# Robeco BP US Premium Equities\*

## RISK DISCLOSURES

**INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the full amount invested.**

- Robeco BP US Premium Equities ("the Fund") invests primarily in equities of companies incorporated or exercising a preponderant part of their economic activities in the United States.
- The Fund's investments are concentrated in the United States. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the United States market.
- The Fund is subject to market risk, risk relating to small- and/or mid-capped companies and risk of use of financial derivative instruments.
- The Fund may engage in securities lending transactions which may involve the risk that the recipient may fail to return the lent securities on the agreed date or furnish the requested additional collateral if required. This could result in losses and negatively impact the Fund's net asset value.
- Investor should not invest in the Fund solely based on the information provided in this document and should read the offering documents for details (including the risk factors).

## KEY POINTS

### Diversified

Broad-based exposure to U.S. stocks, including large, mid-sized, and small companies.

### High quality

A focus on high quality, inexpensively priced companies with positive business momentum.

### Consistent

A time-tested philosophy and process employed by a long-tenured team yielding consistent results.

## THE OPPORTUNITY

### Finding opportunities in overlooked areas of the US market to complement the expensive growth exposures

By using a bottom up process focused on identifying names with attractive valuation, strong business fundamentals and improving business momentum, the Robeco BP US Premium Equities Fund aims to consistently produce a diversified, highly differentiated portfolio of stocks that are not trading at peak prices with sky-high expectations built in. Many investors in US equities find their portfolios to be highly concentrated on mega-cap consumer, tech and AI names. As the market continues to rotate away from these high-priced names, many high-quality underpriced companies may benefit.

*“ The focus of investors on US mega cap growth businesses has left a wide variety of inexpensive businesses, up and down the market capitalization spectrum, that reflect strong quality and importantly, improving earnings profiles. We focus on finding individual companies that fit our criteria instead of trying to predict macroeconomic outcomes and this has served our clients well over our 30 year history running this strategy.”*

Duilio Ramallo, portfolio manager with 30 years of experience at Boston Partners
