

Robeco 3D EM Equity UCITS ETF USD Acc

Robeco 3D EM Equity UCITS ETF is an actively managed Sub-fund that invests in stocks of companies in emerging markets and will apply the Manager's "3D" investment strategy, which seeks to consider risk, return and sustainability in the Sub-fund's portfolio. The Sub-fund's portfolio will be optimised using a quantitative process to target returns in excess of the Benchmark, sustainability characteristics better than the Benchmark and to manage risk compared to the Benchmark. The three dimensions of risk, return and sustainability are considered together in the Manager's proprietary quantitative stock-ranking model.

Investment policy

Robeco 3D EM Equity UCITS ETF is an actively managed Sub-fund that invests in stocks of companies in emerging markets and will apply the Manager's "3D" investment strategy, which seeks to consider risk, return and sustainability in the Sub-fund's portfolio. The Sub-fund's portfolio will be optimised using a quantitative process to target returns in excess of the Benchmark, sustainability characteristics better than the Benchmark and to manage risk compared to the Benchmark. The three dimensions of risk, return and sustainability are considered together in the Manager's proprietary quantitative stock-ranking model.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in the prospectus.

Key risks

- The value of shares is sensitive to market fluctuations, instrument prices, and changes in political, economic, or market conditions. Emerging and frontier markets are usually characterised by less stable political and economic environment. This may result in larger price movements, increased volatility and potentially lower liquidity compared to developed markets.
- The fund may use financial derivatives.
- A (derivative) counterparty may fail to fulfil its obligations. Counterparty risk is reduced by exchanging collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which may affect their value.
- The fund is managed using quantitative models. Materialisation of the model risk may adversely affect fund performance.
- Sustainability risk factors may negatively impact investment returns. This fund promotes ESG characteristics but does not have a sustainability objective.
