Performance

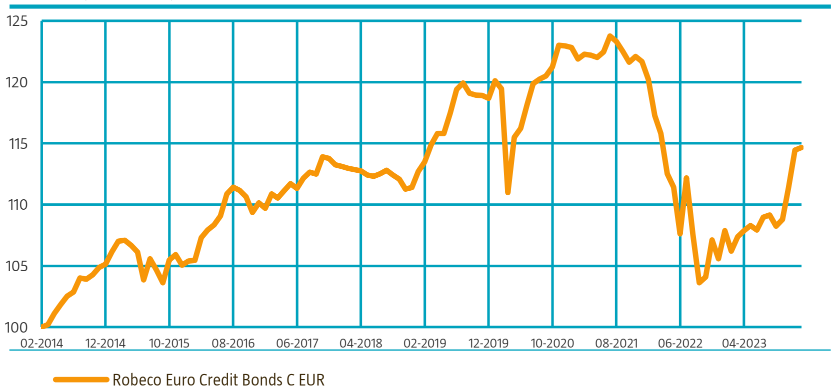
Indexed value (until 31-01-2024) - Source: Robeco



Performance

Based on transaction prices, the fund's return was 0.18%.
The portfolio outperformed its benchmark index, gross of fees. The positive benchmark return was driven by a decrease in underlying government bond yields and a tightening of credit spreads. Specifically, the 10-year German Bund yield exhibited a decline of 43 basis points, reaching 2.02%. Credit spreads tightened in the first half of the month, with the average spread on the Euro Aggregate Corporate Index moving down 9 bps to 138 basis points above government bonds. Performance attribution is split into beta positioning and issuer selection, in line with our investment process. Our small beta overweight position had a positive impact during the month, as index spreads tightened, while we maintained a beta position above one throughout the period. Issuer selection again made a positive contribution this month. Individual names that contributed the most to the relative performance were Cellnex, ABN AMRO, Raiffeisen Bank, Volkswagen and Netflix. Positions that lagged on a risk-adjusted basis were Athora, Enel and NIBC Bank.

Market development

In January, investment grade credit spreads continued their tightening trend, fueled by robust economic indicators on both sides of the Atlantic. In the US, fourth-quarter GDP surged to 3.3%, while unemployment stayed near record lows. Meanwhile, Europe surprised with growth slightly exceeding expectations, evading the threat of a technical recession. Despite this strength, central banks remained cautious, tempering expectations of imminent rate cuts and prompting a rise in underlying government bond yields across both regions. Against this backdrop and following seasonal norms, the new issue market burst into action with unprecedented vigor. Banks, as usual the first ones to issue, flooded the market from day one with a diverse array of bonds ranging from covered bonds to Tier-2 bonds and CoCos. Initially, the market appeared overwhelmed, causing spreads to widen amid the influx of supply. However, investor confidence swiftly reversed this sentiment, lifting the performance of new bond issues and pushing allocations downward. Despite a tepid start, credit spreads rebounded significantly as the month progressed, underscoring the market's resilience amid initial volatility.

Expectation of fund manager

We have reached the end of one of the sharpest hiking cycles in modern history. Economies in Europe and the US have so far moved through it without being derailed. Markets have declared victory and fully embraced a soft landing. However, we remain cautious, as it is likely we have not fully seen the impact of the tightening cycle. Central banks are gradually pivoting, but rate cuts are still a few months away it seems. The market overall has moved a lot and in some parts valuations are outright rich. We believe selection will be key, not all companies are equal, so it is important to remain vigilant and invest in those companies where risk return is properly balanced. For investment grade portfolios, we continue to see value in banks that still trade cheaper on average. Europe has further room to tighten compared to the US credit market. Given the rally that we have witnessed, we are currently targeting our betas for investment grade portfolios to just above 1. We see this as a conservative positioning for this category. Given the improved technical picture, we deem it too early to go underweight risk. And this leaves ample room to increase risk if volatility returns.

Top 10 largest positions

The large issuer positions are in the banking and insurance sector. In non-financials we remained overweight in utilities like EDF and Enel. The holdings in agencies and covered bonds are overweight positions relative to the corporate benchmark.

Fund price

Green Bonds (%, Weighted)	16.5	12.3

Sector allocation

In our portfolio management, we not only factor in weights, but also spreads and durations (DTS). On that basis, we are overweight in financials and underweight in non-financial corporates. The banking sector remains an overweight, while the real estate sector remains an underweight. The fund maintained its overweight positions in agencies, covered bonds and ABS. The position in ABS consists of European residential mortgages and auto loans. The agencies category comprises issuers that are majority-owned by governments.

Sector allocation		Deviation index
Financials	42.3%	-1.1%
Industrials	27.4%	-21.1%
Covered	11.2%	11.2%
Agencies	6.6%	6.6%
Utilities	4.7%	-3.4%
ABS	4.3%	4.3%
Treasuries	1.0%	1.0%
Local Authorities	0.2%	0.2%
Cash and other instruments	2.3%	2.3%

Currency denomination allocation

Most of our bond exposures (more than 95%) are in euros. Some exposures can be in USD or GBP. All currency risks are hedged.

Currency denomination allocation		Deviation index
Euro	97.5%	-2.5%
Pound Sterling	0.2%	0.2%

Duration allocation

The policy of the fund is to have a duration position that is neutral against its benchmark.

Duration allocation		Deviation index
Euro	4.4	0.0

Rating allocation

We have no clear preference for specific rating buckets. Our positioning over the different buckets is therefore the result of beta positioning, sector themes and issuer selection.

Rating allocation		Deviation index
AAA	17.1%	16.8%
AA	4.6%	-3.2%
A	23.4%	-18.3%
BAA	46.1%	-4.1%
BA	5.9%	5.9%
NR	0.6%	0.6%
Cash and other instruments	2.3%	2.3%

Subordination allocation

In the banking sector, we maintained our overweight positions in Tier-1 and Tier-2 debt. The total exposure to Additional Tier-1 bank capital is less than 2%. For several European corporates there is an attractive spread pickup available by moving from senior debt into corporate hybrids.

Subordination type allocation		Deviation index
Senior	84.8%	-6.0%
Tier 2	7.9%	1.7%
Hybrid	3.9%	1.0%
Tier 1	1.1%	1.1%
Cash and other instruments	2.3%	2.3%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process via exclusions, ESG integration, a minimum allocation to ESG-labeled bonds, and engagement. The fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up security analysis to assess the impact on the issuer's fundamental credit quality. In the credit selection the fund limits exposure to issuers with an elevated sustainability risk profile. Furthermore, the fund invests at least 5% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where issuers are flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement.
The following sections display the ESG-metrics for this fund along with short descriptions. For more information please visit the sustainability-related disclosures.
The index used for all sustainability visuals is based on Bloomberg Euro Aggregate: Corporates.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

	Portfolio weight	Index weight
Green Bonds	16.50%	12.30%
Social Bonds	0.74%	1.09%
Sustainable Bonds	0.00%	0.63%
Sustainability-Linked Bonds	0.00%	2.44%

Engagement

Robeco distinguishes between three types of engagement.
Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	13.81%	25	101
Environmental	7.38%	13	55
Social	2.90%	8	23
Governance	3.10%	5	9
Sustainable Development Goals	0.71%	2	8
Voting Related	1.15%	1	1
Enhanced	0.27%	1	5

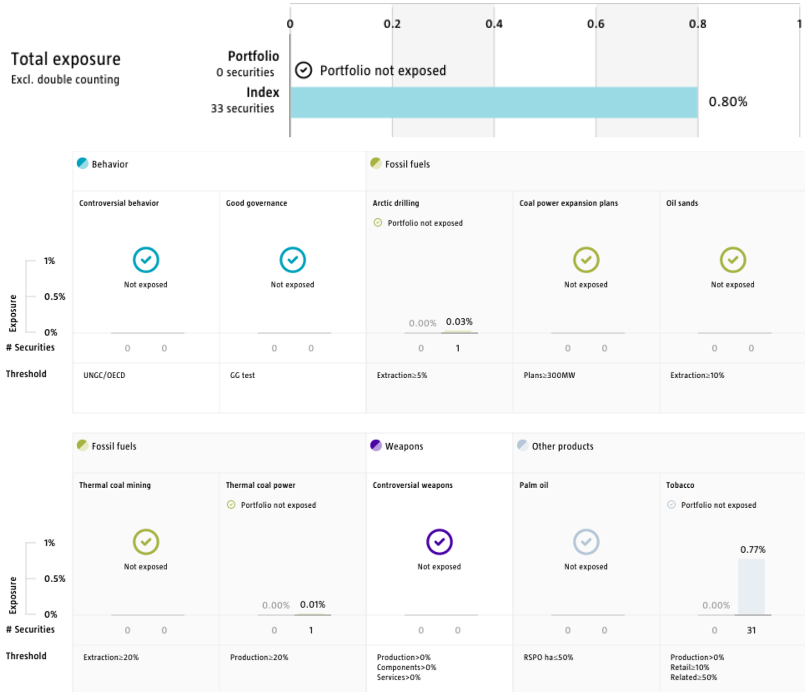
Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.



Source: We use several data sources such as Sustainalytics, RSPO (Roundtable on Sustainable Palm Oil), World Bank, Freedom House, Fund for Peace and International Sanctions; further policy document available Exclusion Policy

Investment policy

Robeco Euro Credit Bonds is an actively managed fund that provides a diversified exposure to the euro investment grade credit market. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long-term capital growth. The fund implements beta policy, sector rotation, off-benchmark positioning in emerging market, covered bonds or limitedly high yield. The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy.The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and engagement.
The majority of bonds selected will be components of the benchmark, but bonds outside the benchmark may be selected too. The fund can deviate substantially from the weightings of the benchmark. The fund aims to outperform the benchmark over the long run, while still controlling relative risk through the application of limits (on currencies and issuers) to the extent of the deviation from the benchmark. This will consequently limit the deviation of the performance relative to the benchmark. The benchmark is a broad market-weighted index that is not consistent with the ESG characteristics promoted by the fund.

Fund manager's CV

Peter Kwaak is Portfolio Manager Investment Grade in the Credit team. Prior to joining Robeco in 2005, he was Portfolio Manager Credits at Aegon Asset Management for three years and at NIB Capital for two years. Peter has been active in the industry since 1998. He holds a Master's in Economics from Erasmus University Rotterdam and he is a CFA® charterholder. Jan Willem de Moor is Portfolio Manager Investment Grade in the Credit team. Prior to joining Robeco in 2005, he worked at the Dutch Medical professionals' pension fund as an Equity Portfolio Manager and at SNS Asset Management as an Equity Portfolio Manager. Jan Willem has been active in the industry since 1994. He holds a Master's in Economics from Tilburg University.

Team info

The Robeco Euro Credit Bonds fundis managed within Robeco's credit team, which consists of nine portfolio managers and twenty-three credit analysts (of which four financials analysts). The portfolio managers are responsible for the construction and management of the credit portfolios, whereas the analysts cover the team's fundamental research. Our analysts have long term experience in their respective sectors which they cover globally. Each analyst covers both investment grade and high yield, providing them an information advantage and benefiting from inefficiencies that traditionally exist between the two segmented markets. Furthermore, the credit team is supported by dedicated quantitative researchers and fixed income traders. On average, the members of the credit team have an experience in the asset management industry of seventeen years, of which eight years with Robeco.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
