

Credit Quarterly Outlook Q4 2021

Common prosperity

- China is changing; what does this mean for the world?
- There's no room for error priced into credit markets
- When will financial repression end?

In our previous outlook we used the word 'humble' when it came to forecasting the economy, given the degree of distortion and unpredictability created by the reopening process. Three months on, we still believe that humility is called for. Aside from the difficulty of making predictions in the current environment, one also wonders about their relevance. Do fundamentals still matter in a world of financial repression, in which monetary and fiscal policymakers set the stage? It seems that markets have for years downplayed the role of fundamentals; one scenario in which the relationship between fundamentals and markets might return is when central banks loosen their grip. The key questions for markets are therefore: when will that happen and should we be looking at central bank signaling, the stock of liquidity, the flow of liquidity or even the delta of the flow in liquidity? With valuations stretched and positioning crowded, we think that the market might be vulnerable to the *delta of the flow*.

Yet while the inflation debate is not yet settled, there are other questions to consider given that tapering is now widely anticipated. Instead, we should be prepared for some less well-flagged (and therefore more surprising) themes that could drive the normalization of risk premia in credit markets.

Outlook Q4 2021

For professional investors
September 2021

Victor Verberk & Sander Bus
Co-heads Credit team

Jamie Stuttard
Credit strategist

In our previous outlook we discussed the long-term possibility of developed markets turning away from neo-liberalism, which has been highly beneficial for capital at the expense of labor, and which has led to growing social inequality. In August, President Xi Jinping announced the 'common prosperity' plans that addresses exactly that point. China will shift its focus from outright growth to more balanced growth, in a way that addresses inequality and sustainability issues. The sharpening in focus is very relevant for certain sectors but, in conjunction with property sector measures and Covid restrictions, will probably also have a dampening impact on global growth.

With spreads still near an all-time tight, a cautious positioning makes sense to us. At the margin, we like financial institution credit more than other credit sub-sectors.

Fundamentals

We feel that the entire market is so focused on inflation expectations that other potentially more important market drivers might be overlooked. China has been the key engine of global growth for the last 15 years. With China now seemingly at a turning point we believe that it is probably more important than ever to monitor developments there closely. We therefore devoted additional time to discussing the economic and policy situation in China where a zero-Covid strategy, regulatory tightening in the property market and a policy reset are all contributing to increased uncertainty.

'Common prosperity [policy] will be enacted gradually. There will be a tighter grip on some sectors, but this does not mean the end of private markets in China; these are simply too important for the economy'

The zero-Covid strategy was a success in 2020 but now feels more like a double-edged sword. The virus will continue to pop up and each time that happens the harsh containment measures hurt mobility and consumption. But, given that the service sector is most sensitive to lockdowns, compared to the more immune manufacturing sector, a purely Covid-induced Chinese slowdown would not hit the global economy as badly: China's service sector is largely domestic and its products are non-tradable. However, sticking to this policy for too

long will not help an economy that already has to deal with the impact of tighter regulation of its property market.

It is obvious that there is froth in the property market and that, given widespread moral hazard, tighter regulation was needed. For now, the uncertainty for the market is whether or not the authorities have overtightened and what the fall-out will be of an Evergrande restructuring. We remember all too well how a combination of froth and high leverage in a housing market can eventually result in a systemic shock. The CBIRC (the China Banking and Insurance Regulatory Commission) cannot afford a mistake here. Higher risk premia are justified to discount for this risk and do not represent an immediate buying opportunity. Let us emphasize that we do not anticipate Evergrande to be the 'Lehman' of China, as Beijing is expected to do *almost* anything in its powers to avoid a systemic crisis. But some fall-out is very likely. Indeed, to remove moral hazard, one or two headline corporate failures may be needed.

Furthermore, in a crisis there always are more interconnections than one can imagine, be it via suppliers or funding channels. Amid mixed disclosure, uncertainties around the size of local government debt, wealth management products, developer exposure and commercial paper, the precise scale and specifics are unknowable even ex ante. An engineered controlled restructuring and some further easing of monetary and fiscal policy is probable. After all, events at Evergrande (like the prior events at Huarong, Baoshang and HNA Group) are just another episode in a multi-year process of policy-driven de-leveraging following the largest nominal credit boom in history.

The last overhang in China is the policy reset where the Chinese leadership wants to shift from outright growth to balancing growth with sustainability and social equality. This policy, labeled 'common prosperity', will be enacted gradually. There will be a tighter grip on some sectors, but this does not mean the end of private markets in China; these are simply too important for the economy.

Nevertheless, the shift will have serious repercussions on certain sectors such as big tech, gaming and tutoring. It is yet to be seen what this new policy means for China's role as the world's manufacturing hub should they succeed in the policy goal to raise low-income wages further and increase labor's share in income. We note this contributes to Sustainable Development Goals (SDGs) 1, 2, 8 and especially 10. As a sustainable investment manager, we applaud the official ambition to strive for carbon neutrality by 2060.

Fighting climate change has rapidly become an important topic in capital markets, anyway. The International Energy Agency estimates that achieving net zero emissions will require annual investments of around USD 5 trillion. Some economists see these large investments as a way out of secular stagnation, as growth and inflation are lifted. Also, on a micro level, we see that climate policies are playing an increasingly important role in companies' strategies.

'The immediate Covid crisis seems to be over, but the virus still has the potential to derail the recovery, perhaps via further disruption to supply chains'

Besides the potential slowdown in China, there are many other sources of uncertainty globally. First and foremost, we are still not out of the woods on Covid-19. Forecasters seem to be relaxed about the virus and the narrative continues to be that we will be back to normal in three months' time. But why would delta be the last economically impactful mutation of the Covid era? Maybe it will be, maybe not. The immediate Covid crisis seems to be over, but the virus still has the potential to derail the recovery, perhaps via further disruption to supply chains (in which case central banks will continue to stimulate and credit markets might not budge). Labor supply is still tighter than pre-Covid, which could support higher wages.

Inflation has been the main focus for markets and is extensively discussed in the [Global Macro team's quarterly outlook](#). All we want to say here is that the inflation debate will not be resolved in the coming months and will cause heated discussions from time to time. It has the potential to cause some volatility, given the evident two-way risks. A key metric to watch is wage inflation, as this might give an indication on the persistence of inflation and tightness in labor markets. This holds for Europe as well as the US. Indications of more structural wage inflation would be important signals for the Fed and the ECB that it is time to speed up tightening plans. On the other hand, the role of elevated energy prices as a 'tax' on spending, and institutional memories of the ECB's policy mistakes by way of rate hikes in the summer of 2008 and 2011 – when oil prices were respectively at USD 150 and USD 100 – no doubt still linger.

Closely related to the inflation debate are the supply chain constraints plaguing many sectors. It started with semiconductors for the automotive industry but there are now shortages of many other inputs, such as containers,

truck drivers, electricity and even raw materials for mattresses. Each has its own explanation, but the bottom line is that supply is falling short of demand. The majority of companies that are faced with higher input costs are able to pass on these higher costs as demand is robust across the board. Our sector analysts confirm that corporate profitability is strong and that margins are well protected. It is unclear if we have seen the peak in raw material price increases, as we get mixed signals from commodity markets (lumber plunging, gas skyrocketing). We have to watch this closely as idiosyncratic risk will probably increase on the back of the swings in input prices.

Valuations

Spread markets have moved in a very narrow range during the last quarter. The exception is China high yield, where spreads have widened substantially on the back of the Evergrande issues and signs of weakness in the Chinese economy. Although we must admit that we were too early with our underweight beta position, we still feel comfortable holding on to this position. At current spreads the cost of running a small underweight beta is low.

The search for yield has resulted in very compressed markets where even troubled credits have performed well. This is not the easiest environment for a bottom-up manager that invests according to the adage 'winning by not losing'. Still, we take comfort from our belief that our credit work will pay off when markets turn and start to distinguish between the good and the bad. Meanwhile, results from stock picking have been good for most portfolios.

Although it is conceivable that the current low-spread environment could last for longer, it is our fiduciary duty to also evaluate tail risks: it is very clear to us that the current spreads do not discount any of these risks, i.e. there is no room for error. We have been in this situation before, where tight spreads seemed to last forever – until the music suddenly stopped. The trigger is often hard to pinpoint in advance, but easy with hindsight. For us it is enough to conclude that markets do not offer adequate compensation in a world that is full of potential sources of turbulence.

There are always opportunities on a relative basis. Within European credit, we still see value in financial institutions. Massive fiscal support from the EU into the periphery has reduced systemic risk, which supports domestic banks. At the same time banks should be better shielded against a potentially more inflationary environment.

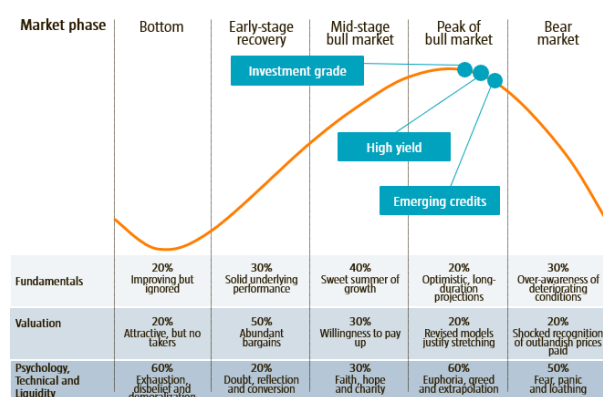

Within corporates we see value in rising stars where the upgrade to investment grade (IG) is not fully reflected in valuations yet. We play this theme both in the IG as well as in the high yield portfolios.

‘Steering away from the losing companies is likely to pay off in this environment’

Within emerging markets, spreads have widened for good reason. Here we look for opportunities in names that saw their spreads widen in sympathy, without this being justified by their fundamentals. We expect to see more opportunities if unrelated sectors start to widen on the back of the Evergrande denouement. That said, ‘winning by not losing’ will be an important strategy here, too, as volatility could very well rise further. Steering away from the losing companies is likely to pay off in this environment.

Within high yield, the CCC-rated segment is outrageously expensive. Average bond prices are now above par. Why do we look at bond prices for this category? Default risk is very high for CCC (five-year cumulative average default rates are close to 50%), so downside risk for any given bond is substantial. That is fine as long as the market also offers opportunities for price appreciation in the credits that survive. That potential upside is absent with prices above par and bonds being call constrained. In other words, the convexity is very negative.

Market cycle | Mapping our view on market segments

Technicals

Central bank policies have for years been the driving force in credit markets and dwarfed all else. And where fundamentals have mattered, they have done so in a counterintuitive way: the worse they got, the better it ultimately was for credit, due to the policy response. It is only human to extrapolate these recent experiences into perpetuity and assume that central banks will continue to support us. We had a lively debate again on the question of what exactly to look for in central banks’ asset purchase programs. Is it simply the sheer size of the central bank balance sheet (stock) that drives the market? Or is it the amount of purchases (flows) that are more important. Or could it even be the delta in the flow? This could be seen as a rather theoretical discussion but, given the tight valuations and the seemingly crowded long positions in credit, it is not inconceivable that even a slight change in central bank policy could disturb markets.

Separate from the stock, flow or delta discussion we should also consider the announcement effect of policy changes. Our Global Macro colleagues meticulously scrutinize every statement by the Fed and the ECB to find clues of potential policy changes. It is clear that the Fed is further ahead on the way to normalization with the groundwork for tapering already being prepared. The ECB umbrella is there, because even once the PEPP program is wound down, the APP program (which is where the CSPP program lies) is set to remain. There are no signs whatsoever that the ECB might stop buying what is in effect 20% of the European gross corporate supply.

So even though it is very clear that central banks will not stop buying bonds in the near future, we still believe it is warranted to call the technical factor neutral instead of strong. The marginal change in policy is negative. We are moving from extremely accommodative policies to very accommodative policies.

Although any other technical factor is dwarfed by what the Fed and ECB are doing, we believe it is still worth looking at other potential market drivers. This is not least because, as the initial Covid shock demonstrated, if a left-hand tail surprise is big enough, spreads can still widen materially in the short run – even when QE is already in operation.

The weakness in Asian credit markets has so far not led to any global contagion. That is somewhat surprising given the importance of Asian flows for US and European markets, trade linkages and China’s outsized contribution to marginal global GDP growth. With the Evergrande story now rapidly approaching its climax, we are closely monitoring potential transmission of risks via unforeseen

interconnections. We have spoken before about the private debt boom in China. History shows us that there are few examples of unsustainable private debt booms that have unwound smoothly. Chinese private debt is at elevated levels and, with Evergrande and Huarong, larger cracks have appeared. Higher risk premia for Chinese credit are justified and we should not rule out a spill-over into other regions.

The bottom line is that we no longer call technicals strong. It is the change we are concerned about.

Positioning

Most likely, the credit market will at best deliver a coupon excess return – in other words, a boring or bearish year [as we forecast in December 2020](#). We still think it is better to be positioned on the cautious side, even if that means that we lose some carry. ‘All signs on green’ has become the widely shared view for credit, and as a contrarian investor that is a red flag to us. This is a market that no longer compensates for tail risks and which is vulnerable to negative surprises.

Even though optically the beta position for some portfolios looks very low in terms of risk points (Duration Times Spread or ‘DTS’) the underweights are not excessive. A 100 risk-point underweight in a low-spread environment gives you a much larger beta deviation than in a high-spread environment, while the tracking error contribution is identical.

Given the very low dispersion in markets, it no longer pays to reach out for the riskier names. Nevertheless, we still find opportunities in banks, rising stars and some idiosyncratic cases. Our positioning is consistent across all credit categories.

Guests:

We would like to thank the guests who contributed to this quarterly outlook with their valuable presentations and discussions. The views of Rikkert Scholten, Martin van Vliet and Jamie Stuttard (Robeco), Robin Xing (Morgan Stanley), Matt King (Citigroup) and Michael Anderson (Citigroup) have been taken into account in establishing our credit views.

Important Information

Robeco Institutional Asset Management B.V. has a license as manager of Undertakings for Collective Investment in Transferable Securities (UCITS) and Alternative Investment Funds (AIFs) ("Fund(s)") from the Netherlands Authority for the Financial Markets in Amsterdam. This marketing document is intended solely for professional investors, defined as investors qualifying as professional clients, who have requested to be treated as professional clients or are authorized to receive such information under any applicable laws. Robeco Institutional Asset Management B.V. and/or its related, affiliated and subsidiary companies, ("Robeco"), will not be liable for any damages arising out of the use of this document. Users of this information who provide investment services in the European Union have their own responsibility to assess whether they are allowed to receive the information in accordance with MiFID II regulations. To the extent this information qualifies as a reasonable and appropriate minor non-monetary benefit under MiFID II, users that provide investment services in the European Union are responsible for complying with applicable recordkeeping and disclosure requirements. The content of this document is based upon sources of information believed to be reliable and comes without warranties of any kind. Without further explanation this document cannot be considered complete. Any opinions, estimates or forecasts may be changed at any time without prior warning. If in doubt, please seek independent advice. This document is intended to provide the professional investor with general information about Robeco's specific capabilities but has not been prepared by Robeco as investment research and does not constitute an investment recommendation or advice to buy or sell certain securities or investment products or to adopt any investment strategy or legal, accounting or tax advice. All rights relating to the information in this document are and will remain the property of Robeco. This material may not be copied or shared with the public. No part of this document may be reproduced or published in any form or by any means without Robeco's prior written permission. Investment involves risks. Before investing, please note the initial capital is not guaranteed. Investors should ensure they fully understand the risk associated with any Robeco product or service offered in their country of domicile. Investors should also consider their own investment objective and risk tolerance level. Historical returns are provided for illustrative purposes only. The price of units may go down as well as up and past performance is no guarantee of future results. If the currency in which the past performance is displayed differs from the currency of the country in which you reside, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency. The performance data do not take account of the commissions and costs incurred when trading securities in client portfolios or for the issue and redemption of units. Unless otherwise stated, the prices used for the performance figures of the Luxembourg-based Funds are the end-of-month transaction prices net of fees up to 4 August 2010. From 4 August 2010, the transaction prices net of fees will be those of the first business day of the month. Return figures versus the benchmark show the investment management result before management and/or performance fees; the Fund returns are with dividends reinvested and based on net asset values with prices and exchange rates as at the valuation moment of the benchmark. Please refer to the prospectus of the Funds for further details. Performance is quoted net of investment management fees. The ongoing charges mentioned in this document are the ones stated in the Fund's latest annual report at closing date of the last calendar year. This document is not directed to or intended for distribution to or for use by any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, document, availability or use would be contrary to law or regulation or which would subject any Fund or Robeco Institutional Asset Management B.V. to any registration or licensing requirement within such jurisdiction. Any decision to subscribe for interests in a Fund offered in a particular jurisdiction must be made solely on the basis of information contained in the prospectus, which information may be different from the information contained in this document. Prospective applicants for shares should inform themselves as to legal requirements which may also apply and any applicable exchange control regulations and taxes in the countries of their respective citizenship, residence or domicile. The Fund information, if any, contained in this document is qualified in its entirety by reference to the prospectus, and this document should, at all times, be read in conjunction with the prospectus. Detailed information on the Fund and associated risks is contained in the prospectus. The prospectus and the Key Investor Information Document for the Robeco Funds can all be obtained free of charge from Robeco's websites.

Additional Information for US investors

Robeco is considered "participating affiliated" and some of their employees are "associated persons" of Robeco Institutional Asset Management US Inc. ("RIAM US") as per relevant SEC no-action guidance. Employees identified as associated persons of RIAM US perform activities directly or indirectly related to the investment advisory services provided by RIAM US. In those situations these individuals are deemed to be acting on behalf of RIAM US, a US SEC registered investment adviser. SEC regulations are applicable only to clients, prospects and investors of RIAM US. RIAM US is a wholly owned subsidiary of ORIX Corporation Europe N.V. and offers investment advisory services to institutional clients in the US.

Additional Information for investors with residence or seat in Australia and New Zealand

This document is distributed in Australia by Robeco Hong Kong Limited (ARBN 156 512 659) ("RIAM BV"), which is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 (Cth) pursuant to ASIC Class Order 03/1103. Robeco is regulated by the Securities and Futures Commission under the laws of Hong Kong and those laws may differ from Australian laws. This document is distributed only to "wholesale clients" as that term is defined under the Corporations Act 2001 (Cth). This document is not intended for distribution or dissemination, directly or indirectly, to any other class of persons. In New Zealand, this document is only available to wholesale investors within the meaning of clause 3(2) of Schedule 1 of the Financial Markets Conduct Act 2013 (FMCA). This document is not intended for public distribution in Australia and New Zealand.

Additional Information for investors with residence or seat in Austria

This information is solely intended for professional investors or eligible counterparties in the meaning of the Austrian Securities Oversight Act.

Additional Information for investors with residence or seat in Brazil

The Fund may not be offered or sold to the public in Brazil. Accordingly, the Fund has not been nor will be registered with the Brazilian Securities Commission (CVM), nor has it been submitted to the foregoing agency for approval. Documents relating to the Fund, as well as the information contained therein, may not be supplied to the public in Brazil, as the offering of the Fund is not a public offering of securities in Brazil, nor may they be used in connection with any offer for subscription or sale of securities to the public in Brazil.

Additional Information for investors with residence or seat in Brunei

The Prospectus relates to a private collective investment scheme which is not subject to any form of domestic regulations by the Autoriti Monetari Brunei Darussalam ("Authority"). The Prospectus is intended for distribution only to specific classes of investors as specified in section 20 of the Securities Market Order, 2013, and must not, therefore, be delivered to, or relied on by, a retail client. The Authority is not responsible for reviewing or verifying any prospectus or other documents in connection with this collective investment scheme. The Authority has not approved the Prospectus or any other associated documents nor taken any steps to verify the information set out in the Prospectus and has no responsibility for it. The units to which the Prospectus relates may be illiquid or subject to restrictions on their resale. Prospective purchasers of the units offered should conduct their own due diligence on the units.

Additional Information for investors with residence or seat in Canada

No securities commission or similar authority in Canada has reviewed or in any way passed upon this document or the merits of the securities described herein, and any representation to the contrary is an offence. Robeco Institutional Asset Management B.V. relies on the international dealer and international adviser exemption in Quebec and has appointed McCarthy Tétrault LLP as its agent for service in Quebec.

Additional information for investors with residence or seat in the Republic of Chile

Neither Robeco nor the Funds have been registered with the *Comisión para el Mercado Financiero* pursuant to Law no. 18.045, the *Ley de Mercado de Valores* and regulations thereunder. This document does not constitute an offer of or an invitation to subscribe for or purchase shares of the Funds in the Republic of Chile, other than to the specific person who individually requested this information on their own initiative. This may therefore be treated as a "private offering" within the meaning of article 4 of the *Ley de Mercado de Valores* (an offer that is not addressed to the public at large or to a certain sector or specific group of the public).

Additional Information for investors with residence or seat in Colombia

This document does not constitute a public offer in the Republic of Colombia. The offer of the Fund is addressed to fewer than one hundred specifically identified investors. The Fund may not be promoted or marketed in Colombia or to Colombian residents, unless such promotion and marketing is made in compliance with Decree 2555 of 2010 and other applicable rules and regulations related to the promotion of foreign Funds in Colombia.

Additional Information for investors with residence or seat in the Dubai International Financial Centre (DIFC), United Arab Emirates

This material is distributed by Robeco Institutional Asset Management B.V. (DIFC Branch) located at Office 209, Level 2, Gate Village Building 7, Dubai International Financial Centre, Dubai, PO Box 482060, UAE. Robeco Institutional Asset Management B.V. (DIFC Branch) is regulated by the Dubai Financial Services Authority ("DFSA") and only deals with Professional Clients or Market Counterparties and does not deal with Retail Clients as defined by the DFSA.

Additional Information for investors with residence or seat in France

Robeco Institutional Asset Management B.V. is at liberty to provide services in France. Robeco France is a subsidiary of Robeco whose business is based on the promotion and distribution of the group's funds to professional investors in France.

Additional Information for investors with residence or seat in Germany

This information is solely intended for professional investors or eligible counterparties in the meaning of the German Securities Trading Act.

Additional Information for investors with residence or seat in Hong Kong

The contents of this document have not been reviewed by the Securities and Futures Commission ("SFC") in Hong Kong. If there is in any doubt about any of the contents of this document, independent professional advice should be obtained. This document has been distributed by Robeco Hong Kong Limited ("Robeco"). Robeco is regulated by the SFC in Hong Kong.

Additional Information for investors with residence or seat in Indonesia

The Prospectus does not constitute an offer to sell nor a solicitation to buy securities in Indonesia.

Additional Information for investors with residence or seat in Italy

This document is considered for use solely by qualified investors and private professional clients (as defined in Article 26 (1) (b) and (d) of Consob Regulation No. 16190 dated 29 October 2007). If made available to Distributors and individuals authorized by Distributors to conduct promotion and marketing activity, it may only be used for the purpose for which it was conceived. The data and information contained in this document may not be used for communications with Supervisory Authorities. This document does not include any information to determine, in concrete terms, the investment inclination and, therefore, this document cannot and should not be the basis for making any investment decisions.

Additional Information for investors with residence or seat in Japan

This document is considered for use solely by qualified investors and is distributed by Robeco Japan Company Limited, registered in Japan as a Financial Instruments Business Operator, [registered No. the Director of Kanto Local Financial Bureau (Financial Instruments Business Operator), No, 2780, Member of Japan Investment Advisors Association].

Additional Information for investors with residence or seat in South Korea

The Management Company is not making any representation with respect to the eligibility of any recipients of the Prospectus to acquire the Shares therein under the laws of South Korea, including but not limited to the Foreign Exchange Transaction Act and Regulations thereunder. The Shares have not been registered under the Financial Investment Services and Capital Markets Act of Korea, and none of the Shares may be offered, sold or delivered, or offered or sold to any person for re-offering or resale, directly or indirectly, in South Korea or to any resident of South Korea except pursuant to applicable laws and regulations of South Korea.

Additional Information for investors with residence or seat in Liechtenstein

This document is exclusively distributed to Liechtenstein-based, duly licensed financial intermediaries (such as banks, discretionary portfolio managers, insurance companies, fund of funds) which do not intend to invest on their own account into Fund(s) displayed in the document. This material is distributed by Robeco Switzerland Ltd, postal address: Josefstrasse 218, 8005 Zurich, Switzerland. LGT Bank Ltd., Herrengasse 12, FL-9490 Vaduz, Liechtenstein acts as the representative and paying agent in Liechtenstein. The prospectus, the Key Investor Information Documents (KIIDs), the articles of association, the annual and semi-annual reports of the Fund(s) may be obtained from the representative or via the website.

Additional Information for investors with residence or seat in Malaysia

Generally, no offer or sale of the Shares is permitted in Malaysia unless where a Recognition Exemption or the Prospectus Exemption applies: NO ACTION HAS BEEN, OR WILL BE, TAKEN TO COMPLY WITH MALAYSIAN LAWS FOR MAKING AVAILABLE, OFFERING FOR SUBSCRIPTION OR PURCHASE, OR ISSUING ANY INVITATION TO SUBSCRIBE FOR OR PURCHASE OR SALE OF THE SHARES IN MALAYSIA OR TO PERSONS IN MALAYSIA AS THE SHARES ARE NOT INTENDED BY THE ISSUER TO BE MADE AVAILABLE, OR MADE THE SUBJECT OF ANY OFFER OR INVITATION TO SUBSCRIBE OR PURCHASE, IN MALAYSIA. NEITHER THIS DOCUMENT NOR ANY DOCUMENT OR OTHER MATERIAL IN CONNECTION WITH THE SHARES SHOULD BE DISTRIBUTED, CAUSED TO BE DISTRIBUTED OR CIRCULATED IN MALAYSIA. NO PERSON SHOULD MAKE AVAILABLE OR MAKE ANY INVITATION OR OFFER OR INVITATION TO SELL OR PURCHASE THE SHARES IN MALAYSIA UNLESS SUCH PERSON TAKES THE NECESSARY ACTION TO COMPLY WITH MALAYSIAN LAWS.

Additional Information for investors with residence or seat in Mexico

The Funds have not been and will not be registered with the National Registry of Securities, maintained by the Mexican National Banking and Securities Commission and, as a result, may not be offered or sold publicly in Mexico. Robeco and any underwriter or purchaser may offer and sell the funds in Mexico on a private placement basis to Institutional and Accredited Investors, pursuant to Article 8 of the Mexican Securities Market Law.

Additional Information for investors with residence or seat in Peru

The Fund has not been registered with the Superintendencia del Mercado de Valores (SMV) and is being placed by means of a private offer. SMV has not reviewed the information provided to the investor. This document is only for the exclusive use of institutional investors in Peru and is not for public distribution.

Additional Information for investors with residence or seat in Shanghai

This material is prepared by Robeco Overseas Investment Fund Management (Shanghai) Limited Company (“Robeco Shanghai”) and is only provided to the specific objects under the premise of confidentiality. Robeco Shanghai was registered as a private fund manager with the Asset Management Association of China in September 2018. Robeco Shanghai is a wholly foreign-owned enterprise established in accordance with the PRC laws, which enjoys independent civil rights and civil obligations. The statements of the shareholders or affiliates in the material shall not be deemed to a promise or guarantee of the shareholders or affiliates of Robeco Shanghai, or be deemed to any obligations or liabilities imposed to the shareholders or affiliates of Robeco Shanghai.

Additional Information for investors with residence or seat in Singapore

This document has not been registered with the Monetary Authority of Singapore (“MAS”). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled “Important Information for Singapore Investors”) contained in the prospectus. Investors should consult your professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled “Important Information for Singapore Investors” of the prospectus (“Sub-Funds”) are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore (“SFA”) and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.

Additional Information for investors with residence or seat in Spain

Robeco Institutional Asset Management B.V., Sucursal en España with identification number W0032687F and having its registered office in Madrid at Calle Serrano 47-14^º, is registered with the Spanish Commercial Registry in Madrid, in volume 19.957, page 190, section 8, sheet M-351927 and with the National Securities Market Commission (CNMV) in the Official Register of branches of European investment services companies, under number 24. The investment funds or SICAV mentioned in this document are regulated by the corresponding authorities of their country of origin and are registered in the Special Registry of the CNMV of Foreign Collective Investment Institutions marketed in Spain.

Additional Information for investors with residence or seat in South Africa

Robeco Institutional Asset Management B.V. is registered and regulated by the Financial Sector Conduct Authority in South Africa.

Additional Information for investors with residence or seat in Switzerland

The Fund(s) are domiciled in Luxembourg. This document is exclusively distributed in Switzerland to qualified investors as defined in the Swiss Collective Investment Schemes Act (CISA). This material is distributed by Robeco Switzerland Ltd, postal address: Josefstrasse 218, 8005 Zurich. ACOLIN Fund Services AG, postal address: Affolternstrasse 56, 8050 Zürich, acts as the Swiss representative of the Fund(s).
