

# Sustainability-related disclosure

## Robeco Climate Global Bonds

This document provides you with information about this fund in relation to the Sustainable Finance Disclosure Regulation. It is not marketing material. The information is required by law to help you understand the sustainability characteristics and/or objectives and risks of this fund. You are advised to read it in conjunction with other relevant documentation on this fund so you can make an informed decision about whether to invest.

<b>(b) No sustainable investment objective</b>
This financial product promotes environmental or social characteristics, but does not have as its objective sustainable investment.
Where fund aims to make one or more sustainable investments explain how the indicators for adverse impacts in Table 1 of Annex I, and any relevant indicators in Tables 2 and 3 of that Annex I, are taken into account?
<p>The fund considers principal adverse impacts on sustainability factors as referred to in Annex I of the SFDR Delegated Act.</p> <p>Pre-investment, for corporates the following principal adverse impacts on sustainability factors are considered.</p> <ul style="list-style-type: none"><li>○ Via the applied normative and activity-based exclusions, the following PAIs are considered:<ul style="list-style-type: none"><li>- Exposure to companies active in the fossil fuel sector (PAI 4, Table 1)</li><li>- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)</li><li>- Activities negatively affecting biodiversity-sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.</li><li>- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons (PAI 14, Table 1)</li></ul></li></ul> <p>Via the carbon footprint performance target of the Fund, the PAI on Carbon footprint (PAI 2, Table 1) is considered via the Paris-Aligned Benchmark.</p> <p>Post-investment, the following principal adverse impacts on sustainability factors are taken into account via Robeco's entity engagement program:</p> <ul style="list-style-type: none"><li>- All indicators related to Climate and other environment-related indicators (PAI 1-9, Table 1)</li><li>- Violations of the UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10, Table 1)</li><li>- Activities negatively affecting biodiversity sensitive areas (PAI 7, Table 1). The consideration of this PAI is currently restricted to applying exclusions to palm oil producing companies and for any breaches to the UNGC, UNGP and OECD Guidelines for Multinational Enterprises in relation to biodiversity.</li><li>- In addition, based on a yearly review of Robeco's performance on all mandatory and selected voluntary indicators, holdings of the Fund that cause adverse impact might be selected for engagement.</li></ul> <p>More information is available via <a href="#">Robeco's Principal Adverse Impact Statement</a>.</p>
Are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights?
The sustainable investments in corporates are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both Robeco's Exclusion Policy as well as the methodology of the benchmark provider.

<b>(c) Environmental or social characteristics of the financial product</b>
What are the environmental or social characteristics that the financial products promotes?
<p>The Fund has the following E/S characteristics:</p> <ol style="list-style-type: none"><li>1. The Fund promotes investment in green, social, sustainable and/or sustainability-linked bonds used to finance environmental and social projects.</li></ol>

The Fund has the following E/S characteristics as promoted by the Fund for the corporate bonds (including government owned but not guaranteed):

2. The Fund pursues an objective of keeping the maximum global temperature rise below 2°C by reducing the carbon footprint of its portfolio.
3. The Fund promotes certain minimum environmental and social safeguards through applying exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society and incompatible with sustainable investment strategies.
4. The Fund promotes adherence to and conducting business activities in accordance with the United Nations Universal Declaration of Human Rights, the International Labor Organization's (ILO) labor standards, the United Nations Guiding Principles for Business and Human Rights (UNGPs), the United Nations Global Compact (UNGC) and the OECD Guidelines for Multinational Enterprises.

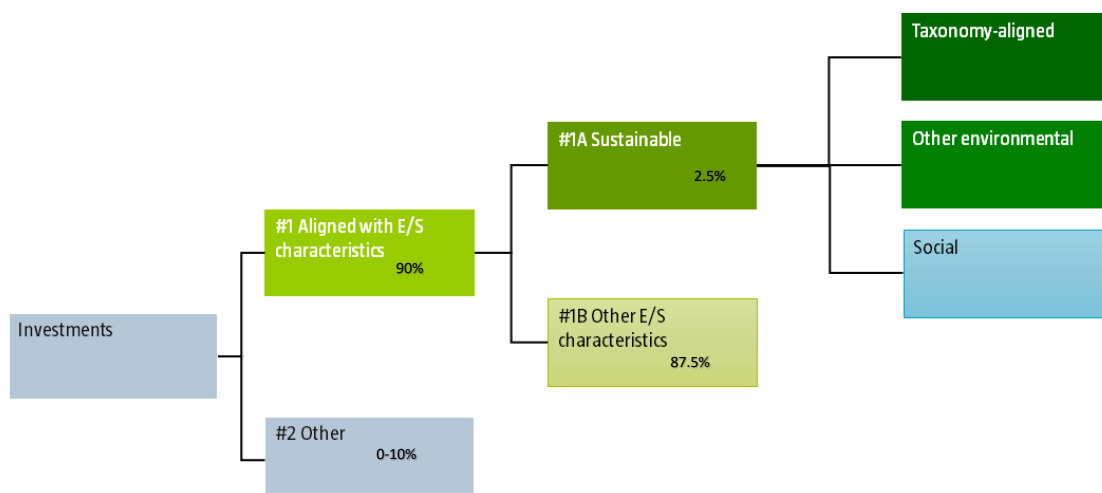

The Fund has the following E/S characteristics as promoted by the Fund for the government and government-related bonds (excluding government owned but not guaranteed):

5. The Fund pursues an objective of keeping the maximum global temperature rise below 2°C by reducing the carbon footprint of its portfolio.
6. The Fund promotes certain minimum environmental and social safeguards through applying exclusion criteria with regards to products and business practices that Robeco believes are detrimental to society and incompatible with sustainable investment strategies.

The sustainable investments made by the Fund will contribute partly to the environmental objective of Climate Mitigation under the Taxonomy regulation. The Fund follows the Solactive Paris Aware Global Aggregate Index as a reference index to meet the carbon footprint reduction objective of The Fund.

(d) Investment strategy
What is the investment strategy used to meet the environmental or social characteristics promoted by the financial product?
RobecoSAM Climate Global bonds is an actively managed fund that invests in bonds globally. The selection of these bonds is based on fundamental analysis. The strategy integrates sustainability indicators on a continuous basis as part of the bond selection process. Amongst others, the Fund applies norms-based, activity-based and regional exclusions, Robeco's good governance policy and considers Principal Adverse Impacts in the investment process.
What is the policy to assess good governance practices of the investee companies, including with respect to sound management structures, employee relations, remuneration of staff and tax compliance?
Robeco has a Good Governance policy to assess governance practices of companies. Robeco's Good Governance policy applies to the Fund. For more information, refer to <a href="https://www.robeco.com/docm/docu-robeco-good-governancepolicy.pdf">https://www.robeco.com/docm/docu-robeco-good-governancepolicy.pdf</a> .

(e) Proportion of investments
Minimum Sustainable Investment: 2.5%
Asset allocation table

#### (f) Monitoring of environmental or social characteristics

How are the environmental or social characteristics promoted by the financial product and the sustainability indicators used to measure the attainment of each of those environmental or social characteristics promoted by the financial product monitored throughout the lifecycle of the financial product and what are the related internal or external control mechanisms?

1. The second line of defense (Risk Management) monitors the concentration towards green bonds, social bonds and sustainability-linked bonds and facilitates pre-trade compliance.
2. The second line of defense (Risk Management) monitors the Carbon Footprint of the portfolio versus the reference index on a daily basis and facilitates pre-trade compliance.
3. All exclusions are coded in the Trading & Compliance module, through which investing in an excluded asset is not possible. In addition, post-trade checks take place.
4. All exclusions in relation to Controversial behavior are coded in the Trading & Compliance module, through which investing in an excluded asset is not possible. In addition, post-trade checks take place.
5. The second line of defense (Risk Management) monitors the Carbon Footprint of the portfolio versus the reference index on a daily basis and facilitates pre-trade compliance.
6. All exclusions are coded in the Trading & Compliance module, through which investing in an excluded asset is not possible. In addition, post-trade checks take place.

#### (g) Methodologies

What are the methodologies to measure how the social or environmental characteristics promoted by the financial product are met?

Robeco maintains comprehensive methodology documents of our proprietary analytical frameworks on our website. These whitepapers go into greater depth, provide further insight into data sources and processes applied within their respective domains. More information in relation to these methodologies can be found at <https://www.robeco.com/en/key-strengths/sustainableinvesting/sustainability-reports-policies.html>.

In addition, for some social and environmental characteristics, Robeco relies on externally sourced content for which we aim to select the best of breed vendor for each of our target characteristics. Each vendor will have its own approach and set of internal processes, over which we have only limited influence as an end consumer. More information with regards to these methodologies can be found at <https://www.robeco.com/docm/docu-robeco-sfdr-data-disclosures.pdf>.

#### (h) Data sources and processing

- How are the data sources used to attain each of the environmental or social characteristics promoted by the financial product?
- What measures are taken to ensure data quality?
- How is data processed?
- What is the proportion of data that are estimated?

The Fund uses the following data sources:

1. The green bond, social bonds, sustainability-linked bonds selection uses Bloomberg in conjunction with data derived from internal processes.
2. The Fund's carbon footprint is calculated based on ISS (Institutional Shareholder Services) data.
3. The exclusion process uses several data sources such as Sustainalytics, RSPO (Roundtable on Sustainable Palm Oil), World Bank, and Freedom House, Fund for Peace and International Sanctions.
4. The controversial behavior process uses data derived from Sustainalytics and the internal process.
5. The Fund's carbon footprint is calculated based on EDGAR (Emissions Database for Global Atmospheric Research) data.
6. The exclusion process uses several data sources such as Sustainalytics, RSPO (Roundtable on Sustainable Palm Oil), World Bank, and Freedom House, Fund for Peace and International Sanctions.
7. The Fund's evaluation of sustainability risk is based on Sustainalytics data.

Robeco scrutinises the data quality of each provider during due diligence assessments, that includes reviewing the data model, performing statistical checks and evaluating coverage. Data processing takes places in different forms,

the preference is always to have data acquisition as automated as possible to avoid any operational risks or unnecessary human intervention.

It is currently complex to report sufficiently accurate yet broad numbers on the proportion of data that is estimated. Robeco has calculated the weighted proportion of assets covered per PAI within our standard equity and fixed income benchmarks. These figures have been calculated per provider and, where relevant, we used this coverage figure as a determining factor in our choice of vendor for that PAI since, ceteris paribus, we prefer higher coverage for our investible universe.

Robeco intends to investigate a methodology for determining the proportion of data that has been internally enriched to support wider applications, e.g., by cascading to the broader corporate structure or using sector averages as proxies. Evaluating the proportion of vendor sourced data that is estimated remains a challenge due to insufficient metadata.

More information in relation to data quality and processing can be found in the SFDR data disclosures available at <https://www.robeco.com/en/key-strengths/sustainableinvesting/sustainability-reports-policies.html>.

#### (i) Limitations to methodologies and data

What are potential limitations to the methodologies or data sources and how do such limitations not affect how the environmental or social characteristics promoted by the financial product are met?

The primary limitation to the methodology or data source is the lack of corporate disclosure. Like many other financial market participants, we struggle to find adequate information on the principal adverse indicators. To overcome this issue, we have resorted to using multiple data providers, since each has its own respective strengths and weaknesses. We do not expect the corporate reporting landscape to change significantly until the anticipated introduction of CSRD in 2025.

In terms of methodology, we frequently see divergence in the way that data vendors deal with certain topics. For instance, for GHG emissions, some vendors blend corporate reporting with modelled data. It has been a common experience to note that 'reported' data can vary between providers due to conflicting policies, quality assurance and other case-by-case factors. We are not alone in this view as evidenced by the numerous reports from industry associations and trade bodies such as EuroSIF and IOSCO on the quality and transparency of ESG data products. Our environmental objectives are predominantly linked to more mature themes, specifically carbon, water and waste. Disclosure is far greater today within these areas and so we are able to evaluate a satisfactory proportion of our universe to be able to perform tasks such as exclusions and comparisons between portfolio and benchmark.

Information in relation to data and methodologies can be found in the SFDR data disclosures document available at <https://www.robeco.com/en/key-strengths/sustainableinvesting/sustainability-reports-policies.html>.

#### (j) Due diligence

What due diligence is carried out on the underlying assets of the financial product (including the internal and external controls)?

Robeco has incorporated the sustainability aspects of the investment strategies into adequate investment due diligence processes and procedures for the selection and monitoring of investments, amongst others taking into account Robeco's risk appetite and sustainability risk management policies.

Specific details on investment due diligence are available in Robeco's Investment Due Diligence Policy as described at <https://www.robeco.com/docm/docu-robeco-sustainability-risk-policy.pdf>.

#### (k) Engagement policies

What is the engagement policy applied, in the case that engagement is part of the environmental or social investment strategy (including any management procedures applicable to sustainability-related controversies in investee companies)?

The governments and government-related agencies are subject to Robeco's engagement program as Robeco engages in public policy engagement. Engagement with governments, government related agencies, or regulators can add value to our engagement program. Therefore, we take part in consultations and provide feedback on regulations that facilitate a better or level playing field for ESG issues. Engagement is never intended to unduly influence the political process and Robeco only conducts engagement on public policy where it is deemed appropriate and transparent. Most of our engagement activities on this topic are coordinated through the various investor associations and collaborative groups of which we are members (for example AGCA and Eumedion). Policy

engagements that are done via these collaborative platforms can be relevant from an equity investor perspective, from a bondholder perspective, or from both perspectives.

Although policy engagements are not directly related to the environmental or social investment strategy of the fund, it can be that adverse sustainability impacts are addressed via engagement program.

More information can be found in Robeco's [Stewardship Policy](#).

#### (I) Designated reference benchmark

Has an index has been designated as a reference benchmark to meet the environmental or social characteristics promoted by the financial product? If yes, how that index is aligned with the environmental or social characteristics promoted by the financial product, and where can one find information with regards to input data, methodologies used to select those data, the rebalancing methodologies and index calculations?

- The Fund follows the Solactive Paris Aware Global Aggregate Index as a reference index to meet the carbon footprint reduction objective of The Fund and thereby keeping the maximum global temperature rise below 2°C.
- The reference index is aligned with the carbon reduction objective of The Fund by applying a methodology with clearly defined rules for evaluating securities on their carbon footprint. The methodology of the reference index is designed in accordance with the requirements of point (d) of Article 13 (1) of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 (the "Benchmarks Regulation") and of the Commission Delegated Regulation (EU) 2020/1817. This means that amongst others for the corporate bond part, the reference index is aligned with those criteria set out in Article 12 of the EU Climate Transition Benchmarks, EU Paris-aligned Benchmarks and sustainability-related disclosures for benchmarks. The Fund also applies the aforementioned exclusion criteria, and the Fund's overall weighted carbon footprint score in each of the government part and the corporate part is always equal to or better than the respective part of the Solactive Paris Aware Global Aggregate Index.
- The methodology of the reference index follows rebalancing rules on a monthly basis for index eligibility and rebalances on a six month basis for decarbonization, which ensures alignment with the investment strategy and objective of The Fund. The index uses data sourced from Institutional Shareholder Services Inc for corporate issuers and from the Emissions Database for Global Atmospheric Research (EDGAR) for sovereign issuers.
- The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for alignment with the Paris Agreement on decarbonization and on greenhouse gas emission reduction and related exclusions.
- The index methodology can be found on the relevant webpages by the index provider: <https://www.solactive.com/indices/>
