and (3) River Low Flow.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for

companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives for efficient portfolio management- and hedging purposes. Such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III –RISK MANAGEMENT PROCESS](#).

6. Asset Allocation Sub-funds

a) Robeco High Income Allocation

Investment policy

Objective The aim of the Sub-fund is to achieve long-term capital growth whilst maintaining a consistent level of income by using asset allocation strategies and taking global exposure to asset classes such as equities, bonds, deposits, Alternative Investments and/or other generally accepted asset classes. At the same time the Sub-fund is promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy Besides investing at least 90% of its net assets directly in equities, bonds, debt instruments, money market instruments, deposits, certificates and financial derivative instruments, the Sub-fund can invest in other UCIs/UCITS, including other UCIs/UCITS that are managed by an Affiliated Entity, that can invest in equities, bonds, deposits and other fixed income securities, money market investments, Alternative Investments and other generally accepted asset classes with a maximum of 10% to achieve the investment goals of the Sub-fund.

The Sub-fund may invest in debt instruments and/or certificates, correlated with changes in commodities (including precious metals).

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 10% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 10% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may not invest more than:

- 10% of its total assets in asset backed securities and mortgage-backed securities; and
- 20% of its total assets in convertible bonds (including up to 10% of its total assets in contingent convertible bonds (also "CoCo" bonds)).

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in Appendix VII. The asset allocation strategy is subject to the investment restrictions.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark. The Sub-fund aims to outperform the benchmark over the long run.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps (including but not limited to Equity Swaps through TRS, interest rate swaps, credit default swaps ("CDS"), index swaps and CDS basket swaps), contracts for differences, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund (excluding active currency positions) with the benchmark including through the use of derivatives. The Sub-fund may take active currency positions including through the use of derivatives. The active currency positions may cause the Sub-fund to deviate from the weights of the respective currencies in the relevant benchmark.

Profile of the typical Investor

This Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in equity, bonds and derivatives may involve risks (for example linked to transferable securities and stock markets and to the default of the issuers, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk		X
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Precipitation.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional long only funds. The Sub-fund uses cash, cash equivalents and derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund is exposed to additional risks (e.g. counterparty risk and risks subject to the use of derivatives) and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments, e.g., the writing of a put option as part of a put spread strategy. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

Investment policy

Objective The aim of the Sub-fund is to achieve long-term capital growth by using asset allocation strategies and taking global exposure to asset classes such as equities, bonds, deposits, Alternative Investments and/or other generally accepted asset classes. At the same time the Sub-fund is promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy Besides investing at least 90% of its net assets directly in equities, bonds, debt instruments, money market instruments, deposits, certificates and financial derivative instruments, the Sub-fund can invest in other UCIs/UCITS, including other UCIs/UCITS that are managed by an Affiliated Entity, that can invest in equities, bonds, deposits and other fixed income securities, money market investments, Alternative Investments and other generally accepted asset classes with a maximum of 10% to achieve the investment goals of the Sub-fund.

The Sub-fund may invest in debt instruments and/or certificates, correlated with changes in commodities (including precious metals).

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

For the purpose of gaining exposure to shares of companies of the People's Republic of China ("PRC") listed in China, the Sub-fund may invest up to 10% of its net assets in China A-shares (via QFI and/or Stock Connect programmes) and China B-shares issued by companies in the PRC and listed on PRC stock exchanges. At least one month's prior notice will be given to Investors if the Sub-fund intends to invest more than 10% of its net assets in China A-shares and China B-shares and the Prospectus will be updated accordingly.

The Sub-fund may not invest more than:

- 10% of its total assets in asset backed securities and mortgage-backed securities; and
- 20% of its total assets in convertible bonds (including up to 10% of its total assets in contingent convertible bonds (also "CoCo" bonds)).

The Sub-fund may invest up to 10% of its total assets in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in Appendix VII. The asset allocation strategy is subject to the investment restrictions.

The Sub-fund is actively managed. The securities selected for the Sub-fund's investment universe may be components of the benchmark, but securities outside the benchmark may be selected too. The investment policy is not constrained by a benchmark but the Sub-fund uses a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund can deviate substantially from the issuer, country and sector weightings of the benchmark. The Sub-fund aims to outperform the benchmark over the long run.

The benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Financial Instruments and Investment Restrictions Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps (including Equity Swaps through TRS), contracts for differences, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the

interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Currency The Sub-fund aims to align the currency exposure of the Sub-fund (excluding active currency positions) with the benchmark including through the use of derivatives. The Sub-fund may take active currency positions including through the use of derivatives. The active currency positions may cause the Sub-fund to deviate from the weights of the respective currencies in the relevant benchmark.

Profile of the typical Investor This Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund The investments in equity, bonds and derivatives may involve risks (for example linked to transferable securities and stock markets and to the default of the issuers, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition. The Sub-fund also invests in emerging and less developed markets, where the legal, judicial and regulatory infrastructure is still developing and there may be legal uncertainty both for local market participants and their overseas counterparts.

c) Robeco Flexible Allocation

Investment policy

Objective The aim of the Sub-fund is to achieve long term capital growth by taking global exposure to asset classes such as equities, bonds, deposits, Alternative Investments and/or other generally accepted asset classes. At the same time, the Sub-fund is promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund applies a flexible allocation strategy to various global asset classes, seeking to balance the trade-off between risk and return. This means the Sub-fund's portfolio composition will be determined and adjusted based on market conditions and may invest up to 70% in equities. The asset allocation strategy is subject to the investment restrictions and a limit on ex-ante volatility.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed and uses the Benchmark for comparison purposes only. The Sub-fund aims to outperform the Benchmark over the long run, whilst there are no restrictions on the deviation of the performance relative to the Benchmark.

The Benchmark is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Besides investing at least 90% of its net assets directly in equities, bonds, debt instruments, money market instruments, deposits, certificates and financial derivative instruments, the Sub-fund can invest in other UCIs/UCITS, including other UCIs/UCITS that are managed by an Affiliated Entity, that can invest in equities, bonds, deposits and other fixed income securities, money market investments, Alternative Investments and other generally accepted asset classes with a maximum of 10% to achieve the investment goals of the Sub-fund.

The Sub-fund may invest in debt instruments and/or certificates, correlated with changes in commodities (including precious metals). The maximum allocation to exchange-traded commodities is 10% of the net assets of the Sub-fund.

Financial Instruments and Investment Restrictions The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavourable market conditions.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the People's Republic of China (PRC) through Bond Connect.

The Sub-fund may invest up to 10% of its net assets in onshore equities issued within the People's Republic of China (PRC) through Stock Connect.

The Sub-fund may not invest more than:

- 10% of its total assets in asset-backed securities and mortgage-backed securities; and
- 20% of its total assets in convertible bonds (including up to 10% of its total assets in contingent convertible bonds (also "CoCo" bonds)).

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps (including Equity Swaps through TRS), contracts for differences, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

Currency The Sub-fund may take active currency positions including through the use of derivatives.

Profile of the typical Investor

This Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

The investments in a mixture of equity of companies and bonds and debt instruments may involve risks (for example linked to transferable securities and stock markets and to the default of the issuers, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)	X	
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk		X
Social Risk		X
Governance Risk		X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	<i>← Lowest</i>	<i>Highest →</i>
Climate Transition Risk		x

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) River Low Flow, (2) Extreme Heat, and (3) Coastal Flooding.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional long only funds. The Sub-fund uses cash, cash equivalents and derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund is exposed to additional risks (e.g. counterparty risk and risks subject to the use of derivatives) and costs should the market move against it. The Sub-fund may also use derivatives to take short positions in some investments, e.g., the writing of a put option as part of a put spread strategy. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with theoretically unlimited losses. Such extreme market conditions could mean that Investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

d) Robeco Global Target Maturity Bonds

Investment policy

Objective The Sub-fund aims to provide a stable income while at the same time promoting certain ESG (i.e. Environmental, Social and Governance) characteristics and integrating sustainability risks.

Strategy The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VII – OVERVIEW PAYING AGENTS, REPRESENTATIVE OFFICES, FACILITY AGENTS](#).

The Sub-fund has three distinct phases as described below:

[1] "**Asset Gathering Phase**". This phase is limited to a maximum of three months, starting as of the issue date of the Sub-fund. During this phase, the Sub-fund may hold up to 100% of its net assets in deposits and cash equivalent investments (including money market instruments). The Sub-fund may also invest in short term debt securities. During the Asset Gathering Phase, the Sub-fund will not fall within the scope of the MMF Regulation.

[2] "**Principle Investment Phase**". This phase starts as of the end of the Asset Gathering Phase and ends at the Target Date. The fixed phase of the Principle Investment Phase will be determined by the Company at the time of launch and will be disclosed in the KID of the Sub-fund ("**Target Date**"). During this phase, the Sub-fund will pursue its principal investment objective. The Sub-fund invests within one week after the start of the Principle Investment Phase at least two-thirds of its total assets in bonds and similar fixed income securities denominated in EUR or USD, with a minimal rating of "B-" or equivalent by at least one of the recognized rating agencies. The portfolio is constructed in such a way that the majority of the bonds has a maturity that is limited to the Target Date of the Sub-fund. If the bonds held by the Sub-fund mature prior to the Target Date, the proceeds can be reinvested in bonds and fixed income securities as referred to above, but also in deposits and cash equivalent investments (including money market instruments).

[3] "**Post Target Date Phase**". This phase follows the Principle Investment Phase and commences at the Target Date. During this phase, the Sub-fund will continue to invest at least two-thirds of its total assets in bonds and similar fixed income securities denominated in EUR or USD, with a minimal rating of "B-" or equivalent by at least one of the recognized rating agencies.

The Sub-fund is actively managed. The investment policy of the Sub-fund is not constrained by a benchmark.

Financial Instruments and Investment restrictions The Sub-fund may invest in financial derivative instruments for hedging, investment purposes and efficient portfolio management purposes but also to actively take positions in the global bond, money market, interest rates and currency markets. In case the Sub-fund uses derivatives for other purposes than duration and/or currency adjustments and/or inflation adjustments, the underlying of such investments shall comply with the investment policy of the Sub-fund.

The buying or selling of exchange traded and over-the-counter derivatives are permitted, including but not limited to futures (including but not limited to interest rate futures, bond futures), swaps (including but not limited to interest rate swaps, credit default swaps ("CDS"), CDS basket swaps and cross currency swaps) and currency forwards.

The Sub-fund does not use a specific derivatives strategy but will use derivatives for investment purposes in accordance with its investment policy and for efficiently managing the investments of the Sub-fund.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 10% in aggregate of its total assets in equities or other participation rights (these holdings may only result from corporate actions and/or debt restructuring and not from direct investments by the Sub-fund), or in other UCIs and/or UCITS that may be managed by an Affiliated Entity and/or Shares in Sub-funds of the Company;

- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds);
- one third of its total assets in money market instruments.

The Sub-fund will not invest directly in:

- equities (with the exception of equities which are received as a result of a corporate action and/or debt restructuring),
- options, or
- swaptions.

Currency The Sub-fund aims to obtain an optimal investment result in the currency in which it is denominated. The investments may be hedged towards the Sub-fund's currency of denomination where appropriate.

Profile of the typical Investor

The Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process, a. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for the intended maturity of the Sub-fund. This Sub-fund may not be suitable for investors who want to withdraw their money before the Target Date as this could limit the investment objective of income generation.

Please note that such information is provided for reference only and investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, investors should seek professional advice.

Risk profile of the Sub-fund

The investments in bonds and debt instruments may involve risks (for example linked to the default of the issuers, downgrading, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can, therefore, be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. The classification provides an indication of the probability and potential impact of an ESG event in the period of one year.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)		X
Environmental Risk	X	
Social Risk		X
Governance Risk	X	

For investments in government bonds, there is a total sustainability risk classification, a classification of environmental risk, a classification of social risk, and a classification of governance risk. The classifications are based on an internal sustainability risk metric for country sustainability risk. These indicators are based on a fixed set of Environmental, Social, and Governance criteria. The classification provides an indication of the probability and potential impact of at least one year.

<i>Government Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Sustainability Risk (Overall)	X	
Environmental Risk	X	

Social Risk	X
Governance Risk	X

Robeco makes use of a climate risk metric provided by a third party specialized in climate risk. Based on a 1.5-degrees decarbonization pathway, the potential impact of climate transition risk is estimated. This is a reflection of the potential decarbonization costs for the next 80 years, of which the heavy point is estimated to be approximately in 15 years. This impact on return is compared to the market risk profile of the Sub-fund and turned into risk classification.

<i>Company Risk</i>	← <i>Lowest</i>	<i>Highest</i> →
Climate Transition Risk	X	

Climate change leads to extreme weather events that may have a negative economic impact on investments. Based on a climate risk model provided by a third party specialized in climate risk, the physical risks that the portfolio is most vulnerable to are assessed assuming a temperature pathway of 3°C. This Sub-fund's primary physical risks are (1) Extreme Heat, (2) Coastal Flooding, and (3) Tropical Cyclone.

Climate risk models are complex and surrounded by a high degree of uncertainty as result of assumptions and availability of data. As result, a change in the methodology may lead to a change in the risk classification. The climate transition risk model assesses the potential costs for decarbonisation for companies. Active policies and ambitions of companies are not taken into account in contrast to the 'ESG' scores that focus on policies and ambitions.

Risk considerations for the Sub-fund

Investors should note that, in addition to the above mentioned risks, the investment strategy and risks inherent to the Sub-fund are not typically encountered in traditional fixed income long only funds. The Sub-fund may use derivatives as part of its investment strategy and such investments are inherently volatile and the Sub-fund could potentially be exposed to additional risks and costs should the market move against it. The Sub-fund may also use derivatives to take short synthetic positions in some investments. Should the value of such investment increase, it will have a negative effect on the Sub-fund's value. In extreme market conditions, the Sub-fund may be faced with the theoretically unlimited losses. Such extreme market conditions could mean that investors could, in certain circumstances, face minimal or no returns, or may even suffer a loss on such investments.

The investment risk will be measured using quantitative techniques. The investment risk of using derivatives is also incorporated in these quantitative techniques. For more information regarding e.g. the exposure calculation method, the maximum leverage or the expected levels of leverage as a result of the use of derivatives as well as a brief explanation as to the basis for such calculation, please consult [APPENDIX III – RISK MANAGEMENT PROCESS](#).

e) Robeco Step-in Global Equities

**Investment
policy**

Objective The aim of the Sub-fund is to achieve long term capital growth by initially investing in fixed income assets and gradually increasing the exposure to global equity over time. At the same time, the Sub-fund is promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund applies a strategy initially tilted toward bonds, aiming for lower risk. Over time, it gradually transitions to global equity exposure, targeting higher risk. The Sub-fund has three distinct phases as described below:

[1] "**Asset Gathering Phase**". This phase is limited to a maximum of three months, starting as of the issue date of the Sub-fund. During this phase, the Sub-fund may hold up to 100% of its net assets in deposits and cash equivalent investments (including money market instruments). The Sub-fund may also invest in short term debt securities. During the Asset Gathering Phase, the Sub-fund will not fall within the scope of the MMF Regulation.

[2] "**Principle Investment Phase**". This phase starts as of the end of the Asset Gathering Phase and is limited to a fixed period defined in years. The fixed period of the Principle Investment Phase will be determined by the Company at the time of launch and will be disclosed in the KID of the Sub-fund ("**Target Date**"). During this phase, the Sub-fund will pursue its principal investment objective, building exposure to global equity. The Sub-fund invests within one week after the start of the Principle Investment Phase at least two-thirds of its total assets in bonds and similar fixed income securities denominated in EUR or USD, with a minimal rating of "B-" or equivalent by at least one of the recognized rating agencies. The portfolio is constructed in such a way that the majority of the bonds has a maturity that is aligned with the gradually increasing allocation towards global equity, where the proceeds from bonds and fixed income securities as referred to above, will invest in equity of companies worldwide (developed and emerging markets). At the Target Date, the Sub-fund will invest at least two-thirds of its total assets in global equity.

[3] "**Post Target Date Phase**". This phase follows the Principle Investment Phase and commences at the Target Date. During this phase, the Sub-fund will continue to invest at least two-thirds of its total assets in global equity.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The investment policy is not constrained by a benchmark and the Sub-fund does not use a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives.

Besides investing at least 90% of its net assets directly in bonds, equities, debt instruments, money market instruments, deposits, certificates and financial derivative instruments, the Sub-fund can invest in other UCIs/UCITS, including other UCIs/UCITS that are managed by an Affiliated Entity, that can invest in bonds, equities, deposits and other fixed income securities, money market investments, Alternative Investments and other generally accepted asset classes with a maximum of 10% to achieve the investment goals of the Sub-fund.

The Sub-fund may invest in debt instruments and/or certificates, correlated with changes in commodities (including precious metals). The maximum allocation to exchange-traded commodities is 10% of the net assets of the Sub-fund.

*Financial
Instruments
and Investment
Restrictions*

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may invest up to 10% of its net assets in onshore equities issued within the PRC through Stock Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds)).

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps, contracts for differences, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

Currency The Sub-fund may take active currency positions including through the use of derivatives.

Profile of the typical Investor

This Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process and wish to invest gradually into global equity while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification.

Please note that such information is provided for reference only and Investors should consider their own circumstances, including without limitation, their own risk tolerance level, financial circumstance, investment objective etc., before making any investment decisions. If in doubt, Investors should seek professional advice.

Risk profile of the Sub-fund

Throughout the time, the investments of the Sub-fund will be a mixture of bonds and debt instruments and equity of companies which may involve risks (for example linked to transferable securities and stock markets and to the default of the issuers, exchange rates, interest rates, liquidity and inflation). The Sub-fund's investments are subject to market fluctuations. No assurance can therefore be given that the Sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a Share in the Sub-fund will not fall below its value at the time of acquisition.

The sustainability risk profile can be split into different sustainability risk sources and is expressed using categories ranging from lowest risk till highest risk. The risk classification relates to both the probability and potential negative impact of sustainability risk on the portfolio return. The classification relates to the portfolio only: there is no comparison to any benchmark.

Robeco distinguishes between sustainability risk of companies and governments. For companies, there is a total risk classification, a classification of environmental risks, a classification of social risks, and a classification of governance risk. The classifications are based on a variety of Environmental, Social, and Governance (ESG) issues provided by a third party that is specialized in the assessment of sustainability risks. f) Robeco Step-in Income Allocation

Investment policy

Objective The aim of the Sub-fund is to achieve long term capital growth by initially investing in low-risk fixed income assets and gradually increasing the global exposure to asset classes such as equities, bonds, and other fixed income securities, deposits, and/or other generally accepted asset classes, aiming higher levels of income. At the same time, the Sub-fund is promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics and integrating sustainability risks in the investment process.

Strategy The Sub-fund applies a strategy initially tilted toward bonds, aiming for lower risk. Over time, it gradually transitions to global exposure in multiple asset classes, targeting higher levels of income. The Sub-fund has three distinct phases as described below:

[1] "**Asset Gathering Phase**". This phase is limited to a maximum of three months, starting as of the issue date of the Sub-fund. During this phase, the Sub-fund may hold up to 100% of its net assets in deposits and cash equivalent investments (including money market instruments). The Sub-fund may also invest in short term debt securities. During the Asset Gathering Phase, the Sub-fund will not fall within the scope of the MMF Regulation.

[2] "**Principle Investment Phase**". This phase starts as of the end of the Asset Gathering Phase and is limited to a fixed period defined in years. The fixed period of the Principle Investment Phase will be determined by the Company at the time of launch and will be disclosed in the KID of the Sub-fund ("**Target Date**"). During this phase, the Sub-fund will pursue its principal investment objective, building exposure to multiple assets globally and targeting high dividend payout. The Sub-fund invests within one week after the start of the Principle Investment Phase at least two-thirds of its total assets in bonds and similar fixed income securities denominated in EUR or USD, with a minimal rating of "B-" or equivalent by at least one of the recognized rating agencies. The portfolio is constructed in such a way that the majority of the bonds has a maturity that is aligned with the gradually increasing allocation towards multiple asset classes with global exposure. At the Target Date, the Sub-fund will invest at least 90% of its net assets directly in equities, bonds, debt instruments, money market instruments, deposits, certificates and financial derivative instruments, the Sub-fund can invest in other UCIs/UCITS, including other UCIs/UCITS that are managed by an Affiliated Entity, that can invest in equities, bonds, deposits and other fixed income securities, money market investments, Alternative Investments and other generally accepted asset classes with a maximum of 10% to achieve the investment goals of the Sub-fund.

[3] "**Post Target Date Phase**". This phase follows the Principle Investment Phase and commences at the Target Date. During this phase, the Sub-fund will continue to invest at least 90% of its total assets as described in the paragraph above.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in [APPENDIX VIII – SUSTAINABILITY DISCLOSURES PER SUB-FUND](#).

The Sub-fund is actively managed. The investment policy is not constrained by a benchmark and the Sub-fund does not use a benchmark for comparison purposes. The Management Company has discretion over the composition of the portfolio subject to the investment objectives.

The Sub-fund may invest in debt instruments and/or certificates, correlated with changes in commodities (including precious metals). The maximum allocation to exchange-traded commodities is 10% of the net assets of the Sub-fund.

Financial Instruments and Investment Restrictions

The Sub-fund is allowed to invest in money market instruments, bank deposits (other than deposits at sight) and other eligible liquid assets for treasury purposes and in case of unfavorable market conditions.

The Sub-fund may hold up to 20% of its net assets in ancillary liquid assets (bank deposits at sight, such as cash held in current accounts). Under exceptionally unfavourable market conditions and if justified in the interest of the Shareholders, the Sub-fund may temporarily exceed the aforementioned limit for investment in ancillary liquid assets and other liquid instruments.

The Sub-fund may invest up to 10% of its net assets in onshore debt securities issued within the PRC through Bond Connect.

The Sub-fund may invest up to 10% of its net assets in onshore equities issued within the PRC through Stock Connect.

The Sub-fund may not invest more than:

- 20% of its total assets in asset backed securities;
- 25% of its total assets in convertible bonds (including up to 20% of its total assets in contingent convertible bonds (also "CoCo" bonds)).

Exchange traded and over-the-counter derivatives are permitted, including but not limited to futures, swaps (including Equity Swaps through TRS), contracts for differences, options, currency forwards and/or combinations of the above. The Sub-fund may use derivatives for investment purposes as well as for hedging and efficient portfolio management.

Currency The Sub-fund may take active currency positions including through the use of derivatives.

Profile of the typical Investor

This Sub-fund is suitable for Investors who seek ESG considerations to be integrated as binding element in the investment process and wish to invest gradually into global equity while still seeking optimum returns. It is also suitable for informed and/or experienced Investors wishing to attain defined investment objectives. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 5-7 years. APPENDIX II – INVESTMENT RESTRICTIONS

Under the Articles of Incorporation of the Company, the Board of Directors has broad investment powers. In connection with the implementation of the above policy, the Board has fixed the following investment restrictions. In this context, the following terms shall mean the following:

Definitions:

"EU"	European Union;
"Eligible State"	any Member State of the EU or any other state in Eastern and Western Europe, Asia, Africa, Australia, North and South America and Oceania;
"Member State"	means a Member State of the EU as defined in the Law;
"money market instruments"	shall mean instruments normally dealt in on the money market which are liquid, and have a value which can be accurately determined at any time;
"Regulated Market"	a market within the meaning of Article 4.1.14 of Directive 2004/39/EC or any other Directive amending or replacing Directive 2004/39/EC and any other market which is regulated, operates regularly and is recognized and open to the public in an Eligible State;
"third country"	A state other than a Member State;
"transferable securities"	shall mean: - Shares and other securities equivalent to Shares, - bonds and other debt instruments, - any other negotiable securities which carry the right to acquire any such transferable securities by subscription or exchange;
"UCITS"	an Undertaking for Collective Investment in Transferable Securities authorized pursuant to Directive 2009/65/EEC, as may be amended;
"other UCI"	an Undertaking for Collective Investment within the meaning of the first and second indents of Article 1 (2) of Directive 2009/65/EEC, as may be amended.

- I. (1) The Company, for each Sub-fund, may invest in:
- a) transferable securities and money market instruments admitted to or dealt in on a Regulated Market;
 - b) recently issued transferable securities and money market instruments, provided that the terms of issue include an undertaking that application will be made for admission to official listing on a Regulated Market and such admission is secured within one year of the issue;
 - c) units of UCITS and/or other UCI, whether situated in a Member State or not, provided that:
 - such other UCIs have been authorized under the laws of any Member State or under the laws of those countries which can provide that they are subject to supervision considered by the CSSF to be equivalent to that laid down in European Community law and that cooperation between authorities is sufficiently ensured,
 - the level of protection for unitholders in such other UCIs is equivalent to that provided for unitholders in a UCITS, and in particular that the rules on assets segregation, borrowing, lending, and uncovered sales of transferable securities and money market instruments are equivalent to the requirements of Directive, 2009/65/EEC,
 - the business of such other UCIs is reported in half-yearly and annual reports to enable an assessment of the assets and liabilities, income and operations over the reporting period,
 - no more than 10% of the assets of the UCITS or of the other UCIs, whose acquisition is contemplated, can, according to their constitutional documents, in aggregate be invested in units of other UCITS or other UCIs;
 - d) deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months, provided that the credit institution is incorporated in a Member State or if the credit institution is incorporated in a third country provided that it is subject to prudential rules considered by the Luxembourg regulator as equivalent to those laid down in Community law;
 - e) financial derivative instruments, including equivalent cash-settled instruments, dealt in on a Regulated Market and/or financial derivative instruments dealt in over-the-counter ("OTC derivatives"), provided that:
 - the underlying consists of instruments covered by this section (I) (1), financial indices, interest rates, foreign exchange rates or currencies, in which the Sub-funds may invest according to their investment objective,
 - the counterparties to OTC derivative transactions are institutions subject to prudential supervision and belonging to categories approved by the CSSF,
 - the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative;
 - f) money market instruments other than those dealt in on a Regulated Market and referred to under "Definitions", if the issue or the issuer of such instruments are themselves regulated for the purpose of protecting investors and savings, and provided that such instruments are:
 - issued or guaranteed by a central, regional or local authority or by a central bank of a Member State, the European Central Bank, the EU or the European Investment Bank, a third country or, in case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more Member States belong, or
 - issued by an undertaking any securities of which are dealt in on Regulated Markets, or
 - issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by Community law, or by an establishment which is subject to and complies with prudential rules considered by the Luxembourg regulator to be at least as stringent as those laid down by Community law, or
 - issued by other bodies belonging to the classes approved by the Luxembourg supervisory authority provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent and provided that the

issuer is a company whose capital and reserves amount to at least EUR 10 million and which presents and publishes its annual accounts in accordance with Directive 78/660/EEC¹, is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitization vehicles which benefit from a banking liquidity line;

- (2) In addition, the Company may invest a maximum of 10% of the net assets of any Sub-fund in transferable securities and money market instruments other than those referred to under (1) above.

II. The Company may hold ancillary liquid assets.

- III. a) (i) The Company will invest no more than 10% of the net assets of any Sub-fund in transferable securities or money market instruments issued by the same issuing body.
- (ii) The Company may not invest more than 20% of the net assets of any Sub-fund in deposits made with the same body. The risk exposure of a Sub-fund to a counterparty in a derivative transaction, that is not centrally cleared through a central counterparty authorised in accordance with Article 14 of Regulation (EU) No 648/2012 or recognised in accordance with Article 25 of that Regulation may not exceed 10% of its net assets when the counterparty is a credit institution referred to in I. d) above or 5% of its net assets in other cases.
- b) Moreover, where the Company holds on behalf of a Sub-fund investments in transferable securities and money market instruments of issuing bodies which individually exceed 5% of the net assets of such Sub-fund, the total of all such investments must not account for more than 40% of the total net assets of such Sub-fund.

This limitation does not apply to deposits and derivative transactions made with financial institutions subject to prudential supervision.

Notwithstanding the individual limits laid down in paragraph a), the Company may not combine for each Sub-fund where this would lead to investment of more than 20% of its assets in a single body, any of the following:

- investments in transferable securities or money market instruments issued by that body,
 - deposits made with that body, or
 - exposures arising from derivative transactions undertaken with that body that are not centrally cleared through a central counterparty authorised in accordance with Article 14 of Regulation (EU) No 648/2012 or recognised in accordance with Article 25 of that Regulation.
- c) The limit of 10% laid down in sub-paragraph a) (i) above is increased to a maximum of 35% in respect of transferable securities or money market instruments which are issued or guaranteed by a Member State, by its public local authorities, or by another Eligible State or by public international bodies to which one or more Member States belong.
- d) The limit of 10% laid down in sub-paragraph a) (i) is increased to 25% for covered bonds as defined under article 3, point 1 of Directive (EU) 2019/2162 of the European Parliament and of the Council of 27 November 2019 on the issue of covered bonds and covered bond public supervision and amending Directives 2009/65/EC and 2014/59/EU, and for certain bonds when they are issued before 8 July 2022 by a credit institution which has its registered office in a Member State and is subject by law, to special public supervision designed to protect bondholders. In particular, sums deriving from the issue of these bonds before 8 July 2022 must be invested in conformity with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attaching to the bonds and which, in case of bankruptcy of the issuer, would be used on a priority basis for the repayment of principal and payment of the accrued interest.
- If a Sub-fund invests more than 5% of its net assets in the bonds referred to in this sub-paragraph and issued by one issuer, the total value of such investments may not exceed 80% of the net assets of the Sub-fund.
- e) The transferable securities and money market instruments referred to in paragraphs c) and d) shall not be included in the calculation of the limit of 40% in paragraph b).

¹ This directive has been repealed and replaced by Directive 2013/34/EU.

The limits set out in sub-paragraphs a), b), c) and d) may not be aggregated and, accordingly, investments in transferable securities or money market instruments issued by the same issuing body, in deposits or in derivative instruments effected with the same issuing body may not, in any event, exceed a total of 35% of any Sub-fund's net assets.

Companies which are part of the same group for the purposes of the establishment of consolidated accounts, as defined in accordance with Directive 83/349/EEC or in accordance with recognized international accounting rules, are regarded as a single body for the purpose of calculating the limits contained in this paragraph III).

The Company may cumulatively invest up to 20% of the net assets of a Sub-fund in transferable securities and money market instruments within the same group.

- f) **Notwithstanding the above provisions, the Company is authorized to invest up to 100% of the net assets of any Sub-fund, in accordance with the principle of risk spreading, in transferable securities and money market instruments issued or guaranteed by a Member State, by its local authorities or agencies, or by another member state of the OECD or by Singapore, or by Brazil, or by India, or by Indonesia, or by Russia or by South Africa or by public international bodies of which one or more Member States are members, provided that such Sub-fund must hold securities from at least six different issues and securities from one issue do not account for more than 30% of the net assets of such Sub-fund.**

- IV. a) Without prejudice to the limits laid down in paragraph V., the limits provided in paragraph III. are raised to a maximum of 20% for investments in Shares and/or debt securities issued by the same issuing body if the aim of the investment policy of a Sub-fund is to replicate the composition of a certain stock or debt securities index which is sufficiently diversified, represents an adequate benchmark for the market to which it refers, is published in an appropriate manner and disclosed in the relevant Sub-fund's investment policy.

- b) The limit laid down in paragraph a) is raised to 35% where this proves to be justified by exceptional market conditions, in particular on Regulated Markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.

- V. a) The Company may not acquire Shares carrying voting rights which should enable it to exercise significant influence over the management of an issuing body.

- b) The Company may acquire no more than:

- 10% of the non-voting Shares of the same issuer;
- 10% of the debt securities of the same issuer;
- 10% of the money market instruments of the same issuer.

These limits under second and third indents may be disregarded at the time of acquisition, if at that time the gross amount of debt securities or of the money market instruments or the net amount of the instruments in issue cannot be calculated.

- c) The provisions of paragraph V. shall not be applicable to transferable securities and money market instruments issued or guaranteed by a Member State or its local authorities or by any other Eligible State, or issued by public international bodies of which one or more Member States of the EU are members.

The provisions of this paragraph V. are also waived as regards Shares held by the Company in the capital of a company incorporated in a third country of the EU which invests its assets mainly in the securities of issuing bodies incorporated in that State, where under the legislation of that State, such a holding represents the only way in which the Company can invest in the securities of issuing bodies of that State provided that the investment policy of the company from the third country of the EU complies with the limits laid down in paragraph III., V. and VI. a), b), c) and d).

- VI. a) The Company may acquire units of the UCITS and/or other UCIs referred to in paragraph I) (1) c), provided that no more than 10% of a Sub-fund's net assets be invested in the units of UCITS or other UCI unless otherwise provided expressly in the specifications of a Sub-fund described under Appendix I.

- b) The underlying investments held by the UCITS or other UCIs in which the Company invests do not have to be considered for the purpose of the investment restrictions set forth under III above.
- c) When the Company, the Management Company or the Portfolio Managers invest in the units of UCITS and/or other UCIs that are managed, directly or by delegation, by the Management Company or by any other company with which the Management Company is linked by common management or control, or by a direct or indirect stake of more than 10% of the capital or votes, or any other entity of an Affiliated Entity, the Management Company or other company cannot charge management, subscription or redemption fees on account of the Company's investment in the units of such UCITS and/or other UCIs.
- d) The Company may acquire no more than 25% of the units of the same UCITS or other UCI. This limit may be disregarded at the time of acquisition if at that time the gross amount of the units in issue cannot be calculated. In case of a UCITS or other UCI with multiple compartments, this restriction is applicable by reference to all units issued by the UCITS or other UCI concerned, all compartments combined.
- e) Units of UCITS and/or other UCIs in which the Company invests may have different investment restrictions. Robeco carries out proportionate due diligence to ensure that the investments in UCITS or other UCIs fit with the investment strategies or restrictions set out in the Company's investment restrictions, the Articles of Incorporation and the Prospectus.

- VII. The Company shall ensure for each Sub-fund that the global exposure relating to derivative instruments does not exceed the net assets of the relevant Sub-fund.

The exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, foreseeable market movements and the time available to liquidate the positions. This shall also apply to the following sub-paragraphs.

If the Company invests in financial derivative instruments, the exposure to the underlying assets may not exceed in aggregate the investment limits laid down in paragraph III above. When the Company invests in index-based financial derivative instruments, these investments do not have to be combined to the limits laid down in paragraph III.

When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the requirements of this paragraph VII.

- VIII. a) The Company may not borrow for the account of any Sub-fund amounts in excess of 10% of the net assets of that Sub-fund, any such borrowings to be from banks and to be effected only on a temporary basis, provided that the Company may acquire foreign currencies by means of back to back loans.
- b) The Company may not grant loans to or act as guarantor on behalf of third parties.
- This restriction shall not prevent the Company from acquiring transferable securities, money market instruments or other financial instruments referred to in I. (1) c), e) and f) which are not fully paid.
- c) The Company may not carry out uncovered sales of transferable securities, money market instruments or other financial instruments.
- d) The Company may only acquire movable or immovable property which is essential for the direct pursuit of its business.
- e) The Company may not acquire either precious metals or certificates representing them. Indirect investment exposure is allowed through permitted investments outlined in this Appendix.
- IX. a) The Company needs not comply with the limits laid down in this chapter when exercising subscription rights attaching to transferable securities or money market instruments which form part of its assets. While ensuring observance of the principle of risk spreading, recently created Sub-funds may derogate from paragraphs III., IV. and VI. a), b) and c) for a period of six months following the date of their creation.
- b) If the limits referred to in paragraph a) are exceeded for reasons beyond the control of the Company or as a result of the exercise of subscription rights, it must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interest of its Shareholders.
- c) To the extent that an issuer is a legal entity with multiple compartments where the assets of the compartment are exclusively reserved to the Investors in such compartment and to those creditors whose

claim has arisen in connection with the creation, operation or liquidation of that compartment, each compartment is to be considered as a separate issuer for the purpose of the application of the risk spreading rules set out in paragraphs III., IV. and VI.

- X. Under the conditions and within the limits laid down by the Law, the Company may, to the widest extent permitted by Luxembourg laws and regulations (i) create any Sub-fund qualifying either as a feeder UCITS (a "Feeder UCITS") or as a master UCITS (a "Master UCITS"), (ii) convert any existing Sub-fund into a Feeder UCITS or Master UCITS, or (iii) change the Master UCITS of any of its Feeder UCITS.

A Feeder UCITS shall invest at least 85% of its assets in the units of another Master UCITS. A Feeder UCITS may hold up to 15% of its assets in one or more of the following:

- ancillary liquid assets in accordance with paragraph II. above;
- financial derivative instruments, which may be used only for hedging purposes.

For the purposes of compliance with the Appendix IV "Financial Derivative Instruments and Techniques and Instruments" below, the Feeder UCITS shall calculate its global exposure relating to financial derivative instruments by combining its own direct exposure under the second indent of the preceding paragraph with either:

- the Master UCITS' actual exposure to financial derivative instruments in proportion to the Feeder UCITS' investment into the Master UCITS; or
- the Master UCITS' potential maximum global exposure to financial derivative instruments provided for in the Master UCITS' management regulations or instruments of incorporation in proportion to the Feeder UCITS' investment into the Master UCITS.

For the avoidance of doubt, please note that such a section derogates from the above investment restrictions.

- XI A Sub-fund (the "Investing Fund") may subscribe, acquire and/or hold securities to be issued by one or more Sub-funds (each, a "Target Fund") without the Company being subject to the requirements of the amended law of 10 August 1915 on commercial companies with respect to the subscription, acquisition and/or the holding by a company of its own shares, under the condition however that:

- a) the Target Fund does not, in turn, invest in the Investing Fund invested in this Target Fund; and
- b) no more than 10% of the assets than the Target Fund whose acquisition is contemplated may, according to its investment policy, be invested in units of UCITS or other UCIs; and
- c) the Investing Fund may not invest more than 20% of its net assets in units of a single Target Fund; and
- d) voting rights, if any, attaching to the Shares of the Target Fund are suspended for as long as they are held by the Investing Fund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
- e) for as long as these securities are held by the Investing Fund, their value will not be taken into consideration for the calculation of the net assets of the Company for the purposes of verifying the minimum threshold of the net assets imposed by the Law; and
- f) to the extent required there is no duplication of management/subscription or redemption fees between those at the level of the Investing Fund having invested in the Target Fund, and this Target Fund.

For the avoidance of doubt, please note that such a section derogates from the above investment restrictions, especially paragraph VI.

Additional investment restrictions for Taiwan:

For so long as the Company is registered in Taiwan, the Sub-funds offered and sold in Taiwan will be subject to the following restrictions:

- (a) Unless otherwise approved or announced for exemption by the Securities and Futures Bureau of the Financial Supervisory Commission (the "FSC"), the total value of open interest in long positions on derivatives, other than for hedging purposes, held by each Sub-fund may not, at any time, exceed 40% of its net asset value; the total value of open interest in short positions on derivatives held by each Sub-fund may not, at any time, exceed the total market value of the corresponding securities held by the Sub-fund;
- (b) A Sub-fund may not invest in gold, direct commodities or direct real estate;

- (c) A Sub-fund's holdings in stocks listed on exchanges in mainland China or in China related stock (as defined by the FSC) may not, at any time, exceed certain percentage limits as stipulated by the FSC from time to time;
- (d) The total investment in such Sub-fund by domestic Investors in Taiwan may not, at any time, exceed certain percentage limits as stipulated by the FSC from time to time, and
- (e) The securities market of Taiwan may not constitute a major investment region in the portfolio of any Sub-fund. The investment amount of each Sub-fund in the securities market of Taiwan shall be subject to a percentage stipulated by the FSC from time to time.

Additional investment restrictions for German tax purposes:

The Sub-funds of the following categories:

- (a) Global Equity Sub-funds (Appendix I Section 1.);
- (b) Regional & Country Equity Sub-funds (Appendix I Section 2.); and
- (c) Theme Equity Sub-funds (Appendix I Section 3.) (except for the Sub-fund Robeco Sustainable Property Equities),

intend to qualify for German tax purposes as a so-called "Equity Funds" in terms of sec. 2(6) of the GInvTA as applicable from 1 January 2018 onwards.

"Equity Funds" are defined as funds, which according to their investment conditions invest continuously more than 50% of their gross assets (defined as the value of the assets without considering liabilities) in "Equity Participations" within the meaning of sec. 2(8) GInvTA.

To this end, the aforementioned Sub-funds will invest continuously more than 50% of their gross assets in Equity Participations within the meaning of sec. 2(8) GInvTA.

Corporate actions, subscriptions/redemptions and market movements may temporarily cause a Sub-fund not to meet this Equity Participation-ratio. In such a case, the Sub-fund will take possible and reasonable measures to re-establish the indicated investment level without undue delay after getting knowledge of the shortfall.

"Equity Participations" within the meaning of sec. 2(8) of the GInvTA are defined as:

- shares in a corporation, which are admitted to official trading at an exchange or an organized market recognized by the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*);
- shares in a corporation, which does not qualify as a "real estate company" for German purposes and which either (i) is resident in an EU member state or an EEA member state and is subject to corporate income tax in that state without being exempted from such tax or (ii) is resident in a third country and is subject to a corporate income tax in that state at a rate of at least 15% without being exempted from such tax;
- fund units in an Equity Fund with 51% of the Equity Fund units' value or, if the investment conditions of the Equity Fund provide for a higher minimum Equity Participation-ratio, with the respective higher percentage of the Equity Fund units' value;
- fund units in a so-called "Mixed Fund" (i.e. a fund, which according to its investment conditions invests continuously at least 25% of its gross assets in Equity Participations within the meaning of sec. 2(8) GInvTA) with 25% of the Mixed Fund units' value or, if the investment conditions of the Mixed Fund provide for a higher minimum Equity Participation-ratio, with the respective higher percentage of the Mixed Fund units' value.

In accordance with sec. 2 (6) sentences 2 and 3 and sec. 2(7) sentences 2 and 3 of the GInvTA, for purposes of calculating their own Equity Participation-ratios, the Sub-funds will also consider the actual Equity Participation-ratios of target funds published on each Valuation Day, provided that a valuation takes place at least once per week.

Pursuant to sec. 2(8) sentence 5 GInvTA the following participations do not qualify as Equity Participations:

- shares in partnerships, even if the partnerships are holding themselves shares in corporations;
- shares in corporations, which pursuant to sec. 2(9) sentence 6 of the GInvTA qualify as real estate;
- shares in corporations which are exempt from income taxation, to the extent these corporations are distributing their profits, unless the distributions are subject to a taxation of at least 15% and the investment fund is not exempt from this taxation;
- shares in corporations;
- whose income is directly or indirectly to more than 10% derived from shares in corporations that do not fulfil the requirements of sec. 2(8) sentence no. 2 lit. a) or b) of the GInvTA; or
- whose market value consists to more than 10% of directly or indirectly held shares in corporations that do not fulfil the requirements of sec. 2(8) sentence 1 no. 2 lit. a) or b) of the GInvTA.

Additional investment restrictions for Hong Kong:

For so long as the Company is registered in Hong Kong, the Sub-funds offered and sold in Hong Kong may be subject to additional investment restrictions specifically imposed by the Hong Kong regulator. An overview of Sub-funds registered and such additional restrictions are shown in the Hong Kong Covering Document, which can be accessed via <https://www.robeco.com/docm/pros-cgf-individual-hk-en.pdf>.

APPENDIX III – RISK MANAGEMENT PROCESS

The Management Company, on behalf of the Company, employs a risk-management process which enables it to monitor and measure the financial risk of the positions and their contribution to the overall risk profile of each Sub-fund. The Management Company, on behalf of the Company employs, if applicable, a process for accurate and independent assessment of the value of any OTC derivative instruments.

An independent risk management team is responsible for the implementation of financial risk management controls on behalf of the Management Company. From a financial risk management perspective, four main risk classifications are discerned, market risk, counterparty risk, liquidity risk and sustainability risk. These are treated separately in this appendix.

Counterparty risk

With respect to counterparty risk, procedures are in place with regard to the selection of counterparties, focusing on external credit ratings and market implied default probabilities (credit spreads). Counterparty exposure and concentration limits are computed and monitored on a frequent basis. In addition, counterparty risk is mitigated by securing appropriate collateral.

For counterparties to OTC derivative transactions to be accepted they are assessed on their creditworthiness based on external resources quoting the short-and long term rating and on credit spread as well as guarantees issued by the parent company of such counterparties, if any. The minimum acceptance level for such counterparties to be accepted is that it must have a long term mid rating higher or equal to A3 and a short term mid rating equal to P-1, except for specific cases or circumstances. In addition to the external ratings, soft indicators are also examined when evaluating a new counterparty. While there are no predetermined legal status or geographical criteria applied in the selection of the counterparties, these elements are typically taken into account in the selection process.

The creditworthiness of the derivative counterparty will determine whether derivatives may be entered into with the respective counterparty. The Company will only enter into new financial derivatives transactions with counterparties specialized in this type of transaction and adhering to the acceptance criteria as set out above. In addition, the use of financial derivatives must comply with the investment objective and policy and risk profile of the Company. These internal guidelines are determined in the best interest of the client by the Company and are subject to change without prior notice.

Counterparties to securities lending transactions/repurchase agreements are assessed on their creditworthiness (based on external resources), credit spread, prudential status, as well as the availability of a guarantee provided by its parent company or the Lending Agent. These internal guidelines are determined in the best interest of the client by the Company and are subject to change without prior notice.

Whenever the delivery of an asset is due by a Sub-fund to a counterparty stemming from a financial derivative instrument, the Sub-fund must be able either to deliver the asset immediately or be able to acquire the asset in time for delivery. Whenever a payment is due by a Sub-fund to a counterparty stemming from a financial derivative instrument, the Sub-fund must either hold cash or have sufficient liquidity in order to meet such obligations. A coverage policy is in place to ensure that the assets in a Sub-fund are sufficiently liquid to enable the Sub-fund to fulfil its payment obligations.

Liquidity risk

The Management Company employs a liquidity risk framework that reflects the dynamic that exists between asset liquidity risk and funding liquidity risk.

Asset liquidity risk arises when transactions cannot be executed in a timely fashion at quoted market prices and/or at acceptable transaction cost levels due to the size of the trade. Or in more extreme cases, when they cannot be conducted at all. Asset liquidity risk is a function of transaction size, transaction time and transaction cost. For each Sub-fund asset liquidity risk is evaluated by calculating how much of the portfolio can be sold within a certain timeframe against acceptable transaction costs.

Funding liquidity risk occurs when the redemption requirements of clients or other liabilities cannot be met without significantly impacting the value of the portfolio. Funding liquidity risk will only arise if there is also asset liquidity risk. Funding liquidity risk is estimated by applying several redemption scenarios, and taking into account funding obligations that arise due to collateral or margin requirements from derivative positions.

Both asset and funding liquidity risks are estimated in normal and in stressed conditions. In compliance with ESMA Guidelines on liquidity stress testing in UCITS and AIFs (Final Guidelines published on 16/07/2020; ESMA34-39-897 EN) and CSSF Circular 19/733 regarding the IOSCO recommendations on liquidity risk management for open-ended UCIs, the liquidity risk

management framework incorporates liquidity stress testing, which is conducted on a regular basis. The liquidity stress testing is applied separately on asset and on funding side. The results are combined in order to determine the overall effect on a Sub-fund's liquidity.

Liquidity coverage ratio is used to measure the ability of a Sub-fund's assets to meet funding obligations. Sub-funds with liquidity coverage ratios below defined thresholds are discussed in relevant risk committees and, if deemed necessary, appropriate measures are taken.

The liquidity risk management framework is applicable at all stages of a Sub-fund's lifecycle.

Sustainability risk

The Management Company systematically incorporates sustainability factors, to the extent these present a material risk to a Sub-fund, into its investment and portfolio construction processes, alongside traditional financial risk factors. This is done through ESG scoring methodologies using proprietary sustainability research and external resources which are built into the portfolio construction process.

Processes and controls for sustainability risk integration are embedded in a designated Sustainability Risk Policy which is maintained by the risk management function and governed by the Risk Management Committee (RMC). The Sustainability Risk Policy is built on three pillars. The environmental or social characteristics promoted by a Sub-fund or sustainable investment objective of a Sub-fund is used to identify and assess the relevant material sustainability risk topics. Based on these characteristics or investment objectives sustainability risk is monitored. Sensitivity and scenario analyses are conducted on a frequent basis to assess any material impact climate change risk may have on the portfolio of a Sub-fund.

Assessment of the likely impact of sustainability risks on returns

The financial position of investments in the portfolios managed by the Management Company may deteriorate due to material sustainability related risks, depending on the investment universe.

The financial position of the securities owned by a Sub-fund in the portfolios managed by the Management Company may deteriorate due to geological or environmental risks these companies are exposed to, which in turn may impact the market value of these investments referred to as physical climate risk. Furthermore the financial position of investments in the portfolio's managed by the Management Company may deteriorate due to increasing government regulation or a shift in consumer behavior that in turn may impact the market value of these investments referred to as climate transition risk.

Failing to mitigate against the consequences of climate change could potentially have a negative impact on the underlying assets of a Sub-fund. A Sub-fund may also experience liquidity risk after a natural disaster in a relevant market, potentially resulting in redemptions.

A climate risk scenario analysis for the Sub-fund is performed as a quantitative assessment of the potential impact of climate transition scenarios. In addition sustainable investment objectives of a Sub-fund, i.e. carbon reduction, may reduce the impact on the market value of the portfolio and is less impacted by any climate transition or physical risks in general and/or market risk stemming from issuers with insufficient environmental management.

Market risk

Risk controls are designed to limit the Sub-funds' market risk. The internal risk management methodology applied by the Management Company focuses on the tracking error, relative volatility versus the benchmark, and absolute volatility. Where appropriate, the extent to which the Sub-funds are exposed to market risk is restricted by means of limits on these risk measures. Derivative positions are included in the market risk calculations, by taking into account the economic exposures of each instrument to its underlying value(s). The use of market risk limits implicitly caps the economic exposure introduced by derivatives that can be part of the portfolio. In circumstances where the market risk of a Sub-fund is measured relative to an appropriate benchmark, where possible, the Sub-fund uses a widely accepted index as benchmark. On top of the above mentioned risk measures, results of stress scenarios are analyzed and monitored. Both the absolute and relative (to the benchmark) stress test results are measured and monitored. In addition, concentration limits (e.g. on countries or sectors) vis-a-vis the benchmark may apply.

Next to the internal market risk measures, the table "Global exposure method and leverage" below presents an overview for the different Sub-funds of the method used to calculate global exposure (i.e. commitment approach, relative VaR or absolute VaR).

For Sub-funds using the commitment approach to calculate global exposure, the positions in financial derivative instruments are converted into equivalent positions of the underlying assets. The total commitment is quantified as the sum of the absolute values of the individual commitments, after consideration of the possible effects of netting and hedging. For Sub-funds using the commitment approach to calculate global exposure, the global exposure of the Sub-fund may reach 210% of its net assets, the possibility to effect borrowings up to 10% of the net assets of the Sub-fund included.

For Sub-funds using the VaR approach, the expected and maximum expected levels of leverage are calculated by using sum of notional approach. The level of leverage using the sum of notional approach is expressed as a ratio between the aggregate of the notional values of all FDI entered into by the Sub-fund (including FDI that are used for investment purposes and/or for hedging purposes) and its NAV.

APPENDIX IV – FINANCIAL DERIVATIVE INSTRUMENTS, EFFICIENT PORTFOLIO MANAGEMENT TECHNIQUES AND INSTRUMENTS

The Company can employ (i) financial derivatives on eligible assets and (ii) techniques and instruments relating to transferable securities and money market instruments under the conditions and within the limits laid down by the Law and the regulations of the supervisory authority. The Company will employ derivatives for efficient portfolio management, for hedging purposes and for investment purposes.

The conditions of use and the limits applicable shall in all circumstances comply with the provisions laid down in the Law.

Under no circumstances shall these operations cause the Company and its Sub-funds to diverge from its investment policies and restrictions.

Techniques and Instruments (including but not limited to securities lending and (reverse) repurchase agreements) relating to transferable securities and money market instruments can be used by each Sub-fund for the purpose of efficient portfolio management as further described hereafter.

Unless otherwise provided in sub-section "Levels securities lending, (reverse) repurchase agreements and Equity Swaps (including TRS and CFD)", a Sub-fund can make use of reverse repurchase transactions, securities lending and Equity Swaps (including TRS and CFD) on a continuous basis.

Securities lending is used to improve the performance either through the fee paid by the borrower for the use of the securities or the reinvestment of the cash collateral. The maximum level of securities lending for a Sub-fund is set at 75%, this level is only expected to be reached in exceptional market circumstances. As indicated below, the Sub-fund Robeco QI Emerging Markets Enhanced Index Equities is excluded from engaging in securities lending transactions.

Reverse repurchase agreements are used to collateralise cash positions and mitigate counterparty exposure as indicated below.

For the avoidance of doubt, even if the expected exposure to securities lending or reverse repurchase transactions can vary between Sub-funds, the objectives of the use of such transactions remain the same for all relevant Sub-funds. The proportion of a Sub-fund's net assets subject to securities lending and reverse repurchase transactions will be dependent on factors such as, but not limited to, the Sub-fund's total net assets, the demand from the underlying market and seasonal trends in the underlying market. During periods of little or no demand from the market, the proportion of a Sub-fund's net assets subject to securities lending and/or reverse repurchase transactions can be lower, while there may also be periods of higher demand, in which case the proportion will be higher.

Repurchase agreements can be used in exceptional circumstances to obtain liquidity at a low rate of interest to meet sudden redemptions. Buy-sell back transactions, sell-buy back transactions and margin lending transactions will not be used.

SECURITIES LENDING, (REVERSE) REPURCHASE AGREEMENTS AND EQUITY SWAPS (including TRS and CFD)

To the maximum extent allowed by, and within the limits set forth in the laws and regulations applicable to the Company, in particular the provisions of (i) Article 11 of the Grand Ducal regulation of 8 February 2008 relating to certain definitions of the Law, of (ii) CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investments when they use certain techniques and instruments relating to transferable securities and money market instruments and of (iii) CSSF Circular 14/592 relating to ESMA Guidelines 2014/937 on ETFs and other UCITS issues (as these pieces of regulations may be amended or replaced from time to time).

The income of securities lending transactions will be for the benefit of the Sub-fund except for a fee applied by the Lending Agent (i.e. the percentage of the income of the securities lending transactions that is retained by the Lending Agent), based on the securities lending returns. This fee amounts to (A) 25% of the income from these securities lending transactions for any Loans which generate a return of 0.5% (i.e. the relevant Sub-fund retains 75% of the gross revenues generated from securities lending activities) or less and (B) 10% of the income from these securities lending transactions for any Loans which generate a return greater than 0.5% (i.e. the relevant Sub-fund retains 90% of the gross revenues). All operational costs/fees of running the programme are paid from the Lending Agent's fee. This includes all direct and indirect costs/fees generated by the securities lending activities. The Lending Agent receives its fee for providing its operational support, its expertise and risk management in relation to the securities lending activities as well as collateral management activities in relation to securities lending.

If cash collateral is received, the Lending Agent will conduct reverse repurchase transactions in order to mitigate counterparty exposures, the result generated by these transactions will be for the benefit/cost of the Sub-fund except for a fee applied by the Lending Agent (i.e. the percentage of the income of the reverse repurchase transactions that is retained by the Lending Agent), based on the returns. This fee amounts to (A) 25% of the income from these transactions if the return is 0.5% (i.e. the relevant Sub-fund retains 75% of the gross revenues generated from reverse repurchase transactions) or less and (B) 10% of the income from these transactions if the return is greater than 0.5% (i.e. the relevant Sub-fund retains 90% of the gross revenues).

The Management Company may invest into Equity Swaps (including TRS and CFD). The net revenues from Equity Swaps (including TRS and CFD) will be solely for the account of the relevant Sub-fund as there are no fees paid to a counterparty or an intermediary. The costs attributed to Equity Swaps (including TRS and CFD) held are included in the spread.

The Management Company conducts repurchase/reverse repurchase transactions with respect to cash positions of the relevant Sub-fund on behalf of the Company. The Management Company may appoint a third party, that may be related to the Depositary, to conduct these transactions. The net revenues from repurchase/reverse repurchase transactions will be solely for the account of the relevant Sub-fund, net of reasonable operational costs and fees. The annual report of the Company shall contain details of the revenues arising from the repurchase/reverse repurchase, together with the direct and indirect operational costs and fees incurred.

Counterparties to securities lending transactions/repurchase agreements/Equity Swaps (including TRS and CFD) are assessed as described in [APPENDIX III – RISK MANAGEMENT PROCESS](#).

The maximum and expected level of leverage in respect of securities lending transactions/repurchase agreements/Equity Swaps (including TRS and CFD) is mentioned in the table below. The securities lending transactions/repurchase agreements must not affect the management of the Company in accordance with their investment policy.

The collateral can be enforced if there is an event of default under the relevant agreement. The collateral can be subject to the right of set-off if the relevant agreement stipulates so.

Specific risks linked to securities lending and (reverse) repurchase agreements

Use of the aforesaid techniques and instruments involves certain risks, some of which are listed in the following paragraphs (in addition to the general information provided under Section 4 of the Prospectus), and there can be no assurance that the objective sought to be obtained from such use will be achieved.

The use of securities lending transactions and/or (reverse) repurchase agreements could, in the event of default (and specifically an event of default of a counterparty) have a negative impact on the performance of the Sub-fund. The risk management process implemented by the Management Company (as described in [APPENDIX III – RISK MANAGEMENT PROCESS](#)) aims at mitigating such a risk.

FINANCIAL DERIVATIVE INSTRUMENTS

To the maximum extent allowed by, and within the limits set forth in the laws and regulations applicable to the Company, in particular the provisions of (i) Article 11 of the Grand Ducal regulation of 8 February 2008 relating to certain definitions of the Law, of (ii) CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investments when they use certain techniques and instruments relating to transferable securities and money market instruments and of (iii) CSSF Circular 14/592 relating to ESMA Guidelines on ETFs and other UCITS issues (as these pieces of regulations may be amended or replaced from time to time), the Company can for the purpose of generating additional capital or income or for reducing costs or risks enter, into financial derivative transactions, as further indicated in [APPENDIX I – INFORMATION PER SUB-FUND](#).

The derivative transactions and the collateral exchanged pursuant to those transactions are in principle governed by the ISDA Master Agreements (or an equivalent document) and the Credit Support Annex (or an equivalent document) respectively. The International Swaps and Derivatives Association ("ISDA") has produced this standardized documentation for these transactions.

Counterparties of the derivative transactions are assessed as described in [APPENDIX III – RISK MANAGEMENT PROCESS](#).

Should the Company invest in financial derivative instruments related to an index for investment purposes, information on the index and its rebalancing frequency would be disclosed in [APPENDIX I – INFORMATION PER SUB-FUND](#) prior thereto, by way of reference to the website of the index sponsor as appropriate.

Should a Sub-fund invest in financial derivative instruments which underlying is a financial index, it is expected that the rebalancing frequency of the index should not require a rebalancing of the portfolio of the Sub-fund considering its investment policy and should not either generate additional costs for the Sub-fund.

The Management Company transacts the financial derivative transactions on behalf of the Company. The result generated from the derivatives transactions (positive or negative) is solely for the account of the Company and is further specified in the Company's audited reports.

Please note that if any counterparty to a financial derivative transaction has discretion as indicated under point 38 d) of the ESMA Guidelines on ETFs and other UCITS issues (ESMA/2014/937 EN), the counterparty will have to be approved by the CSSF as portfolio manager in respect of the relevant Sub-fund.

Conflict of interest

Pursuant to the Management Company Services Agreement between the Company and the Management Company and, as the case may be, the Portfolio Management Agreements between the Management Company and the Portfolio Managers (if any),

the Management Company and the Portfolio Managers (if any) undertake to disclose all and any conflicts of interest that may arise regarding the provision of its services in writing to the Company. Notwithstanding this, the Management Company and the Portfolio Managers (if any) shall be at liberty to act as management company to any other person or persons it might think fit and nothing herein contained shall prevent the Management Company or the Portfolio Manager (if any) from contracting or entering into any financial, banking, commercial, advisory or other transactions (including without limitation financial derivative transactions) whether on its own account or on the account of others as allowable by law and regulation.

More specifically in relation to the use of financial derivatives such as but not limited to swaps (including but not limited to Equity Swaps, credit default swaps, interest rate swaps and index swaps), futures and options, the Management Company undertakes to disclose all and any conflicts of interest that may arise regarding these transactions, in writing to the Company.

With respect to securities lending transactions and (reverse) repurchase agreements, the Lending Agent maintains a conflicts of interest policy for identifying, preventing and managing conflicts of interest between the lender and the agent or any person directly or indirectly linked to the Lending Agent or between the Lending Agent and another client of the Lending Agent. Up-to-date information on the conflicts of interest policy can be obtained via the following website link: <http://www.jporganchase.com/>.

It is not intended to lend the securities to an affiliated entity of the Company.

Credit Default Swaps

Credit default swaps can be used to buy protection under credit default swaps or sell protection under credit default swaps in order to acquire a specific credit exposure. A credit default swap is a bilateral financial contract in which one counterpart (the protection buyer) pays a periodic fee in return for a contingent payment by the protection seller following a credit event of a reference issuer. The protection buyer must either sell particular obligations issued by the reference issuer at their par value (or some other designated reference or strike price) when a credit event occurs or receive a cash settlement based on the difference between the market price and such reference or strike price. The credit default swaps to be entered into will be marked to market daily on this basis. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt, or failure to meet payment obligations when due.

CDS basket swaps (such as iTraxx and IBOXX families of CDS basket swaps) are basket swaps that reference a range of securities or derivative instruments. The Sub-fund can invest in CDS basket swaps and CDS as protection buyer and seller. The main advantages of CDS basket swaps are instant exposure to a very diversified basket of credits with low bid and offer costs and use for example as credit hedge for an existing single name credit default swap or cash bond.

Interest rate Swaps

The Company can make use of interest rate swaps. An interest rate swap is an agreement between two counterparties whereby one stream of future interest payments is exchanged for another based on a specified principal amount. Interest rate swaps often exchange a fixed payment for a floating payment that is linked to an interest rate. A counterparty will typically use interest rate swaps to limit or manage exposure to fluctuations in interest rates, or to obtain a marginally lower interest rate than it would have been able to get without the swap. The interest rate swaps to be entered into will be marked to market daily on this basis.

Equity Swaps (including TRS and CFD)

The Company can make use of Equity Swaps (including TRS and CFD). Equity Swaps are used for implementing components of the investment strategy to enhance returns that can only be achieved through derivatives such as gaining short exposure to companies. Equity Swaps may also be used to manage the portfolio efficiently such as gaining cost efficient long exposure. Any Sub-fund engaging in short positions through derivatives must always hold sufficient liquid assets to cover its obligations arising from these positions. Sub-funds may be required to place initial and/or variation margin with its counterparty. As a result it may need to hold a proportion of its assets in cash or other liquid assets to satisfy any applicable margin requirements for the Sub-fund. This may have a positive or negative impact on the performance of the Sub-fund.

Futures, Options and Forwards

The Company may use options, futures and forward contracts on currencies, securities, indices, inflation and interest rates.

Futures: Transactions in futures may carry a high degree of risk. The amount of the initial margin is small relative to the value of the futures contract so that transactions are "leveraged". A relatively small market movement will have a proportionately larger impact which may work for or against the Company. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

Options: Transactions in options may also carry a high degree of risk. Selling ("writing" or "granting") an option generally entails considerably greater risk than purchasing options. Although the premium received by the option seller is fixed, the seller may suffer a loss well in excess of that amount as the value of the underlying exceeds the exercise price of the option. Losses would continue to accumulate as the underlying would continue to increase. As the increase of the underlying is not capped, the Company could theoretically be exposed to indefinite losses.

The seller will also be exposed to the risk of the purchaser exercising the option and the seller will be obliged either to settle the option in cash or to acquire or deliver the underlying investment. If the option is "covered" by the seller holding a corresponding position in the underlying investment or a future on another option, the risk may be reduced.

Details on the use of certain derivatives

Exchange traded and over-the-counter derivatives used, include but are not limited to futures, options, swaps (including but not limited to Equity Swaps, interest rate swaps, credit default swaps ("CDS"), index swaps and CDS basket swaps).

TBA instruments are contracts on an underlying mortgage backed security ("MBS") to buy or sell a MBS which will be delivered at an agreed-upon date in the future. In a TBA trade, the buyer and seller decide on general trade parameters, such as agency, coupon, settlement date, par amount, and price, but the buyer typically does not know which pools actually will be delivered until two days before settlement.

Specific risks linked to financial derivatives instruments

Use of financial derivatives involves certain risks, some of which are listed in the following paragraph (in addition to the information generally contained in Section 4 of this Prospectus), and there can be no assurance that the objective sought to be obtained from such use will be achieved.

In general, financial derivative transactions can be entered into to increase the overall performance of the relevant Sub-fund of the Company, but an event of default (and specifically an event of default of a counterparty) could have a negative impact on the performance of the relevant Sub-fund. The risk management process implemented by the Management Company (as described above) aims at mitigating such risk.

COLLATERAL MANAGEMENT FOR SECURITIES LENDING, REPURCHASE AGREEMENTS AND FINANCIAL DERIVATIVE TRANSACTIONS

The collateral received by a Sub-fund shall comply with applicable regulatory standards regarding especially liquidity, valuation, issuer credit quality, correlation and diversification.

The criterion of sufficient diversification with respect to issuer concentration is considered to be respected if the Sub-fund receives from a counterparty of efficient portfolio management and over-the-counter financial derivative transactions a basket of collateral with a maximum exposure to a given issuer of 20% of its Net Asset Value. When a Sub-fund is exposed to different counterparties, the different baskets of collateral shall be aggregated to calculate the 20% limit of exposure to a single issuer. To the extent permitted by the applicable regulation and by way of derogation the Sub-fund can be fully collateralized in different transferable securities and money market instruments issued or guaranteed by a Member State, one or more of its local authorities, OECD countries, or a public international body to which one or more Member States belong. In that case the Sub-fund shall receive securities from at least six different issues, but securities from any single issue shall not account for more than 30% of the Net Asset Value of the Sub-fund.

Non cash collateral received by a Sub-fund in respect of any of these transactions will not be sold, reinvested or pledged.

As the case may be, cash collateral received by a Sub-fund in relation to any of these transactions can be reinvested in a manner consistent with the investment objectives of the Sub-fund in (a) shares or units issued by short-term money market undertakings for collective investment as defined in the CESR Guidelines on a Common Definition of European Money Market Funds (Re – CESR/10-049) calculating a daily net asset value and being assigned a rating of AAA or its equivalent, (b) short-term bank deposits with a credit institution which has its registered office in a Member State or, if the registered office is located in a third country, provided that it is subject to prudential rules considered by Luxembourg regulator as equivalent to those laid down in community law, (c) highly rated bonds issued or guaranteed by a Member State, Switzerland, Canada, Japan or the United States or by their local authorities or by supranational institutions and undertakings with EU, regional or world-wide scope and (d) reverse repurchase agreement transactions provided the transactions are with credit institutions subject to prudential supervision and the Company can recall at any time the full amount of cash on an accrued basis. Such reinvestment will be taken into account for the calculation of the Company's global exposure, in particular if it creates a leverage effect.

To mitigate counterparty exposures, cash received from securities lending will be collateralised via short term reverse repurchase transactions.

The collateral received in connection with such transactions must meet the criteria set out in the CSSF Circular 08/356 which includes the following collateral:

- (i) bonds issued or guaranteed by a Member State, an OECD member state, by their local authorities or by supranational bodies and organizations with community, regional or world-wide character;
- (ii) investment grade corporate bonds issued by issuers located in a Member State or an OECD member state;
- (iii) shares or units issued by money market UCIs calculating a daily net asset value and being assigned a rating of AAA or its equivalent;
- (iv) shares or units issued by UCITS investing mainly in bonds/shares mentioned in (v) and (vi) below;
- (v) main index equity securities quoted on a stock exchange in a Member State, an OECD member state, Hong Kong or Singapore;
- (vi) shares admitted to or dealt in on a Regulated Market of a Member State or on a stock exchange of a member state of the OECD, on the condition that these shares are included in a main index;
- (vii) cash; or
- (viii) the collateral will not consist of securities issued by the borrower or any of its legal entities. The collateral will not be highly correlated to the counterparty's performance.

In respect of securities lending transactions and reverse repurchase agreements, the standard approach in respect of any Sub-fund is that collateral is received by a tri-party agent, whereas in specific cases (e.g. specific government bonds) the collateral can also be received bilaterally. In case of such a bilateral receipt, which is predominantly applicable to repurchase agreements, the collateral is administrated, monitored and valued by the Lending Agent and/or the Administration Agent.

The collateral received in case of a bilateral receipt is kept per Sub-fund on a segregated account at the Depositary (or sub-custodian on behalf of the Depositary). Collateral will be received by way of title transfer in the tri-party account and will be held by the Depositary (or sub-custodian on the behalf of the Depositary) on behalf of the relevant Sub-fund in accordance with applicable laws and the Depositary's safekeeping duties under the Depositary Agreement. It is valued by a tri-party agent, which acts as an intermediary between the two parties to the securities lending transactions. In this case the tri-party agent is responsible for the administration of the collateral, marking to market, and substitution of collateral. Securities lending positions and collateral are marked-to-market on a daily basis, in a similar manner and frequency as the assets of the Company, and are monitored by the Lending Agent.

Collateral margins (or "haircut") are dependent on the asset type of the out-on-loan securities (or cash) and collateral received (equities, bonds or cash), on the type of issuers (governments or companies), currency mismatches as well as on the correlation between the out-on-loan securities and the collateral received. Under normal circumstances, the collateral received as security for securities lending transactions typically ranges between 102% and 110% of the market value of the securities lent. The margin can be changed without notice to reflect current market conditions. The adequacy of the collateral received vis-à-vis the collateral margins, as well as the adequacy of the collateral margins, is assessed on a daily basis by the Lending Agent and the tri party collateral manager. No other re-evaluation of the collateral takes place.

Eligible Collateral	Collateral Margin
Cash	100%*
Government bonds and T-Bills	≥ 102%
Supranational bonds and municipal bonds	≥ 102%
Other bonds	≥ 102%
Equities	≥ 102%

* Exposures that result for financial derivative transactions are predominantly collateralised by cash. Due to MTA's (Minimal Transfer Amounts) the actual collateralisation percentage can be lower.

The Sub-funds can also accept cash when received as collateral in securities lending transactions. Cash collateral received from securities lending is subject to a margin grid that reflects the haircut. Cash provided as collateral can be reinvested.

The collateral received as security for (reverse) repurchase agreement transactions will be at least 90% of the value of the outstanding (or incoming) money under the relevant (reverse) repurchase agreement.

In respect of financial derivative transactions, the Management Company is responsible for the administration of the transactions and the collateral, marking to market, and substitution of collateral. The transactions and collateral are marked-to-market on a daily basis.

APPENDIX V – PERFORMANCE FEE

Methodology:

A Performance Fee for the relevant Class of Shares of the Sub-fund is only due at the end of the Financial Year when the relevant Class of Shares of the Sub-fund outperforms the relevant Index or Hurdle Rate as indicated in Appendix I (i.e. yearly crystallisation frequency). **Note that an outperformance of the relevant Class of Shares of the Sub-fund does not imply a positive return of the relevant Class of Shares of the Sub-fund, a performance fee is also due when the relevant Class of Shares of the Sub-fund has a negative return but an outperformance over the relevant Index or Hurdle Rate as indicated in Appendix I.**

This outperformance over the relevant Index or Hurdle Rate must have taken place since inception of the relevant Class of Share of the Sub-fund or since the time that a Performance Fee was due. In the event that payment of the Performance Fee is due ("Pay-out"), the basis for the Performance Fee calculation for the next Financial Year will be reinitiated. A performance fee should only be payable in circumstances where a positive performance has been accrued during the performance reference period. In the event of no Pay-out, the basis for the Performance Fee calculation will not be reinitiated and any underperformance will be brought forward for the purpose of the calculation of the Performance Fee of the next Financial Year. Any underperformance previously incurred during the performance reference period should be recovered before a performance fee becomes payable. To this purpose, the length of the performance reference period is equal to the whole life of the relevant Sub-fund. The performance reference period is to be understood as the time horizon over which the performance is measured and compared with that of the reference indicator, at the end of which the mechanism for the compensation for past underperformance (or negative performance) can be reset.

In addition if a Shareholder redeems or switches all or part of their Shares before the end of a performance period, any accrued performance fee with respect to such Shares will crystallize on that Valuation Day and will then become payable to the Management Company. The basis for the Performance Fee calculation will not be reinitiated on those Valuation Days at which performance fees crystallize following the redemption or switch of Shares.

Examples ²

	Year 1	Year 2	Year 3
NAV start of the relevant Class of Shares of the Sub-fund	100	98	108
NAV end of the relevant Class of Shares of the Sub-fund	98	108	104
Return of the Relevant Class of Shares of the Sub-fund	-2%	10%	-4%
Index/Hurdle Rate start	100	105	107
Index/Hurdle Rate end	105	107	101
Index/Hurdle Rate return	5%	2%	-6%
Performance (Share Class return -/- Index /Hurdle Rate return) in the Financial Year	-7%	8%	2%
Out- or underperformance since inception or since last Pay-out	-7%	1% (=8% - 7%)	2%
Performance Fee due	NO	Yes, (max 1% * "Portion")	Yes, (max 2% * "Portion")
Basis for the Performance Fee calculation next year	Calculation continued	Reinitiated	Reinitiated

- Year 1: Share of the relevant Class of the Sub-fund did not outperform the Index/Hurdle rate and the underperformance will be brought forward for the purpose of the calculation of the Performance Fee of Year 2.
- Year 2: Share of the relevant Class of the Sub-fund did outperform the Index/Hurdle Rate. The Performance Fee is corrected for the underperformance in Year 1. As a Performance Fee is due, the basis for the Performance Fee calculation for the next Financial Year will be reinitiated.
- Year 3: Share of the relevant Class of the Sub-fund has a negative return but outperformed the Index/Hurdle Rate since the last Pay-out. As a Performance Fee is due, the basis for the Performance Fee calculation for the next Financial Year will be reinitiated.

² The figures in the table are rounded to 0 decimals.

Detailed description of Calculation method

Daily process

Each Valuation Day the difference between the percentual change in the NAV per Share of the relevant Class of Shares of the Sub-fund on the first Valuation Day since inception (or since the last Pay-out) and the Valuation Day Year and the percentual change in the simple daily equivalent of the relevant Index or Hurdle Rate, as defined in Appendix I over the corresponding period is calculated. In case this difference is negative (underperformance of the relevant Class of Shares of the Sub-fund), the accrual in the Net Asset Value per Share of the relevant Class of Shares of the Sub-fund will be 0. In case the difference is positive (outperformance of the relevant Class of Shares of the Sub-fund), the daily Performance fee will be calculated.

The daily Performance Fee will be calculated as follows. Each Valuation Day the difference is calculated between the percentual change in the Net Asset Value (NAV) per Share of the relevant Class of the Sub-fund of the Valuation Day compared to the previous Valuation Day and the percentual change in the simple daily equivalent of the relevant Index or Hurdle Rate as defined in **APPENDIX I – INFORMATION PER SUB-FUND** of the Valuation Day compared to the previous Valuation day. The outcome hereof is multiplied by the NAV^{IA} of the relevant Class of Shares of the Sub-fund and by the relevant Portion as defined in Appendix I.

$$\begin{aligned} \text{daily Performance Fee} = & \Delta \quad (\text{NAV per Share Valuation Day/NAV per Share previous Valuation Day}) \\ & -/- \quad \Delta \quad (\text{Index/Hurdle Rate Valuation Day/Index/Hurdle Rate previous Valuation Day}) \\ & \times \quad \text{NAV of the relevant Class of the Sub-fund} \\ & \times \quad \text{Portion} \end{aligned}$$

The calculated daily Performance Fee will be included in the cumulative Performance Fee since inception (or since the last Pay-out). In the event that the calculated daily Performance Fee is negative, it will reduce the cumulative Performance Fee. The cumulative Performance Fee will be deducted from the Net Asset Value per Share of the relevant Class of Shares of the Sub-fund, provided that the cumulative Performance Fee is positive. In the event that the cumulative Performance Fee is negative, the accrual in the Net Asset Value per Share of the relevant Class of Shares of the Sub-fund will be 0.

In addition if a Shareholder redeems or switches all or part of their Shares before the end of a performance period, any accrued performance fee with respect to such Shares will crystallize on that Valuation Day and will then become payable to the Management Company. The basis for the Performance Fee calculation will not be set to 0 on those Valuation Days at which performance fees crystallize following the redemption or switch of Shares.

Annual Process

At the end of the Financial Year it will be calculated whether the criteria ("**Criteria Annual Process**") are met, by taking the difference between the percentual change in the NAV per Share of the relevant Class of Shares of the Sub-fund on the first Valuation Day since inception (or since the last Pay-out) and the last Valuation Day of the Financial Year and the percentual change in the simple daily equivalent of the relevant Index or Hurdle Rate, as defined in Appendix I over the corresponding period.

Criteria Annual Process are met if

$$(\text{NAV last Valuation Day/NAV first Valuation Day}) > (\text{Index/Hurdle Rate last Valuation Day/Index/Hurdle Rate first Valuation Day})$$

If the Criteria Annual Process are met, the positive cumulative Performance Fee accrual will become payable to the Management Company. If the cumulative Performance accrual is negative, no Performance Fee accrual will be paid to the Management Company. In both cases, the basis for the Performance Fee calculation for the next Financial Year will be set to 0 and the cumulative Performance Fee accrual will be reinitiated. If the Criteria Annual Process are not met, the basis for the Performance Fee calculation for the next Financial Year will not be reinitiated and the cumulative Performance Fee accrual will not become payable to the Management Company and will not be reinitiated.

The calculation of the (percentage change in the) Index-Adjusted Net Asset Value per Share as described above will take place in accordance with the valuation method described in Section 2.7 "**Calculation of the Net Asset Value**", with the following deviations:

- the time of valuation will be aligned with the time of valuation of the Index (to the extent possible);
- dilution adjustments (as mentioned in Section 2.7 "**Calculation of the Net Asset Value**" under "Swing pricing"), if any, will not be taken into account;

- it will be corrected for dividend distributions; and
- it will be net of all other fees and expenses and excluding the effect of subscriptions and redemptions.

APPENDIX VI – BENCHMARKS

The table below stipulates whether the Sub-funds use a benchmark and for which purpose:

- Asset allocation: The Sub-fund is actively managed and uses – to a certain extent – a Benchmark or a combination of Benchmarks in defining the asset allocation of the portfolio, still allowing the Management Company and Portfolio Managers to have discretion over the composition of its portfolio subject to the investment objectives.
- Performance fee calculation: the Sub-fund uses the Benchmark in computing the performance fee.
- Not in scope of the Benchmark Regulation: the Sub-fund does not use an index or uses an index in a way which is not in scope of the Benchmark Regulation.
- ESG characteristics: The methodology of the Benchmark takes into account ESG factors that may either be aligned with the ESG characteristics promoted by the Sub-fund(s) or with the sustainable investment objectives pursued by the Sub-fund(s).

The methodology used for the calculation of the benchmarks can be found on the website of the relevant benchmark administrators.

³ ESMA and the national competent authorities are currently in the process of gradually updating and migrating benchmark-related data in the register, a process which is expected to be completed by 30 September 2026. During this update period, the registration status of certain Benchmarks and/or their administrators may be pending or undergoing review. As a result, the information contained in this table may not be up to date. The status of the Benchmarks and their administrators in the ESMA register will be monitored and all necessary steps will be taken to ensure ongoing compliance with the Benchmark Regulation, including any obligations applicable following the expiration of the transitional framework for third-country benchmarks.
