

Finding value in today's commodity cycle

- Geopolitics, inflation and the AI build-out are pushing up commodity prices
- Higher prices are enabling some companies to return cash to shareholders
- We see opportunity in energy subsectors as well as miners of gold and copper

In this article, Robeco's sister company Boston Partners takes a look at the push and pull dynamics affecting today's commodities markets and how they're creating opportunities for value investors.

Macroeconomic forces and commodity-specific drivers have combined to fuel a strong commodity upcycle over the past year, shining a light on traditional value-oriented sectors like Energy and Materials. We believe that the current environment provides an opportunity for active managers to outperform based on selecting companies with the strongest combination of valuation, fundamentals and earnings momentum.

In our view, healthy companies that exercise capital discipline and do not rely on peak-cycle prices for profitability are best positioned to generate large amounts of free cash flow and benefit from the windfalls of higher commodity prices.

“The AI infrastructure buildout drives demand for commodities like copper and silver that are crucial to electrification

What is driving the commodity cycle?

There are several macroeconomic drivers pushing commodities prices higher. The first is geopolitics: a reordering of global trade, the return of armed conflict, and new central bank reserve management behaviors. Reshoring, re-industrialization, and remilitarization all create commodity demand, while conflicts like the Iran war and Russia's invasion of Ukraine create supply shocks.

The second is the macro backdrop. Structurally higher fiscal deficits and persistently higher inflation relative to the post-Global Financial Crisis period are driving demand for real assets. And third, the AI infrastructure buildout drives demand for commodities like copper and silver that are crucial to electrification.

The above, along with other individual sector-driven tailwinds, have driven gains in commodity-linked sectors like Energy and Materials, and create an opportunity set for active managers. Three areas that exemplify this dynamic are oil/energy, gold and copper.

ARTICLE OCTOBER 2026

Oil/Energy

For oil and the broader energy complex, 2026 has been a story of supply shocks driven by geopolitics. Many analysts started the year worried about downside risks to oil prices from a potential supply glut: the issue of OPEC+ spare capacity coupled with expectations that non-OPEC+ countries like Brazil and Guyana would increase production.

Those concerns changed quickly with the onset of the Iran war, which saw the closing of the Strait of Hormuz and what many analysts have called the largest oil supply shock on record. Brent and WTI crude oil prices rose above USD 120/barrel and USD 110/barrel, respectively, in immediate response to the closing of the Strait. Oil prices have since fluctuated widely, driven by a variety of factors, including on-again/ off-again peace negotiations, redirection of Persian Gulf oil flows, 'dark fleet' tankers still transiting through the Strait, increased production from non-Gulf producers, and demand switching (most notably from China).

While oil prices dominate headlines, oil products such as gasoline, diesel and jet fuel are experiencing even sharper impacts that are commonly referred to as higher 'crack spreads'. This not only comes from the disruptions caused by the Iran war, but also from Ukraine's targeting of Russian oil refineries as it looks to gain leverage in that war. As long as these conflicts persist and uncertainty remains, there is likely to be a risk premium in energy commodities.

"While oil prices dominate headlines, oil products such as gasoline, diesel and jet fuel are experiencing even sharper impacts that are commonly referred to as higher 'crack spreads'"

Figure 2: The costs of refined products have risen

Source: Bloomberg, Boston Partners, September 2022

Where we see opportunities today

Energy sub-sectors have different drivers. Upstream producers are correlated with oil prices, refiners are more closely tied to the oil products markets, and services are tied more to the maintenance and building of new oil production and refining facilities, for example.

One positive development that cuts across the sector is related to capital discipline. For many years, energy companies were quick to ramp up capital spending and increase production to take advantage of energy price spikes, only to fall on hard times when prices fell. But especially during this decade, investors have instilled the importance of discipline on the sector, transforming it into a value sector that generates strong capital returns.

Today, the energy companies that are best positioned to generate substantial free cash flow when energy commodities trend higher are those that have shown restraint in capital spending, have developed healthy balance sheets, and are profitable even on conservative estimates of oil prices. Of course, active managers have the opportunity to be even more selective, choosing those that are showing other signs of business momentum like better efficiency in production or unlocking asset value via strong execution on high-return projects, for example.

At Boston Partners, we aim to find companies that generate controllable free cash flow, i.e. they are not dependent solely on energy prices for us to take advantage of a strong opportunity set in an environment of high volatility for the underlying commodity price.

The points of emphasis within the energy sub-sectors are likely to fluctuate over time. Refiners have gained sharply since the war began, on unusually wide crack spreads. But those gains have pushed valuations to levels that only hold up if mid-cycle margins are structurally higher moving forward. Companies levered to the price of oil have also done well, and stand to gain more if oil gets bid up by refiners increasing refining runs on spare capacity as the market works to compress crack spreads. Services companies, whose fortunes track new project activity, become interesting if producers eventually relax capital discipline and spend to capture persistently high prices.

At Boston Partners, we aim to find companies that generate controllable free cash flow, i.e., not dependent solely on energy prices...

Gold

Gold has been a story about shifting drivers of marginal demand. Historically, gold prices have been inversely correlated to real interest rates – higher real rates increase the opportunity cost of holding a non-interest-bearing asset like gold. That relationship broke down for a time beginning in 2022 after Russia's invasion of Ukraine. In response, Western democracies froze Russian sovereign assets, and global central banks became a marginal buyer of gold as they sought to diversify reserves.

The old correlation re-emerged in 2025, as expectations for rate cuts and concerns about Fed independence, fiscal deficits and inflation added fuel to the gold rally. For most of 2026, expectations of higher rates due to the Iran war and hopes that new Fed Chair Kevin Warsh would clamp down on inflation were headwinds to gold.

While there are strong arguments on both sides for where gold goes from here, many analysts are bullish on gold longer-term, at least at levels that would continue to allow miners to be profitable and continue to improve their businesses. There is likely some floor provided by the new structural demand from central banks and ongoing cycles of concern about inflation and fiscal spending.

Figure 3: Central bank purchases of gold

Source: Bloomberg, Metals Focus Data, Boston Partners, June 2026.

The opportunity set in gold miners

Gold miners have historically been a difficult investment, leading to the kind of market skepticism that often creates opportunities for value investors. Miners are highly capital-intensive businesses that need to spend persistently to maintain their existing production. Operating costs have historically inflated over time – labor,

energy, consumables and royalties trend higher alongside gold prices – and they tend to be sticky. So, miners historically have seen stark margin compression when gold prices come down.

In terms of valuation, the market continues to price many gold miners as perennial destroyers of capital. We regularly see companies trading at discounts to net asset value not only at prevailing gold prices near USD 4,500/troy ounce but also well below that level. And while the fundamentals of these businesses will likely always remain difficult due to the structural forces mentioned above, much higher gold prices have led the financial characteristics of the sector to improve in ways we can measure. For example, the sharp increases in gold prices have allowed miners to clean up their balance sheets, and cash is beginning to flow through to shareholders.

Similar to the opportunity set in energy, we look for miners that are disciplined from a capital allocation perspective and do not depend solely on peak-cycle prices – businesses that can grow production and free cash flow per share idiosyncratically. We also monitor business momentum to confirm the improvement is real and persistent; rising earnings revisions and improving returns separate improving businesses from ones that are simply cheap. We see opportunities in gold miners that exhibit these characteristics today.

...sharp increases in gold prices have allowed miners to clean up their balance sheets, and cash is beginning to flow through to shareholders.

Copper

While the oil story has been mostly about supply and the gold story mostly about demand, copper prices have risen sharply due to both. On the demand side, copper is a critical input in the electrification process, and therefore the AI build-out – not necessarily for the data centers themselves, but the electrification needed for supporting infrastructure. The sharp increases in global electric vehicle and solar panel production are also fueling demand.

Meanwhile, many analysts are predicting the copper market will move deeper into deficit as this higher demand meets difficult supply issues, including long lead times to build new mines, geopolitical and operational disruption, a lack of new copper discoveries, a decline in ore grades (the percentage of copper found in a rock that is mined and processed), and inventory distortions caused by tariffs.

The opportunity set in copper miners

Tight supply/demand conditions are presenting opportunities for copper miners to reinvest at a high level of return, supported largely by internally generated cash from operations. Resource scarcity within copper is high, while the assets themselves are structurally different than in gold; whereas gold mines may carry 10-15 years of reserves (forcing perpetual reinvestment), large copper deposits can operate for decades.

Naturally, these sorts of projects come with large amounts of operational risk, though once delivered, they can produce significant cash flows. Given operational risks, we monitor momentum to look to protect downside (structural issues within mining tend to be persistent), while looking for companies with a history of strong execution.

Figure 4: Cash flows for commodity-linked equities

Past performance is no guarantee of future results. The value of your investments may fluctuate.

Source: Bloomberg, Boston Partners, September 2026. Methodology: Take an average of Bloomberg historical data of free cash flows pre-2026, and an average of blended Bloomberg historical data and estimates for calendar year 2026. For gold, we took an average of seven large gold miners (Kinross Gold, Equinox Gold, Newmont Gold, AngloGold Ashanti, Royal Gold, Coeur Mining, and Aura Minerals).² For copper, we took an average of three large miners (Freeport-McMoran, Southern Copper, and Teck Resources). For energy, took an average of all constituents of the S&P 500 Energy Index.

Ultimately, we use the same framework when evaluating miners of both metals: we are looking for attractively valued businesses with improving fundamentals and positive momentum. In metals more broadly, we view the opportunity set as attractive and supported by macro/geopolitical factors, while from a bottom up basis, the miners are generating healthy cash flows with opportunities to either reinvest or return cash to shareholders.

² The companies/securities shown on this slide are for illustrative purposes only in order to demonstrate the investment strategy on the date stated. The companies/securities are not necessarily held by a strategy/fund nor is future inclusion guaranteed. No inference can be made on the future development of the company. This is not a buy, sell, or hold recommendation.

Important information – Capital at risk

Robeco Institutional Asset Management B.V. has a license as manager of Undertakings for Collective Investment in Transferable Securities (UCITS) and Alternative Investment Funds (AIFs) ("Fund(s)") from the Netherlands Authority for the Financial Markets. This document is considered for use solely by qualified investors and private professional clients (as defined in Article 26 (1) (b) and (d) of Consob Regulation No. 16190 dated 29 October 2007). If made available to Distributors and individuals authorized by Distributors to

conduct promotion and marketing activity, it may only be used for the purpose for which it was conceived. The data and information contained in this document may not be used for communications with Supervisory Authorities. This document does not include any information to determine, in concrete terms, the investment inclination and, therefore, this document cannot and should not be the basis for making any investment decisions.

Additional information for investors with residence or seat in Japan

This document is considered for use solely by qualified investors and is distributed by Robeco Japan Company Limited, registered in Japan as a Financial Instruments Business Operator, [registered No. the Director of Kanto Local Financial Bureau (Financial Instruments Business Operator), No.2780, Member of Japan Investment Advisors Association].

Additional information for investors with residence or seat in Liechtenstein

This document is exclusively distributed to Liechtenstein-based, duly licensed financial intermediaries (such as banks, discretionary portfolio managers, insurance companies, fund of funds) which do not intend to invest on their own account into Fund(s) displayed in the document. This material is distributed by Robeco Switzerland Ltd, postal address: Josefstrasse 218, 8005 Zurich, Switzerland. LGT Bank Ltd., Herrengasse 12, FL-9490 Vaduz, Liechtenstein acts as the representative and paying agent in Liechtenstein. The prospectus, the Key Information Documents (PRIIP), the articles of association, the annual and semi-annual reports of the Fund(s) may be obtained from the representative or via the website.

Additional information for investors with residence or seat in Malaysia

Generally, no offer or sale of the Shares is permitted in Malaysia unless where a Recognition Exemption or the Prospectus Exemption applies: NO ACTION HAS BEEN, OR WILL BE, TAKEN TO COMPLY WITH MALAYSIAN LAWS FOR MAKING AVAILABLE, OFFERING FOR SUBSCRIPTION OR PURCHASE, OR ISSUING ANY INVITATION TO SUBSCRIBE FOR OR PURCHASE OR SALE OF THE SHARES IN MALAYSIA OR TO PERSONS IN MALAYSIA AS THE SHARES ARE NOT INTENDED BY THE ISSUER TO BE MADE AVAILABLE, OR MADE THE SUBJECT OF ANY OFFER OR INVITATION TO SUBSCRIBE OR PURCHASE, IN MALAYSIA. NEITHER THIS DOCUMENT NOR ANY DOCUMENT OR OTHER MATERIAL IN CONNECTION WITH THE SHARES SHOULD BE DISTRIBUTED, CAUSED TO BE DISTRIBUTED OR CIRCULATED IN MALAYSIA. NO PERSON SHOULD MAKE AVAILABLE OR MAKE ANY INVITATION OR OFFER OR INVITATION TO SELL OR PURCHASE THE SHARES IN MALAYSIA UNLESS SUCH PERSON TAKES THE NECESSARY ACTION TO COMPLY WITH MALAYSIAN LAWS.

Additional information for investors with residence or seat in Mexico

The funds have not been and will not be registered with the National Registry of Securities or maintained by the Mexican National Banking and Securities Commission and, as a result, may not be offered or sold publicly in Mexico. Robeco and any underwriter or purchaser may offer and sell the funds in Mexico on a private placement basis to Institutional and Accredited Investors, pursuant to Article 8 of the Mexican Securities Market Law.

Additional information for investors with residence or seat in New Zealand

In New Zealand, this document is only available to wholesale investors within the meaning of clause 3(2) of Schedule 1 of the Financial Markets Conduct Act 2013 (FMCA). This document is not intended for public distribution in New Zealand.

Additional information for investors with residence or seat in Peru

The Superintendencia del Mercado de Valores (SMV) does not exercise any supervision over this Fund and therefore the management of it. The information the Fund provides to its investors and the other services it provides to them are the sole responsibility of the Administrator. This Prospectus is not for public distribution.

Additional information for investors with residence or seat in Singapore

This document has not been registered with the Monetary Authority of Singapore ("MAS"). Accordingly, this document may not be circulated or distributed directly or indirectly to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305, of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. The contents of this document have not been reviewed by the MAS. Any decision to participate in the Fund should be made only after reviewing the sections regarding investment considerations, conflicts of interest, risk factors and the relevant Singapore selling restrictions (as described in the section entitled "Important information for Singapore Investors") contained in the prospectus. Investors should consult their professional adviser if you are in doubt about the stringent restrictions applicable to the use of this document, regulatory status of the Fund, applicable regulatory protection, associated risks and suitability of the Fund to your objectives. Investors should note that only the Sub-Funds listed in the appendix to the section entitled "Important information for Singapore Investors" of the prospectus ("Sub-Funds") are available to Singapore investors. The Sub-Funds are notified as restricted foreign schemes under the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and invoke the exemptions from compliance with prospectus registration requirements pursuant to the exemptions under Section 304 and Section 305 of the SFA. The Sub-Funds are not authorized or recognized by the MAS and shares in the Sub-Funds are not allowed to be offered to the retail public in Singapore. The prospectus of the Fund is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. The Sub-Funds may only be promoted exclusively to persons who are sufficiently experienced and sophisticated to understand the risks involved in investing in such schemes, and who satisfy certain other criteria provided under Section 304, Section 305 or any other applicable provision of the SFA and the subsidiary legislation enacted thereunder. You should consider carefully whether the investment is suitable for you. Robeco Singapore Private Limited holds a capital markets services license for fund management issued by the MAS and is subject to certain clientele restrictions under such license.

Additional information for investors with residence or seat in Spain

It is provided for informational purposes only and does not constitute investment advice or an invitation to purchase any security or other investment. Subscriptions will only be received and shares issued on the basis of the current Prospectus, relevant Key Investor Information Document (KIID) and other supplementary information for the Fund. These can be obtained free of charge from Northern Trust Global Serviced Limited, 50 Bank Street, Canary Wharf, London E14 5NT or from our website www.robeco.com. This information is directed at Professional Clients only and is not intended for public use.

Additional information for investors with residence or seat in Uruguay

The sale of the Fund qualifies as a private placement pursuant to section 2 of Uruguayan law 18,627. The Fund must not be offered or sold to the public in Uruguay, except under circumstances which do not constitute a public offering or distribution under Uruguayan laws and regulations. The Fund is not and will not be registered with the Financial Services Superintendency of the Central Bank of Uruguay. The Fund corresponds to investment funds that are not investment funds regulated by Uruguayan law 16,774 dated 27 September 1996, as amended.
