

## Swing factors and entry/exit fees

Robeco believes that it is good stewardship to protect shareholders in a mutual fund from performance dilution caused by transaction costs arising from subscriptions and redemptions. For that reason swing pricing (full or partial) or an entry/exit fee is used to protect existing shareholders in our funds.

The actual swing factors can be found below. Please note that in the case of large cashflows the swing factor or entry/exit fee may be amended to cover for the estimated additional transaction costs.

Please note that the levels below are indications as they may be amended any time, without prior notice, if this deems necessary.

More information regarding the methodology can be found in the [Swing Pricing Flyer](#) on the website [robeco.com/riam](http://robeco.com/riam).

The transaction price is the net asset value of the fund per share -- depending on the net cash flow -- plus or minus the swing factor.
