Portfolio Smart ESG Score & Breakdown (1 of 3)

The Portfolio Smart ESG Score chart displays the portfolio's Total, Environmental, Social and Governance scores. These are calculated by multiplying each portfolio component's Smart ESG Score by its respective portfolio weight. If a benchmark has been selected, those scores are provided alongside the portfolio scores, highlighting the portfolio's relative sustainability.

The Total Score Distribution chart shows the portfolio components' scores broken into deciles, providing an indication of the proportion of ESG leaders versus ESG laggard companies in the portfolio. If a benchmark has been selected, the same information is shown for the benchmark.

Footprint Intensity

Footprint intensity expresses a portfolio's aggregate resource efficiency. Each company's footprint intensity is calculated by normalizing the company's resources consumed by its annual revenues. The portfolio's aggregate intensity figure is calculated by multiplying each portfolio component's intensity figure by its respective portfolio weight.

If a benchmark has been selected, its aggregate intensity is provided alongside the portfolio's intensity: additional alerts highlight relative environmental performance. Environmentally efficient companies have lower intensity values, thus an efficient portfolio should have an aggregate intensity below the benchmark's value.

"Not assessed" and "not mapped" positions are assumed to have the same footprint as the portfolio as a whole.

Coverage (1 of 2)

This section provides a transparent breakdown of the coverage upon which the ESG reports are based. Because different datasets underlie different reports, figures are provided per dataset (for portfolio and benchmark alike). The percentage shows the coverage based on portfolio weight, with the absolute number of positions covered in parentheses. For SDG, analyzed companies comply with our SDG Guidebook; estimations are approximately aligned.

Not mapped: the security identifier provided wasn't found and thus data could not be provided.

Not assessed: the mapping was successful however the security is not covered in the respective dataset.

Cash & other: if the weights in the portfolio don't sum to 100%, cash & other provides the third reason for lack of coverage.

Investment involves risks. Before investing, please note the initial capital is not guaranteed. Investors should ensure that they fully understand the risk associated with any Robeco product or service offered in their country of domicile ("Funds"). Investors should also consider their own investment objective and risk tolerance level. Historical returns are provided for illustrative purposes only. The price of units may go down as well as up and the past performance is not indicative of future performance. If the currency in which the past performance is displayed differs from the currency of the country in which you reside, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency. The performance data do not take account of the commissions and costs incurred on trading securities in client portfolios or on the issue and redemption of units. Unless otherwise stated, the prices used for the performance figures of the Luxembourg-based Funds are the end-of-month transaction prices net of fees up to 4 August 2010. From 4 August 2010, the transaction prices net of fees will be those of the first business day of the month. Return figures versus the benchmark show the investment management result before management and/or performance fees; the Fund returns are with dividends reinvested and based on net asset values with prices and exchange rates of the valuation moment of the benchmark. Please refer to the prospectus of the Funds for further details. Performance is quoted net of investment management fees. The ongoing charges mentioned in this document are the ones stated in the Fund's latest annual report at closing date of the last calendar year.
